JAMES M. HOLLY CHIEF OF STAFF

June 7, 2013

To the Citizens, Governor and Members of the South Carolina General Assembly

I am pleased to present to the citizens of South Carolina this Comprehensive Annual Financial Report for the State of South Carolina for the fiscal year ended June 30, 2012. The report provides financial information about the State's operations during the year and describes its financial position at the end of the year. Its presentation is designed for conformity with the Governmental Accounting Officers Association's Certificate of Achievement for Excellence in Financial Reporting Program from which the June 30, 2011 report received the Award of Excellence.

Management assumes full responsibility for the completeness and reliability of the information contained in this report, based upon a comprehensive framework of internal controls that was established for this purpose. Because the cost of internal controls should not exceed the anticipated benefits, the objective is to provide reasonable, rather than absolute, assurance that the financial statements are free of any material misstatements.

The State Auditor and CliftonLarsonAllen LLP, an independent certified public accounting firm, jointly performed an independent audit of the State's basic financial statements for the fiscal year ended June 30, 2012. The auditors have issued an unqualified opinion, the most favorable outcome of the audit process.

This letter of transmittal is designed to complement management's discussion and analysis that immediately follows the report of the independent auditors.

PROFILE OF THE GOVERNMENT

South Carolina extends from the Atlantic Ocean westward to the Blue Ridge Mountains, containing over 30,000 square miles. Fortieth in geographic area among the fifty states, South Carolina ranks twenty-fourth in population with approximately 4.6 million citizens. The State's rate of population growth is presently the fourteenth fastest in the nation.

As shown in the organizational chart on page 15, State government is divided into three separate branches: legislative, executive, and judicial. The State's citizens elect the legislative and executive branch officials. The General Assembly elects certain members of the judicial branch, including the Supreme Court. The principal State officials currently in office are listed on page 14.

State government provides a full range of services to South Carolina's citizens including educational, health, social/human, transportation, public safety, regulatory, and conservation/natural resources services. In addition, the State provides funds, grants, and loans to assist local governments, including school districts.

Certain legally separate entities are included in these financial statements because they function, in essence, as part of State government. The Governor appoints the governing boards for the Public Service Authority, a public utility company, and the State Ports Authority. The Connector 2000 Association, Inc. contracts with the State's Department of Transportation to operate a toll road project. The Lottery Commission

transfers its net proceeds to the State for educational programs. Other entities benefit and support institutions of higher education, provide medical malpractice insurance, and address medical and educational needs of South Carolina's children. Additional information on these legally separate entities can be found in the notes to the financial statements.

South Carolina's annual Appropriations Act includes legally adopted budgets for the Budgetary General Fund and for Total Funds. The initial budget appears in the annual Appropriations Act. After the budget year begins, the State Budget and Control Board, comprised of five key executive and legislative officials, may order spending cuts if revenue collections fail to reach predicted levels. Departments and agencies may request transfers of appropriations among programs if the transfer request does not exceed 20% of the program budget. The Budget and Control Board has the authority to approve additional transfers of appropriations between personal service and other operating expense accounts. For additional information, see the notes to the required supplementary information - budgetary.

STATE ECONOMY

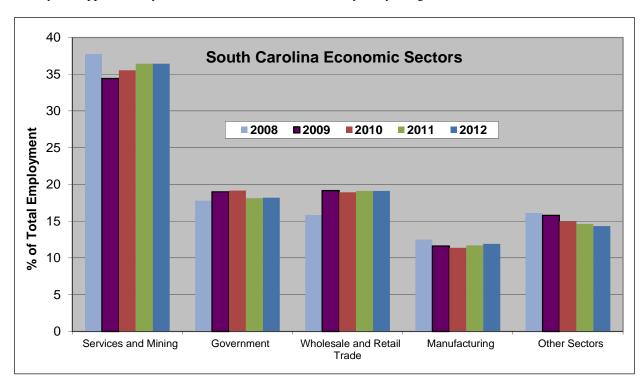

South Carolina has a diverse economic base, including manufacturing, trade, healthcare, services, and leisure/hospitality. Businesses have migrated here from all over the world to take advantage of the State's skilled labor force, competitive wages, lower-priced land, excellent port facilities and accessibility to markets, and, in recent years, substantial tax incentives.

Businesses continue to choose South Carolina as a place to locate or expand, and the State of South Carolina is committed to working with employers to meet their workforce needs.

In the last year, total non-farm employment saw an overall increase of 22,800 jobs. The strong Manufacturing sector grew 7,400 from June 2011 to June 2012, and Professional and Business Services also reported a large gain over the year (+7,200), with the Employment Services subsector adding 6,700 of that increase. In addition, large over-the-year gains were posted in Trade, Transportation, and Utilities (+5,800) and Education and Health Services (+3,400), mostly in Healthcare and Social Assistance. In the last year, both Construction and Financial Activities employment has dropped 1,200.

South Carolina's seasonally adjusted unemployment rate decreased to 9.4% in June 2012, well below the June 2011 rate of 10.5%. Nationally, the unemployment rate for June 2012 was 8.2%.

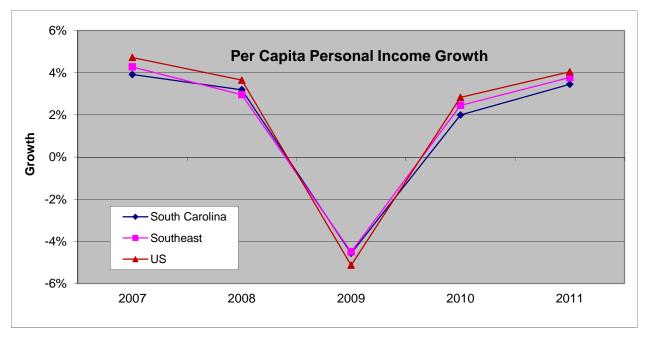

The weekly average number of initial claimants for Unemployment Insurance (UI) in South Carolina rose nearly 11.0% in June 2012, the third consecutive month of increased activity. June's initial UI claimant activity was approximately 9.0% lower than UI claimant activity one year ago.

Although the June 2012 building permit activity was higher than June 2010 and 2009, the month-to-month decline drove the South Carolina Leading Index, SCLI, down 0.13 points to 100.52 in June. June also saw an 11.0% increase in initial claims for Unemployment Insurance compared to the previous month, which also pushed the SCLI lower. Positive indicators for June include an increase in the average manufacturing workweek, up 0.5% to 41.8 hours, and improvements in the stock market. Because the SCLI is still above the 100 mark, June marks seven consecutive months of positive economic outlook for the state's economy. Meanwhile, the Conference Board's national Leading Economic Index declined 0.3% and is below the 100 mark at 95.6.

The number of homes sold in the state was up nearly 12.0% in June compared to one year ago. Likewise, the median sales price of South Carolina homes was up nearly 2.0% from this time last year.

The median South Carolina home sales price in June was \$158,000, 1.9% higher than this time last year. The year-over-year comparison of the number of homes sold is also up, with 11.6% more homes sold in June 2012 compared to June 2011. Foreclosure activity was up through June with 29.3% more foreclosure filings compared to a year ago.

LONG-TERM FINANCIAL PLANNING

State law requires agencies receiving 1.0% or more of the total annual General Fund appropriations to provide an estimate of their General Fund expenditures for the next three fiscal years. The State Budget Office combines these expenditure estimates with long-term revenue estimates made by the State's Board of Economic Advisors (BEA) to create a three-year financial plan. The three-year financial plan assists the State in strategically assessing its future financial commitments. The plan is updated annually and provided to the State's Budget and Control Board, the Speaker of the House of Representatives, and the President Pro Tempore of the Senate during the second quarter of each fiscal year.

Principal financial challenges facing state government include anticipated future spending increases for Medicaid, State retirement and health benefits (including post employment benefits), and elementary and secondary education.

The State's long-term financial management practices include a five—year capital improvement plan that requires funding to be in place before beginning construction on any capital improvement projects.

RELEVANT FINANCIAL POLICIES

The State's legislature is required to adopt a balanced budget annually based on revenue projections provided by the BEA. State law requires the BEA to meet at least quarterly to review how actual revenue collections compare with its earlier projections and to adjust its projections if necessary. If the BEA reduces revenue projections significantly once the budget year begins, the State's Budget and Control Board (Board) is responsible for taking appropriate action to keep the State's budget in balance. If the Board anticipates a year-end operating deficit as a result of the BEA reducing its revenue projections, it must reduce most agency appropriations evenly across-the-board. The State also is required to maintain a 3.5% General Reserve Fund that can be used only for eliminating a year-end operating deficit. If the State's budgetary General Fund subsequently experiences a year-end operating deficit even after applying all the actions described above, the Board is required to meet within sixty days of August 31 to adopt a plan to eliminate the deficit and restore a balanced budget. Beginning with the fiscal year ending June 30, 2012, the amount required to be held in the General Reserve Fund will gradually increase 0.5% every year until the fund reaches 5%. The State is also required to fund a 2% Capital Reserve Fund that can be used only for capital appropriations. The foregoing percentages are multiplied against the General Fund revenue for the latest completed fiscal year.

Legislation also exists directing that in closing the books each year the Comptroller General shall suspend, to the extent necessary, any budgetary surplus appropriations in a general or supplemental act or Capital Reserve Fund appropriations if the State's Generally Accepted Accounting Principles-basis General Fund reports a negative unrestricted, unassigned fund balance.

The State ended the fiscal year with a positive General Fund balance of \$956.356 million (*adjusted for fiscal year 2011-12 post-closing budgetary activity*) comprised of the unassigned surplus of \$379.538 million, legislatively approved agency carryover appropriations of \$166.180 million, the Contingency Reserve of \$122.334 million, the Capital Reserve of \$104.838 million, and the General Reserve Fund of \$183.466 million. The \$379.538 million surplus was subsequently reduced to zero to support the supplemental appropriations authorized for fiscal year 2012-13 in accordance with Proviso 90.20.

MAJOR INITIATIVES

State Retirement Systems

This year the General Assembly approved comprehensive retirement systems revisions as a means of securing long term financial health for South Carolina's employee pension plans. The legislation makes revisions to the South Carolina Retirement System (SCRS), which serves public school teachers and most state government employees, and the Police Officers Retirement System (PORS) by establishing eligibility criteria that require new employees to work longer in order to retire with full benefits. Existing employees retain their eligibility criteria for full retirement. The legislation increases the employee contribution rate by one percent for both SCRS and PORS, corresponding to a one percent increase in the employer contribution rate recently approved by the Budget and Control Board. The legislation eliminates the current provisions for awarding cost of living adjustments (COLAs) to SCRS retirees that tie COLAs to inflation and instead establishes benefit adjustment provisions that award SCRS and PORS retirees a guaranteed 1% annual increase in benefits up to a cap of \$500. The legislation phases out the Teacher and Employee Retention Incentive (TERI) Program so that it is eliminated by July 1, 2018. New restrictions are placed on those who retire under SCRS or PORS and return to work in state government or in another position covered by the pension plans. Beginning in 2013, such employees would be subject to a yearly earning limitation of ten thousand dollars. Once this cap is exceeded, retirement allowances would be discontinued for the remainder of the year. Anti-spiking measures are applied to new employees to prevent eleventh hour raises and other steps taken at the end of service from distorting pension benefits. The legislation creates the Public Employee Benefit Authority to assume responsibility for the day-to-day administration and operation of the state's pension systems, the Employee Insurance Programs, and the Deferred Compensation Programs. PEBA is to be governed by an eleven-member board of directors composed of gubernatorial and legislative appointees, four of which are representative members participating in the pension systems as either active state employees or retirees and seven of which are unaffiliated with the retirement systems and must have expertise in such areas as accounting and financial management of pension or insurance plans. The legislation also revises the General Assembly Retirement System by increasing the employee contribution rate by one percent and closing the system to newly-elected legislators beginning in 2012.

State Inspector General

The General Assembly approved legislation creating the office of the State Inspector General to address allegations of fraud, waste, abuse, mismanagement, misconduct, violations of law and wrongdoing in state agencies. The office is authorized to investigate any authority, board, branch, commission, committee, department, division, or other instrumentality of the executive branch of state government. The State Inspector General is appointed by the Governor with the advice and consent of the Senate for a term of four years.

The State Budget

Lawmakers approved a \$6.700 billion state government budget for fiscal year 2012-2013. The budget provides small business tax relief by initiating a gradual reduction of the tax rate for income derived from pass-through trade and business arrangements, such as sole proprietorships, partnerships, and "S" corporations. The first of three \$20 million installments is included in order to reduce this income tax rate from 5% to 3% over the course of three years. Also, \$77 million is devoted towards paying off the unemployment insurance loan that the state had to obtain from the federal government when South Carolina's jobless benefit fund became insolvent. This State Unemployment Tax Authority (SUTA) debt funding is provided to reduce the unemployment insurance taxes that all the state's businesses pay for their employees, amounting to an average savings of 12.3% or \$51.11 for each worker. The Harbor Deepening Reserve Fund is created within the State Ports Authority and \$300 million is provided to cover the full cost of deepening the Charleston Harbor so that South Carolina can remain competitive in maritime shipping with a port capable of accommodating the larger vessels that will pass through the newly-expanded Panama Canal.

An additional \$30 million is included for the state's counties and municipalities through the Local Government Fund. An additional \$152 million in Education Finance Act funding is included for K-12 education, allowing for an increase in the Base Student Cost to \$2,012 per student. An additional \$48 million is included in the Education Improvement Act salary supplement to guarantee a 2% state-funded pay raise for all teachers. Full funding is provided for the LIFE, HOPE, and Palmetto Fellows higher education scholarship programs. Over \$19 million is devoted to worker training through the Ready SC Program at the state's technical colleges. An additional \$15 million is provided for the Deal Closing Fund that the Department of Commerce uses to recruit new business to the state. The budget legislation also provides that this economic development fund is to receive \$10 million from South Carolina's share of the multi-state mortgage settlement reached with the nation's major lending institutions.

The budget provides for the full funding of the General Reserve Fund and the Capital Reserve Fund, the financial reserve accounts that the state draws upon to cope with budget shortfalls. \$549 million goes to the state's residential property tax relief fund. Funding is provided for additional Circuit Court and Family Court judges to cope with increased caseloads.

Full funding is provided for the Medicaid program's Maintenance of Effort which allows the program to continue to offer services at the current level. Full funding is provided for Medicaid express lane eligibility for children to allow the state's health insurance program for low-income residents to accommodate the inclusion of around 70,000 children who already qualify for participation in the program, but had not yet been enrolled. The Department of Health and Environmental Control is provided \$1 million for the AIDS Drug Assistance Program, \$1 million for child immunizations, \$1.8 million for community health centers, an additional \$800,000 for local health departments, and \$500,000 for the Rural Physician Program. Funding is increased by \$8 million for the destination-specific tourism advertising program at the Department of Parks, Recreation, and Tourism. The Department of Agriculture received \$2 million for the marketing and branding of South Carolina produce.

Election Process

The General Assembly approved a joint resolution that proposes to amend the South Carolina Constitution to provide for the joint election of the Governor and Lieutenant Governor beginning with the general election of 2018. Under the revised system, a gubernatorial candidate would select a running mate for the post of Lieutenant Governor in a manner comparable to the selection of the President and Vice President at the federal level. The legislation eliminates the Lieutenant Governor's legislative duties. Under this legislation, the Senate would every four years elect a President from among its members to preside over the Senate and perform other duties as provided by law. The legislation revises how vacancies in the office of Lieutenant Governor are filled. Under this legislation, the Governor would appoint, with the advice and

consent of the Senate, a successor to fulfill an unexpired term. The proposed amendments to the South Carolina Constitution will be submitted to the state's voters at the next general election.

AWARDS AND ACKNOWLEDGMENTS

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the State of South Carolina for its Comprehensive Annual Financial Report (CAFR) for the fiscal year ended June 30, 2011. This was the twenty-fourth consecutive year that the State of South Carolina achieved this recognition. In order to be awarded a Certificate of Achievement, a government must publish a timely, easily readable, and efficiently organized CAFR. The CAFR must comply with both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current CAFR continues to meet the Certificate of Achievement Program's requirements, and we are submitting it to the GFOA to determine its eligibility for another certificate.

Production of the CAFR was made possible only by the support of all State agencies and component units that supplied financial data to our office on a timely basis. We extend special appreciation to the University of South Carolina for providing the attractive cover for this year's CAFR.

Sincerely,

Richard Eckstrom, CPA Comptroller General

CERTIFICATE OF ACHIEVEMENT FOR EXCELLENCE IN FINANCIAL REPORTING

Certificate of Achievement for Excellence in Financial Reporting

Presented to

State of South Carolina

For its Comprehensive Annual Financial Report for the Fiscal Year Ended June 30, 2011

A Certificate of Achievement for Excellence in Financial Reporting is presented by the Government Finance Officers Association of the United States and Canada to government units and public employee retirement systems whose comprehensive annual financial reports (CAFRs) achieve the highest standards in government accounting and financial reporting.

Independent Auditors' Report

The Honorable Nikki R. Haley, Governor and Members of the General Assembly State of South Carolina Columbia, South Carolina

We have jointly audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of South Carolina (the State), as of and for the year ended June 30, 2012, which collectively comprise the State's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the State's management. Our responsibility is to express opinions on these financial statements based on our audit. We did not jointly audit the financial statements of certain agencies and component units of the State of South Carolina, which represent the indicated percent of total assets and total revenues as presented in the table below. Those financial statements were audited by other auditors, including CliftonLarsonAllen LLP acting separately, whose reports thereon have been furnished to us, and our opinion, insofar as it relates to the amounts included for those agencies and component units, is based solely on the reports of the other auditors.

	CliftonLars	e Audited by sonAllen LLP arately	Percentage Audited by Other Auditors				
	Total	Total	Total	Total			
Government-wide	Assets	Revenue	Assets	Revenue			
Governmental activities	-	-	66	19			
Business-type activities	-	-	98	100			
Component units	-	-	100	100			
Fund Statements							
Governmental Funds	-	-	19	10			
Enterprise Funds	-	-	98	100			
Internal Service Funds	-	-	89	94			
Fiduciary Funds	82	21	17	79			

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to the financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The financial statements of the discretely presented component units identified in Note 1(a) were not audited in accordance with *Government Auditing Standards*, issued by the Comptroller General of the United States. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements.

An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit and the reports of other auditors provide a reasonable basis for our opinions.

State of South Carolina June 7, 2013 Page 2

In our opinion, based on our audit and the reports of other auditors, the financial statements referred to in paragraph one present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of South Carolina as of June 30, 2012, and the respective changes in financial position and cash flows, where applicable, thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

In accordance with Government Auditing Standards, we have also issued our report dated June 7, 2013 on our consideration of the State's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with Government Auditing Standards and should be considered in assessing the results of our audit.

Accounting principles generally accepted in the United States of America require that the management discussion and analysis on pages 21 through 31 and the budgetary comparison information on pages 148 through 153 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in appropriate operational, economic, or historical context. We and the other auditors have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements and other knowledge we and the other auditors obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State's basic financial statements. The introductory section, supplementary information to the financial statements and the statistical section as listed in the accompanying table of contents are presented for purposes of additional analysis and are not a required part of the basic financial statements. supplementary information to the financial statements is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the financial statements. The supplementary information to the financial statements has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the financial statements or to the financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America by us and the other auditors. In our opinion, the supplementary information to the financial statements is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole. The introductory section and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on them.

Columbia, South Carolina

Baltimore, Maryland June 7, 2013 June 7, 2013

MANAGEMENT'S DISCUSSION AND ANALYSIS—

Required Supplementary Information (Unaudited)

Management's Discussion and Analysis

In this section of the State of South Carolina's annual report, we provide a narrative overview and analysis of the State's financial performance for its accounting year (*fiscal year*) that ended June 30, 2012. Please read it in conjunction with the Comptroller's *Letter of Transmittal* at the front of this report and the financial statements that follow this section.

Overview of the Financial Statements

This discussion and analysis provides an introduction to the State of South Carolina's basic financial statements, which include the following parts: (1) government-wide financial statements, (2) fund financial statements, (3) component unit financial statements, and (4) notes to the financial statements. This annual report also contains certain required supplementary information and other supplementary information to aid in understanding the operations of the State.

Government-wide Financial Statements

The government-wide statements present a long-term view of the State's finances *as a whole*, using *accrual-basis accounting*—the same accounting basis that most businesses use. The basic government-wide financial statements are presented on pages 34 through 39 of this report.

There are two government-wide financial statements:

<u>Statement of net assets</u>: This statement presents information on *all* of the State's assets and liabilities, both short-term (*current*) and long-term (*non-current*). In addition, the statement reports the difference between assets and liabilities as *net assets*. Over time, the comparison of net assets to liabilities may indicate whether the State's financial health is strengthening or weakening. However, the statement of net assets does not tell the whole story. To assess the State's overall financial health, other factors need to be considered such as the State's economy and the condition of its *capital assets* such as its buildings and infrastructure (roads and bridges).

<u>Statement of activities</u>: This statement presents information showing how the State's overall net assets changed during the year. The State reports a change in its net assets as soon as an underlying event occurs that causes a change. The statement of activities accounts for all current-year revenues and expenses, regardless of when the State received or paid cash. Although governments compile the statement of activities using accounting methods similar to businesses, the format of this statement is quite different from the format of a business's profit and loss statement. The statement of activities helps to show how much it costs for the State to provide various services. It also indicates the extent to which each government function covers its own costs through user fees, charges, or grants. The *net revenues (expenses)* column on the far right of this statement on page 38 shows how much a particular function relies on taxes and other general revenues as opposed to program revenues to support its programs.

The government-wide statements present three different kinds of *activities*:

<u>Governmental activities</u>: Most of the State's basic services are included here, such as general government, education, health and environment, social services, administration of justice, and transportation. Taxes (primarily income and sales taxes) and federal grants provide resources to support most of these services.

<u>Business-type activities</u>: These activities usually recover all, or a significant portion, of the costs of their services or goods by charging fees to customers. Higher education (State-supported colleges and universities), unemployment compensation benefits, and financing of housing facilities are the most significant of South Carolina's business-type activities.

<u>Component units</u>: Although component units are legally separate from the State, the State's elected officials are financially accountable for them. The Public Service Authority (Santee-Cooper, an electric utility company), the State Ports Authority, the Connector 2000 Association, Inc. (which operates the Southern Connector, a toll road), and the Lottery Commission are the State's major component units. Some financial information for these component units is included in this report. Complete financial statements for these component units can also be obtained from their respective administrative offices (see Note 1a of the notes to the financial statements on page 74).

Fund Financial Statements

The fund financial statements on pages 40 through 63 of this report provide detailed information about the State's most significant funds—not the State as a whole. Funds are accounting designations that the State uses to track specific funding sources and spending for particular purposes. South Carolina, like other governments, uses fund accounting to ensure and demonstrate compliance with financial related legal requirements.

The State reports three types of funds:

<u>Governmental funds</u>: The State reports most of its basic services in governmental funds. Governmental funds account for activities that the State reports as *governmental activities* in its government-wide statements. These funds focus on *short-term* inflows and outflows of expendable resources. The balances remaining at the end of the year help determine whether a fund has more or less financial resources available to spend in the near future. Because the governmental fund statements lack the additional long-term focus of the government-wide statements, a reconciliation that explains the relationship (or differences) between the two kinds of statements is provided. By comparing the two kinds of statements and examining the reconciliation, a better understanding of the long-term impact of the State's near-term funding decisions is available.

The basic governmental fund statements are on pages 40 through 47 of this report.

<u>Proprietary funds</u>: Proprietary funds charge customers for the services they provide—whether they are provided to outside customers (<u>enterprise funds</u>) or other State agencies and other governments (<u>internal service funds</u>). Proprietary funds use the <u>accrual basis of accounting</u> like businesses use. The State reports all of its enterprise funds as <u>business-type activities</u> in the government-wide statements. However, because the internal service fund operations primarily benefit other State agencies or other governments, these proprietary funds are included as <u>governmental activities</u> in the government-wide financial statements.

The basic proprietary fund statements are on pages 48 through 61 of this report.

<u>Fiduciary funds</u>: The State is the trustee, or <u>fiduciary</u>, for its employees' retirement and other post-employment benefit plans. The State also is responsible for other assets that, because of a trust agreement, it is to use only for trust beneficiaries such as an investment pool operated on behalf of local governments. These activities are <u>excluded</u> from the State's government-wide financial statements because the State is not to use these assets to benefit its operations. The State has an obligation to ensure that the net assets it reports in fiduciary funds are used for the intended purposes.

The basic fiduciary fund statements are on pages 62 and 63 of this report.

Component Unit Financial Statements

The *Government-wide Financial Statements* section on the preceding page identifies the State's major component units under the *Component units* subheading. More detailed financial statements which include these component units are on pages 64 through 67 of this report.

Notes to the Financial Statements

Immediately following the financial statements are *notes* that provide additional and pertinent information to the financial statement amounts. The notes on pages 68 through 145 are necessary to fully understand the financial statements.

Required Supplementary Information

This section addresses budgetary matters and provides certain *required* reporting information that supplements the basic financial statements. Included in this section is a schedule that compares the State's legally adopted General Fund budget with actual revenues collected and expenditures paid for the year. Note 5 on page 153 to the required supplementary information is a reconciliation that provides and explains differences between the changes in fund balance of certain funds when presented on the budgetary-basis and the changes in fund balance of these funds when presented on the GAAP-basis as reported in the governmental fund statements. This required supplementary information is on pages 147 through 153 of this report.

Government-wide Financial Analysis

Exhibits 1 and 2 summarize the State's overall financial position and results of operations for the past two years based on information included in the government-wide financial statements.

Net Assets

As we noted earlier, the comparison of net assets to liabilities may serve, over time, as a useful indicator of the State's financial strength. At the end of the 2011-2012 accounting year, the State's net assets totaled \$21.326 billion.

The largest portion of the State's net assets reflects its *investment in capital assets* (for example, buildings, roads, and bridges), less any related debt used to acquire those assets that is still outstanding. The State uses these capital assets to provide services to citizens; consequently, they are *not* available for future spending. Further, the State cannot sell the capital assets themselves to repay the related debt because it needs the assets for its operations; so it must find other resources to repay the debt.

Restricted net assets generally are available for future spending but are subject to external restrictions, such as bond covenants, federal government grant restrictions, or restrictions imposed by enabling State legislation or through State constitutional provisions. The State's largest restricted balances include capital improvement bond proceeds (restricted for various capital projects) and loan program funds (restricted primarily for local government water and sewer projects).

Unrestricted net assets—resources available for future spending without restrictions—reported a balance of \$2.735 billion at June 30, 2012. This represents an increase of \$1.269 billion over the prior year. Some of this increase resulted from a \$988.214 million increase in the unrestricted net assets reported for the State's *governmental activities*.

The State's *business-type activities* reported a \$974.730 million unrestricted net asset balance. This resulted from net positive balances of \$1.554 billion associated with higher education and certain other business-type activities. However, that positive balance was partially offset by a \$427.341 million accumulated deficit in the State-run unemployment compensation fund, a \$98.810 million accumulated deficit in the State-run medical malpractice insurance program, and a \$34.318 million accumulated deficit in the State-run college tuition prepayment program.

^a The higher education institution support activity represents certain associations, foundations, and authorities created for the benefit of the State's higher education institutions.

Changes in Net Assets

The State's total net assets increased \$1.568 billion or 7.9% over the prior year's net assets as a result of its governmental activities and its business-type activities. The overall improvement in the financial position of the State was experienced through an increase in current and other assets and a decrease in long-term debt. The State has taken advantage of lower interest rates to reduce long-term debt through refunding and early retirement. The use of refunding transactions has allowed a better position in the current and other assets as of June 30, 2012.

Governmental Activities

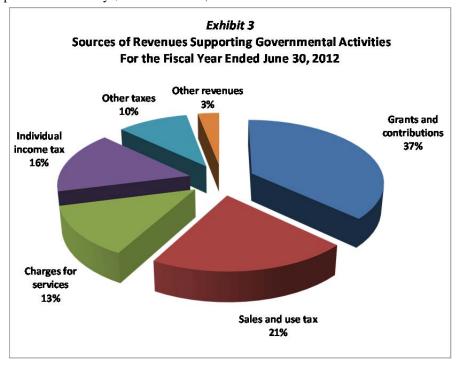

Net assets of the State's governmental activities increased by \$1.158 billion or 7.7%. Revenue decreased from last year by \$120.248 million or .6%, which is an increase of \$439.938 million or 4.6% in general revenue and a decrease of \$560.186 million or 5.0% in program revenue. Revenues that support governmental activities are derived mostly from taxes; grants and contributions, including federal aid; and charges for goods and services. *Exhibit 3* illustrates the comparative sources of revenues that support governmental activities.

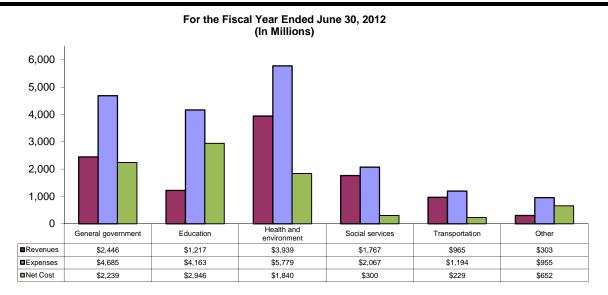

b 2012 restatement due to correction of an error. See Note 2, Accounting and Reporting Changes, on page 81 of the financial statements.

Expenses associated with governmental activities decreased by \$370 million or 1.9% for the fiscal year ended June 30, 2012. These expenses were mostly associated with services provided for health and environment, education, general government, transportation, and social services. *Exhibit 4* compares the cost of these services with their *program revenues*—revenues derived directly from the program itself or from parties outside the State's taxpayers or citizenry. The difference between the two represents the *net cost* of these services that taxes and other general revenues financed. For the fiscal year ended June 30, 2012, the State used \$8.206 billion in tax and other general revenues to offset the net cost of all services that the State's governmental activities provided. Governmental activities reported \$640.774 million in net transfers to the State's business-type activities, most of which represents support provided to the State's public colleges and universities.

The following paragraphs highlight the most significant changes in revenues and expenses for governmental activities during the 2011-2012 fiscal year:

- Program revenues were \$10.637 billion, a decrease of \$560.186 million, or 5.0%. The decrease was primarily due to reductions in the amount available for public health programs through Federal Stimulus program funds.
- Individual income tax revenues increased \$221.357 million or 7.7%, retail sales and use tax revenues increased by \$178.792 million or 4.50%, and other taxes revenues increased by \$165.088 million or 9.0%. Tax collections increased during fiscal year 2011-2012 due to increased enforcement and improvements in the state and national economies.
- General government expenses increased \$222.596 million or 5.0%, which is attributable to improvements in the state's economy, availability of budgetary appropriations, and increased demand for government services.
- Education expenses increased \$158.610 million or 4.0% from last year. The increase is primarily the result of general increases in the costs of providing public education. Secondarily, additional appropriations were available from improved economic conditions.
- Health and environmental expenses decreased \$805.604 million or 12.2% resulting from a decline is Federal Stimulus program funds.
- Social Services expenses increased by \$166.897 million, or 8.8% due to an increase in demand for services.

Business-type Activities

Net assets of the State's business-type activities increased \$409.979 million or 8.6%.

Most business-type activities are self-supporting. Tuition and student fees, research and other grants (both private and governmental), and other charges primarily pay for the services that the Higher Education Fund provides. However, the Higher Education Fund receives substantial resources (primarily transfers of annual appropriations) from the State's governmental activities. The \$640.774 million reported as net transfers in Exhibit 2 consists primarily of the appropriations and other transfers to the Higher Education Fund, which totaled \$582.723 million for the year ended June 30, 2012, and represent the cost of educational services supported with taxes and other general revenues of governmental activities.

Expenses for the payment of unemployment compensation benefits decreased \$1.105 billion during the 2011-2012 fiscal year. This decrease resulted from declining unemployment rates in the state.

Financial Analysis of the State's Funds

The State of South Carolina uses fund accounting to ensure and demonstrate compliance with financial related legal requirements. Within the fund financial statements, the focus is on reporting major funds.

Governmental Funds

Exhibit 5 shows the components of fund balance for the State's various governmental funds as of June 30, 2012.

Exhibit 5
Governmental Fund Balances
As of June 30, 2012
(Eypressed in Thousands)

	General Fund	Departmental Program Services		Local Government Infrastructure		Department of Fransportation pecial Revenue	State Tobacco Settlement		Nonmajor Governmental Funds		Go	Total vernmental Funds

Totals	\$ 1,894,049	\$ 208,790	\$	1,951,081	\$	(130,553)	\$	21,791	\$	716,667	\$	4,661,825
Change from prior year	\$ 350,368	\$ 23,996	\$	34,278	\$	130,227	\$	1,718	\$	236,223	\$	776,810
Percentage change	 22.7%	 13.0%		1.8%		(49.9%)		8.6%		49.2%		20.0%

At June 30, 2012, total ending fund balance for the State's governmental funds was \$4.662 billion, which represents an increase of \$776.810 million or 20.0% from the prior year. Included in this total is a deficit in *unrestricted*, *unassigned* fund balance of \$635.940 million. The General Fund reports \$944.742 million as unrestricted, unassigned and available with no constraints for spending in the coming year. Approximately 50.0% of the total fund balance for governmental funds are *restricted* by external parties or enabling legislation which includes creation through state law or constitutional provision.

The majority of the remaining fund balance is *non-spendable*, *committed*, *or assigned* and is *not* available for future appropriation because it is not in a spendable form or is accessible only for specific purposes.

The General Fund is the State's operating fund. This fund includes resources, such as taxes, that pay for the services that the State traditionally has provided to its citizens. Activity is accounted for in the General Fund unless constraints established by State law or external parties require them to be accounted for in another fund. Increases in the current fiscal year were experienced in individual income taxes of \$215.205 million, 7.5%, sales and use taxes of \$146.711 million, 4.4%, and other taxes of \$31.313 million, 2.7%, from prior year. The increase in expenditures of \$474.284 million, 6.0%, is below the increase in revenue indicating a continued controlling of costs and spending reductions previously mandated by State officials.

The *Departmental Program Services* is a major special revenue fund in which agencies account for primarily restricted resources used to fund program services. These resources provide a supplement for the payment of the services that the State traditionally has provided to its citizens thus expanding services when possible. During the 2011-2012 fiscal year, the total fund balance increased by \$23.996 million or 13.0% from the prior year. The primary source of revenue for the fund is Federal which accounts for \$6.681 billion or 90.2% of the total revenue reported.

The Department of Transportation (DOT) Special Revenue Fund accounts for various gasoline taxes, fees, fines, and federal grant resources. The DOT uses these resources to pay for its general operations, which include maintenance, regulation, and construction of public highways and bridges. The fund balance increased \$130.225 million or 49.9% during 2011-2012 leaving a deficit fund balance of \$130.555 million at the end of the fiscal year. The increase in fund balance was caused by improvement in tax collections and an increase in funding from the Federal government.

Proprietary Funds

Exhibit 6 shows the components of net assets for the State's various proprietary funds at June 30, 2012.

The State has two kinds of proprietary funds: enterprise funds and internal service funds.

Enterprise funds are reported as business-type activities in the government-wide financial statements. Enterprise funds sell goods or services primarily to parties outside of State government.

The net assets of the Unemployment Compensation Benefits Fund, a major enterprise fund, increased by \$155.618 million or 26.7% over the prior year. As discussed in Note 22g on page 144, due to the increasing unemployment rate and resulting increased amount of unemployment benefits the Fund paid out, along with the increased length of time over which the benefits are paid out, the Fund was required to obtain advances from the Federal Unemployment Fund, the balance of which is \$782.188 million at June 30, 2012. Increased tax collections, coupled with decreases in the number of individuals eligible for and claiming State unemployment insurance benefits and changes in the relevant state laws have resulted in the improved net asset position and enabled the Fund to operate without obtaining additional advances from the Federal government since April of 2011. Additional information on the advances and plans for repayment are included in Note 12i.

The net assets of the State's *nonmajor enterprise funds* increased by \$20.776 million or 7.8%. This increase was due in part to positive operating results for the *Patients' Compensation Fund*, increased charges for services coupled with controlled costs in the *University of South Carolina Trust*, and increased charges for services for *University Medical Associates*.

South Carolina's *internal service funds* provide certain services (including maintenance, insurance, printing, information technology, and motor pool services) and some goods (such as office supplies) primarily to other State funds but sometimes to local governments as well. The decrease in net assets of \$12.443 million or 2.5% over the prior year resulted from increases in claims expense in Insurance Reserve Fund and Employee Insurance Programs and a decrease in charges for services in the State Accident Fund. The objective of an internal service fund is to charge its customers for the costs of the services or goods that it provides. Because internal service funds primarily benefit State government, South Carolina reports them as governmental activities in the government-wide financial statements.

Budgetary General Fund Highlights

Original estimated revenues for the 2011–2012 accounting year were \$5.476 billion. Because of continual review of tax revenue collections and improvements in economic conditions, the Board of Economic Advisors (BEA) revised the revenue estimate during the course of the year to a total of \$5.886 billion. Actual revenues at June 30, 2012, were \$28.541 million or 0.5% under the BEA's adjusted revenue estimate which also represented an increase in collections over the prior year of \$224.969 million or 4.0%. Individual income and sales tax collections, the fund's primary revenue sources, ended the year under the adjusted estimate by \$36.368 million and \$13.307 million, respectively.

Actual expenditures were \$341.297 million less than actual revenues because economic conditions improved during the year allowing revenue estimations to be increased after the passing of the balanced budget. In addition, \$5.812 million of unbudgeted spending was allowed through "open-ended" appropriations.

Based on the above results of operations, fiscal year 2011-2012 ended with a budgetary surplus. The State ended the year with a budgetary General Fund balance of \$1.053 billion (\$956.356 million after consideration of fiscal year 2011-12 post-closing budgetary activity).

See the *Required Supplementary Information* section on pages 148 through 153 of this report for a detailed budgetary comparison schedule.

Capital Assets and Debt Administration

Capital Assets

At the end of the 2011-2012 accounting year, the State had \$19.558 billion invested in capital assets. This represented a net increase (including additions and deductions) of \$304.658 million or 1.6%, over the previous accounting year (see *Exhibit 7*).

Total	\$ 14,847,194	\$ 14,723,111	\$ 4,711,069 \$	4,530,494	\$ 19,558,263	\$ 19,253,605	1.6%

Growth in capital asset investment occurred in the buildings and improvements primarily through replacement of aging structures and the expansion of campus facilities for the public colleges and universities. During the current year, vehicle fleets have continued to decrease due to general aging and irreparability, as reflected in the net book value through depreciation. In addition, machinery and equipment replacements have utilized improvements in technology to reduce the costs below the capitalization threshold.

See Note 7 in the notes to the financial statements on page 98 of this report for additional information on the State's capital assets.

Debt Outstanding

At June 30, 2012, the State had \$6.459 billion in bonds and notes outstanding—a decrease of \$392.835 million, or a 5.7% decline from last year (see *Exhibit 8*).

The reduction of principal on outstanding debt exceeded the issuance of debt resulting in a decrease in debt outstanding for governmental activities of \$322.122 million. Activity in the debt reported by the governmental activities included issuance of general obligation bonds in the amount of \$46.875 million of capital improvement bonds, \$29.860 million of state school facilities bonds, \$27.220 million of economic development bonds, and \$28.745 million of state infrastructure bonds. Also, the Infrastructure Bank issued revenue bonds in the amount of \$265.965 million. All of the proceeds from issuances of debt by governmental activities were used to refund earlier bond issues.

For business-type activities, the issuance of bonds and notes was less than principal reductions, resulting in an overall decrease in debt of \$70.713 million. New debt reported in business-type activities included the issuance of general obligation state institution bonds by Clemson University, the University of South Carolina, Winthrop University, and the Medical University of South Carolina in the amounts of \$21.135 million, \$21.475 million, \$13.140 million, and \$12.645 million, respectively. Of the general obligation debt issued by business-type activities, \$68.395 million was used to refund earlier bond issues. Clemson University, the University of South Carolina, College of Charleston, Coastal Carolina University, and Greenville Technical College, institutions within the Higher Education Fund, issued new revenue bonds of \$33.535 million, \$109.985 million, \$59.375 million, \$6.147 million, and \$13.385 million, respectively. Of the revenue bonds issued by the Higher Education Fund, \$141.287 million was used to refund earlier bond issues. In addition, the Housing Authority issued \$34.000 million in Homeownership revenue bonds.

Three bond rating services assign ratings to bonds that the State backs with its own taxing authority (*general obligation bonds*). Fitch Ratings rated these bonds as "AAA" and Moody's Investors Service rated them as "Aaa" during the fiscal year ended June 30, 2012, the highest rating that these services assign. The State's bond rating from Standard & Poor's was "AA+" during the same period.

The State limits the amount of annual payments for principal and interest on general obligation bonds and notes rather than directly limiting the amount of those bonds and notes that the State may have outstanding. At June 30, 2012, the State legally could issue additional bonds as long as the new debt would not increase the State's annual principal and interest payments by more than the following amounts: \$43.425 million for institution bonds (*Institution bonds* are general obligation bonds that benefit the State's Higher Education Fund.), \$37.135 million for highway bonds, \$156.686 million for general obligation bonds (excluding institution and highway bonds), \$3.568 million for economic development bonds, and \$7.465 million for research university infrastructure bonds.

See Note 12 in the notes to the financial statements on page 116 of this report for additional information about the State's long-term debt.

Economic Factors and Next Year's Budget

The "Rainy Day Account"

At June 30, 2012, the General Reserve Fund, sometimes called the *rainy day account*, had a balance of \$183.466 million which increased from the prior year by \$17.141 million appropriated by the 2011-2012 Appropriations Act. The balance is fully funded in accordance with the State's Constitution. The State's Constitution requires restoration of the reserve to full funding within three fiscal years after a withdrawal. For the fiscal year 2011-2012, State law defines full funding for the reserve as 3.5% of the Budgetary General Fund's revenues of the prior fiscal year. This requirement increases in increments of one-half of one percent annually until it reaches 5.0% in fiscal year 2014-15.

Budgetary General Fund for the 2012-2013 Accounting Year

For fiscal year 2012-2013, the Appropriations Act reflected estimated General Fund cash basis revenue of \$6.088 billion, which was \$230.141 million or 3.9% greater than fiscal year 2011–2012 actual revenue collections. The State's Board of Economic Advisors February 2013 estimate reflects an additional increase of \$163.082 million or 2.8% over the original revenue estimate for fiscal year 2012-2013.

Jul

Budgetary General Fund revenues for the first ten months of fiscal year 2012-2013 were \$5.391 billion, an increase of \$465.040 million or 9.4% over the same period for fiscal year 2011-2012. Total individual income taxes collected have increased \$278.065 million or 11.3% over the same period in the prior year. Sales taxes have also increased \$60.183 million or 3.5% from fiscal year 2011-2012.

Reconciliation of the Governmental Funds Balance Sheet to the Statement of Net Assets

June 30, 2012 (Expressed in Thousands)

Total fund balances-governmental funds	\$ 4	4,661,825
Amounts reported for governmental activities in the statement of net assets are different because:		
Capital assets used in governmental activities are not financial resources and therefore are not reported in the funds.		
Depreciable capital assets	57,673 32,926 46,745)	4,743,854
Bond issue costs are reported as current expenditures in the funds. However, issue costs are deferred and amortized over the life of the bonds and are included in governmental activities in the statement of net assets		24,003
Certain State revenues will be collected after year-end but are not available soon enough to pay for the current period's expenditures, and therefore are deferred in the funds		318,974
Internal service funds are used by management to charge the costs of certain activities to individual funds. The assets and liabilities of the internal service funds are included in governmental activities in the statement of net assets		484,443
Eliminations relating to the consolidation of internal service funds resulted in an amount due from governmental activities to business-type activities in the statement of net assets		18,273
Certain liabilities are not due and payable in the current period and therefore are not reported in the funds. Those liabilities consist of:		
Notes payable (3 Accrued interest on bonds (5 Capital leases (20 Policy claims (2)	61,100) 38,284) 59,110) (318) 03,985) 43,225) 75,083)	4,081,105)
·	<u>·</u>	
Net assets of governmental activities	\$ 10	6,170,267

Reconciliation of the Statement of Revenues, Expenditures, and Changes in Fund Balance of Governmental Funds to the Statement of Activities

For the Fiscal Year Ended June 30, 2012 (Expressed in Thousands)

Net change in fund balances-total governmental funds		\$ 776,810
Amounts reported for governmental activities in the statement of activities are different because:		
Capital outlays are reported as expenditures in governmental funds. However, in the statement of activities, the cost of capital assets is allocated over their useful lives as depreciation expense. In the current period, these amounts are:		
Capital outlay	\$ 400,354	
Depreciation expense	(291,880)	
Excess of capital outlay over depreciation expense		108,474
Donations of capital assets increase net assets in the statement of activities, but do not appear in		
the governmental funds because they are not financial resources		43,573
Gain on disposals of capital assets are reported as a revenue in the statement of activities		3,749
Bond and note proceeds provide current financial resources to governmental funds; however, issuing debt increases long-term liabilities in the statement of net assets. In the current period, proceeds were received from:		
Bonds and notes issued	(399,475)	
Net bond premiums and discounts	(47,398)	
Net bond and note proceeds		(446,873)
Bond issuance costs are expenditures in governmental funds, but are deferred assets in the statement of net assets		828
Certain capital additions were financed through capital leases. In governmental funds, a capital lease arrangement is considered a source of financing, but in the statement of net assets, the		
lease obligation is reported as a liability		(230)
Repayment of long-term debt is reported as an expenditure in governmental funds, but the repayment reduces long-term liabilities in the statement of net assets. In the current year, these amounts consist of:		
	246.074	
Bond principal retirement Bonds repurchased	316,074	
Note principal retirement	442,290	
Capital lease payments	8,231	
Total long-term debt repayment	151_	766,746
Internal service funds are used by management to charge the costs of certain activities to		
individual funds. The net expense of the internal service funds is included in		
governmental activities in the statement of activities		(12,443)
Because certain receivables will not be collected soon enough after the State's fiscal year ends,		
the related revenues are not considered "available" and are deferred in the governmental funds.		
Decrease in deferred revenues		(118,600)

Reconciliation of the Statement of Revenues, Expenditures, and Changes in Fund Balance of Governmental Funds to the Statement of Activities (Continued)

For the Fiscal Year Ended June 30, 2012 (Expressed in Thousands)

Eliminations relating to the consolidation of internal service funds resulted in a net decrease in expenses		
for the business-type activities in the statement of activities		15,976
Certain items reported in the statement of activities do not require the use of current financial		
resources and therefore are not reported as expenditures in governmental funds. These		
consist of changes in the following assets and liabilities:		
Accrued interest payable	\$ 8,279	
Unamortized bond issuance costs	(3,601)	
Unamortized bond premiums and discounts	(12,764)	
Unamortized deferred losses on refunding of debt	(4,113)	
Compensated absences payable	1,240	
Policy claims payable	(7,138)	
Other long-term liabilities	 38,542	
Total additional expenses	 _	20,445
Change in net assets of governmental activities		\$ 1,158,455

Notes to the Financial Statements

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a. Scope of Reporting Entity

The South Carolina General Assembly (an elected legislative body) and several elected executives govern the State of South Carolina. The accompanying financial statements present the activities of the State of South Carolina's primary government and its component units.

Component units are legally separate organizations for which the State is accountable for purposes of financial reporting. Blended component units, although legally separate from the State, are part of the State's operations in substance. Accordingly, the State presents them as funds in its fund financial statements and as activities in its government-wide financial statements. In contrast, the State excludes its discretely presented component units from the fund financial statements included within its basic financial statements and it reports the discretely presented component units separately in its government-wide financial statements.

As explained more fully below, the State's primary government and its component units include various State funds, agencies, departments, institutions, authorities, and other organizations.

Primary Government

The State's primary government includes all constitutional offices, departments, agencies, commissions, and authorities unless otherwise noted below. Most of these have executives or boards appointed by the Governor, the General Assembly, or both. These entities are financially accountable to and fiscally dependent on the State.

Although they operate somewhat autonomously, the entities listed below are included in the State's primary government because they lack full corporate powers.

Fiscal year ended June 30, 2012:

State Housing Finance and Development Authority South Carolina Education Assistance Authority Jobs-Economic Development Authority Patriots Point Development Authority

Fiscal year ended December 31, 2011:

The Public Railways Division of the Department of Commerce

The State's five retirement systems and two post-employment benefit trust funds are part of the State's primary government. The State Budget and Control Board, which consists of five elected officials, serves as trustee of the systems and the trust funds. The State Treasurer is custodian of the funds.

The State reports ten State-supported universities and sixteen area technical colleges within its Higher Education Fund as part of the primary government. Although the universities and colleges operate somewhat autonomously, they lack full corporate powers. In addition, the Governor and the General Assembly appoint most of their boards and budget a significant portion of their funds.

The accompanying financial statements exclude the related foundations listed in Note 20 because, based on the criteria provided by GASB Statement No. 39, the economic resources received or held by the related foundations to which the State, or its component units, is entitled or has the ability to otherwise access, are not significant to the State.

Blended Component Units

Unless otherwise indicated below, the blended component units have fiscal years ended June 30, and the accompanying financial statements include component unit financial information for the fiscal year ended June 30, 2012.

Tobacco Settlement Revenue Management Authority

The Tobacco Settlement Revenue Management Authority, a blended component unit accounted for as a governmental fund, was created in accordance with an act of the General Assembly that resulted from South Carolina's participation in a settlement (the Master Settlement Agreement or MSA) that arose out of litigation that a group of state governments brought against the tobacco industry. The legally separate Authority's primary purposes are (a) to receive all receipts due to South Carolina under the MSA after June 30, 2001, and (b) to issue the Authority's revenue bonds payable solely from, and secured solely by, those receipts. The Authority's governing board is composed of the Governor or her designee, the State Treasurer, the Comptroller General, the Chairman of the Senate Finance Committee, and the Chairman of the House Ways and Means Committee. The State receives the funding from the bond issuances, except in the event that the Authority issues bonds expressly to refund its outstanding bonds.

Blended Component Units Associated with the Higher Education Fund

The State's enterprise funds include the following blended component units, all of which are associated with the Higher Education Fund, a major enterprise fund:

The *Medical University Hospital Authority (the Authority)* was created to manage and operate the Medical University of South Carolina's hospitals and clinics. The legislation establishing the Authority requires that the members of the Medical University's Board of Trustees also constitute the Authority's Board of Trustees. The Authority also is a major enterprise fund.

The Citadel Trust, Inc., was formed to provide scholarship and other financial assistance or support to The Citadel.

The *University of South Carolina Trust (the Trust)* operates exclusively for the benefit of the University's School of Medicine to augment and aid education, research, and service in the field of health sciences. The financial information presented in the accompanying financial statements is for the Trust's fiscal year ended December 31, 2011.

University Medical Associates (UMA) was established to promote and support educational, medical, scientific, and research purposes of the Medical University of South Carolina (MUSC). UMA promotes the recruitment and retention of superior faculty at MUSC. UMA is a blended component unit because it almost exclusively benefits MUSC even though UMA does not provide all of its services directly to MUSC.

The *Medical University Facilities Corporation* was established to obtain financing for the Medical University of South Carolina to purchase land, an office building, and a parking garage.

The *CHS Development Company* was established to provide financing services for the Medical University of South Carolina by developing and leasing property.

The *Enterprise Campus Authority* was established to provide for the management, development, and operation of the Enterprise Campus of Midlands Technical College.

Obtaining More Information about Blended Component Units

One may obtain complete financial statements for the above blended component units from the following administrative offices:

South Carolina Tobacco Settlement Revenue Management Authority 122 Wade Hampton Office Building Capitol Complex Columbia, South Carolina 29201 www.treasurer.sc.gov

Discretely Presented Component Units

Unless otherwise indicated below, the discretely presented component units have fiscal years ended June 30, and the accompanying financial statements include component unit financial information for the fiscal year ended June 30, 2012. In determining which discretely presented component units are major, the State considered each component unit's significance relative to the other discretely presented component units and the nature and significance of its relationship to the primary government. The following have been identified as the State's major discretely presented component units:

Public Service Authority

The State General Assembly created the South Carolina Public Service Authority (Santee Cooper), a public utility company. Its primary purpose is to provide electric power and wholesale water to the people of South Carolina. The Governor appoints its Board of Directors and has the ability to remove the appointed members at will. By law, the Authority must annually transfer to the State's General Fund any net earnings not necessary for prudent business operations. The financial information presented is for the Authority's fiscal year ended December 31, 2011.

State Ports Authority

The State General Assembly created the South Carolina State Ports Authority to develop and improve the State's harbors and seaports. The State Ports Authority owns and operates eight ocean terminals that handle import and export cargo. The Governor appoints the members of the Authority's governing board, except for the Secretary of Transportation and the Secretary of Commerce. Removal of the Governor's appointed members requires a breach of duty or entering into a conflict of interest transaction. The State's primary government has provided financial support to the Authority in the past, and State law grants the primary government access to the Authority's surplus net revenues.

Connector 2000 Association, Inc.

Connector 2000 Association, Inc. was created to contract with the State Department of Transportation (DOT) in financing, acquiring, constructing, and operating turnpikes and other transportation projects, primarily the project known as the Southern Connector in Greenville County. The leasing and operational agreements with the DOT provide the DOT with certain managerial oversight authority. The toll rates established by the Association must be in compliance with revenue covenants of the Association's financing agreements. The financial information presented in the accompanying financial statements is for the Association's fiscal year ended December 31, 2011.

Lottery Commission

The South Carolina Lottery Commission was created through an act of the General Assembly to generate entertainment for citizens and visitors of the state while providing revenue for educational purposes. The Commission is governed by a nine-member board with three members appointed by the Governor, three appointed by the President Pro Tempore of the Senate, and three appointed by the Speaker of the House of Representatives. State law requires, as nearly practical, that at least 45% of sales must be returned to the public in the form of prizes to achieve its entertainment value and that the Commission must transfer its net proceeds to the State to support improvements and enhancements for educational purposes and programs.

Other Discretely Presented Component Units

The State's government-wide financial statements also include the following non-major discretely presented component units in the aggregate:

The *Clemson University Foundation* is a non-profit, tax-exempt public charity that was established to raise and manage private gifts for the advancement and benefit of Clemson University. The Foundation is governed by an independent, forty-three member volunteer board of directors, with additional honorary and ex-officio directors.

The *University of South Carolina Educational Foundation* is an eleemosynary corporation operating for the benefit and support of the University of South Carolina. The Foundation establishes and implements long-range fund raising programs to assist in the expansion and improvement of the educational functions of the University. The Foundation is governed by a self-perpetuating board of directors consisting of at least twenty-four members, including four ex-officio directors.

The South Carolina Medical Malpractice Liability Joint Underwriting Association was established to provide medical malpractice insurance on a self-supporting basis. The Association is governed by a board of thirteen directors, all of whom are appointed by the Governor. The Governor has the ability to remove the appointed members at will. The financial information presented is for the Association's fiscal year ended December 31, 2011.

The South Carolina First Steps to School Readiness is a non-profit, tax-exempt public charity created specifically to carry out the objectives of The South Carolina First Steps to School Readiness Act and to lessen the burdens on government by overseeing the initiative for improving early childhood development of the Act. The corporation's governing board is composed of two classes of members, voting and nonvoting. The Board's voting members include the Governor, State Superintendent of Education, ten Governor appointees, four members appointed by the President Pro Tempore of the Senate, four members appointed by the Speaker of the House of Representatives, the Chairman of the Senate Education Committee, and the Chairman of the House Education and Public Works Committee.

State of South Carolina

The Children's Trust Fund of South Carolina, Inc. is a non-profit, tax-exempt public charity with a purpose to stimulate innovative prevention and treatment programming to meet critical needs of South Carolina's children by awarding grants to private non-profit organizations. The Governor appoints the Board of Directors' seventeen members and has the ability to remove the appointed members at will. The financial information presented is for the Fund's fiscal year ended September 30, 2011.

Obtaining More Information about Discretely Presented Component Units

One may obtain complete financial statements for the discretely presented component units from the following administrative offices:

South Carolina Public Service Authority (Santee Cooper) One Riverwood Drive Post Office Box 2946101 Moncks Corner, South Carolina 29461 www.santeecooper.com

South Carolina State Ports Authority Post Office Box 22287 Charleston, South Carolina 29413 www.port-of-charleston.com

University of South Carolina Educational Foundation 208 Osborne Building University of South Carolina Columbia, South Carolina 29208 www.sc.edu

The South Carolina Medical Malpractice Liability Joint Underwriting Association c/o Patient's Compensation Fund 121 Executive Center Drive Suite 110 Columbia, South Carolina 29210 www.scjua.com

The Children's Trust Fund 1205 Pendleton Street, Suite 506 Columbia, South Carolina 29201 www.scchildren.org

Fund financial statements for the South Carolina First Steps to School Readiness are included in the Supplementary Information section of the State's Comprehensive Annual Financial Report. This entity does not issue separate financial statements.

Related Organizations

A related organization is one for which the primary government is accountable but not *financially accountable*. The South Carolina Reinsurance Facility, the Associated Auto Insurers Plan, regional housing authorities, and the Rural Crossroads Institute are related organizations because the State is not financially accountable for them despite the fact that the Governor appoints a voting majority of their governing boards. County boards of mental retardation and redevelopment authorities are related organizations if the Governor appoints a voting majority of the members.

Jointly Governed Organizations

The Governor, in conjunction with officials of certain local governments, appoints the board members of three military-defense facility redevelopment authorities. The three authorities include the Charleston Naval Complex Redevelopment Authority, the Myrtle Beach Air Force Base Redevelopment Authority and the Savannah River Site Redevelopment Authority. The State does not have an ongoing financial interest in these authorities.

The State of South Carolina is a member state within the Atlantic Low-Level Radioactive Waste Compact, a voluntary association of states that, by federal law, is legally separate from each of the member states. South Carolina does not have an ongoing financial interest in the Compact.

b. Basis of Presentation

Government-wide Financial Statements

The statement of net assets and the statement of activities report information about all activities of the primary government and its component units, except for fiduciary activities. These statements distinguish between the State's *governmental* and *business-type activities*. Taxes, federal revenues, and other nonexchange transactions primarily finance the governmental activities whereas fees charged to external parties finance, in whole or in part, the business-type activities. All of the State's governmental and internal service funds are reported in the government-wide financial statements as governmental activities and all of its enterprise funds are reported as business-type activities. (See the *Fund Financial Statements* subsection for more information about fund types.)

Statement of Activities and Eliminations

The statement of activities presents a comparison between direct expenses and program revenues for the different business-type activities of the State and for each function of the State's governmental activities. Direct expenses are those that are specifically associated with a program or function and, therefore, are clearly identifiable to a particular function. The State does not eliminate direct expenses and does not allocate indirect expenses to functions in the statement of activities. In the statement of activities, reimbursements under indirect cost plans for federal reimbursement purposes are reported as program revenues of the function that includes the reimbursed expenses.

Eliminations have been made to minimize the double-counting of internal activities. For example, the State eliminates payments the Department of Health and Human Services makes to the Department of Mental Health for providing Medicaid services because it reports both departments in its health and environment function. An exception to this general rule is that interfund services provided or used between functions have not been eliminated in the statement of activities because to do so would distort the net cost for functional activities as reported in the total column of that statement. The State treats these internal payments as program revenues and treats interfund reimbursements in the statement of activities in the same manner as described below for fund financial statements. For example, when the Department of Health and Human Services purchases computer services from one of the State's higher education institutions, the health and environment governmental function reports an expense, and the higher education business-type activity reports program revenue (charges for services).

Program revenues include: (a) fees, fines, and charges paid by the recipients of goods, services, or privileges offered by the programs; (b) grants and contributions that are restricted to meeting the operational or capital requirements of a particular program; and (c) investment earnings that are legally restricted for a specific program. The State classifies as *general revenues* all revenues that are not program revenues, including all taxes.

Fund Financial Statements

The fund financial statements provide information about the State's funds, including its fiduciary funds and blended component units. The State presents separate statements for each fund category—governmental, proprietary, and fiduciary. The emphasis of fund financial statements is on major governmental and enterprise funds, with each displayed in a separate column. The State aggregates and reports as nonmajor funds all remaining governmental and enterprise funds.

The State eliminates material intrafund activity. It also treats interfund reimbursements (repayments from the funds responsible for particular expenditures or expenses to the funds that initially paid for them) as reductions of expenditure/expense in the initial fund. For example, the Department of Motor Vehicles (reported within the general government function) used office supplies and postage provided by the Department of Public Safety (reported within the administration of justice function). The Department of Public Safety initially recorded expenditures for the office supplies and postage in the General Fund. The Department of Motor Vehicles later reimbursed the Department of Public Safety with monies from a Special Revenue Fund. That is, the Department of Motor Vehicles recorded Special Revenue Fund expenditures while the Department of Public Safety reduced its General Fund expenditures by the same amount.

Governmental Funds

Governmental funds focus primarily on the sources, uses, and balances of current financial resources. The governmental fund category includes the General Fund, Special Revenue Funds, Debt Service Fund, Capital Projects Fund, and Permanent Funds. The State reports the following major governmental funds:

The *General Fund* is the State's general operating fund. It accounts for resources that fund the services South Carolina's State government traditionally has provided to its citizens, except those required to be accounted for in another fund.

The Departmental Program Services Fund accounts for restricted resources that State agencies use for continued programmatic accomplishments. These resources include significant amounts of federal grant receipts.

The Local Governmental Infrastructure Fund accounts for grants, loans, and other financial assistance to local governments for infrastructure purposes. Certain motor fuel taxes, federal funds, and transfers from other funds are the fund's primary resources. This fund includes operations of the South Carolina Transportation Infrastructure Bank.

The *Department of Transportation Special Revenue Fund* accounts for the various gasoline taxes, fees, fines, and federal grant resources that the Department of Transportation uses in its general operations. Those operations include highway maintenance and repair as well as most of the Department's administrative activities.

The State Tobacco Settlement Fund accounts for revenues received from the General Fund and from the Tobacco Settlement Revenue Management Authority, a blended component unit and nonmajor governmental fund designated to receive and manage South Carolina's share of the multi-state legal settlement with the tobacco industry. Various healthcare and local government programs use these funds and the related interest.

The State aggregates other nonmajor governmental funds in a single column in its fund financial statements.

Enterprise Funds

Enterprise funds (which are reported as business-type activities in the government-wide financial statements) report activities that charge fees to external users for goods or services. The State reports the following major enterprise funds:

The *Higher Education Fund* accounts for the general operations of ten four-year higher education institutions and sixteen area technical colleges, all of which are part of the State's primary government.

The *Unemployment Compensation Fund* accounts for the State's unemployment compensation benefits. Revenues consist of federal grants and assessments on employers to pay benefits to qualified unemployed persons.

The *Housing Authority Fund* facilitates medium-income and low-income housing opportunities by providing reasonable financing to the State's citizens. To provide such financing, the Fund issues bonds and notes and administers federal grants and contracts. Mortgage interest is a primary resource for the Fund.

The *Medical University Hospital Authority* manages and operates the Medical University of South Carolina's hospitals and clinics. Revenues consist of payments from patients and third-party payers including Medicare and Medicaid.

The *Education Assistance Authority Fund* issues bonds to make loans to individuals to enable students to attend higher education institutions. Resources include interest charges, subsidies from the United States Department of Education, loan repayments, and investment earnings.

The State aggregates other nonmajor enterprise funds in a single column in its fund financial statements.

Other Fund Types

The State reports the following fund types in addition to governmental and enterprise funds:

Internal service funds account for various goods and services provided to other State departments or agencies (primarily to governmental funds), or to other governments, on a cost-reimbursement basis. Services provided by these funds include several risk management activities for which the State is the primary participant, including underwriting related to the following risks: public buildings and their contents, torts, medical malpractice, automobile use by public employees in the performance of their official duties, employee health and disability, and workers' compensation benefits. Other services include those relating to telecommunications, computer operations, office rental, janitorial, building maintenance, lease and repair of fleet vehicles, procurement, employee training, and management of public employee retirement systems. The internal service funds also sell goods produced with prison inmate labor. In addition, the internal service funds purchase selected supplies and equipment in bulk and sell these items to other State funds (primarily governmental funds) and to local governmental units. The State's internal service funds are considered to be governmental activities because they primarily serve governmental funds.

Pension and post-employment benefit trust funds account for the pension benefits of the South Carolina Retirement System, the Police Officers' Retirement System, the General Assembly Retirement System, the Judges' and Solicitors' Retirement System, and the National Guard Retirement System, and the post-employment health, dental, and long-term disability insurance benefits provided by the State to its retirees.

The State's investment trust fund acts as a local government investment pool that the State Treasurer operates.

Private-purpose trust funds include a tuition savings plan benefiting college students and miscellaneous other trust agreements holding assets that benefit non-State parties.

Agency funds account for assets that the State holds as an agent. These assets include employee and employer payroll deductions and contributions for the short period of time between the issuance of payroll checks and payment to the recipients; and various other assets held for prisoners, patients of State institutions, and other external parties.

Operating and Nonoperating Revenues and Expenses in Proprietary Fund Financial Statements

Enterprise and internal service funds distinguish *operating* revenues and expenses from *nonoperating* revenues and expenses. Operating revenues and expenses are items resulting from the provision of services and goods in connection with the fund's principal ongoing operations. The State classifies revenues and expenses as operating if the substance of the transaction is an exchange transaction. Accordingly, grants and grant-like transactions are reportable as operating revenues only if they are essentially contracts for services whereby they finance programs that the proprietary fund would not otherwise undertake (i.e., the activity of the grant is inherently part of the operations of the grantor). Conversely, the State classifies nonexchange transactions as nonoperating. This includes all grant revenues except those reportable as operating revenue as described above and those restricted by the grantor for use exclusively for capital purposes. The State reports as operating expenses those paid from operating revenues except financing related expenses such as interest expense, which is reported as nonoperating.

In accordance with the general policy stated in the preceding paragraph, the *Higher Education Fund's* principal operating revenues include tuition; student fees; student loans; scholarships and grants where the provider has identified the student recipients; sales of miscellaneous goods and services; and certain research grants that, in substance, are contracts for services rather than nonexchange revenues. However, the *Higher Education Fund* generally does not report as revenue third-party loan amounts that it receives and disburses. State appropriations to the *Higher Education Fund* are recorded as transfers.

For the *Unemployment Compensation Fund*, principal operating revenues include amounts received from covered employers and from federal agencies. The amounts received from federal agencies are classified as operating revenues because they are provided to the State primarily to provide unemployment benefits, although amounts not needed for that purpose may be used for other purposes. This fund's operating expenses consist primarily of unemployment compensation benefits paid. Interest income is classified as nonoperating revenue.

For the *Housing Authority Fund* and the *Education Assistance Authority Fund*, principal operating items include revenues and expenses associated with program loans that provide direct benefits to individuals.

For the *Medical University Hospital Authority*, principal operating items include revenues and expenses associated with managing and operating the Medical University of South Carolina's hospitals and clinics.

Component Unit Financial Statements

The State presents a statement of net assets and a statement of activities for each of its major discretely presented component units and for the aggregate of its nonmajor discretely presented component units.

Use of Private-Sector Accounting and Financial Reporting Principles

The government-wide and proprietary fund financial statements reflect the State's compliance with private-sector standards of accounting and financial reporting issued prior to November 30, 1989, to the extent that those standards do not conflict with or contradict guidance of the Governmental Accounting Standards Board (GASB). Governments also may opt to follow private-sector guidance issued after November 30, 1989, for their business-type activities (enterprise funds) and for their discretely presented component units that follow enterprise fund accounting, subject to the same limitation. Only the Public Service Authority and the State Ports Authority, major discretely presented component units, have selected this option.

The Financial Accounting Standard Board ("FASB") Accounting Standards Codification ("ASC") is the source of authoritative U.S. Generally Accepted Accounting Principles recognized to be applied by the private-sector. The State adopted ASC in certain cases where the FASB does not conflict with or contradict guidance of the GASB as noted in the above paragraph.

c. Measurement Focus and Basis of Accounting

A particular measurement focus determines *what* resources are measured. The State reports its government-wide, proprietary, and fiduciary fund (other than agency fund) financial statements using the *economic resources* measurement focus. Agency funds report only assets and liabilities; and therefore cannot be said to have a measurement focus. Private –sector business enterprises also use the economic resources measurement focus. The State reports its governmental funds using the *current financial resources* measurement focus.

The basis of accounting determines *when* the State recognizes revenues and expenditures/expenses as well as the related assets and liabilities, regardless of measurement focus. Generally accepted accounting principles for governments require the use of the accrual and the modified accrual basis of accounting as described below.

Accrual Basis

The State uses the accrual basis of accounting in reporting its government-wide financial statements, as well as its proprietary and fiduciary fund financial statements and its major component unit financial statements. Under the accrual basis, the State generally records revenues when earned and reasonably measurable and records expenses when a liability is incurred, regardless of the timing of related cash flows. Revenues collected in advance are deferred until the period in which they are earned.

Significant nonexchange transactions, in which the State gives (or receives) value without directly receiving (or giving) equal value in exchange, include taxes, grants, and donations. On the accrual basis, the State recognizes taxes (income, sales, and similar) in the period when the underlying income or sales transactions occur, net of estimated overpayments or refunds. Grants, donations, and similar items are recognized as revenue as soon as the State meets all eligibility requirements. Pledges are recognized as receivables and revenues, net of estimated uncollectible amounts, if all eligibility requirements are met, the promise is verifiable, and the resources are measurable and probable of collection. Note 17b provides additional details regarding pledges that were not measurable at June 30, 2012.

Modified Accrual Basis

Governmental fund financial statements are reported using the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the State considers revenues to be available if they are collected within one month of the end of the current fiscal period with the following exceptions: tax and grant revenues are considered available if collected within one year; interest on investments is recorded as earned because it is deemed available when earned. Receivables not expected to be collected within the established availability periods are offset by deferred revenues.

Recognition of Specific Grant and Shared Revenue Transactions

The State reports the receipt of food commodities as revenue and the distribution of commodities as expenditure or expense. The fair value of the donated commodities is recognized as revenues when all eligibility requirements are met.

The State recognizes the face value of food stamp benefits distributed as revenue and expenditure or expense under both the accrual and modified accrual bases of accounting.

The State shares certain of its revenues with municipalities, counties, and districts within its borders, recognizing expenditure or expense when the recipient government has met all eligibility requirements.

d. Cash and Cash Equivalents

The amounts shown in the accompanying financial statements as *cash and cash equivalents* represent cash on hand, cash on deposit in banks and savings associations, and cash invested in various instruments as a part of the State's cash management pool, an internal investment pool. Because the cash management pool operates as a demand deposit account, amounts invested in the pool are classified as cash and cash equivalents. The State Treasurer administers the cash management pool. The pool includes some long-term investments such as obligations of the United States, government sponsored entities, and domestic corporations, certificates of deposit, and collateralized repurchase agreements. *Restricted cash and cash equivalents* represents cash on deposit with external parties held for compliance with laws, regulations, and contractual obligations.

Most entities in the primary government and the discretely presented governmental component units participate in the cash management pool. Significant exceptions include: retirement plans, the Local Government Investment Pool (an external investment pool), the Tobacco Settlement Revenue Management Authority (a blended component unit and a nonmajor governmental fund), the Housing Authority (a major enterprise fund), and certain activities of the Higher Education Fund (a major enterprise fund). Of the discretely presented component units, the State Ports Authority and the South Carolina First Steps to School Readiness Board of Trustees participate in the pool. For activities excluded from the pool, cash equivalents include investments in short-term, highly liquid securities having a maturity at the time of purchase of three months or less.

e. Cash Management Pool-Allocation of Interest

The State's cash management pool consists of a general deposit account and several special deposit accounts. The State records each fund's equity interest in the general deposit account. All earnings on that account are recorded in the General Fund. In contrast, each special deposit account retains its own earnings.

f. Investments

The State Treasurer is authorized by statute to invest all State funds. The State Treasurer's investment objectives are preservation of capital, maintenance of adequate liquidity, and obtaining the best yield possible within prescribed parameters. To meet those objectives, the State Treasurer uses various resources including an investment advisory service, electronic financial quotation and information services, various economic reports, and daily communication with brokers and financial institution investment officers.

To insure safety of principal, the State Treasurer's policy is to limit liquid investments (i.e., those with maturities not exceeding one year) to cash, repurchase agreements (when collateralized by United States Treasury or federal agency obligations with a market value in excess of 100.0% of funds advanced), United States Treasury bills, federal agency discount notes, and commercial paper. The State Treasurer further preserves principal by investing in only the highest investment grade securities (i.e., those rated at least A by two leading national rating services). In order to diversify investment holdings, asset allocation policies are utilized for investments having more than one year to maturity. Overall credit exposure is managed by asset allocation policies and by additional constraints controlling risk exposure to individual corporate issuers.

Certain agencies and component units have specific authority to manage deposits and investments under their control. The investment policies of these entities may differ from those of the State Treasurer.

State law has established a six-member Investment Commission with fiduciary responsibility for investment of all of the State Retirement Systems' investments. The chief investment officer may invest no more than 70.0% of the Systems' investment portfolio in equity securities.

Substantially all of the State's investments are presented at fair value; securities are valued at the last reported sales price as provided by an independent pricing service.

The State sponsors the Local Government Investment Pool (LGIP), an external investment pool reported as an investment trust fund. The LGIP's complete financial statements may be obtained by writing to the following address:

The State Treasurer's Office Local Government Investment Pool Post Office Box 11778 Columbia, South Carolina 29211

g. Receivables and Payables

The State records amounts receivable from parties outside the primary government net of allowances for uncollectible amounts and contractual adjustments. It estimates uncollectible amounts based on past collection experience. The State discloses the gross amounts of these receivables and the amounts of related allowances and adjustments, as well as any significant receivable balances not expected to be collected within one year, in Note 5. Further, the State disaggregates its receivable balances in Note 5 if any significant components thereof have been obscured in the financial statements by aggregation or if different components of receivables have significantly different liquidity characteristics.

The State presents balances outstanding at the end of the fiscal year that relate to lending/borrowing arrangements between funds as interfund receivables and payables and reports all other outstanding balances between funds as due to/from other funds. The government-wide statement of net assets displays internal balances that involve fiduciary funds as accounts receivable and accounts payable. The State reports as internal balances any residual balances outstanding between the governmental and business-type activities in the government-wide financial statements.

h. Inventories

The State values its inventories at the lower of cost or market, predominantly using the first-in, first-out methodology for its proprietary funds and its business-type activities and predominantly using the average cost methodology for its other funds and activities and its discretely presented component units. The State records expenditures in governmental funds when it consumes inventory items rather than when it purchases them.

i. Prepaid Items

Certain payments to vendors reflect costs applicable to future accounting periods. The State records these payments as prepaid items in both the government-wide and fund financial statements. The state's policy is to reflect consumption of the future benefit under the consumption method.

j. Capital Assets

The State reports its capital assets in the following categories in the applicable governmental or business-type activities in the government-wide financial statements: land and land improvements, infrastructure (i.e., highways and bridges), buildings and improvements, construction in progress, vehicles, machinery and equipment, works of art and historical treasures, and intangible assets.

Capital assets are valued at historical cost or at estimated historical cost if actual historical cost data is not available. Donated capital assets are recorded at estimated fair value on the donation date. Infrastructure assets acquired prior to fiscal years ended after June 30, 1980, are reported at cost beginning in the year 1917. The costs of normal maintenance and repairs that do not significantly add to the value of an asset or materially extend an asset's useful life are not capitalized. Cumulative costs incurred on major capital assets under construction but not yet placed in service are capitalized and reported as construction in progress. Net interest incurred by a proprietary fund during the construction phase of a major capital asset is included as part of the capitalized value of such asset.

An individual asset is capitalized and reported if it has an estimated useful life of at least two years and a historical cost as follows: more than \$5 thousand for vehicles, machinery and equipment, and works of art and historical treasures; more than \$100 thousand for buildings and improvements, depreciable land improvements, and intangible assets; and more than \$500 thousand for roads and bridges. All land and non-depreciable land improvements are capitalized and reported, regardless of cost. The Lottery Commission, a major discretely presented component unit, capitalizes all property and equipment purchases of \$1 thousand or more.

Once the State or one of its discretely presented component units places a depreciable capital asset in service, depreciation is recorded using the straight-line method over the following estimated useful lives:

Asset Category	Years
Land Improvements	3 - 60
Infrastructurehighways	75
Infrastructurebridges	50
Buildings and Improvements	5 - 55
Vehicles	3 - 20
Machinery and equipment	2 - 25
Works of art; historical treasures	10 - 25
Intangible assets	3 - 38

The State does not depreciate land, non-depreciable land improvements, and construction in progress. The State does not depreciate capitalized individual works of art and historical treasures determined to have inexhaustible useful lives and does not capitalize collections of works of art and historical treasures that are held for public use, are protected and preserved, and are subject to a policy that requires the proceeds from sales of collection items to be used to acquire other items for collections. These non-capitalized collections include historical relics, antiques, fossils, and other South Carolina artifacts.

In the government-wide statement of activities, the State reports losses on disposal of capital assets as expense of its General Government function and gains on such disposal as general revenue.

k. Deferred Charges

Deferred costs to be recovered from future revenues of the South Carolina Public Service Authority (a regulated utility reported as a major discretely presented component unit) are recorded as deferred charges. The Authority's rates are based upon debt service and operating fund requirements. The Authority recognizes differences between debt principal maturities and straight-line depreciation as costs to be recovered from future revenue. The recovery of outstanding amounts recorded as costs to be recovered from future revenue will coincide with the repayment of the outstanding long-term debt of the Authority.

The South Carolina Medical Malpractice Liability Joint Underwriting Association, a non-major discretely presented component unit, defers certain policy acquisition costs for new and renewal business. The Association amortizes these costs based on the related written and unearned premiums.

Unamortized bond issuance costs are reported as deferred charges and are amortized as described in Note 1m.

I. Tax Refunds Payable

Most of the tax refunds payable balance in the General Fund relates to individual income tax. During the calendar year, the State collects employee withholdings and taxpayers' payments. Taxpayers file returns by April 15 for the preceding calendar year. At June 30, the State estimates the amount it owes taxpayers for overpayments during the preceding six months. The State records this estimated payable as tax refunds payable and a reduction of tax revenues.

m. Long-Term Obligations

The State records general long-term debt and other long-term obligations of the primary government's governmental funds in the governmental activities reported in its government-wide financial statements. Long-term debt and other obligations financed by proprietary funds are recorded as liabilities in the appropriate funds.

The State defers and amortizes bond premiums and discounts, as well as issuance costs, over the life of the bonds predominantly using the effective interest method. For current refundings and advance refundings resulting in defeasance of debt, the difference between the reacquisition price and the net carrying amount of the old debt is also deferred and amortized over the shorter of the remaining life of the old debt or the life of the new debt. The State reports bonds payable net of the applicable bond premium or discount and deferred amount on refunding. Unamortized issuance costs are reported as deferred charges.

n. Compensated Absences

During their first ten years of service, most full-time permanent State employees annually earn 15 days of vacation leave and 15 days of sick leave. After ten years, most employees earn an additional 1.25 days of vacation leave for each year of service over ten until they reach the maximum of 30 days per year. Sick leave earnings remain at 15 days per year. Employees may carry forward up to 45 days of vacation leave and 180 days of sick leave from one calendar year to the next. Upon termination of employment, the State pays employees for accumulated vacation leave at the pay rate then in effect. Employees do not receive pay for accumulated sick leave when they terminate. However, at retirement, employees participating in the South Carolina Retirement System and the South Carolina Police Officers' Retirement System may receive additional service credit for up to 90 days of accumulated unused sick leave.

The government-wide and proprietary fund statements record an expense and a liability when employees earn compensated absence credits. Governmental fund financial statements record a liability for compensated absences payable at June 30 only if the liability for accumulated vacation leave has matured but has not yet been paid at that date (for example, as a result of employee resignations and retirements). The State does not record a liability for unpaid accumulated sick leave.

o. Perkins Loan Liability

The Higher Education Fund, a major enterprise fund, records a liability related to the Perkins Student Loan Program and certain other federal student loan programs to reflect the amount of capital contributions received to date from the federal government plus any other amounts that ultimately are refundable to the federal government under the programs. The State has recorded this liability as part of its other non-current liabilities account.

p. Net Assets and Fund Balance

The State reports a portion of its net assets or fund balance in its government-wide and fund financial statements as restricted. Net assets or fund balance, for enterprise or governmental fund types respectively, are reported as restricted when constraints placed on resource use are either (a) externally imposed by creditors (such as debt covenants), grantors, contributors, laws or regulation of other governments, or (b) imposed by law through constitutional provisions or enabling legislation.

Enabling legislation authorizes the State to assess, levy, charge, or otherwise mandate payments of resources (from resource providers) and includes a legally enforceable requirement that those resources be used only for the specific purposes stipulated in the legislation. A legally enforceable requirement is one that an outside party (such as citizens, public interest groups, or the judiciary) can compel the government to honor. At June 30, 2012, \$1.707 billion was reported as restricted net assets because of restrictions imposed by enabling legislation.

The State reports other constraints in its fund balance in the governmental funds as committed or assigned. Fund balance is reported as committed if a state statute or constitutional provision constrains the use of resources of the state. Assigned fund balance is constrained through appropriation actions of the legislature. Committed constraints can be removed only through similar action that created the constraint, either legislation amending or repealing the statute or ratification of a constitutional change by the electorate. The removal of constraints for assigned funds occurs through the budgetary process.

Non-spendable fund balance in the governmental funds reflects the lack of availability in form or substance of the assets and liabilities reported in the fund to meet obligations of the fund in the near future.

q. Flow Assumption, Net Assets or Fund Balance

The State's policy is to first apply restricted resources when an expense is incurred for purposes for which both restricted and unrestricted net assets or fund balance are available. Within the unrestricted fund balance, committed resources would be first applied, when available, followed by assigned resources before unassigned resources are used.

r. Escheat Property

The State accounts for its escheat property in the General Fund, the fund to which the property ultimately escheats. To the extent it is probable and estimable that such property will be reclaimed and paid to claimants, the State records a liability and reduces revenue in the General Fund.

NOTE 2: ACCOUNTING AND REPORTING CHANGES

a. Adoption of New Accounting Standards

Effective for the fiscal year 2011-2012, the State adopted the following Governmental Accounting Standards Board (GASB) Statements.

Statement No. 64, *Derivative Instruments: Application of Hedge Accounting Termination Provisions – an amendment of GASB Statement No. 53*, modifies the guidance relating to derivative instrument accounting and reporting. Specifically it expands guidance for differences in accounting between changes allowed by established agreements and events which would constitute termination of the agreement. The requirements, where applicable, have been incorporated in these note disclosures.

b. Correction of Errors

During fiscal year 2011-2012, an error was discovered in the reporting of the market value of investments held in the Pooled Cash Management portfolio. The portfolio is the primary source of cash and equivalents for the reporting units of the State of South Carolina. The cash and equivalents as of June 30, 2011 were understated by \$34.117 million in total. A restatement in the year ended June 30, 2012 has been reflected in the Governmental Activities, Business-Type Activities, Discretely Presented Component Units, Other Private-Purpose Trust Funds and the Agency Funds.

During the fiscal year 2011-2012, an evaluation of the accounting and presentation of the License Agreement between the Connector 2000 Association, a Discretely Presented Component Unit, and the Department of Transportation, a Special Revenue Fund, was performed as a result of the modifications required during the Connector 2000 bankruptcy procedures. This evaluation determined that prior reporting of an infrastructure asset by the component unit was not consistent with the transaction. Beginning net assets were restated by \$144.910 million in the Governmental Activities of the Government-wide presentation to reflect the infrastructure asset in the primary government. The asset reported by the component unit is more accurately reflected as an other long-term asset.

The University of South Carolina Educational Foundation, a nonmajor discretely presented component unit, identified an error in the processing of a deposit. A transaction in the amount of \$5.775 million was previously reported as a contribution. Subsequent information available indicated that the receipt was intended to be a contribution to another organization supporting the University of South Carolina requiring the recognition of a liability by this foundation. A restatement in the year ended June 30, 2012 has been reflected.

NOTE 3: DEFICITS OF INDIVIDUAL FUNDS

The accompanying fund financial statements display deficit fund balances and deficit net asset balances for individual major funds, if applicable. Nonmajor funds had the following deficit net asset balances (expressed in thousands) at June 30, 2012:

Nonmajor Enterprise Funds:	
Patients' Compensation	\$ 98,438
Second Injury	130
Tuition Prepayment Program	34,262
Internal Service Funds:	
State Accident Fund	40,416
Pension Administration	294

Actions taken to eliminate deficits include increase of existing fees, assessment of additional fees, purchase of excess loss reinsurance, and implementation of cost containment programs.

NOTE 4: DEPOSITS AND INVESTMENTS

By law, all deposits and investments are under the control of the State Treasurer except for those that, by specific authority, are under the control of other agencies or component units. The deposit and investment policies of those entities may differ from those of the State Treasurer. Typically, those agencies follow the deposit and investment policies of the State Treasurer in an effort to minimize deposit and investment risks.

a. Deposits

The following deposits disclosure excludes the primary government's Pension Trust Funds of the South Carolina Retirement Systems (the Systems) which are described in subsection e and the primary government's Other Post-Employment Benefit Trust Funds which are described in subsection f.

Policy

The State's policy, by law, requires all banks or savings and loan associations that receive State funds deposited by the State Treasurer, to secure the deposits by deposit insurance, surety bonds, collateral securities, or letters of credit to protect the State against any loss. Agencies, with specific authority to manage their deposits outside of the State Treasurer, may have custodial credit risk policies that differ from the State Treasurer. Therefore, some deposits presented below have custodial credit risk. Note 1, subsections d and e explain other policies concerning deposits.

Custodial Credit Risk

Custodial credit risk for deposits is the risk that in the event of a depository financial institution's failure, the State will not be able to recover the value of the deposits with the collateral securities that are in the possession of an outside party. Deposits include cash and cash equivalents on deposit in banks and non-negotiable certificates of deposit. All deposits under the control of the State Treasurer are fully insured or collateralized. The reported amount of the State Treasurer's deposits as of June 30, 2012 was \$466.018 million and the bank balance was \$959.223 million. As of June 30, 2012, the reported amount of the primary government's deposits outside of the State Treasurer was \$547.693 million and the bank balance was \$568.739 million. Of the \$241.279 million bank balance exposed to custodial credit risk, \$70.552 million was uninsured and uncollateralized, \$163.016 million was uninsured and collateralized with securities held by the pledging financial institution, and \$7.711 million was uninsured and collateralized with securities held by the counterparty's trust department or agent but not in the State's name.

As of June 30, 2012, the reported amount of the major discretely presented component units' deposits was \$146.421 million and the bank balance was \$150.585 million, of which \$500 thousand was exposed to custodial credit risk as uninsured and collateralized with securities held by the counterparty's trust department or agent, but not in the State's name.

b. Investments

The investment disclosures exclude the primary government's Pension Trust Funds of the South Carolina Retirement Systems which are described in subsection e and the primary government's Other Post-Employment Benefit Trust Funds which are described in subsection f.

Investment Policy

The State's investment policy by law authorizes investments that vary by fund, but generally include obligations of the United States and government sponsored entities, obligations of the State of South Carolina and certain of its political subdivisions, certificates of deposit, collateralized repurchase agreements, certain corporate bonds, and commercial paper. Substantially all of the State's investments are presented at fair value. Securities are valued at the last reported sales price as provided by an independent pricing service. Investment income consists of realized and unrealized appreciation (depreciation) in the fair value of investments and interest income earned. Other investment policies for the State and its component units are explained in Note 1, subsection f.

Custodial Credit Risk

Custodial credit risk for investments is the risk that in the event of a failure of the counterparty to a transaction, the State will not be able to recover the value of investments or collateral securities that are in possession of an outside party. All of the State Treasurer's investments are fully insured or collateralized. Certain agencies, with specific authority, manage their own investments and may have custodial credit risk policies that differ from the State Treasurer. The primary government's investments and the major discretely presented component unit's investments that are exposed to custodial credit risk have been classified into two categories of custodial credit risk. Category A includes investment securities that are uninsured, not registered in the name of the State, and are held by a counterparty. Category B includes investment securities that are uninsured, not registered in the name of the State, and are held by a counterparty's trust department or agent but not in a State entity's name. The portion of the primary government's investments with custodial credit risk is classified by risk category (expressed in thousands) at June 30, 2012, as follows:

Primary Government	 Cat		Reported			
Investment Type	A		В	4	Amount	
U.S. Treasuries	\$ 	\$	2,660	\$	2,660	
U.S. agencies	61,962		39,666		101,628	
Limited partnership	30,379		_		30,379	
Mortgage backed obligations	_		4,396		4,396	
Corporate bonds	1,336		_		1,336	
Muncipal bonds	_		2,024		2,024	
Repurchase agreements	_		10,009		10,009	
Common stock	2,156		_		2,156	
Other equity securities	3,010		_		3,010	
Commercial paper	_		33,118		33,118	
Money market mutual funds	153		19,916		20,069	
Guaranteed investment contracts	_		529		529	
Other	_		2,032		2,032	
Totals	\$ 98,996	\$	114,350	\$	213,346	

The State's major discretely presented component units hold investments in U.S. Treasuries and U.S. agencies, repurchase agreements, and mutual bond funds that are not exposed to custodial credit risk.

Credit Risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations to the State. Credit risk exposure is primarily limited to debt instruments and other hybrid equity securities. The State Treasurer's credit risk policy mitigates potential for loss of principal by purchasing only high investment grade debt securities. In the event that the rating of a security falls below investment grade, that security may continue to be held contingent upon an evaluation of the longer term investment merits of the security. Certain agencies, with specific authority to manage their own investments outside of the State Treasurer, have credit risk policies that differ from that of the State Treasurer. Debt instruments held for investment for the primary government were rated as of June 30, 2012 using the Standard and Poor's rating scale or Moody's, when no other rating was available, as follows (expressed in thousands):

Investment Type and Fair Value	AAA		AA	A / A1	 BBB	BB	В	be	elow	No	ot Rated
U.S. agencies	\$ 14	993	\$ 1,233,162	\$ 61,962	\$ _	\$ _	\$ _	\$	_	\$	26,626
Mortgage backed obligations	4	395	717,634	_	_	_	_		_		186,011
Asset backed securities		_	_	_	_	-	_		_		4,177
Corporate bonds	20	078	471,729	1,850,379	1,177,372	_	_		_		119,038
Municipal bonds	30	951	61,546	45,162	102	_	_		_		610
Repurchase agreements		_	_	2,753,579	_	_	_		_		121,183
Commercial paper		_	_	2,171,067	_	_	_		_		116
Money market mutual funds	17	982	_	_	_	_	_		_		8,871
Mutual bond funds		92	_	30	195	287	720		456		133,412
Guaranteed investment contracts		_	_	_	_	_	_		_		529
Other			_		 		 				673
Totals	\$ 88	491	\$ 2,484,071	\$ 6,882,179	\$ 1,177,669	\$ 287	\$ 720	\$	456	\$	601,246

At fiscal year end, the State Ports Authority (June 30, 2012), the Public Service Authority (December 31, 2011), and the Connector 2000 Association, Inc. (December 31, 2011), all major discretely presented component units, held investments in U.S. government securities which do not require disclosure of credit quality. In addition to U.S. Government securities, the State Ports Authority, Public Service Authority, and the Connector 2000 Association, Inc. held investments as listed below with Standard and Poor's rating scale (expressed in thousands):

Investment Type and Fair Value	AAA	Not Rated			
U.S. agencies	\$ 821,676	\$	16,776		
Repurchase agreements	_		149,029		
Mutual bond funds	3,681		_		
Totals	\$ 825,357	\$	165,805		

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The State Treasurer's policy does not specifically address interest rate risk. Its objectives for preservation of capital and maintenance of adequate liquidity focus the management of interest rate sensitivity on investing in securities with a range of maturities from one day to thirty years. At June 30, 2012, the maturities of the securities that will mature were limited according to the following segmented time distribution (expressed in thousands):

			Investment Maturities (in years)											
Investment Type		Fair Value		ess than 1		1 - 5		6 - 10	More than 10					
U.S. Treasuries	\$	238,272	\$		\$	545	\$		\$	237,727				
U.S. agencies		947,700		114,986		46,857		85,942		699,915				
Mortgage backed obligations		734,817		_		185		169,786		564,846				
Asset backed securities		4,177		_		_		_		4,177				
Corporate bonds		2,704,659		760,710		1,419,515		500,806		23,628				
Municipal bonds		97,422		25,096		33,743		29,012		9,571

Agencies that manage their own investments have interest rate risk policies that differ from the State Treasurer. Some of these agencies do not have a formal investment policy that limits investment maturities as a means of managing exposure to fair value losses arising from increasing interest rates. At June 30, 2012, agencies within the State's primary government that manage their own investments limited the maturities of their interest-earning securities according to the following segmented time distribution (expressed in thousands):

]	Investment Mat	urities (in years)		
Investment Type	F	air Value	L	ess than 1		1 - 5		6 - 10	More than 10	
U.S. Treasuries	\$	33,111	\$	\$ 23,095		5,187	\$	\$ 4,029		800
U.S. agencies		389,043		266,922		65,301		3,391		53,429
Mortgage backed obligations		173,223		225		1,245		1,201		170,552
Corporate bonds		933,937		899,076		17,938		2,872		14,051
Municipal bonds		40,949		38,356		336		995		1,262

Mutual funds		139,848		4,657		720		1,444		133,027
Other		673								673
Totals	\$	4,100,232	\$	3,621,663	\$	90,727	\$	13,932	\$	373,910

The State's major discretely presented component units also had interest rate risk policies that varied from the State Treasurer. At June 30, 2012, these major discretely presented component units had the following fixed income investments with maturities disclosed by investment category and segmented time distribution stated with fair value (expressed in thousands):

		Investment Maturities (in years)									
Investment Type	Fair Value		Fair Value		Fair Value Less than 1 1 - 5 6 - 10		More than 10				
U.S. Treasuries	\$	65,363	\$		\$		\$	65,363	\$		
U.S. agencies		838,452		232,184		589,492		_		16,776	
Repurchase agreements		149,029		149,029		_		_		_	
Mutual bond funds		3,681		3,681				<u> </u>			
Totals	\$	1,056,525	\$	384,894	\$	589,492	\$	65,363	\$	16,776	

Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investments in a single issuer. The State's policy for reducing this risk is to diversify and limit exposure to any single issuer to no more than 5%, except for United States Treasury and agency obligations. The State sponsors the Local Government Investment Pool (LGIP), an external investment pool reported as an investment trust fund. As of June 30, 2012, the State Treasurer had approximately 13.13% of the State's General investment portfolio and 33.45% of the LGIP investment portfolio in an overnight repurchase agreement with Bank of America that was fully collateralized by U.S. Treasury and agency obligations. Approximately 7.09% of the State's general investment portfolio at June 30, 2012 was in an overnight repurchase agreement with Wells Fargo that was fully collateralized by U.S. Treasury and agency obligations.

c. Securities Lending Program

The following securities lending disclosures exclude the primary government's Pension Trust Funds of the South Carolina Retirement Systems which are described in subsection e. The following disclosures, with the exception of the amounts reported in the table below, also apply to the primary government's Other Post-Employment Benefit Trust Funds reported in subsection f.

By law, the State Treasurer may lend securities from its investment portfolios on a collateralized basis to third parties, primarily financial institutions, with a simultaneous agreement to return the collateral for the same securities in the future. The State may lend United States government securities, corporate bonds, other securities and equities for collateral in the form of cash or other securities. The contracts with the State's custodians require them to indemnify the State if the borrowers fail to return the securities (and if the collateral is inadequate to replace the securities lent) or fail to pay the State for income distributions by the securities' issuers while the securities are on loan.

The weighted average maturity of the State's collateral investments generally matched the maturity of the securities loaned during the fiscal year and at June 30, 2012. At June 30, 2012, the State had no credit risk exposure to borrowers because the amounts the State owed the borrowers exceeded the amounts the borrowers owed the State. Either the State or the borrower can terminate all securities loans on demand. There are no restrictions on the amount of the loans that can be made. For the fiscal year ended June 30, 2012, the State experienced no losses on its securities lending transactions because of borrower defaults.

The State receives primarily cash as collateral for its loaned securities. The market value of the required collateral must meet or exceed 102% of the market value of the securities loaned, providing a margin against a decline in the market value of the collateral. During the fiscal year ended June 30, 2012, the State met the 102% requirement. The State cannot pledge or sell collateral securities unless the borrower defaults. The lending agent, on behalf of the State, invests cash collateral received. Accordingly, at June 30, 2012, the State recorded these investments of cash collateral as assets in the accompanying financial statements. Corresponding liability amounts also have been recorded because the State must return the cash collateral to the borrower upon expiration of the loan. The following table presents the fair value (expressed in thousands) of the underlying securities and the total collateral received for securities on loan at June 30, 2012:

	A	mount
Securities lent for cash collateral:		
Corporate bonds	\$	35,103
Total for cash collateral	\$	35,103
Cash collateral invested:		
Repurchase agreements	\$	924
Asset backed securities		5,870
Floating Rate Notes		3,907
Total collateral invested	\$	10,701

d. Investment Market Uncertainty

The diversification of the State's investment portfolio exposes it to various risks as discussed in previous sections of this note. These risks result in market fluctuations. It is at least reasonably possible that these market fluctuations may result in material changes to the values of the investments reported in the State's financial statements.

e. South Carolina Retirement Systems

Custodial Credit Risk

Deposits

Custodial credit risk for deposits is the risk that in the event of a bank failure, the Systems' deposits may not be recovered. As prescribed by South Carolina state statute, the State Treasurer is the custodian of all deposits and is responsible for securing all deposits held by banks. These deposits are secured by deposit insurance, surety bonds, collateral securities, or letters of credit to protect the state against loss in the event of insolvency or liquidation of the institution or for any other cause. Deposits are insured by the Federal Deposit Insurance Corporation (FDIC) up to \$250 thousand or collateralized with securities held by the state or its agent in the State Treasurer's name as custodian.

As of June 30, 2012, the carrying amount of the Systems' deposits was \$38.739 million and the bank balance was \$54.375 million.

Investments

Custodial credit risk for investments is the risk that, in the event of a failure of the counterparty, the Systems will not be able to recover the value of the investments or collateral securities that are in the possession of an outside party. Investing for the Systems is governed by Section 16, Article X of the South Carolina Constitution and Section 9-1-1310(B) and Title 9 Section 16 of the South Carolina Code of Laws. Funds held in trust for the Retirement Systems may be invested and reinvested in a variety of instruments including, but not limited to, fixed income instruments of the United States, foreign fixed income obligations, swaps, forward contracts, futures and options, domestic and international equity securities, private equity, real estate, and fund of funds.

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. While the Systems' have no formal interest rate risk policy, interest rate risk is managed within the portfolio using effective duration, which is a measure of the price sensitivity of a bond or a portfolio of bonds to interest rate movements given a 100 basis point change in interest rates. Effective duration takes into account that expected cash flows will fluctuate as interest rates change and provides a measure of risk that changes proportionately with market rates. Within the investment policy, operational guidelines specify the degree of interest rate risk taken versus the benchmark within each fixed income portfolio.

The Systems invest in mortgage-backed securities which are reported at fair value in the Statement of Plan Net Assets and are based on cash flows from principal and interest payments of the underlying mortgages. These securities are sensitive to prepayments, which are likely in an environment of declining interest rates, and thereby reduce the value of the security.

State of South Carolina

The Systems invest in these securities to diversify the fixed income portfolio and minimize risk. Disclosures for interest rate risk at June 30, 2012, are noted below (dollar amounts expressed in thousands):

Investment Type	Fair Value	Effective Duration
Short Term Investments		
Short Term Investment Funds (U.S. Regulated)	\$ 782,489	0.08

Credit Risk of Debt Securities

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations to the Systems. As a matter of practice, there are no overarching limitations for credit risk exposures within the overall fixed income portfolio. Each individual portfolio within fixed income is managed in accordance with operational guidelines that are specific as to permissible credit quality ranges, exposure levels within individual quality tiers, and average credit quality. Within high yield portfolios, a quality rating of lower than C is not permissible in any of the fixed income guidelines except in those circumstances of downgrades subsequent to purchase, in which case the investment manager is responsible for communicating the downgrade to the Retirement System Investment Commission's consultant and staff. The Systems' fixed income investments were rated by Moody's and are presented below (expressed in thousands):

Investment Type and Fair Value	AAA	AA	A	BAA	BA	В	CAA	CA	NR^1

¹Not Rated represents securities that were either not rated or had a withdrawn rating.

Concentration of Credit Risk -Investments

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer. The Systems' policy for reducing this risk is to comply with the Statement of Investment Objectives and Policies as amended and adopted by the Commission which states that "except that no limitations on issues and issuers shall apply to obligations of the U.S. Government and Federal Agencies, the domestic fixed income portfolio shall contain no more than 6 percent exposure to any single issuer." As of June 30, 2012 there is no single issuer exposure within the portfolio that comprises 5 percent or more of the overall portfolio. Therefore, there is no concentration of credit risk.

Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates will adversely impact the fair value of an investment. The Systems participate in foreign markets to diversify assets, reduce risk and enhance returns. Exposure to foreign investments has, to date, been achieved synthetically using financial futures, forwards and swaps. Currency forwards are used to manage currency fluctuations and are permitted by investment policy. Policy forbids speculating in forwards and other derivatives.

The table below presents the Systems' exposure to foreign currency risk in U.S. dollars as of June 30, 2012 (expressed in thousands):

Currency	Cash & Cash Equivalents	orward ontracts	utures ontracts	Private Equity								Alternative Investments		Fixed ncome

Derivatives

Derivatives are financial instruments whose value is derived from underlying assets or data. All of the Systems' derivatives are considered investments. Excluding futures, derivatives generally take the form of contracts in which two parties agree to make payments at a later date based on the value of specific assets or indices. Through certain collective trust funds, the Systems may invest in various derivative financial instruments such as futures and options thereon; forward foreign currency contracts; options; interest rate, currency, equity, index, and total return swaps; interest-only strips; and CMOs to enhance the performance and reduce volatility.

To date, the primary reasons for the Retirement Investment Commission's use of derivative contracts have pertained to their ability to facilitate changes to the asset allocation of the total plan and for their low cost of implementation. The Commission uses derivatives for several reasons:

- Asset Allocation: In many cases, synthetic exposures (using derivatives) are placeholders until managers are hired
 and funded. In time, the Commission may substitute traditional managers for much of the synthetic exposure
 currently in the portfolio. Efficient markets dictate that in some asset classes, synthetics are the best way to achieve
 exposure.
- Risk Management: Derivatives allow investors the ability to swiftly and efficiently increase or decrease exposures in order to manage portfolio risk.
- Cost: A synthetic (derivative) solution is often the least expensive way to gain exposure to an asset class or to
 manage portfolio risk. Derivatives are more beneficial in each of the three major measures of cost: commission
 costs, market impact of trading, and opportunity costs.

Futures are contractual obligations that require the buyer (seller) to buy (sell) assets at a predetermined date at a predetermined price. These contracts are standardized and traded on an organized exchange with gains and losses settled daily thereby significantly reducing credit and default risk. Gains and losses are included in the net appreciation/(depreciation) in the fair value of investments total of the Statement of Changes in Plan Net Assets. To comply with the requirements of multiple exchanges, securities in the amount of \$120.214 million of various GNMA's were held in trust by the clearing brokers on June 30, 2012, to satisfy the required margin amount to establish the Systems' futures exposure.

The table below presents the classification of the Systems' derivatives at June 30, 2012 (expressed in thousands):

	Changes in Fair Va	ılue		Fair Value at June 30, 2012					
	Classification	Ga	uin/(Loss)	Classification	A	mount			
Investment derivatives:					<u> </u>				
Futures Contracts	Net appreciation/(depreciation)	\$	(55,387)	Alternative Investments	\$	19,735			
Forward Contracts	Net appreciation/(depreciation)		11,193	Cash & Cash Equivalents		905			
Swaps	Net appreciation/(depreciation)		93,592	Alternative Investments		21,975			
Options	Net appreciation/(depreciation)		62,398	Alternative Investments		52,572			

As of June 30, 2012, the Systems had the following exposure via futures contracts (dollar amounts expressed in thousands):

Futures Contracts	Expiration	Long/Short	Quantity	Notional Value*
MTF CAC40 10EU	July 2012	Long	1,284	\$ 52,012
EURX DAX INDEX	September 2012	Long	226	45,971

Total Small Cap Equity				(179,283)
GOLD 100 OZ FUT	August 2012	Long	309	49,570
Total Commodities				49,570
Totals				\$ 1,689,171

^{*} Notional value is the nominal or face amount that is used to calculate payments made on derivative instruments (futures, forwards, swaps, etc.). This amount generally does not change hands and is thus referred to as notional. The notional amount represents the economic equivalent to an investment in the physical securities represented by the derivative contract.

Forwards are contractual obligations that require the delivery of assets at a fixed price on a predetermined date. These contracts are "over-the-counter" (OTC) instruments, meaning they are not traded on an organized exchange. Currency forwards gains and losses are included in the net appreciation/(depreciation) in the fair value of investments total of the Statement of Changes in Plan Net Assets. As of June 30, 2012, the Systems had the following forward exposures, listed by counterparty (dollar amounts expressed in thousands):

			I	Base	
Broker	Not	tional Value	Gair	n/(Loss)	Base Exposure
HSBC Bank	\$	284,847	\$	787	13.70%
Commonwealth Bank of Australia		284,779		858	13.70%
Barclays Bank		277,398		814	13.34%
Deutshe Bank		275,744		803	13.26%
JP Morgan Chase		275,682		818	13.26%
Royal Bank of Canada		131,805		(648)	6.34%
Royal Bank of Scotland		130,899		(636)	6.30%
Citibank NA		126,757		(639)	6.10%
UBS		122,736		(623)	5.90%
Credit Suisse		122,735		(627)	5.90%
Brown Brothers Harriman		45,675		(2)	2.20%
Totals	\$	2,079,057	\$	905	100.00%

The Systems has entered into various swap agreements to manage risk exposure. Swaps are OTC agreements to exchange a series of cash flows according to specified terms. The underlying asset can be an interest rate, an exchange rate, a commodity price or any other index.

Total return swaps are primarily used to efficiently achieve a target asset allocation. Exposures to an asset class are typically gained by paying a reference rate such as LIBOR, plus or minus a spread, in exchange for the risk and returns of a desired market index. Similarly, exposures can be reduced by receiving a reference rate in exchange for the economic risks and returns of an index.

Counterparty risk, or default risk, is the risk that a party will not honor its contractual obligations. The Systems seeks to actively manage its counterparty risk by thorough analysis and evaluation of all potential counterparties by investment staff and the independent overlay manager. Risk is further minimized through diversification among counterparties with high credit ratings and collateralizing unrealized gains and losses. The Systems currently does not participate in a master netting agreement. Unrealized gains and losses are not netted across instrument types.

The table below reflects the counterparty credit ratings at June 30, 2012, for currency forwards and swap agreements (expressed in thousands):

Quality Rating	For	Forwards		Swaps		Options		Total		
Aaa	\$	(636)	\$	_	\$	_	\$	(636)		
Aa1		210		_		_		210		
Aa3		1,785						1,785		
A1		814				27,477		28,291		
A2		(627)		21,975				21,348		
A3		_				21,152		21,152		
Baa2		(639)				3,943		3,304		
NR		(2)						(2)		
Total subject to credit risk	\$	905	\$	21,975	\$	52,572	\$	75,452		

Swap market value (or notional value) is calculated based on the actual index value of the benchmark index multiplied by the number of index units. The index value is the level or price of the benchmark index. The index units were determined at commencement of the swap and are detailed in the term sheet. At June 30, 2012, the Systems held swaps as shown in the table below (amounts expressed in thousands):

				Maturity	,	urrent	Ga	III (LOSS)
Counterparty	Total Return Swaps	SCRS Pays	SCRS Receives	Date	N	Notional		ce Trade
Societe Generale	DJ-UBS Commodities TR	3 month T Bill plus 9 bps	DJ-UBS Commodities TR	8/31/12	\$	279,892	\$	(59,814)
Societe Generale	DJ-UBS Commodities TR	3 month T Bill plus 10 bps	DJ-UBS Commodities TR	2/28/13		142,698		(13,247)
	Total Swap Exposures				\$	422,590	\$	(73,061)

Options are exchange traded agreements between two parties for a future transaction on an underlying asset at a reference or strike price. The buyer of an option has the right, but not the obligation, to transact. The seller of an option has the obligation to transact if forced by the buyer. The price of an option is derived by taking the difference in the underlying asset and the strike price plus a premium for the remaining time until expiration. At June 30, 2012, the Systems held swaps as shown in the table below (amounts expressed in thousands):

					in (Loss)
Option Stategy	Expiration	Index Counterparty		Sinc	ce Trade

	Total Options V	/alue		\$	52,572

The Buffered Return Accelerated Value Equity (BRAVE) option position consists of three parts: a long call, a short call and a short put. By employing this strategy, the Systems gain immediate market exposure to the underlying asset class. These positions also offer sizeable downside protection in exchange for limiting the maximum upside return. These positions allow the Systems to have exposure to various markets at little or no underlying cost, offering a return stream that is based on the performance of an underlying index.

Alternative Investments

The Alternatives category includes exposure to private equity, global tactical asset allocation, absolute return, opportunistic credit, real estate, derivatives and strategic partnerships. Private equity investments are normally structured as limited partnerships. In this structure, the Systems is one of several limited partners, while the investment manager serves as the general partner. Investing in limited partnerships legally obligates the Systems to invest the committed amount until the investment is fully funded or contractual investment period has expired. All other asset classes within the Alternatives category may be housed in a variety of legal structures. The Systems established several strategic partnerships to gain access to the best ideas of the investment manager, to receive favorable economics, and to efficiently take advantage of market opportunities. Investments within the strategic partnership accounts include allocations to private equity, opportunistic

State of South Carolina

credit, real estate, absolute return strategies and cash. The Systems' allocation to opportunistic credit is designed to take advantage of the dislocations that have occurred in the credit markets. The Systems' intent is to access superior risk-adjusted returns through a variety of different credit strategies.

Investment Commitments

The Systems entered into contractual agreements with numerous alternative investment managers and is committed for future funding of private equity, real estate, and opportunistic credit limited partnerships. As of June 30, 2012, the Systems had committed to fund various limited partnerships in the amount of \$3.482 billion (US dollars) and €278.000 million (Euros). The total unfunded commitment as of June 30, 2012, was \$1.469 billion (US dollars) and €84.000 million (Euros). The total remaining commitment adjusted for cash flows as of September 21, 2012 is \$1.402 billion (US dollars) and €81.000 million (Euros). In addition, although legal contractual agreements in place do not necessarily dictate authorized commitment amounts, various other alternative investment fundings will be deployed at the full discretion of the Retirement System Investment Commission through the use of the strategic partnership accounts. These underlying investments include hedge funds, private equity, real estate, opportunistic credit, short duration fixed income, commodities, and high yield fixed income.

Securities Lending

Through a custodial agent, the Systems participate in a securities lending program whereby securities are loaned for the purpose of generating additional income. The Systems lends securities from its investment portfolios on a collateralized basis to third parties, primarily financial institutions. The market value of the required collateral must initially meet or exceed 102 percent of the market value of the securities loaned, providing a margin against a decline in the market value of the collateral, and requires additional collateral if the collateral value falls below 100 percent.

There are no restrictions on the amount of securities that may be loaned. The types of securities available for loan during the year ended June 30, 2012, included U.S. Government securities, U.S. Government agencies, corporate bonds and equities. The contractual agreement with the Systems' custodial bank provides indemnification in the event the borrower fails to return the securities lent or fails to pay the Systems income distribution by the securities' issuers while the securities are on loan. Cash and U.S. Government securities were received as collateral for these loans. The Systems cannot pledge or sell collateral securities without a borrower default. The Systems invests cash collateral received; accordingly, investments made with cash collateral appear as an asset. A corresponding liability is recorded as the Systems must return the cash collateral to the borrower upon the expiration of the loan.

At June 30, 2012, the fair value of securities on loan was \$270.836 million. The fair value of the invested cash collateral was \$184.025 million. Securities lending obligations at June 30, 2012, were \$275.896 million with the unrealized loss in invested cash collateral of \$91.871 million reported as investment income and net appreciation in investments in the Statement of Changes in Plan Net Assets. This unrealized loss is due to certain Lehman bonds held by the securities lending program. During the fiscal year, the Systems received a \$7.800 million settlement distribution in relation to a Lehman creditor-payment plan approved by the U.S. Bankruptcy Court. This distribution was applied to the amortized costs of the Lehman bonds. The custodial bank's Securities Lending group sold approximately \$44.000 million of these bonds with proceeds of \$10.700 million which resulted in a realized loss of \$30.770 million. This loss is being held in the securities lending collateral pool as an undistributed loss. Subsequent to June 30, 2012, the custodian banks' Securities Lending group sold the remaining Lehman bonds. The Retirement System Investment Commission continues to evaluate the securities lending program in order to minimize risk, enhance performance and ensure a cost effective fee structure is in place.

With regard to custodial credit risk, the Systems' cash collateral invested is held by the counterparty and is uninsured. All securities loaned can be terminated on demand by either the Systems or the borrower. At year end the average number of days the loans were outstanding was three days. Except as explained in the preceding paragraph, at June 30, 2012, there had been no losses resulting from borrower defaults and the Systems had no credit risk exposure to borrowers because the amounts the Systems owed the borrowers exceeded the amounts the borrowers owed the Systems.

The following table presents the fair value (expressed in thousands) of the underlying securities and the total collateral received for securities on loan at June 30, 2012:

\$	93 \$ 142,720

f. Other Post-Employment Benefit Trust Funds

The State Treasurer is the custodian and investment manager of all deposits and investments of the South Carolina Retiree Health Insurance Trust Fund and the Long-term Disability Insurance Trust Fund (the Trusts).

Custodial Credit Risk

Deposits

Custodial credit risk for deposits is the risk that in the event of a depository financial institution's failure, the Trusts' deposits may not be recovered. As prescribed by law, the State Treasurer is the custodian of all deposits and is responsible for securing all deposits held by banks or savings and loan associations. These deposits must be secured by deposit insurance, surety bonds, collateral securities, or letters of credit to protect the State against loss in the event of insolvency or liquidation of the institution, or for any other cause. As of June 30, 2012, the Trusts' had no cash on deposit with banks. All cash reported was held in the cash management pool by the State Treasurer's Office.

Investments

Custodial credit risk for investments is the risk that in the event of a failure of the counterparty to a transaction, the State will not be able to recover the value of investments or collateral securities that are in possession of an outside party. All of the State Treasurer's investments are fully insured or collateralized.

In accordance with State Law, the Trusts may invest in a variety of instruments including obligations of the United States and its agencies and securities fully guaranteed by the United States, certain corporate obligations, certain shares of Federal savings and loan associations and State chartered savings and loan associations, and collateralized repurchase agreements. All investments are required to be insured or registered, or held by the State or its agent in the name of the State Treasurer, as custodian.

With respect to investments in the State internal cash management pool, all of the State Treasurer's investments are insured or registered or are investments for which the securities are held by the State or its agents in the State's name.

Credit Risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations to the State. The State Treasurer's credit risk policy mitigates potential for loss of principal by purchasing only high investment grade fixed-income securities. In the event that the rating of a security falls below investment grade, that security may continue to be held contingent upon an evaluation of the longer term investment merits of the security. As of June 30, 2012, the Trusts' debt investments were rated by Standard & Poor's as follows (expressed in thousands):

Investment Type and Fair Value		AAA		AA		A / A1	BBB		
U.S. agencies	\$	_	\$	107,129	\$	_	\$	_	
Mortgage backed obligations		_		17,478		_		_

Totals	\$	5,015	\$	136,008	\$	253,526	\$	194,568	

State of South Carolina

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The State Treasurer's policy does not specifically address interest rate risk. Its objectives for preservation of capital and maintenance of adequate liquidity focus the management of interest rate sensitivity on investing in securities with a range of maturities from one day to thirty years. At June 30, 2012, the maturities of the securities that will mature were limited according to the following segmented time distribution (expressed in thousands):

		Investment Maturities (in years)										
Investment Type	Fair Value	Less than 1	1 - 5	6 - 10	More than 10							
U.S. Agencies	\$ 107,129	\$ —	\$ 2,853	\$ 19,653	\$ 84,623							
Collateralized mortgage obligations	17,478	_	_	814	16,664							
Corporate bonds	313,930	46,134	99,775	161,216	6,805							
Municipal bonds	2,177	_	2,177		_							
Repurchase agreements	53,075	53,075	_	_	_							
Commercial paper	95,328	95,328										
Totals	\$ 589,117	\$ 194,537	\$ 104,805	\$ 181,683	\$ 108,092							

Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investments in a single issuer. The State's policy for reducing the risk is to diversify and limit exposure to any single issuer to no more than 5%, except for United States Treasury and agency obligations.

Securities Lending

The Trusts participate in the Securities Lending Program as described in subsection c. The following table presents the fair value (expressed in thousands) of the underlying securities and the total collateral received for securities on loan at June 30, 2012:

	A	mount
Securities lent for cash collateral:		
Corporate bonds	\$	11,593
Total for cash collateral	\$	11,593
Cash collateral invested:		
Repurchase agreements	\$	302
Asset backed securities		1,939

Governmental funds report deferred revenue in connection with receivables for revenues that are not considered to be available to liquidate liabilities of the current period. Governmental funds also defer revenue recognition in connection with resources that have been received, but not yet earned. The components of deferred revenue and unearned revenue in the governmental funds (expressed in thousands) at June 30, 2012, were as follows:

					Gov	Total ernmental
	Un	available	U	nearned		Funds
Taxes	\$	1,125	\$	22,210	\$	23,335
Federal grants		20,764		105,405		126,169

Lottery Commission		262	

At June 30, 2012, the primary government had outstanding construction commitments totaling \$731.944 million for capital projects in progress. In addition, outstanding construction commitments at that date totaled \$85.670 million for significant permanent improvement projects that will not increase State assets. Projects that will not be capitalized as State assets upon completion include projects for replacements, repairs, and renovations to existing facilities. In addition, the primary government had outstanding commitments totaling \$3.475 million at June 30, 2012, related to information technology projects.

Outstanding construction commitments for major discretely presented component units were \$3.972 billion for the Public Service Authority at December 31, 2011 and \$63.525 million for the State Ports Authority at June 30, 2012.

The total interest expense incurred by the State's enterprise funds during the current fiscal year was \$136.078 million, of which \$9.311 million was included as part of the cost of capital assets under construction, net of interest earnings. The State Ports Authority, a major discretely presented component unit, incurred total interest costs of \$9.750 million during its fiscal year ended June 30, 2012, of which \$8.299 million was included as part of the cost of capital assets under construction.

NOTE 8: RETIREMENT PLANS

a. Plan Descriptions

The South Carolina Retirement Systems (the Systems), a division of the State Budget and Control Board, administers five defined benefit retirement plans: the South Carolina Retirement System (SCRS), the South Carolina Police Officers' Retirement System (PORS), the Retirement System for Members of the General Assembly of the State of South Carolina (GARS), the Retirement System for Judges and Solicitors of the State of South Carolina (JSRS), and the National Guard Retirement System (NGPS). The Systems issues a publicly available Comprehensive Annual Financial Report that includes required supplementary information for all five plans. The report may be obtained by writing to:

South Carolina Retirement Systems PO Box 11960 Columbia, South Carolina 29211-1960 www.retirement.sc.gov

SCRS, established by Section 9-1-20 of the South Carolina Code of Laws, is a cost-sharing multiple-employer defined benefit pension plan that benefits employees of public schools, the State, and its political subdivisions. Membership is required as a condition of employment, unless exempted by State law. Both employers and employees must contribute. Benefits vest after five years of service. Vested members, who retire at age sixty-five or with twenty-eight years of service at any age, receive an annual benefit, payable monthly, for life. The benefit is based on length of service and average final compensation, an annualized average of the employee's highest twelve consecutive quarters' compensation. The annual benefit amount is 1.82% of average final compensation times years of service. Reduced benefits are payable at

age 55 with 25 years of service credit. A member is eligible to receive a reduced deferred annuity at age 60 with 5 years of earned service.

PORS, established by Section 9-11-20 of the South Carolina Code of Laws, is a cost-sharing multiple-employer defined benefit pension plan that benefits police officers and fire fighters employed by the State or its political subdivisions. Membership is required as a condition of employment, unless exempted by State law. Both employers and employees must contribute. Benefits vest after five years of service. A monthly pension is payable at age fifty-five for members who retire with five years earned service or with 25 years of service regardless of age. The benefit is based on length of service and average final compensation, an annualized average of the employee's highest twelve consecutive quarters' compensation. The annual benefit amount is 2.14% of average final compensation times years of service.

GARS, established by Section 9-9-20 of the South Carolina Code of Laws, is a single-employer defined benefit pension plan that benefits members of the South Carolina General Assembly. Membership is required as a condition of taking office as a member of the General Assembly, unless exempted by State law. Both the members of the General Assembly and the State must contribute. Benefits vest after eight years of service. Vested members, who retire at age sixty or at any age with thirty years of service, receive an annual benefit, payable monthly, for life. In addition, a member at age seventy or with thirty years of service is eligible to retire and draw an annuity while continuing to serve in the General Assembly. The annual benefit amount is 4.82% of earnable compensation times years of service. Earnable compensation is defined as forty days' pay at the rate currently paid to members of the General Assembly plus \$12 thousand.

JSRS, established by Section 9-8-20 of the South Carolina Code of Laws, is a single-employer defined benefit pension plan that benefits the judges, solicitors, and circuit public defenders of the State. Membership is required as a condition of taking office, unless exempted by State law. Both judges and the State must contribute. Benefits vest after ten years of service in a position as a judge and eight years in a position as a solicitor or circuit public defender. Members may retire at age seventy with fifteen years of service, at age sixty-five with twenty years of service, at age sixty-five with four years in a JSRS position and twenty-five years other service with the State, twenty-five years of service regardless of age for a judge or twenty-four years of service for a solicitor or circuit public defender regardless of age. Members are allowed to retire and draw an annuity while continuing to serve. Members receive a retirement benefit equal to 71.3% of the current active salary of the position occupied at retirement.

The National Guard Retirement System, established by Section 9-10-30 of the South Carolina Code of Laws, is a single employer defined benefit pension plan that provides benefits to National Guard members who served in South Carolina. National Guard members are considered to be federal government employees. The federal government pays Guard members' drill pay and summer camp pay. In accordance with State law, the State's General Fund pays Guard members' salaries only if the Governor activates the National Guard for service to the State. The pension benefit that the State provides is intended only to supplement the retirement benefit that Guard members receive from the federal government. Members who retire at age sixty with twenty years of military service, including at least fifteen years of South Carolina National Guard duty, ten of which immediately precede retirement, and who have received an honorable discharge, are entitled to monthly pension benefits. The pension amount is equal to \$50 per month for twenty years of creditable service with an additional \$5 per month for each additional year of service, provided that the total pension shall not exceed \$100 per month.

Information regarding the number of participating employers and active members as of June 30, 2012, is as follows (dollars expressed in thousands):

	SCRS		PORS		GARS		JSRS	NGPS
State and school districts			 					
Number of employers		227	112		2		3	1
Annual covered payroll	\$	5,400,748	\$ 353,523	\$	3,162	\$	16,422	N/A a
Average number of contributing members		132,699	9,496		170		144	N/A b
Other participating employers								
Number of employers		579	327		_		_	_
Annual covered payroll	\$	1,981,636	\$ 692,950	\$	_	\$		\$ —
Average number of contributing members		53,118	16,688		_		_	_

^a Annual covered payroll is not applicable for NGPS because benefits are based on years of service.

The plans provide retirement, death, and disability benefits to State employees; public school employees; and employees of counties, municipalities, and certain other State political subdivisions. The NGPS provides retirement benefits to members that served in the South Carolina National Guard. Each plan is independent. Assets of each plan may be used only to benefit participants of that plan.

^b Members do not contribute; average number of members is 12,097.

b. Summary of Significant Accounting Policies—Basis of Accounting and Valuation of Investments

The financial statements of the previously-described plans are prepared using the accrual basis of accounting. Employee contributions are recognized in the period in which the contributions are due. Employer contributions to each plan are recognized when due and the employer has made a formal commitment to provide the contributions. Retirement benefits and refunded expenses are recognized when due and payable in accordance with the terms of each plan.

Note 1f specifies the method used to value pension trust fund investments.

c. Funding Policies

Article X, Section 16 of the South Carolina Constitution requires that all State-operated retirement plans be funded on a sound actuarial basis. Title 9 of the South Carolina Code of Laws prescribes requirements relating to membership, benefits, and employee/employer contributions for each plan. The following paragraphs summarize those requirements.

By law, employee contribution requirements for the fiscal year ended June 30, 2012, were as follows:

Plan	Rate
SCRS	6.5% of earnable compensation
PORS	6.5% of earnable compensation
GARS	10.0% of earnable compensation
JSRS	10.0% of earnable compensation
NGPS	Non-contributory

Actuarially determined employer contribution rates, expressed as percentages of compensation, for the fiscal year ended June 30, 2012, were as follows:

Plan	Rate
SCRS	9.39%
PORS	11.53%
GARS	76.06%
JSRS	45.09%

The State appropriated \$3.937 million to fund the NGPS actuarially determined employer contribution for the fiscal year ended June 30, 2012.

Under certain conditions, new employers entering the plans are allowed up to ten years to remit matching employer contributions resulting from their employees' purchase of prior service credits. Interest is assessed annually on the unpaid balance. There were no amounts outstanding at June 30, 2012 under this type of agreement.

d. Annual Pension Cost

Annual pension cost (dollars expressed in thousands) and related actuarial data for the State's single-employer defined benefit pension plans were as follows:

	GARS	JSRS	NGPS
Annual pension cost	\$ 2,532	\$ 8,414	\$ 4,352
Employer contributions made	\$ 2,532	\$ 8,414	\$ 3,937
Actuarial valuation date	July 1, 2011	July 1, 2011	July 1, 2011
Actuarial cost method	Entry age	Entry age	Entry age
	Level dollar,	Level percent,	Level dollar,
Amortization method	closed	open	open
Remaining amortization period	16 years	30 years	21 years
	5-year	5-year	5-year
	smoothed	smoothed	smoothed
Asset valuation method	market	market	market
Actuarial assumptions:			
Investment rate of return	7.50%	7.50%	7.50%
Projected salary increases	None	3.00%	None
Assumed inflation rate	2.75%	2.75%	2.75%
Assumed cost-of-living adjustments	None	3.00%	None

The following represents the components of the net pension obligation (NPO) for the NGPS, at June 30, 2012 (expressed in thousands):

	NGPS
Actuarially required contribution (ARC)	\$ 4,539
Interest on the NPO	689
Adjustment to the ARC	(876)
Annual pension cost	4,352
Contributions made	(3,937)
Increase in NPO	415
NPO beginning of year	9,192
NPO end of year	\$ 9,607

e. Trend Information

Trend information indicates the progress made in accumulating sufficient assets to pay benefits when due.

For the cost-sharing multiple-employer defined benefit pension plans in which the State participates, the State's required contributions in dollars (expressed in thousands) and the percentages of those amounts contributed for the three latest available years were as follows. Also see Note 8f for funding status and progress.

	Fiscal Year Ended								
	June 30, 2012				June 30, 2011			June 30, 2010	
			%			%			%
	Required		Required Contributed		Required	Contributed	Required		Contributed
SCRS-State:									
Primary government	\$	270,327	100.0%	\$	252,814	100.0%	\$	255,653	100.0%
Component units		15,050	100.0%		14,231	100.0%		13,986	100.0%
PORS-State:									
Primary government		43,776	100.0%		42,699	100.0%		42,268	100.0%
Component units		85	100.0%		78	100.0%		70	100.0%

The following table presents (dollars expressed in thousands) the annual pension cost, percentage of annual pension cost contributed, and the net pension obligation for the three latest available years for the State's single-employer defined benefit plans. Also see Note 8f for funding status and progress:

	Fiscal Year Ended	Annual Pension Cost (APC)		Percentage of APC	Net Pension	
Plan	June 30			Contributed	Obligation	
GARS	2010	\$	2,598	100.00%	\$ —	
	2011		2,414	100.00%	_	
	2012		2,532	100.00%		
JSRS	2010		8,414	100.00%	_	
	2011		8,414	100.00%	_	
	2012		8,414	100.00%		
NGPS	2010		3,800	106.60%	9,348	
	2011		3,748	104.20%	9,192	
	2012		4,352	90.50%	9,607	

f. Funding Status and Progress (Unaudited)

The following schedule (dollars expressed in thousands) describes the funding progress for the SCRS and the PORS, cost-sharing multiple-employer defined benefit plans, for the three latest available years:

Plan	Actuarial Valuation Date July 1	Actuarial Value of Assets (a)	Actuarial Accrued Liability (AAL) Entry Age (b)	1	Unfunded AAL (UAAL) (b-a)	Funded Ratio (a/b)	Covered Payroll (c)	UAAL as a Percentage of Covered Payroll ((b-a)/c)
SCRS	2009	\$ 25,183,062	\$ 37,150,315	\$	11,967,253	67.8%	\$ 7,761,808	154.2%
	2010	25,400,331	38,774,029		13,373,698	65.5%	7,769,820	172.1%
	2011	25,604,823	38,011,610		12,406,787	67.4%	7,687,558	161.4%
PORS	2009	3,482,220	4,564,111		1,081,891	76.3%	1,084,154	99.8%
	2010	3,612,700	4,850,457		1,237,757	74.5%	1,076,467	115.0%
	2011	3,728,241	5,122,501		1,394,260	72.8%	1,087,587	128.2%

The following schedule (dollars expressed in thousands) describes the funding progress for the State's single-employer defined benefit plans for the three latest available years:

<u>Plan</u>	Actuarial Valuation Date July 1	Actuarial Value of Assets (a)	Actuarial Accrued Liability (AAL) Entry Age	Unfunded AAL (UAAL) (b-a)	Funded Ratio (a/b)	Covered Payroll (c)	UAAL as a Percentage of Covered Payroll ((b-a)/c)
GARS	2009	\$ 45,891	\$ 68,491	\$ 22,600	67.0%	\$ 3,854	586.4%
	2010	43,712	68,671	24,959	63.7%	3,854	647.6%
	2011	41,484	74,604	33,120	55.6%	3,854	859.4%
JSRS	2009	141,797	214,363	72,566	66.1%	18,661	388.9%
	2010	142,871	215,823	72,952	66.2%	18,661	390.9%
	2011	144,927	243,514	98,587	59.5%	18,661	528.3%

			Actuarial				UAAL as a	
			Accrued				Percentage	
	Actuarial	Actuarial	Liability	Unfunded			of	
	Valuation	Value of	(AAL)	AAL	Funded	Covered	Covered	
	Date	Assets	Entry Age	(UAAL)	Ratio	Payroll	Payroll	
Plan	July 1	(a)	(b)	(b-a)	(a/b)	(c)	((b-a)/c)	
NGPS	2009	\$ 18,600	\$ 53,421	\$ 34,821	34.8%	N/A	N/A	
	2010	19,458	54,153	34,695	35.9%	N/A	N/A	
	2011	20,138	60,388	40,250	33.3%	N/A	N/A	

Included among the measurements of long-term funding progress for defined benefit pension plans are whether a plan's funding ratio is increasing, whether a plan's unfunded liability (UAAL) as a percentage of covered payroll is decreasing, and whether the actuarial values of plan assets are increasing or decreasing over time relative to the actuarial accrued liabilities (AAL's) for benefits. The tables above present the results of those measurements.

South Carolina statute allows for retiree cost-of-living allowances (COLAs). Each July 1, eligible retired members of the SCRS and PORS will receive an automatic COLA of up to 2.0% as long as the Consumer Price Index (CPI) as of the previous December 31 was at least 2.0%. If the CPI is less than 2.0%, the COLA will equal the actual CPI. If the CPI is negative, no COLA will be granted. The Budget and Control Board, as trustees of the State's pension trust funds, may approve ad hoc COLAs of up to 2.0% in addition to the automatic COLA if certain guidelines are met.

g. Receivables and Investments

The principal components of receivables and investments (expressed in thousands) at June 30, 2012, for the plans administered by the South Carolina Retirement Systems were as follows:

		SCRS	PORS	(GARS	JSRS]	NGPS	Totals
Receivables:									
Contributions	\$	186,801	\$ 20,266	\$	24	\$ 626	\$	15	\$ 207,732

Total investments	\$	20,466,412	\$ 3,046,367	\$	28,157	\$ 114,726	\$	15,347	\$ 23,671,009

h. Teacher and Employee Retention Incentive Program

The Teacher and Employee Retention Incentive (TERI) program, established by State law, became effective January 1, 2001. The program is a deferred retirement option available to SCRS members eligible for service retirement. Upon entering the TERI program, a member's status changes from active to retired. A TERI participant agrees to continue employment with an employer participating in the system for a specified period, not to exceed five years.

TERI participants retain the same status and employment rights they held upon entering the program but are not considered active employees for purposes of the group life insurance and disability retirement programs. A TERI retiree's monthly benefits are accrued and remain in the SCRS trust account during the TERI participation period, but no interest is accrued or paid thereon. Upon termination of employment or at the end of the TERI participation period (whichever is earlier), a retiree may roll over some or all of the accumulated TERI balance into a qualified, tax-sheltered retirement plan and/or receive a lump-sum distribution.

A total of 6,986, members were participating in the TERI program at June 30, 2012. The financial activity of the program (expressed in thousands) during the fiscal year ended June 30, 2012, was as follows:

Ending balance of TERI trust accounts	\$ 385,716
TERI distributions at termination	 (148,753)
Additions	171,096
Beginning balance of TERI trust accounts	\$ 363,373

i. Defined Contribution Plan

As an alternative to membership in SCRS, certain State, public school, and higher education employees and individuals newly elected to the South Carolina General Assembly beginning with the November 2012 general election have the option to participate in the State Optional Retirement Program (State ORP). Participants in the State ORP direct the investment of their funds into a plan administered by one of four investment providers. The State assumes no liability for State ORP benefits. Rather, the benefits are the liability of the investment providers and are governed by the terms of the contracts that those providers issue. Accordingly, balances of the State ORP are not reported in the accompanying financial statements.

Under State law, contributions to the State ORP are at the same rates as for the SCRS (see Subsection c, Funding Policies). A direct remittance is required from the employers to the investment providers for the employee contribution (6.500%) and a portion of the employer contribution (5.000%). A direct remittance is also required to the SCRS for a portion of the employer contribution (4.385%) and a group life contribution (0.150%), which is retained by the SCRS. The activity for the State ORP is as follows (expressed in thousands):

Covered payroll	\$ 997,607
Employee contributions	64,844
Employer contributions	49,880

NOTE 9: POST-EMPLOYMENT BENEFITS OTHER THAN PENSIONS

a. Plan Description

In accordance with the South Carolina Code of Laws and the annual Appropriations Act, the State provides post-employment health and dental and long-term disability benefits (OPEB plans) to retired State and school district employees and their covered dependents. The OPEB plans have been determined to be cost-sharing multiple-employer defined benefit plans and are administered by the Employee Insurance Program (EIP), a part of the State Budget and Control Board (SBCB). Generally, retirees are eligible for the health and dental benefits if they have established at least ten years of retirement service credit. For new hires on May 2, 2008 and after, retirees are eligible for benefits if they have established twenty-five years of service for 100% employer funding and fifteen through twenty-four years of service for 50% employer funding. Benefits become effective when the former employee retires under a State retirement system. Basic long-term disability (BLTD) benefits are provided to active state, public school district and participating local government employees approved for disability.

b. Funding Policies

Sections 1-11-705 through 1-11-710 of the South Carolina Code of Laws of 1976, as amended, requires these post-employment healthcare and long-term disability benefits be funded though annual appropriations by the General Assembly for active employees to the EIP and participating retirees to the SBCB except the portion funded through the pension surcharge and provided from other applicable sources of the EIP for its active employees who are not funded by State General Fund appropriations. Employers participating in the healthcare plan are mandated by State statute to contribute at a rate assessed each year by the Office of the State Budget, 4.30% of annual covered payroll for fiscal year 2011-2012. The EIP sets the employer contribution rate based on a pay-as-you-go basis. The State paid \$312.641 million applicable to the surcharge included with the employer contribution for retirement benefits for the fiscal year ended June 30, 2012. The net estimated OPEB obligation at June 30, 2012 was \$417.156 million. This OPEB obligation is not recorded in the State's financial statements because the State met its contractually required contributions for the fiscal year. BLTD benefits are funded through a per person premium charged to State agencies, public school districts, and other participating local governments. The monthly premium per active employee paid to EIP was \$3.22 for the fiscal year ended June 30, 2012.

Effective May 1, 2008, the State established two trust funds through Act 195 for the purpose of funding and accounting for the employer costs of retiree health and dental insurance benefits and long-term disability insurance benefits. The South Carolina Retiree Health Insurance Trust Fund (SCRHITF) is primarily funded through the payroll surcharge. Other sources of funding include additional State appropriated dollars (\$2.375 million), accumulated EIP reserves (\$103.993 million), and income generated from investments. The Long Term Disability Insurance Trust Fund (LTDITF) is primarily funded through investment income and employer contributions.

c. Trend Information

The State's required contributions for the OPEB plans in dollars (expressed in thousands) and the percentages of those amounts contributed for the three latest available years were as follows:

					Fiscal Ye	ar Ended				
		June 30, 2012			June 30	0, 2011	June 30, 2010			
	Actuarially Required		% Contributed			% Contributed		tuarially Required	% Contributed	
SCRHI	\$	787,293	53.22%	\$	815,825	36.78%	\$	785,250	37.76%	
LTDI		9,231	73.11%		9,456	71.25%		9,590	71.43%	

d. Funding Progress

The schedule of funding progress for the OPEB plans based on the most recent actuarial valuation date is as follows (dollar amounts expressed in thousands):

OPEB Plan	Actuarial Valuation Date	ctuarial Value of Assets (a)	Actuarial Accrued Liability (b)	Unfunded Actuarial Accrued Liability (b-a)	Funded Ratio (a/b)	Covered Payroll (c)	UAAL as a Percentage of covered Payroll ([b-a]/c)
SCRHITF	June 30, 2009	\$ 439,903	\$ 9,643,577	\$ 9,203,674	5%	\$ 7,736,161	119%
SCRHITF	June 30, 2010	\$ 487,496	\$ 9,632,092	\$ 9,144,596	5%	\$ 8,045,607	114%
SCRHITF	June 30, 2011	\$ 477,124	\$ 10,625,914	\$ 10,148,790	4%	\$ 7,127,657	142%
LTDITF	June 30, 2009	\$ 29,440	\$ 23,610	\$ (5,830)	125%	\$ 8,418,750	<1%
LTDITF	June 30, 2010	\$ 32,690	\$ 25,855	\$ (6,835)	126%	\$ 8,295,065	<1%
LTDITF	June 30, 2011	\$ 33,283	\$ 24,957	\$ (8,326)	133%	\$ 7,837,796	<1%

Complete financial statements for the OPEB plans and the trust funds may be obtained by writing to:

Employee Insurance Program 1201 Main Street, Suite 360 Columbia, SC 29201.

e. Receivables and Investments

The principal components of receivables and investments (expressed in thousands) at June 30, 2012, for the OPEB plans administered by the Employee Insurance Program were as follows:

	SCRHI		LTDI	Totals		
Receivables:						
Accrued interest	\$	4,855	\$ 331	\$	5,186	
Due from other funds		43,321	\$ 	\$	43,321	
Investments and invested securities ler Domestic Debt Instruments Financial Paper Invested securities lending	ding \$	collateral: 418,871 84,414	\$ 26,300 6,457	\$	445,171 90,871	
collateral		3,532	 		3,532	
Total investments		506,817	\$ 32,757	\$	539,574	

NOTE 10: INSURANCE ACTIVITIES

a. Insurance Reserve Fund

The State generally does not purchase commercial insurance for the risks of losses for property damage, including theft of, damage to, and destruction of assets; automobile liability; tort liability; and medical professional liability. Instead, State management believes it is more economical to manage its risks internally and set aside assets for claim settlement in its Insurance Reserve Fund (IRF), within the internal service funds. The IRF services claims for risk of loss to which the State is exposed, including the following: property insurance on government owned buildings, the contents of such buildings, equipment, and automobiles; automobile liability insurance on government owned vehicles and school buses; tort liability insurance for government premises and operations; and medical professional liability for hospitals. Although the State is the predominant participant in the IRF, county and municipal governments, school districts and special purpose political subdivisions also participate. The IRF allocates the cost of providing claims servicing and claims payment by charging each participant an actuarially determined premium for the coverage provided.

The IRF reports liabilities when it is probable that a loss has occurred and the amount of that loss can be reasonably estimated. Amounts for allocated and unallocated claims adjustment expenses have been included in the calculation of the unpaid claims liability. The liability is reported net of receivables for salvage, subrogation, and reinsurance. The unpaid policy claims liability of \$244.520 million at June 30, 2012, includes a provision for reported claims and claims incurred but not reported. The liability for claims incurred but not reported is an actuarial estimate based on the most current historical claims experience. This process does not necessarily result in an exact amount. The IRF continually reviews estimates of

liabilities for incurred claims and revises those estimates as changes occur. The current year's operating statement reflects the revisions.

Changes in the balances of claims liabilities during the past two years were as follows (expressed in thousands):

Fiscal							
Year	Beginning of	of Cla	aims and			Ba	alance at
Ende d	Fiscal Yea	r Ch	anges in		Claim		Fiscal
June 30	Liability	Es	timates	Pa	ayme nts	Y	ear-End
2011	\$ 230,01	1 \$	49,436	\$	(41,573)	\$	237,874
2012	237,87	4	58,639		(51,993)		244,520

The IRF purchases aircraft and ocean marine insurance, areas in which the IRF has limited expertise. The IRF also purchases reinsurance to limit losses in the areas of property, boiler and machinery, and automobile liability. The IRF purchases reinsurance for catastrophic losses in the area of property insurance for losses above \$10.000 million per occurrence. Reinsurance permits partial recovery of losses from reinsurers; however, the IRF, as the direct insurer of the risks, remains primarily liable.

b. Employee Insurance Programs Fund

State law established the Employee Insurance Programs Fund, part of the State's internal service funds, to provide health and dental insurance coverage for eligible employees and retirees of State agencies and school districts and to provide group life and long-term disability insurance coverage to eligible active State and public school employees. The State, the predominant participant, retains the risk of loss. Under the health insurance program, participants elect coverage through either self-insured health maintenance organizations (HMO) or State self-insured plans. All dental, group life, and long-term disability coverages are provided through the State's self-insured plans. State funds and payroll deductions pay health and dental premiums for eligible State and public school employees. Agencies and school districts pay the employer share of premiums for retirees. Retirees directly pay their own share of premiums. Agencies and school districts pay the premiums for group life and long-term disability for their employees.

The Employee Insurance Programs Fund serves as the third party administrator for the Long-Term Disability Insurance Trust and the South Carolina Retiree Health Insurance Trust Fund collecting monthly premiums, processing claims, and providing other managerial and administrative responsibilities. Transfers to the LTDITF occur monthly for the Basic Long-Term Disability premiums. Likewise monthly transfers are made from the Trust to cover the cost of claims. Refer to Note 9 for more information on the outstanding liability for Basic Long-Term Disability. Similar transactions occur monthly for the SCRHITF for which claims liability information is also available in Note 9.

The Employee Insurance Programs Fund establishes claims liabilities when information before the issuance of the financial statements indicates that a liability is probable and estimable at the date of the financial statements. The calculation of the unpaid claims liability includes amounts for allocated and unallocated claims adjustment expenses. The unpaid policy claims liability of \$176.801 million at June 30, 2012, includes a provision for reported claims and for claims incurred but not reported. The Fund actuarially estimates the liability for claims incurred but not reported based on the most current historical claims experience including factors for changes in number of members and participants, inflation, award trends, and estimates of health care trend changes (cost, utilization, and intensity of services). This process does not necessarily result in an exact amount. The Fund continually reviews estimates of liabilities for incurred claims and revises those estimates as changes occur. The current year's operating statement reflects the revisions.

Of the total claims liability reported for the Employee Insurance Programs Fund at June 30, 2012, \$6.031 million relates to the HMO self-insured managed care plan liability. The State does not discount its claims liabilities for health and dental insurance coverage to present value.

Changes in the balances of claims liabilities during the past two years were as follows (expressed in thousands):

Year Ended June 30	Fi	ginning of scal Year Liability	C	laims and Changes in Estimates	 Claim Payments	alance at Fiscal ear-End
2011 2012	\$	156,969 144,879	\$	1,615,143 1,771,543	\$ (1,627,233) (1,739,621)	\$ 144,879 176,801

c. State Accident Fund

State law established the State Accident Fund, an internal service fund, to provide workers' compensation insurance coverage to State entities. Although the State is the Fund's predominant participant, counties, municipalities, and other political subdivisions of the State may also elect to participate. The State assumes the full risk for workers' compensation claims.

The Fund investigates, adjusts, and pays workers' compensation claims as awarded by the Workers' Compensation Commission for job-related accidental injury, disease, or death to covered individuals. The Fund annually bills participating entities for estimated premiums based on the entity's estimated payroll modified for claims experience. After the policy period ends, policyholders submit the details of the actual salaries paid. The Fund then adjusts the premium using the actual payroll data.

The Fund establishes claims liabilities based on estimates of the ultimate cost of claims that have been reported but not settled, and of claims that have been incurred but not reported. The claims liabilities include specific incremental claims adjustment expenses but not administrative expenses. The Fund deducts reasonably estimable amounts of salvage and subrogation and reinsurance recoverable, if any, on both settled and unsettled claims from the liability for unpaid claims. The Fund periodically recomputes claims liabilities using a variety of actuarial and statistical techniques to produce current estimates. The Fund charges or credits expense in the period when it adjusts claims liabilities. At June 30, 2012, the Fund's policy claims liability was \$235.450 million. Policy claims in the financial statements include the liabilities for claims reported but not yet paid and for claims incurred but not reported. Because actual claims costs depend on such complex factors as inflation, changes in legal doctrines, and damage awards, computation of the claims liability does not necessarily result in an exact amount.

Changes in the balances of claims liabilities during the past two years were as follows (expressed in thousands):

Fiscal			Cur						
Year	Beg	ginning of	aims and			Balance at			
Ended Fiscal Year		Ch	anges in		Claim		Fiscal		
June 30	I	Liability	Estimates		P	ayments	Year-End		
2011	\$	228,145	\$	56,251	\$	(46,606)	\$	237,790	
2012		237,790		45,688		(48,028)		235,450	

The Fund has entered into a reinsurance agreement to reduce its exposure to catastrophic losses on insured events. Losses in excess of \$1.000 million are covered up to limits of statutory liability; the Fund retains the risk for the first \$1.000 million of loss. Reinsurance reduces the Fund's exposure to losses on insured events related to State-owned aircraft in excess of \$1.000 million per occurrence up to a limit of \$9.000 million. Reinsurance permits partial recovery of losses from reinsurers; however, the Fund, as the direct insurer of the risks, remains primarily liable.

d. Patients' Compensation Fund and Medical Malpractice Liability Insurance Joint Underwriting Association

The South Carolina Medical Malpractice Patients' Compensation Fund (PCF) and the South Carolina Medical Malpractice Liability Insurance Joint Underwriting Association (JUA) were created by State law. The PCF is accounted for as a nonmajor enterprise fund, and the JUA is a nonmajor discretely presented component unit of the State. The State accounts for the PCF and the JUA as insurance enterprises because they primarily cover non-governmental entities. Accordingly, the PCF and JUA follow the guidance of FASB ASC 944, *Financial Services - Insurance*, and collectively are referred to below as "the insurance enterprises."

The JUA is responsible for payment of that portion of any covered entity's medical malpractice claim, settlement, or judgment up to \$200 thousand per incident or \$600 thousand in the aggregate for one year. The PCF is responsible for payments exceeding these thresholds. In the event that the JUA incurs a liability exceeding \$200 thousand to any person under a single occurrence, the JUA may ultimately pay the claim in full, but it generally may not pay more than \$200 thousand per year on such claim unless agreed to by the PCF's Board of Governors.

Licensed health care providers include physicians and surgeons, directors, officers and trustees of hospitals, nurses, oral surgeons, dentists, pharmacists, chiropractors, hospitals, nursing homes, and any similar category of health care providers required to obtain a license to practice in the state. All providers licensed in South Carolina are eligible to participate upon remittance of the annual assessment fees.

The State actuarially establishes claims liabilities for the insurance enterprises based on estimates of the ultimate cost of claims that have been reported but not settled, and of claims that have been incurred but not reported. The policy claims liabilities were \$112.209 million for the PCF at June 30, 2012, and \$124.891 million, for the JUA at December 31, 2011, and these amounts include a provision for claims reported but not settled and for claims incurred but not reported. Amounts for claims adjustment expenses, when applicable, have been included in the calculation of the unpaid claims liabilities of the insurance enterprises. The enterprises charge or credit expense, as appropriate, in the period when they adjust claims liabilities. The length of time for which claims costs must be estimated varies depending on the coverage involved. Because actual claims costs depend on such complex factors as medical technology, changes in doctrines of legal liability, and damage awards, the process for computing claims liabilities does not necessarily result in an exact amount. The insurance enterprises and their actuaries recompute claims liabilities annually, using a variety of actuarial and statistical techniques, to produce current estimates that reflect recent settlements, claims frequency, and other economic and social factors. A provision for inflation in the calculation of estimated future claims costs is implicit because the insurance enterprises and

their actuaries rely both on actual historical data that reflect past inflation and on other factors that are considered to be appropriate modifiers of past experience.

Changes in the balances of claims liabilities for the PCF during the past two years were as follows (expressed in thousands):

Fiscal			Curi						
Year	Beg	inning of	Cla	ims and			Balance at		
Ended June 30			Changes in Estimates		Claim Payments		Fiscal Year-End		
2011	\$	138,654	\$	956	\$	(17,517)	\$	122,093	
2012		122,093		7,730		(17,614)		112,209	

Changes in the balances of claims liabilities for the JUA during the past two years were as follows (expressed in thousands):

Fiscal					
Year Ended Dec 31	Beginning of Fiscal Year Liability	Claims and Changes in Estimates	Claim Payments	Balance at Fiscal Year-End	
2010	\$ 157,664	\$ 10,220	\$ (27,450)	\$ 140,434	
2011	140,434	10,859	(26,402)	124,891	

e. Second Injury Fund

The State accounts for the South Carolina Second Injury Fund, a nonmajor enterprise fund, as a public benefit program rather than an insurance program primarily because its participants—workers' compensation insurance carriers and self-insured employers—do not transfer their risk to the Fund. The Fund services claims in cases where an individual with a preexisting permanent physical impairment incurs a subsequent disability from injury or accident arising out of and in the course of employment. Participants of the Fund, rather than the State, are ultimately responsible for these liabilities.

The Fund collects and invests assessments received from its participants and pays claims on behalf of its participants to the extent that Fund resources are available to pay such claims. The Fund reports these activities in its statement of cash flows. In accordance with accounting principles used by claims processors, the Fund reports as revenue only that portion of assessments and interest earnings intended to cover the Fund's administrative costs, including capital costs. Likewise, the Fund records no claims expense, and it records claims liabilities only to the extent that Fund assets are available to pay such claims

Per Section 42-7-200(a) of the South Carolina Code of Laws of 1976, as amended, the Second Injury Fund is responsible for administering the Workers' Compensation Uninsured Employers' Fund. The State reports the Workers' Compensation Uninsured Employers' Fund in its Other Special Revenue Fund. The Fund issues payment of awards of workers' compensation benefits, which are unpaid because of employers who fail to acquire necessary coverage for employees. Funding for payment of awards is provided from collections of the tax on insurance carriers and self-insured persons in an amount sufficient to maintain the fund. The policy claims liability reported on the government-wide statement of net assets at June 30, 2012, was \$43.224 million.

Changes in the balances of claims liabilities during the past two years were as follows (expressed in thousands):

Year Ended June 30	Beginning of Fiscal Year Liability		Cla Ch	rent Year nims and anges in stimates	Claim yments	Balance at Fiscal Year-End		
2011	\$	35,710	\$	8,140	\$ (7,764)	\$	36,086	
2012		36,086		14,505	(7,367)		43,224	

With the ratification of the Workers' Compensation Reform Act the Second Injury Fund has been placed in "run-off" and will be terminated effective July 1, 2013. The Act provides for an orderly termination of the Fund through decreasing the assessment calculation factor, closing the acceptance of new claims, and transferring any remaining claims as of July 1, 2013 to the State Accident Fund and any remaining assets or operational liabilities to the Budget and Control Board.

f. Discretely Presented Component Unit—Public Service Authority (Santee Cooper)

The Public Service Authority (Santee Cooper), a major discretely presented component unit with a fiscal year ended December 31, is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; business interruption; and errors and omissions. The Authority purchases commercial insurance to cover these risks. Settled claims

resulting from these risks have not exceeded commercial insurance except in 2010 when settled claims resulting from the Santee River Flooding Case exceeded coverage limits and were paid by the Authority (See Note 22 for further details). Policies are subject to deductibles ranging from \$250 to \$1.000 million with the exception of named storm losses, which carry deductibles from \$1.000 million up to \$5.000 million. In addition, a \$1.400 million general liability self-insured layer exists between the Authority's primary and excess liability policies. During 2011, there were no losses incurred or reserves recorded for general liability. The Authority is exposed to additional risks specific to the utilities industry including nuclear incidents at the V.C. Summer Nuclear Station and environmental contaminations from operations of other sources of electric generation. The Authority purchases insurance coverage for these risks. During 2011, there were no losses incurred or reserves recorded for these industry specific risks.

The Authority self-insures its risks related to auto, dental, and environmental incidents that do not arise out of an insured event. Automotive exposure is up to \$2.000 million per incident. Risk exposure for the dental plan is limited by plan provisions. There have not been any third-party claims for environmental damages for calendar year 2011.

The State reports all of the Authority's risk management activities within the Public Service Authority's accounts. The State reports the Authority's claims expenses and liabilities when it is probable that a loss has occurred and the amount of the loss is reasonably estimable.

At December 31, 2011, the policy claims liabilities were \$1.612 million. Changes in the reported liability in each of the past two years were as follows (expressed in thousands):

Fiscal			Curi	rent Year				
Year	Begi	nning of	Claims and				Ba	lance at
Ended December 31		cal Year ability	Changes in Estimates				Fiscal Year-End	
2010	\$	1,753	\$	3,548	\$	(3,038)	\$	2,263
2011		2.263		1.985		(2.636)		1.612

NOTE 11: LEASES

a. Capital Leases

The State leases land, office facilities, equipment, and other assets under both capital and operating leases. The present value of future minimum capital lease payments and total minimum annual lease payments for capital leases recorded in the government-wide statement of net assets at June 30, 2012 for the primary government and the State's discretely presented component units were as follows (expressed in thousands):

Fiscal Year Ending June 30		rnmental tivities	Business-type Activities		Totals	
2013	\$	105	\$	11,601	\$	11,706
2014		95		11,315		11,410
2015		95		10,843		10,938
2016		62		9,928		9,990
2017		25		13,467		13,492
2018-2022		_		38,146		38,146
2023-2027		_		31,083		31,083
2028-2032		_		26,692		26,692
2033-2037		_		22,997		22,997
Thereafter				8,734		8,734
Total minimum payments	<u> </u>	382		184,806		185,188
Less: interest and executory costs		(64)		(83,813)		(83,877)
Present value of net minimum						
payments	\$	318	\$	100,993	\$	101,311

Fiscal Year Ending December 31	Component Unit Public Service Authority			
2012	\$	1,343		
2013		1,023		
2014		251		
Total minimum payments Less: interest and executory costs		2,617 (148)		
Present value of net minimum payments	\$	2,469		

Assets under capital leases recorded in the accompanying government-wide statement of net assets at June 30, 2012, were as follows (expressed in thousands):

		Pri	Component Unit						
			В	usiness-			Public		
		nmental		type				Service	
Assets Acquired Under Capital Leases	Acti	vities	A	ctivities		Totals		Authority	
Land and non-depreciable improvements	\$	_	\$	29,233	\$	29,233	\$	_	
Buildings and improvements		_		135,144		135,144		20,500	
Machinery and equipment		922		8,594	_	9,516			
Assets acquired under capital leases before									
accumulated amortization		922		172,971		173,893		20,500	
Less: accumulated amortization		(560)		(45,825)		(46,385)		(17,700)	
Assets acquired under capital leases, net	\$	362	\$	127,146	\$	127,508	\$	2,800	

Excluded from the amounts presented above are capital leases between the Medical University of South Carolina (MUSC), an institution included in the Higher Education Fund of the primary government, the Medical University Facilities Corporation, a non-major Enterprise Fund, and the CHS Development Company, a non-major Enterprise Fund. The outstanding balance of the capital lease obligation and its corresponding receivable are presented in the Fund statement presentation but have been eliminated in the Government-wide presentation because the Corporation and Company are identified by MUSC as blended component units. The amount of the elimination is reported on the Reconciliation of Government-wide to Fund Statements. The future minimum lease payments are to be paid through 2023 with interest approximating \$6.588 million.

Included in the Assets under capital leases is land, buildings, and equipment for which no future minimum lease payments are reported because the lease payments have been prepaid. The prepaid asset reported in the Higher Education Fund as other assets which includes prepayments for capital and operating leases has a balance of \$8.988 million as of June 30, 2012 and is being amortized over the life of the leases. Rent expense of \$346 thousand was reported for amortization in the current fiscal year.

b. Operating Leases

For the primary government's fiscal year ended June 30, 2012, minimum rental payments under operating leases were \$93.713 million and contingent rental payments were \$8.832 million. The State's contingent rental payments are primarily for copiers, with expense being determined on a cost-per-copy basis.

For the Public Service Authority, a major discretely presented component unit, minimum rental payments under operating leases for the fiscal year totaled \$4.500 million. For the State Ports Authority, a major discretely presented component unit, minimum rental payments under operating leases with terms of less than twelve months totaled \$1.238 million for the fiscal year. For the Lottery Commission, a major discretely presented component unit, minimum rental payments under operating leases for the fiscal year totaled \$760 thousand.

At June 30, 2012, future minimum payments under noncancelable operating leases with remaining terms in excess of one year were as follows (expressed in thousands):

		Component Unit			
Fiscal Year Ending June 30	rimary vernment		ottery mission		
2013	\$ 54,391	\$	636

c. Facilities and Equipment Leased to Others

At June 30, 2012, the State agencies within the primary government had leased to non-State parties certain land, facilities, or equipment having a cost of approximately \$53.256 million and related accumulated depreciation of \$13.676 million. In addition at June 30, 2012, the State Ports Authority, a major discretely presented component unit, had leased to non-State parties certain land and facilities having a cost of approximately \$11.415 million and related accumulated depreciation of \$7.837 million. Future minimum rental payments to be received at June 30, 2012, under these operating leases were as follows (expressed in thousands):

			Comp	onent Unit

NOTE 12: BONDS AND NOTES PAYABLE

a. General Obligation Bonds

General obligation bonds are backed by the full faith, credit, and taxing power of the State. General obligation bonds (expressed in thousands) outstanding at June 30, 2012, were:

Governmental Activities	
Capital improvement bonds, 3.50% to 5.50%, maturing serially through 2019	\$ 243,248
State highway bonds, 2.00% to 5.00%, maturing serially through 2023	433,266
State school facilities bonds, 4.00% to 5.00%, maturing serially through 2018	264,245
Infrastructure Bank bonds, 3.00% to 5.00%, maturing serially through 2029	45,953
State economic development bonds, 1.00% to 6.50%,	
maturing serially through 2031	377,809
Research university infrastructure bonds, 3.00% to 5.00%,	
maturing serially through 2025	162,626
Air carrier hub terminal facilities bonds, 1.00% to 4.00%,	
maturing serially through 2025	44,810
Subtotal—governmental activities	1,571,957
Business-type Activities, Higher Education Fund	
State institution bonds, 2.50% to 6.50%, maturing serially through 2031	461,607
Total—general obligation bonds payable	\$ 2,033,564

At June 30, 2012, \$6.344 million of capital improvement bonds, \$106.000 million of State highway bonds, \$42.185 million of State economic development bonds, and \$10.565 million of State research university infrastructure bonds were authorized but unissued.

Business-type Activities

At June 30, 2012, future debt service requirements (expressed in thousands) for general obligation bonds were:

	Governmental Activitie			tivities	(Higher Education Fun				
Year Ending June 30		Principal		Interest		Principal		Interest	
2013	\$	186,245	\$	63,426	\$	26,975	\$	19,091	
2014		185,255		56,127		27,495		18,344	
2015		194,150		47,641		28,275		17,352	
2016		170,045		38,604		29,395		16,165	
2017		135,435		30,857		28,210		14,998	
2018-2022		454,980		73,968		141,225		57,378	
2023-2027		160,305		11,011		120,270		29,061	
2028-2031		17,435		1,066		50,755		8,438	
Total debt service									
requirements		1,503,850	\$	322,700		452,600	\$	180,827	
Unamortized premiums		93,678				12,021			
Deferred amount on refunding		(25,571)				(3,014)			
Total principal outstanding	\$	1,571,957			\$	461,607			

The Department of Transportation Special Revenue Fund, a major governmental fund, pays the debt service for the State highway bonds. The Local Government Infrastructure Fund, a major governmental fund, pays the debt service for the Infrastructure Bank bonds. The General Fund pays the debt service for the other general obligation bonds recorded for governmental activities. The Higher Education Fund, a major enterprise fund, pays the debt service for general obligation bonds recorded in that fund.

Rather than directly limiting the amount of outstanding general obligation debt, State law imposes a limitation on annual debt service expenditures. The legal annual debt service margin at June 30, 2012, was \$43.425 million in total for all institution bonds, \$37.135 million for highway bonds, \$156.686 million for general obligation bonds excluding institution and highway bonds, \$3.568 million for economic development bonds, and \$7.465 million for research university infrastructure bonds. Excluded from the debt service limit calculations are a \$170.000 million 2010 issue of economic development bonds and a \$50.000 million 2010 issue of air carrier hub terminal facilities bonds which by State Law are not subject to the limitation on maximum annual debt service. South Carolina State University exceeded its legal debt service limit on its State institution bonds by approximately \$30 thousand at June 30, 2012. The University is adjusting tuition fees and making other corrections to cover the debt requirement

b. Limited Obligation Bonds

Limited obligation bonds are not backed by the full faith, credit, and taxing power of the State. Limited obligation bonds outstanding at June 30, 2012, which are reported in the internal service funds, totaled \$3.822 million and mature serially through 2016. Interest rates on these bonds ranged from 4.50% to 6.10%.

At June 30, 2012, there were no limited obligation bonds authorized but unissued.

The State issued limited obligation lease revenue bonds to finance the cost of capital facilities for use by certain State agencies. Pledges of lease rental payments that the agencies will pay from their governmental funds secure the bonds.

At June 30, 2012, future debt service requirements (expressed in thousands) for limited obligation bonds were:

			tal Activities rvice Funds)			
Year Ending June 30	Pr	incipal	Int	terest		
2013	\$	1,420	\$	186		
2014		1,495		110		
2015		735		32		
2016		185		8		
Total debt service requirements		3,835	\$	336		
Unamortized discounts		(13)				
Total principal outstanding	\$	3,822				

The internal service funds pay all debt service for the lease revenue bonds.

c. Revenue, Infrastructure Bank, and Other Bonds and Notes

Revenue debt is not backed by the full faith, credit, and taxing power of the State. Revenue, Infrastructure Bank, and other bonds and notes (expressed in thousands) outstanding at June 30, 2012, were:

Debt Derivatives

Transportation Infrastructure Bank

The Transportation Infrastructure Bank, reported in the Local Government Infrastructure Fund, a major governmental fund, is a party to interest rate exchange agreements with a termination date of October 1, 2031, to enhance the interest cost savings and offset changes in tax-exempt variable interest rates on certain revenue bonds. Under these variable-to-fixed interest rate exchanges, for the 2003B-1 and 2003B-3 agreements, the Bank pays a 3.859% fixed rate on a notional amount, having an amortization schedule equal to that of the revenue bonds. For the 2003B-2 agreement, the Bank pays a 3.932% fixed rate on a notional amount, having an amortization schedule equal to that of the revenue bond. In return, the counterparties of the agreement pay the Bank a variable rate equal to 67.0% of the one-month London Interbank Offered Rate (LIBOR), plus 0.75%, or 75.0% of the one-month LIBOR plus 0.885%, depending on the participating bank, on such notional amount. For the fiscal year ended June 30, 2012, the Bank made variable bond interest payments of \$3.464 million and fixed rate payments on the exchange agreement of \$13.958 million. The Bank received variable swap payments on the exchange agreement of \$581 thousand. The June 30, 2012, mark to market value of this swap was negative \$47.527 million, representing an increase in fair value of \$15.564 million from prior year. The deferred outflow of the interest rate swap and the derivative instrument liability are shown on the statement of net assets.

University Medical Associates

University Medical Associates of the Medical University of South Carolina (UMA) is a blended component unit and nonmajor enterprise fund. UMA entered into an interest rate swap agreement with a financial institution to modify interest rates on certain bonds by converting the variable interest rate into a rate equal to 2.98% plus 8% of the one-month LIBOR rate. The interest rate swap agreement matures on July 1, 2037. The notional amount as of June 30, 2012 is \$62.085 million, which equals the principal outstanding. Under the swap agreement, UMA pays the financial institution a fixed interest payment of 2.10% and receives a variable payment equal to 67.0% of the one-month LIBOR rate. The variable rate in effect at June 30, 2012 was 0.16%. The fair value of this swap, estimated using the zero-coupon method, was negative \$5.871 million as of June 30, 2012. The negative fair value of the cash flow hedge swap has been recorded on the Statement of Net Assets as an asset and offset by an identical amount for the deferred inflows from this swap since the swap is considered an effective hedging instrument. The decrease in the fair value of the cash flow hedge swap from June 30, 2011 of \$8.786 million is not recognized in these financial statements.

In addition, UMA has entered into an interest rate swap agreement with a financial institution to modify interest rates on an outstanding term loan in an effort to convert its variable rate to a synthetic fixed rate of 3.87%. The swap agreement related to the term loan matures January 2, 2019. The notional amount as of June 30, 2012 was \$24.961 million, which equaled the principal outstanding on the term loan. Under this swap agreement, UMA pays the financial institution a fixed interest payment of 3.87% on the term loan. UMA receives a variable payment equal to the one-month LIBOR rate plus 1.30% on the swap associated with the taxable term loan. The variable rate for the term loan in effect at June 30, 2012 was 1.54%. The fair value of the term loan swap, estimated using the zero-coupon method, was negative \$1.486 million as of June 30, 2012. The negative fair value of the term loan cash flow hedge swap has been recorded on the Statement of Net Assets as an asset and offset by an identical amount for the deferred outflows from this swap since the swap is considered an effective hedging instrument. The decrease in the fair value of the term loan cash flow hedge swap from June 30, 2011 of \$744 thousand is not recognized in these financial statements.

As of June 30, 2012, debt service requirements of the UMA variable rate debt and net swap payments (expressed in thousands), assuming current interest rates remain the same for their term, were as follows:

Year Ending		Variable 1	Rate Debt		Inter	est Rate

State Ports Authority

The State Ports Authority, a major discretely presented component unit, is a party in two interest swap contracts intended to manage interest expense of fixed-rate debt. The contracts provide that the Authority will pay the swap provider interest on a notional amount at a fixed rate of 3.67%, and the swap provider will pay the Authority at a rate based on 70.0% of the one-month LIBOR on such notional amount. The notional amounts at June 30, 2012 were \$60.113 million and \$25.913 million. The swap contracts expire on July 1, 2026.

In addition, the Authority entered into a third interest swap contract intended to manage interest expense and offset the effects of its other interest rate swaps previously executed. This agreement provides that the Authority will pay the swap provider interest on a notional amount at a variable rate equal to the SIFMA Municipal Swap Index rate on the first day of each month through expiration on July 1, 2026. The swap provider will pay the Authority at a fixed rate of 3.51%. The notional amount under this swap agreement is \$88.875 million at June 30, 2012.

As of June 30, 2012, the swaps had a negative fair value of approximately \$2.916 million. The unrealized loss related to these agreements recorded at June 30, 2012 is \$688 thousand and is included in interest expense on the Statement of Activities.

Pledged Revenues for Payment of Debt

Certain revenue bonds require the individual business-type activities to provide sufficient revenue to pay debt service and to fund all necessary expenses of the activities. The funds that receive the proceeds of revenue, Infrastructure Bank, and other bonds and notes have pledged revenues for payment of debt service as follows:

Primary Government:

Governmental Activities:

Infrastructure Bank bonds: fees and interest revenues recorded in the Local Government Infrastructure Fund, a major governmental fund

Heritage Trust bonds: revenues derived from a portion of State Deed Recording Fee dedicated to the Heritage Land Trust Fund

Corrections Department note: farm facility revenues Budget and Control Board bonds: loan repayments

Business-type Activities:

Higher education bonds and notes: various specific higher education revenues

State Housing Authority bonds and note: revenues of the Housing Authority Fund, a major enterprise fund

Education Assistance Authority bonds: loan repayments and United States Commissioner of Education funds in the Education Assistance Authority Fund, a major enterprise fund

Major Discretely Presented Component Units:

Public Service Authority bonds: Public Service Authority revenues State Ports Authority bonds: State Ports Authority revenues Connector 2000 Association, Inc. bonds: toll revenues

For its business-type activities, the State separately identifies amounts of pledged revenues available at June 30, 2012, in the statement of revenues, expenses, and changes in fund net assets for proprietary funds.

Debt Service Requirements

At June 30, 2012, future debt service requirements (expressed in thousands) for revenue, Infrastructure Bank, and other bonds and notes of the primary government were as follows:

	Primary Government								
	Governmen	tal Activities	Business-type Activities						
Year Ending June 30	Principal	Interest	Principal	Interest					
2013	\$ 74,736	\$ 98,524	\$ 81,843	\$ 100,674

Deferred amount on refunding	(81,129)		(42,832)						
Total principal outstanding	\$ 2,143,162		\$ 2,250,476						

The fiscal year for the Public Service Authority ends December 31 while the fiscal year for the State Ports Authority ends June 30. Both entities are major discretely presented component units. At December 31, 2011, the carrying value of the Public Service Authority's debt was \$5.161 billion while the fair value was approximately \$5.700 billion. At June 30, 2012, the carrying value of the State Ports Authority debt was \$174.957 million while the fair value was approximately \$197.266 million. The fair values were estimated using current rates available to the entities for similar borrowing arrangements and on the market rate of comparable traded debt.

During the fiscal year ended December 31, 2011, Connector 2000 Association issued capital appreciation bonds with an ultimate maturity value of \$754.185 million. These bonds are recorded in the Statement of Net Assets in the amount of \$157.677 million, which is the accreted value at December 31, 2011. Because all of the 2011 bonds are capital appreciation bonds, accretions are accounted for as interest expense and additions to principal. For purposes of the following debt service schedule, all accretions are included as principal, and no interest is shown.

As of the last reporting date of the Component Units, future debt service requirements (expressed in thousands) for bonds and notes of the State's major discretely presented component units were as follows:

Interest Expense

Borrowing is essential to the continuation of programs associated with certain entities reported within the primary government's governmental activities. The primary government reported interest expense during the fiscal year ended June 30, 2012, in governmental functions for these entities as follows (expressed in thousands):

	 Amount
General government	\$ 11,826
Transportation	127,032
Total allocated interest expense	\$ 138,858

The amount shown above in the general government function relates to bonds that a blended component unit issued.

d. Bond Anticipation Notes

At June 30, 2012, \$28.000 million in short-term general obligation bond anticipation notes were outstanding in the Higher Education Fund, a major enterprise fund. These notes are due on or before June 30, 2013.

e. Defeased Bonds

During May 2012, the State issued \$46.875 million in general obligation State capital improvement refunding bonds with an average interest rate of 4.97% to refund \$51.965 million of general obligation State capital improvement bonds (\$19.755 million of Series 1999A and \$32.210 million of Series 2004A) with an average interest rate of 3.23%. The net proceeds of \$53.931 million (after payment of \$230 thousand in issuance costs), were used for a current refunding of the Series 1999A issue, and the remainder was used to purchase United States government securities to advance refund the Series 2004A issue. The advance refunding resulted in a difference between the reacquisition price and the net carrying amount of the old debt of \$1.673 million. This difference, reported in the accompanying financial statements as a deduction from bonds payable, is being charged to operations through the year 2019 on a straight-line basis. The bonds were refunded to reduce total debt service payments over the next seven years by approximately \$2.320 million and to obtain an economic gain (difference between the present values of the old and new debt service payments) of approximately \$2.397 million.

During May 2012, the State issued \$29.860 million in general obligation State school facilities refunding bonds with an average interest rate of 5.0% to refund \$33.780 million of general obligation State school facilities bonds, Series 2002B, with an average interest rate of 3.14%. The net proceeds of \$34.696 million (after payment of \$153 thousand in issuance costs), were used to purchase United States government securities to advance refund the Series 2002B issue. The advance refunding resulted in a difference between the reacquisition price and the net carrying amount of the old debt of \$916 thousand. This difference, reported in the accompanying financial statements as a deduction from bonds payable, is being charged to operations through the year 2017 on a straight-line basis. The bonds were refunded to reduce total debt service payments over the next six years by approximately \$1.640 million and to obtain an economic gain of approximately \$1.888 million.

During May 2012, the State issued \$27.220 million in general obligation State economic development refunding bonds with an average interest rate of 4.23% to refund \$28.605 million of general obligation State economic development bonds (\$14.815 million of Series 2004A and \$13.790 million of Series 2005C) with an average interest rate of 4.42%. The net proceeds of \$31.803 million (after payment of \$142 thousand in issuance costs), were used to purchase United States government securities to advance refund the Series 2004A and Series 2005C issues. The advance refundings resulted in a difference between the reacquisition price and the net carrying amount of the old debt of \$3.272 million. This difference, reported in the accompanying financial statements as a deduction from bonds payable, is being charged to operations through the year 2029 on a straight-line basis. The bonds were refunded to reduce total debt service payments over the next seventeen years by approximately \$2.231 million and to obtain an economic gain of approximately \$2.118 million.

During May 2012, the State issued \$28.745 million in general obligation State Transportation Infrastructure Bank refunding bonds with an average interest rate of 4.57% to refund \$31.220 million of general obligation State Transportation Infrastructure Bank bonds, Series 2004A, with an average interest rate of 4.89%. The net proceeds of \$34.143 million (after payment of \$154 thousand in issuance costs), were used to purchase United States government securities to advance refund the Series 2004A issue. The advance refunding resulted in a difference between the reacquisition price and the net carrying amount of the old debt of \$2.928 million. This difference, reported in the accompanying financial statements as a deduction from bonds payable, is being charged to operations through the year 2025 on a straight-line basis. The bonds were refunded to reduce total debt service payments over the next thirteen years by approximately \$4.389 million and to obtain an economic gain of approximately \$3.846 million.

During April 2012, the State Transportation Infrastructure Bank issued \$265.965 million in revenue refunding bonds with a 3.00% to 5.00% coupon rate over the life of the issue. The net proceeds after payment of \$2.800 million in issuance costs were used to refund \$34.635 million of the Series 2001A bonds and \$253.625 million of the Series 2002A bonds. The refunding resulted in a difference between the reacquisition price and the net carrying amount of the old debt of \$6.036 million. This difference, reported in the accompanying financial statements as a deduction from bonds payable, is being charged to operations on a straight-line basis over the life of the bonds. The bonds were refunded to reduce total debt service payments by approximately \$55.335 million and to obtain an economic gain of approximately \$29.323 million.

During May 2012, the University of South Carolina issued \$21.475 million in general obligation State institution refunding bonds to partially advance refund \$23.940 million of general obligation State institution bonds (\$9.020 million of Series 1996B, \$10.585 million of Series 2002E, and \$4.335 million of Series 2003I), with an average interest rate of 4.54%. The refunding transactions resulted in a deferred loss on refunding of \$639 thousand, an aggregate debt payment reduction of \$2.878 million over the next twelve years, and an economic gain of \$2.796 million.

During May 2012, the Clemson University issued \$21.135 million in general obligation State institution refunding bonds to partially advance refund \$22.980 million of general obligation State institution bonds (\$13.000 million of Series 2002B, \$4.940 million of Series 2003B, and \$5.040 million of Series 2003F), with an average interest rate of 4.14%. The refunding transactions resulted in a deferred loss on refunding of \$872 thousand, an aggregate debt payment reduction of \$2.124 million over the next six years, and an economic gain of \$1.995 million.

During May 2012, the Medical University of South Carolina issued \$12.645 million in general obligation State institution refunding bonds to partially advance refund \$13.670 million of general obligation State institution bonds (\$2.995 million of Series 2001C, \$3.335 million of Series 2003D, and \$7.340 million of Series 2003J), with an average interest rate of 4.43%. The refunding transactions resulted in a deferred loss on refunding of \$650 thousand, an aggregate debt payment reduction of \$1.354 million over the next twelve years, and an economic gain of \$1.325 million.

During May 2012, Winthrop University issued \$13.140 million in general obligation State institution refunding bonds to affect current refundings of \$5.010 million of Series 2001A2, Series 2001B5, and 2003C issues. Remaining proceeds of \$10.747 million were used to advance refund \$9.710 million of general obligation State institution bonds (\$3.040 million of Series 2004A1 and \$6.670 million of Series 2005B), with an average interest rate of 4.18%. The refunding transactions resulted in a deferred loss on refunding of \$1.036 million, an aggregate debt payment reduction of \$1.580 million over the next ten years, and an economic gain of \$1.203 million.

During June 2012, the University of South Carolina issued \$6.350 million in Athletics Facilities revenue refunding bonds to fully advance refund Series 2002A revenue bonds. The refunding transaction resulted in a loss on refunding of \$61 thousand, an aggregate debt payment reduction of \$1.072 million over the next twenty years, and an economic gain of \$851 thousand.

During May 2012, the University of South Carolina issued \$28.110 million in 2012A revenue refunding bonds advance refund \$30.925 million of revenue bonds (\$2.275 million of Series 1999A, \$3.175 million of Series 2003B, and \$25.475 million of Series 2004A). revenue bonds. The refunding transaction resulted in a deferred loss on refunding of \$1.380 million, an aggregate debt payment reduction of \$4.667 million, and an economic gain of \$3.631 million.

During February 2012, Clemson University issued \$21.200 million in Series 2012 revenue refunding bonds to advance refund \$20.350 million of Series 2003 revenue bonds. The refunding transaction resulted in a loss on refunding of \$1.410 million, an aggregate debt payment reduction of \$2.343 million over the next seven years, and an economic gain of \$2.268 million.

During February 2012, Clemson University issued \$12.335 million in Series 2012 Athletics Facilities revenue refunding bonds for a current refunding of \$8.885 million outstanding on the Series 2001 bonds and the advance refund \$6.920 million of the Series 2003 bonds. The refunding transaction resulted in a loss on refunding of \$809 thousand, an aggregate debt payment reduction of \$4.777 million over the next twelve years, and an economic gain of \$1.424 million.

During February 2012, the College of Charleston issued \$25.630 million in 2012A revenue bonds to refund the outstanding 2002A and 2002C revenue bonds. The refunding transactions resulted in a loss on refunding of \$439 thousand, an aggregate debt payment reduction of \$6.651 million over the next twenty years, and an economic gain of \$5.033 million.

During its fiscal year ended December 31, 2011, the Public Service Authority, a major discretely presented component unit, issued \$288.515 million in 2011 Refunding Series B Bonds, with an aggregate all-in true interest cost of 2.27% to refund \$8.990 million of the 2002 Refunding Series D bonds and \$291.825 million of the 2004 Series A bonds with an average interest rate of 5.0%. The difference between the bonds issued and the outstanding balance is reported in the accompanying financial statements as a deduction from bonds payable and is being charged to operations through the year 2021 using the effective-interest method. The bonds were refunded to reduce total debt service payments over the next eleven years by approximately \$23.800 million and to obtain an economic gain of approximately \$22.600 million.

Also in its fiscal year ended December 31, 2011, the Public Service Authority issued \$135.855 million in 2011 Refunding Series C Bonds, with an aggregate all-in true interest cost of 4.63% to refund \$134.715 million of the 2002 Series B bonds and \$5.160 million of the 2011 Series A bonds with an average interest rate of 5.12%. The difference, reported in the accompanying financial statements as a deduction from bonds payable, is being charged to operations through the year 2036 using the effective-interest method. The bonds were refunded to reduce total debt service payments over the next twenty-six years by approximately \$9.400 million and to obtain an economic gain of approximately \$7.700 million.

For all defeasances involving advance refundings in the current and prior years, the securities purchased were deposited in an irrevocable trust with an escrow agent to provide for all future debt service payments on the old bonds. Accordingly, the State has not recorded the defeased bonds in the accompanying financial statements. At June 30, 2012, the following outstanding bonds of the primary government (expressed in thousands) were considered defeased:

	Governmental Activities	Business- type Activities	Totals Primary Government		
Capital improvement bonds	\$ 32,210	\$ —	\$ 32,210		
School Facilities bonds	41,710	_	41,710		
Economic Development bonds	28,605	_	28,605		
Infrastructure Bank bonds	308,595	_	308,595		
Department of Transportation bonds	359,450	_	359,450		
Tobacco Authority bonds	64,890	_	64,890		
Higher Education Fund bonds		214,345	214,345		
Totals	\$ 835,460	\$ 214,345	\$ 1,049,805		

In addition, at December 31, 2011, \$684.500 million of bonds associated with the Public Service Authority were considered defeased.

f. Arbitrage Rebate Payable

The Internal Revenue Code and arbitrage regulations issued by the Internal Revenue Service require rebate to the federal government of excess investment earnings on bond proceeds if the yield on those earnings exceeds the effective yield on the related tax-exempt bonds issued. At June 30, 2012, reported as other liabilities for governmental activities is an arbitrage rebate liability of \$651 thousand associated with the State's General Obligation Debt and a \$910 thousand arbitrage rebate liability associated with revenue bonds of the Local Government Infrastructure Fund (a major governmental fund).

q. Conduit Debt

State law authorizes issuance of certain bonds for which the State assumes no responsibility for repayment. These bonds do not appear as liabilities in the accompanying financial statements.

The Educational Facilities Authority, reported in the General Fund, issues bonds to assist nonprofit educational institutions that do not receive State appropriations in the acquisition, construction, and financing of facilities for educational programs. The bonds are payable solely from, and secured by, a lease agreement on the facilities between the Authority and the institution. When the bonds have been fully paid, the Authority conveys the title for the facility to the institution. At June 30, 2012, the outstanding balance of bonds issued was \$302.288 million.

The Jobs-Economic Development Authority, a nonmajor enterprise fund, issues industrial revenue bonds to develop and benefit business enterprises. The bonds are payable solely by revenues of the business enterprise and generally are secured by an irrevocable letter of credit. At June 30, 2012, the outstanding balance of bonds issued after June 30, 1995, was \$3.543 billion. The original amount of bonds issued prior to that date is not available.

The Housing Authority Fund, a major enterprise fund, issues certain mortgage loan notes and housing revenue bonds for developers to construct moderate to low income housing projects. The bonds are payable solely from housing rental payments received by the developer and generally are secured by an irrevocable letter of credit or bond insurance. At June 30, 2012, the outstanding balance of bonds issued was \$216.550 million.

h. Commercial Paper Notes and Letters of Credit

Note 13 Changes in Liabilities, displays the activity of commercial paper notes and lines of credit during the fiscal year ended June 30, 2012, including beginning and ending balances (if any) as well as all draws and repayments. The Public Service Authority presents its outstanding amounts as commercial paper notes, but all other amounts outstanding on lines of credit at June 30, 2012 are reported as notes payable. Other relevant information regarding these accounts is provided below.

The University Medical Associates of the Medical University of South Carolina (UMA), a blended component unit and nonmajor enterprise fund, has a line of credit with a maximum borrowing limit of \$10.000 million, on which UMA could draw for working capital. The loan bears interest at the 30-day LIBOR rate plus 1.15% and is secured by all unrestricted accounts receivable. During fiscal year ended June 30, 2012, there were no advances under this line of credit. The line of credit expired during July 2012 and was renewed with basically the same terms through July 31, 2013.

The Public Service Authority, a discretely presented component unit, has recorded a \$306.566 million liability for commercial paper notes at its fiscal year ended December 31, 2011. The paper is issued for valid corporate purposes with terms not to exceed 270 days. The Authority has a \$500.000 million revolving credit agreement to support the issuance of commercial paper. There were no borrowings under the agreement during 2011.

i. Advances from Federal Government

On December 26, 2008, the Unemployment Compensation Fund, a major enterprise fund, began to obtain advances from the Federal government in order to pay unemployment benefits due to the exhaustion of all other funds to pay benefits. These advances were obtained due to the significant increase in unemployment benefits resulting from a significant increase in the unemployment rate in the State and the extension of the period by the Federal government that benefits were paid to claimants. Section 1201 of Title XII of the Social Security Act provides that an advance from the Federal Unemployment Fund to the account of a state's unemployment trust fund is allowed if the governor of a state applies for payment for any 3-month period. Only amounts actually drawn down for benefit payments must be repaid.

At June 30, 2012, the outstanding balance of these advances was \$782.188 million. Principal payments began on September 30, 2011, with interest accruing at an interest rate of approximately 4.00% beginning on January 1, 2011. Of the balance reported, \$675.688 million is considered non-current with \$106.500 million reported as due within one year.

Under Section 1201 of Title XII of the Social Security Act, if a balance of advances to a state is outstanding on January 1, in two consecutive years and not fully repaid prior to November 10 of the second year, employers subject to contributions under such state's unemployment compensation law will be subject to additional Federal unemployment taxes

State of South Carolina

determined by a formula of reductions in credit against the tax. Such credit reduction will apply beginning with the second consecutive January 1 as of the beginning of which there is a balance of such advances. The credit reductions, pursuant to Section 3302(c)(2) of FUTA, increase employers' Federal tax liability each year. The amount equal to the reduced credits, excluding penalty and interest, will be applied to reduce the State's balance of advances. For the fiscal year ended June 30, 2012, a total of \$119 thousand was applied to reduce the balance of federal unemployment account advances to the Fund as a result of the reduced FUTA credits. Non-recurring revenues appropriated to the Department of Employment Workforce by the General Assembly will be utilized to make principal payments on the federal advances in amounts sufficient to avoid the FUTA credit reductions for state employers for the 2012 tax year.

The comprehensive changes to the Unemployment Insurance (UI) tax structure implemented to assist in putting the Fund back on the path to solvency are structured to raise revenues that more accurately address the demands on the Fund and the changing economic environment in which the Fund operates. While the Fund remains in Federal loan status, required tax revenues will consist of estimated benefit payouts for the subsequent year, an amount required to repay the principal on all outstanding federal advances over five years, and an additional surcharge designated to pay accrued interest on outstanding advances. As the expected level of state UI benefits continues to decrease, a greater proportion of state UI tax revenues will be available to repay the advanced funds.

Increased tax collections coupled with decreases in the number of individuals eligible for and claiming state UI benefits have enabled the Fund to operate without obtaining additional advances from the federal government since May 2011. Management plans to continue to borrow from the Federal government, if needed, to fund its deficits for the foreseeable future; however, it is estimated that no additional advances will be required under the new tax structure. The Federal government has not established a maximum amount that the Fund can borrow.

Federal regulations specify that interest on Federal Unemployment Account Advances may not be paid, either directly or indirectly, from the Fund; therefore, no accrued interest is reported in the Unemployment Compensation Benefits Fund. Interest of \$25.242 million was paid in September 2012 from the State's Debt Service Fund, with the portion due at June 30, 2012 of \$19.835 million reported as accrued interest in the government-wide Statement of Net Assets for governmental activities.

NOTE 13: CHANGES IN LIABILITIES

a. Long-Term Liabilities

Changes in major classes of long-term liabilities (expressed in thousands) for the fiscal year ended June 30, 2012, were:

	Balances at July 1, 2011	Increases	Decreases	Balances at June 30, 2012	Amounts Due Within One Year

The National Guard Retirement System net pension obligation payable, judgments and contingencies payable, and arbitrage payable are included in *other liabilities* in the accompanying financial statements.

The governmental fund that pays an employee's salary is responsible for liquidating the employee's related compensated absence liability. The General Fund is responsible for liquidating the National Guard Retirement System liability. Historically, the State has paid most judgments related to governmental funds from its General Fund unless an identifiable amount was directly attributable to another specific fund.

b. Short-Term Debt

The State's Higher Education Fund may issue Bond Anticipation Notes (BANS) to provide interim financing for capital projects while in the process of issuing bonds. The Public Service Authority, a major discretely presented component unit, may issue commercial paper as short-term financing for valid corporate purposes as allowed by the Authority's Board of Directors. Short-term debt for the fiscal year ended June 30, 2012 included: BANS in the Higher Education Fund, a major enterprise fund and commercial paper notes in the Public Service Authority. Short-term debt activity during the fiscal year (expressed in thousands) was as follows:

		lances at y 1, 2011	In	icreases	D	ecreases		lances at e 30, 2012
Primary Government: Business-type Activities								, and the second

NOTE 14: FUND BALANCES IN GOVERNMENTAL FUNDS

Fund balance classifications in governmental funds represent levels of constraints on the use of the resources received and reported in each fund. At June 30, 2012, the amounts constrained within the unrestricted fund balance in governmental funds (expressed in thousands) were as follows:

					Dep	partment of

The following subsections contain further descriptive information regarding the constraints of fund balance.

a. Non-spendable

This portion of fund balance is not available for appropriation because it is either in a form that cannot be spent or is legally or contractually required to be maintained intact (Endowments).

Health

This is restricted resources for the continuation and enhancement of programs to improve the health and safety of the citizens and visitors of the State of South Carolina. Programs promote environment, physical, and mental health of the State, its resources, citizens, and travelers.

Transportation

Restricted resources for transportation are imposed by external parties or enabling legislation for use in the maintenance and improvement highway systems and access to commercial markets through rail, air, and transoceanic.

Capital Projects

The balance represents resources received from external parties or through enabling legislation which requires the use of the resources for the construction or acquisition and installation of a capitalizable asset. The resources will be expended over the life of the construction.

Debt Service

The balance represents resources received from external parties or through enabling legislation which requires the use of the resources for the repayment of outstanding debt, including principal and interest.

Other

Other restricted fund balance includes resources restricted to individual programs undertaken by the agencies to provide services and resources to the constituents of the State of South Carolina and visitors to it.

c. Committed

Capital Reserve Fund

The South Carolina Constitution requires that two percent of the General Fund revenue of the latest completed fiscal year be used to fund this reserve for future appropriations for capital acquisitions, retirement of capital improvement bonds, or other nonrecurring purposes. This reserve is reduced to cover year-end operating deficits prior to withdrawal of funds from the General Reserve Fund.

Contingency Reserve Fund

This reserve fund was created by State law requiring the accumulation of General Fund revenues in excess of general appropriations. Any balance in this fund must be utilized to replenish any deficit of the General Reserve Fund below its fully funded amount. Upon determination by the Comptroller General of the amount deposited to this reserve, notification is provided to the Board of Economic Advisors for determination of the amount available for appropriation by the State's legislative process.

Education

This portion of fund balance has been committed through various sections of the State's Code of Law which stipulate the utilization of resources for the continuation and improvement of educational programs in the State. The programs include formative education, higher education, and skills training for job creation.

Health

This represents the portion of the fund balance, which has been committed through various sections of the State's Code of Law, for purposes of promoting and safeguarding the health of the citizens and visitors of the State. The programs include enforcement of regulations, access to services, and education in the risks faced by the citizens of the State.

Other

The remaining committed fund balance is constrained through enabling legislation for programs within the established missions of the agencies in its directives for service to the citizens of the State of South Carolina.

d. Assigned

Appropriations to be Carried Forward

The General Fund does not use encumbrance accounting. Appropriations to be carried forward are used if the General Assembly has authorized the carry-forward of General Fund appropriations to the next fiscal year.

Capital Expenditures

Amounts identified and budgeted for capital projects under construction in the State's Capital Projects Fund, a nonmajor governmental fund, or for acquisition of capital assets are reported as assigned fund balance.

Education

Amounts reported in this category arise from programmatic requirements for use in educational purposes. The assignment may be by contract with other state agencies or through budgetary action of the legislation in the form of a proviso.

Health and Safety

The fund balance reported in this category arises primarily from contracts between state agencies for services provided in connection with public health and the safety of the citizens and visitors to the State.

Local Infrastructure

The fund balance reported in this category arises primarily from budgetary proviso actions which provide a certain level of funding to local governments for improvements in infrastructure to ensure the health and welfare of its citizens and visitors.

Social Programs

Amounts reported in this category primarily arise through contractual agreements between state agencies that cooperate in the provision of social programs to the citizens of the State.

Other

The remaining balance in the assigned fund balance classification is created through budgetary proviso actions and agency contractual obligations between parties within the reporting entity relating to a variety of other services provided to the citizens of the State and its visitors.

e. Unrestricted, unassigned

Included in the unrestricted, unassigned fund balance classification is the General Reserve Fund. The South Carolina Constitution requires that the State maintain a reserve to prevent deficits in the Budgetary General Fund. The Reserve is fully funded for the June 30, 2012 fiscal year if it equals three percent of the Budgetary General Fund's revenue (budgetary basis) of the previous fiscal year.

If the State withdraws funds from the Reserve to cover a year-end deficit, it must replace the funds within three years. The Constitution requires that at least one percent of the Budgetary General Fund revenue (budgetary basis) of the latest completed fiscal year, if so much is necessary, be restored each year following the deficit until full funding is achieved.

At June 30, 2012, the Reserve was \$183.466 million, which was the required fully funded amount.

Totals	\$	351,947	\$	351,947	\$	312,618	

The preceding interfund receivables and payables generally include loans for building improvements, economic development initiatives, and initial funding for new programs. Also included are the following:

- \$316.227 million owed by the Department of Transportation Special Revenue Fund, a major governmental fund, to
 the Local Government Infrastructure Fund, a major governmental fund. The Department of Transportation has
 entered into various agreements to provide assistance for highway and transportation facilities projects being
 constructed by the Local Government Infrastructure Fund.
- \$12.085 million owed by the nonmajor governmental funds to the internal service funds. The nonmajor governmental funds borrowed the money to purchase and renovate new headquarters facilities for the State Department of Public Safety.
- \$8.723 million owed by the nonmajor enterprise funds to the General Fund and nonmajor governmental funds. This amount includes funds borrowed by the Patriots Point Development Authority for the purpose of funding repairs to the destroyer *USS Laffey* and funds borrowed under a loan program for energy conservation improvements administered by the Office of Energy in the Budget and Control Board.
- \$4.382 million owed by the nonmajor enterprise funds to the internal service funds. The nonmajor enterprise funds lent the money received to a county for infrastructure within a residential development.

Excluded from the preceding interfund receivables and payables because of elimination in the government-wide presentation are internal leasing arrangements between the Medical University of South Carolina, an institution in the Higher Education Fund, and its blended component units, nonmajor enterprise funds. The following details the eliminations and the resulting interfund payables balance (expressed in thousands):

Totals	\$	890,121	\$	890,121	

The State routinely uses transfers to (1) move revenues from the fund that statute or budget requires to collect them to the fund that statute or budget requires to expend them, (2) move State grant monies from grantor funds to grantee funds, and (3) transfer bond proceeds from the original fund to other funds authorized to receive portions of the proceeds.

NOTE 16: PROPRIETARY FUND REVENUES-ALLOWANCES AND DISCOUNTS

In the financial statements, the State presents its revenues net of allowances for uncollectible accounts receivable and contractual adjustments. Note 5 reports these allowances.

Scholarship allowances in the Higher Education Fund represent the sum of differences between stated charges for goods and services provided to students and amounts billed to students and/or third parties making payments on behalf of students. For the fiscal year ended June 30, 2012, scholarship allowances reduced the following revenues of the Higher Education Fund by the indicated amounts (expressed in thousands):

	lowances
Charges for Services	\$ 592,025
Operating revenues pledged for revenue bonds	 29,272
Total	\$ 621,297

For the fiscal year ended June 30, 2012, the State's enterprise funds presented \$1.372 billion included in net charges for services after provisions for contractual and other adjustments in the amount of \$2.112 billion and uncollectible accounts in the amount of \$110.077 million.

NOTE 17: DONOR-RESTRICTED ENDOWMENTS AND PLEDGES

a. Donor-Restricted Endowments

The State's permanent funds (nonmajor governmental funds) and the Higher Education Fund, a major enterprise fund, maintain donor-restricted endowments. Net appreciation consists of realized and unrealized increases in the fair value of an endowment's assets over the historic dollar value of the contributions.

At June 30, 2012, \$25.159 million of the amount reported as restricted net assets, expendable for education, represented net appreciation on investments of donor-restricted endowments available for authorization for expenditure by governing boards of the higher education institutions. In addition, \$565 thousand of the amount reported as restricted net assets, expendable for other, \$163 thousand of the amount reported as restricted net assets expendable for health, and \$2.534 million of the amount reported as restricted net assets, expendable for education represented net appreciation on investments of donor-restricted endowments of permanent funds.

The South Carolina Uniform Prudent Management of Institutional Funds Act (Title 34, Chapter 6, of the South Carolina Code of Laws, which is referred to below as "the Act") permits an agency's/institution's governing board to authorize for expenditure all of an endowment's net appreciation, unless the applicable gift instrument indicates the donor's intention that net appreciation not be expended. The Act requires that the authorized expenditure be limited to the uses, benefits, purposes,

and duration for which the endowment was established and that the institution's governing board exercise ordinary business care and prudence in authorizing the expenditure of net appreciation.

Specific policies for authorizing and spending endowment investment income vary among the agencies and institutions that hold endowments. Generally, the governing boards establish these policies. Among those agencies and institutions that recorded investment income in donor-restricted endowments during the fiscal year ended June 30, 2012, the predominant policy was to authorize the spending of 4.0% to 5.0% of the fair value of total endowment assets annually.

b. Pledges

The State's Higher Education Fund, a major enterprise fund, and related blended component units reported as nonmajor enterprise funds, recognize receivables and revenues for pledges or promises of cash or other assets from nongovernmental entities when all eligibility requirements are met, provided that the promise is verifiable and the resources are measurable and probable of collection. The financial statements report these amounts as accounts receivable. However, various benefactors have established split interest agreements with The Citadel Trust, Inc., a nonmajor enterprise fund. Among these agreements are a charitable remainder unitrust and a charitable remainder trust. The Citadel, a higher education institution reported in the Higher Education Fund, will receive a specified portion of the assets remaining under these agreements at the benefactors' deaths. The parties who manage the assets associated with these agreements are not included within the State of South Carolina's financial reporting entity. The State's financial statements do not report these trust assets because the ultimate amounts that the State will receive were not deemed to be measurable at June 30, 2012, and the eligibility requirements for the gifts have not been met.

NOTE 18: SEGMENT INFORMATION

The Housing Authority provides low-cost housing to the State's citizens by issuing bonds and notes and by administering federal contracts and grants. The State issues various separate revenue bonds to finance activities within the Single Family Finance program of its Housing Authority Fund, a major enterprise fund. Covenants of the following revenue bonds within the Single Family Finance program require separate accounting and financial reporting: (a) Single Family, (b) Mortgage Revenue, (c) Homeownership Bond and (d) Revenue Reserve. Investors in these bonds rely solely on the revenue generated by the individual activities for repayment. Accordingly, condensed financial statements (expressed in thousands) for these segments for the fiscal year ended June 30, 2012, are presented on the following pages:

CONDENSED STATEMENT OF NET ASSETS

		Single Family		O		0 00			Hom	eownership Bond	Revenue Reserve

Ending cash and cash equivalents	\$ 3,545	\$	38,574	\$	36,847	\$	2,106

Because the above separately identifiable activities provide essentially similar services to the Authority's customers, they are not considered to be different activities for financial reporting purposes. Accordingly, all of the Housing Authority's activities are reported as a single fund and as a single business-type activity in the accompanying financial statements.

NOTE 19: JOINT VENTURE AND JOINT OPERATION

a. Joint Venture

The Public Service Authority (the Authority), a major discretely presented component unit, along with six unrelated publicly owned electric utilities own a wholesale power marketing joint venture called The Energy Authority (TEA). The Authority engages in gas hedging activities through TEA to reduce the cost of fuel inventories. The Authority now has a 20.8% ownership interest, which it records as an equity investment. TEA provides services to its member organizations, as well as to certain non-member organizations, and allocates transaction savings and operating expenses to its member organizations pursuant to an agreement.

During its fiscal year ended December 31, 2011, the Authority received distributions of \$17.659 million from TEA and recognized \$16.426 million in reductions to power costs and increases in electric revenues.

The Authority has provided certain guarantees and has pledged certain collateral to support TEA's transactions. The Authority's Board of Directors has approved the use of up to \$82.100 million to support TEA's activities.

At December 31, 2011, the Authority had a payable to TEA of \$17.856 million for power and gas purchases. In addition, the Authority had a receivable due from TEA of approximately \$1.008 million for power sales and sales of excess gas capacity.

Interested parties may obtain a copy of TEA's financial statements by writing to:

The Energy Authority 301 West Bay Street, Suite 2600 Jacksonville, Florida 32202 www.teainc.org

b. Joint Operation

The Summer Nuclear Station is a joint operation owned by the Public Service Authority (the Authority), a major discretely presented component unit and regulated electric utility, and the South Carolina Electric and Gas Company (SCE&G), a non-governmental electric utility. The Authority owns an undivided one-third interest in the Station while SCE&G owns an undivided two-thirds interest. SCE&G is solely responsible for the Station's design, construction, management, budgeting, operation, maintenance, and decommissioning; and the Authority is obligated to pay its ownership share of all costs relating thereto. The Authority receives one-third of the net electricity generated.

In accordance with regulatory accounting practices, the Authority reported capital assets of \$529.300 million, accumulated depreciation of \$314.700 million, and expenses of \$76.100 million, which represent its interest in this joint operation. The Summer Nuclear Station is not a separate legal entity and does not prepare separate financial statements.

The Nuclear Regulatory Commission (NRC) requires a licensee of a nuclear reactor to provide minimum financial assurance of its ability to decommission its nuclear facilities. A site-specific decommissioning study completed in 2006 estimated the Authority's share of decommissioning costs for the Summer Nuclear Station as \$178.900 million in 2006 dollars. The Authority accrues its share of the estimated decommissioning costs over the remaining life of the facility. These costs are being recovered through the Authority's rates.

To comply with the NRC regulations, the Authority established an external trust fund and has been making deposits into this fund since September 1990. In addition, the Authority established an internal decommissioning account. The Authority makes deposits into this fund in the amount necessary to fund the difference between the 2006 site-specific study and the NRC's imposed minimum requirement. Based on current decommissioning cost estimates developed by SCE&G, these funds, which totaled \$186.700 million (adjusted to market) at December 31, 2011, along with future deposits into both the external and internal decommissioning accounts and investment earnings, are estimated to provide sufficient funds for the Authority's share of the estimated decommissioning costs.

On October 20, 2011, the Authority and SCE&G entered into an agreement for the design and construction of two 1,100 megawatt nuclear generating units at the existing Summer Nuclear Station site. The Authority's Board of Directors approved spending up to \$1.900 billion on this project through December 31, 2012.

NOTE 20: RELATED PARTY TRANSACTIONS

These financial statements exclude certain related foundations and other organizations, including those discussed below. (See also Note 1a, Scope of Reporting Entity.)

During the fiscal year ended June 30, 2012, the Educational Television Endowment of South Carolina, Inc., disbursed \$5.009 million on behalf of the Departmental Program Services Fund, a major governmental fund, for programs, development, advertising, and other costs.

The following organizations are related to the Higher Education Fund, a major enterprise fund: the University of South Carolina Development Foundation; the University of South Carolina Business Partnership Foundation; the University of South Carolina Research Foundation; the Greater University of South Carolina Alumni Association; the Carolina Piedmont Foundation, Inc.; the Lancaster County Educational Foundation, Inc.; the Clemson University Research Foundation; the Clemson University Real Estate Foundation; the Clemson University Continuing Education and Conference Complex Corporation; the Clemson Advancement Foundation for Design and Building; the Medical University of South Carolina Foundation; the Medical University of South Carolina Foundation for Research Development; the Coastal Educational Foundation, Inc.; the Coastal Carolina University Student Housing Foundation; Coastal Carolina Booster/Athletic Foundation; the Horry County Higher Education Commission; the College of Charleston Foundation; the Cougar Club; the Winthrop University Foundation; the Winthrop University Real Estate Foundation; the Francis Marion University Student Housing LLC; The Citadel Foundation; The Citadel Alumni Association; The Citadel State Foundation; South Carolina State Real Estate Foundation; the S.T.A.T.E. Club; the South Carolina State Alumni Association; the Lander Foundation; Aiken Technical College Foundation; Greenville Tech Foundation, Inc.; Midlands Technical College Foundation; Orangeburg-Calhoun Technical

College Foundation; Piedmont Technical College Foundation; Spartanburg Community College Foundation; Tri-County Technical College Foundation; Trident Technical College Foundation; and York Technical College Foundation. During the fiscal year ended June 30, 2012, the State entered into various transactions with these organizations. Approximate amounts within the State's Higher Education Fund that represent transactions with these related parties include: receivable from foundations—\$119.917 million; donations of cash and other assets from foundations—\$201.406 million; expenditures paid to foundations—\$10.496 million; and reimbursements to the State for expenses/expenditures the State incurred on behalf of foundations—\$5.383 million.

The Education Assistance Authority Fund, a major enterprise fund, has designated the South Carolina Student Loan Corporation (SLC) as the entity to administer the enterprise fund's student loan program. During the fiscal year ended June 30, 2012, the enterprise fund entered into various transactions with SLC. Approximate amounts within the enterprise fund that represent these transactions include: accounts receivable from SLC-\$138.741 million; program revenue from SLC-\$4.996 million; reimbursements to SLC for administrative costs-\$643 thousand; and payable to SLC-\$25.654 million.

NOTE 21: MAJOR DISCRETELY PRESENTED COMPONENT UNITS

a. Significant Transactions of Major Component Units with the Primary Government

The Public Service Authority makes payments to the General Fund in lieu of taxes each year based on requirements under bond indentures. These payments totaled \$18.656 million during the Authority's fiscal year ended December 31, 2011.

During the fiscal year ended June 30, 2002, the State Ports Authority resolved to contribute a total of \$45.0 million over twenty-six years to the Local Government Infrastructure Fund, a major governmental fund, for the Cooper River Bridge project in Charleston. The Authority made a payment of \$1.000 million during the fiscal year ended June 30, 2012.

The South Carolina Lottery for Education Act requires the Lottery Commission to transfer all proceeds from lottery ticket sales and other revenues net of expenses to the Education Lottery Fund, a nonmajor governmental fund. The Commission transferred \$302.756 million during the fiscal year ended June 30, 2012; the Commission owed an additional \$32.074 million to the Fund at June 30, 2012.

b. Concentrations of Customer Credit Risk

The Public Service Authority and State Ports Authority have chosen to present their statements in accordance with applicable pronouncements of the Financial Accounting Standards Board (FASB) issued after November 30, 1989. Accordingly, these component units present disclosures regarding concentrations of customer credit risk.

Public Service Authority

Concentrations of credit risk with respect to the Public Service Authority's receivables are limited due to its large number of customers and their dispersion across different industries. The Authority maintains an allowance for uncollectible accounts based on the expected collectability of all accounts receivable. The Authority's sales to its two major customers for its fiscal year ended December 31, 2011, were as follows (expressed in thousands):

		% of Total Sales
Customer	Revenue	Revenue
Central Electric Power Cooperative, Inc	\$ 1,089,000	57%
Alumax of South Carolina, Inc	189,000	10%

No other customer accounted for more than 10% of the Authority's sales.

State Ports Authority

During the fiscal year ended June 30, 2012, of the State Ports Authority's total revenues, three customers accounted for approximately 15%, 11%, and 9% each. The Authority performs ongoing credit evaluations of its customers and generally operates under international laws, which may provide for a maritime lien on vessels in the event of default on credit terms. The Authority maintains reserves for potential credit losses.

c. Inequality of Due from Component Units and Due to Primary Government

The Due to Primary Government of \$20 thousand is reported without an offsetting amount Due from Component Units as a result of differences in the reporting period between the Connector 2000 Association with a fiscal year ending December 31 and the primary government with a fiscal year ending June 30. At December 31, 2011, the Connector 2000 Association, Inc. owed the Department of Transportation Special Revenue Fund \$20 thousand for maintenance costs, which is reported as Due to Primary Government.

NOTE 22: CONTINGENCIES AND COMMITMENTS

a. Litigation

Primary Government

Among the unresolved legal actions in which the State was involved at June 30, 2012, are three cases that challenge the legality of certain taxes. In the event of unfavorable outcomes for these cases, the State estimates the potential loss of \$290.031 million. Although State losses in these cases could reduce future revenues, the preceding estimates do not include any impact on future revenues or future accruals of interest on disputed refunds.

The South Carolina Retirement Systems (the Systems) is involved in a putative class action lawsuit involving legislation (Act No. 153, 2005 S.C. Acts and Joint Resolutions) requiring that employees who return to work after retirement (including employees participating in the Teacher and Employee Retention Incentive [TERI] Program) resume making contributions into the retirement system. The action was filed in federal court in August 2010 alleging the provisions of Act 153 are unconstitutional and illegal. The plaintiffs all retired after Act 153 was enacted and thus were on notice that they would pay retirement contributions if they chose to return to work. As of June 30, 2012, the Systems had collected approximately \$121.000 million in the form of retirement contributions from members who are retired and returned to work on or after July 1, 2005. The Systems and the State filed a motion to dismiss this matter on a number of grounds. By Order and Decision dated September 27, 2012, the federal district court granted the Systems' motion and dismissed the Plaintiff's suit. Plaintiffs have filed a motion to reconsider that decision within the federal court.

The State is involved in a number of cases in which the amounts of potential losses, if any, are not presently determinable. These cases include one contending that the funding of public education in South Carolina is inequitable and inadequate. The State moved to dismiss the case, and the Circuit Court granted that motion. The plaintiffs appealed, and the State Supreme Court affirmed part of the Circuit Court's order, but remanded the case to the Circuit Court for further proceedings as to the issue of alleged inadequate educational opportunity. The Court denied the plaintiffs' request to add a damage claim. The Court issued an order during December 2005 in which the Court found in favor of the State on most issues, but ruled that the State is failing to fund early childhood intervention programs adequately. Motions to alter or amend the Circuit Judge's Order were filed in July 2007, but the Court denied the motions. The plaintiffs, the House and the Senate, appealed to the Supreme Court and the case was argued in June 2008. The Court heard re-argument in September 2012 and has not yet issued an Opinion. In a second unrelated case, the plaintiffs allege that a State Dentistry Board's actions interfered with their businesses. The State has filed a motion for summary judgment. The case was dismissed, a motion to reconsider has been denied, and an appeal has been filed. In the event the State loses this case, the loss amount may not be limited by the State Tort Claims Act and may exceed the allowable reimbursement from the State's self-insurance fund. In a third unrelated case, the plaintiffs contend that a lack of funding has resulted in the unconstitutional treatment of prison inmates with mental illnesses. A non-jury trial was held during the current fiscal year but the judge has not issued a decision.

Due to the uncertainty involving the ultimate outcome of the several previously discussed unresolved lawsuits; no provision for potential liability has been made for them in the accompanying financial statements.

The State is involved in other legal proceedings pertaining to matters incidental to the performance of routine governmental operations. Such litigation includes cases involving claims asserted against the State arising from alleged torts, breach of contract, and possible violations of State laws. In the event of unfavorable outcomes in all of these matters, the State's estimated liability would be approximately \$115.500 million. While the State is uncertain as to the ultimate outcome of any of the individual lawsuits, it believes its positions are meritorious and it is vigorously defending its position in each case.

Generally, liabilities recorded by the State's Insurance Reserve Fund (see Note 10a), an internal service fund, are sufficient to cover claims arising from alleged torts, up to the liability limits established by the South Carolina Tort Claims Act. Currently, except as described above, no tort claims are pending that are expected to result in any significant liability in excess of the provision for policy claims recorded by the Insurance Reserve Fund.

Major Discretely Presented Component Unit—Public Service Authority

The Public Service Authority, a major discretely presented component unit and electric utility company, is a party to or has an indirect interest in several lawsuits in which the amounts of potential losses, if any, are not presently determinable. The following paragraph discusses the most significant of these cases.

Landowners located along the Santee River contend that the Authority is liable for damage to their real estate because of flooding that has occurred since the U. S. Army Corps of Engineers completed its Cooper River Rediversion Project in 1985. A 1997 trial returned a jury verdict against the Authority on certain causes of action. The Authority has entered into a settlement agreement with the plaintiffs. Pursuant to this agreement, the Authority has made payments of all claims amounting to \$221.600 million. In addition the Authority has paid the court ordered attorney fees and costs of \$10.400 million. The contract between the Corps and the Authority requires that the Corps indemnify the Authority for certain claims arising out of the construction and operation of the project. The Authority has entered a claim seeking indemnification from the Corps. No estimate of the amount or timing of the recovery from the Corps can be made at this time.

b. Federal Grants

The State receives significant federal grant and entitlement revenues. Compliance audits of federal programs may identify disallowed expenditures. Disallowances by federal program officials as a result of these audits may become liabilities of the State. The State records a liability for pending disallowances if settlement is probable and the settlement amount is reasonably estimable. Otherwise, the liability is recorded only when the State and the federal government agree on reimbursement terms. Based on an analysis of historical data, the State believes that any disallowances without an established agreement of reimbursement terms relating to the fiscal year ended June 30, 2012, or earlier years will not have a material impact on the State's financial statements.

c. Other Loan Guarantees

The South Carolina Education Assistance Authority, a major enterprise fund, guarantees student loans. At June 30, 2012, these loans totaled \$2.735 billion. The United States Department of Education reinsures 100.0% of losses under these guarantees for loans made prior to October 1, 1993; 98.0% of losses for loans made between October 1, 1993 and October 1, 1998; and 95.0% for loans made on or after October 1, 1998. If the loan default rate exceeds 5.0% of the loans in repayment status, the United States Department of Education decreases the reinsurance rate. The State's default rate during the fiscal year ended June 30, 2012, was 1.3%.

A nonmajor enterprise fund guarantees a portion of a mortgage debt up to a maximum of \$1.531 million.

d. Purchase Commitments

Major Discretely Presented Component Unit—Public Service Authority

At December 31, 2011, the Public Service Authority, a major discretely presented component unit and electric utility company, had outstanding minimum obligations under existing purchase contracts totaling \$3.670 billion for coal. In addition, minimum obligations under two purchased power contracts as of December 31, 2011, were approximately \$59.900 million with a remaining term of twenty-three years and \$29.100 million with a term of three years. Also at December 31, 2011, the Authority had commitments for nuclear fuel and nuclear fuel conversion contracts of \$750.000 million over the next twenty-three years. The enrichment and fabrication component of these commitments from 2012 through 2013 totaling \$19.100 million is contingent upon the operating requirements of the nuclear unit.

The Authority amended a service agreement to an approximate amount of \$103.500 million. The agreement provides a contract performance manager, initial spare parts, parts and services for specified planned maintenance outages, remote monitoring and diagnostics of the turbine generators, and combustion tuning for the gas turbines. The contract term extends through 2024, but can be terminated at the end of 2015. Also, the Authority has entered into network integration transmission service agreements with an initial payment of \$10.600 million due in calendar year 2012 and annual payments totaling \$69.400 million through 2023.

Major Discretely Presented Component Unit—Lottery Commission

At June 30, 2012, the Lottery Commission had remaining commitments of \$42.983 million under service contracts expiring in 2019. The contracts provide, among other things, services and equipment to operate the on-line lottery.

e. Commitments to Provide Grants and Other Financial Assistance

As of June 30, 2012, the following agencies had outstanding commitments for the identified programs:

- The South Carolina Transportation Infrastructure Bank, reported within the Local Government Infrastructure Fund (a major governmental fund), has \$994.700 million remaining on agreements with various counties to provide financial assistance for highway and transportation facilities projects.
- The Department of Commerce has \$135.296 million to provide funds to local governmental entities including grants for water and wastewater infrastructure projects, airport construction projects, and rural infrastructure projects. Of the outstanding commitment, \$35.653 million will be funded by federal grants and \$99.643 million will be funded with private aid.

- The Budget and Control Board has \$78.690 million to provide loans and grants for water and wastewater projects and energy efficiency improvement projects. Federal grants will fund \$29.608 million of this commitment.
- The Division of Aeronautics has \$2.487 million for grants made to municipal and county airports for capital improvements. Federal grants will fund \$1.558 million of this commitment.
- The State Board for Technical and Comprehensive Education has \$26.292 million to provide training for new and expanding business and industry in the State.
- The Department of Public Safety has \$40.524 million for pass-through grants to various State agencies, local governments, and not-for-profit entities, of which \$40.229 million will be funded by federal grants.
- The South Carolina Law Enforcement Division has \$41.130 million for grant program activities and pass-through grants to subrecipients, all of which will be funded by federal grants.
- The South Carolina Judicial Department has \$1.242 million outstanding commitments related to vendor service contracts.
- The State Housing Finance and Development Authority has \$120 thousand for special initiatives under the Program Fund and \$4.500 million from the Housing Trust Fund, reported within the nonmajor governmental funds, for affordable housing projects and developments.

f. Connector 2000 Association, Inc.—Going Concern

Since 2001, when the Southern Connector toll road was opened to public traffic and the Connector 2000 Association, Inc., a major discretely presented component unit, began collecting tolls, both traffic on the highway and the resulting toll revenues generated have been substantially less than projected during the planning of the project and issuance of related debt. Factors such as the weak economy, lack of development along the Southern Connector's corridor and patron resistance to the payment of tolls, all contributed to the less-than-forecasted traffic demands.

Because the Association pledged these toll collections for debt service payments on its toll road revenue bonds, the Association's debt service capability also is affected. Debt service on the bonds increased sharply beginning in January 2008 as principal began to mature. The Association was forced to withdrawal from the Debt Service Reserve Accounts maintained by the Trustee under the indenture in order to meet the debt service obligations. Remaining balances were not sufficient to meet the debt service obligations in January 2010 resulting in the Association's first payment default on the 1988 Bonds.

A Revenue Covenant in the Original Trust Indenture for which the Association was unable to comply since January 2005 resulted in a technical default under the bond indenture on January 1, 2008. A lack of compliance with the Revenue Covenant required the conduct of a toll rate study. The studies performed for each of 2005, 2006, and 2007 indicated that even if the recommended maximization of toll revenue was implemented the projected toll revenue would be insufficient to pay principal and interest on the 1998 Bond in full.

The Association was also unable to pay its contractual obligations to the SCDOT for license fees, highway maintenance costs and related interest, and was unable to make deposits into the 1998 R&R Fund to cover any future costs of renewal and replacement of the Southern Connector.

Because of the previously mentioned factors, the Association hired a special financial consultant in early 2008 to explore alternatives related to its existing capital structure. Based on the findings of the financial analysis, the consultant advised the Association that any restructuring of its obligations within the remaining term of the License Agreement with the South Carolina Department of Transportation (SCDOT) would require a substantial reduction in the principal amount of the bond indenture and that restructuring the bonds outside of bankruptcy would be extremely difficult. To move forward with the recommendations of the special financial consultant, the Association also hired an engineering consultant to perform an investment grade traffic and revenue study to provide additional information regarding concession agreements or other restructuring options. In response to the study's findings, the Association requested and received approval from SCDOT for a toll rate increase that was implemented in November 2009.

The Association presented three optional debt adjustment plans to the Senior Bond Trustee, the Subordinate Trustee, SCDOT and certain bondholders owning a majority of outstanding principal of the 1998 Senior Bonds (the Restricted Owners). All of these plans were rejected by one or all of the parties. On January 20, 2010, the Association's Board of Directors adopted a resolution authorizing the Association's management, when management so deemed it appropriate, to file a petition for bankruptcy protection under the United States Bankruptcy Code and to take related actions in connection with the bankruptcy. On June 24, 2010, following the failure of negotiations for debt adjustment plans, the Association filed its Chapter 9 bankruptcy petition in the U.S. Bankruptcy Court at the direction of its Executive Vice President and General Manager.

GASB Statement No. 58, Accounting and Financial Reporting for Chapter 9 Bankruptcies (GASB 58) requires that liabilities subject to adjustment in a Chapter 9 bankruptcy proceeding be frozen as of the date of the bankruptcy petition. As of June 24, 2010, and through the effective date of the Association's Plan, the Association's liabilities subject to adjustment in bankruptcy (the 1998 Bonds payable liabilities, all amounts owed to SCDOT and the excess collateral liability) were frozen by the U.S. Bankruptcy Law. Accordingly, no additional amounts were accrued after June 24, 2010 pertaining to these liabilities.

During the remainder of 2010 and during the pendency of the bankruptcy proceeding, the Association continued to operate the Southern Connector as usual and paid its non-Bondholder and non-SCDOT creditors in the ordinary course of business. As mentioned previously, payments were no longer made to the bondholders, although the 1998 Senior Bonds Trustee, the Subordinate Bonds Trustee, their respective counsel and advisors were paid their fees and expenses from the toll revenues collected. The Association continued its negotiations with the 1998 Senior Bonds Trustee, the Subordinate Bonds Trustee, the Restricted Owners and SCDOT, and filed a First Amended Plan for Adjustment of Debts in November 2010. That document, along with the Addendum to First Amended Plan for Adjustment of Debts filed in January 2011 and Debtor's Modification to the First Amended Plan for Adjustment of Debts filed in March 2011, form the Plan that was later confirmed by the U.S. Bankruptcy Court on April 1, 2011 and became effective on April 21, 2011.

Full details of the plan are available on the Association's website, www.SouthernConnector.com under the *News & Filings* tab. The plan includes an amendment to the License Agreement between the Association and SCDOT under which (1) SCDOT assumes the obligation of future highway maintenance, repair, renewal, and replacement and related costs and (2) toll rates and future rate changes will be determined by independent traffic engineering studies. Under the Plan, Amended and Restated Bonds (the "2011 Bonds") were issued in exchange for the 1998 Bonds. The 2011 Bonds consist of Series 2011A Bonds and Series 2011B Bonds (exchanged for the 1998 Senior Bonds) and Series 2011C Bonds (exchanged for the 1998 Subordinate Bonds). These were issued in three series. In accordance with GASB 58, an extraordinary gain from the adjustment of debts of \$186.847 million was recognized for the fiscal year ended December 31, 2011.

g. Unemployment Compensation Benefits Fund—Liquidity

In recent years, the Unemployment Compensation Fund, a major enterprise fund, has generated substantial operating losses and has been required to use all of its cash resources to fund its operations. Due to the increasing unemployment rate and the resulting increased amount of unemployment benefits paid, and the increased length of time over which benefits are paid, the Fund has been required to obtain advances from the Federal Unemployment Compensation Fund resulting in a balance owed of \$782.188 million as of June 30, 2012.

Increased tax collections, coupled with decreases in the number of individuals eligible for and claiming State unemployment insurance benefits and changes in the relevant state laws have enabled the Fund to operate without obtaining additional advances from the Federal government since April of 2011.

NOTE 23: SUBSEQUENT EVENTS

a. Contingencies

A breach of taxpayer information was identified subsequent to year end. Approximately 3.5 million taxpayers, individuals, dependents, and businesses, may be affected by the breach. The Department of Revenue has arranged for a national firm to provide free protective monitoring for all potential taxpayers affected who sign up for their service. The Department has provided notifications to identified individuals who may be affected. Several state agencies and elected officials have been named in litigation arising from the breach. Currently the estimated costs approximate \$20.170 million. The State Budget and Control Board has authorized an inter-agency loan from the Insurance Reserve Fund, an internal service fund, to the Department of Revenue's General Fund to provide temporary funding for the immediate costs until other funding can be authorized through the legislative process.

b. Retirement Reform Legislation

Legislation was enacted during the year to facilitate longer term financial sustainability while attaining fairness for governmental employees. A provision of Act 278 effective July 1, 2012 is the creation of the South Carolina Public Employee Benefit Authority (PEBA) as the new governing body and administrative agency for the Retirement Division and the Employee Insurance Program. An oversight board was established providing for appointment of the members by the executive branch and the legislative branches. Annual benefit adjustments for South Carolina Retirement System (SCRS) and the Police Officers' Retirement System (PORS) annuitants will be equal to the lesser of one percent or \$500. A new tier (Class III) of membership was created with different eligibility and benefit provisions. The eligibility criteria and calculation of disability benefits were changed. Modifications were made to the cost for purchased service credit so that it can be actuarially neutral. Additional provisions include requiring increases to both member and employer contribution rates for SCRS and PORS and disallowing contribution decreases until the Systems are at least 90 percent funded. Act 278 closes the TERI program after June 30, 2018, implements an earnings limitation of \$10 thousand for certain members who retire after January 1, 2013 and return to work in a position covered by any state retirement system, and discontinues interest accruals on inactive member account balances. The Act further closes the General Assembly Retirement System (GARS) to individuals first elected to serve in the General Assembly at or after the general election of 2012. These individuals may elect to participate in SCRS or State Optional Retirement Plan (ORP) or they may elect to be a nonmember. Additionally, the

State of South Carolina

General Assembly is authorized to set and change the assumed rate of return on the System's investments for actuarial valuation purposes.

c. Debt Issuances

Subsequent to the fiscal year end, the State of South Carolina issued the following debt:

- The State Housing Finance and Development Authority, a major enterprise fund, issued \$65.710 million in Refunding Mortgage Revenue Bonds, Series 2012A, on September 26, 2012.
- The South Carolina Transportation Infrastructure Bank, a major governmental fund, issued \$424.910 million in Revenue Refunding bonds, Series 2012B, on November 8, 2012.
- The State issued a Series 2012 General Obligation State institution Bond Anticipation Note in the amount of \$28.000 million on behalf of the Medical University of South Carolina, reported in the State's Higher Education Fund, a major enterprise fund, on December 11, 2012.
- The FHA Insured Mortgage Refunding Obligations, Series 2012A, of the Medical University Hospital Authority of the Medical University of South Carolina, a blended component unit and major enterprise fund, were issued on December 19, 2012 in the amount of \$361.427 million.
- Subsequent to its fiscal year end, the Public Service Authority, a major discretely presented component unit, has issued \$262.830 million in taxable revenue obligations, \$312.160 million in tax-exempt revenue obligations, \$250.875 million in revenue refunding obligations, and \$39.326 million in tax-exempt revenue mini-bonds.

As of May 31, 2013, the balance of advances from the Federal Government for Unemployment Compensation was \$675.561 million.

Notes to the Required Supplementary Information--Budgetary

NOTE 1: BUDGETARY FUNDS AND PERSPECTIVE DIFFERENCES

a. Budgetary Funds

South Carolina's Annual Appropriations Act, the State's legally adopted budget, does not present budgets by GAAP fund. Instead, it presents program-level budgets for the following two funds:

General Funds. These funds are general operating funds. The resources in these funds are primarily taxes. The State expends General Funds to provide traditional State government services. The General Funds column in the Appropriations Act differs somewhat from the GAAP General Fund and is referred to within these notes and in the accompanying schedule as the *Budgetary General Fund*.

Total Funds. The Total Funds column in the Appropriations Act includes all budgeted resources. Amounts in this column include General Funds as well as most, but not all, federal and department-generated resources. Total funds include portions of certain proprietary and capital project fund activities as well as most special revenue activities but, exclude the pension trust funds and some other fiduciary fund activities.

Amounts obtained by subtracting the General Funds column in the Appropriations Act from the Total Funds column in the Appropriation Act are referred to within these notes and in the accompanying schedules as *Other Budgeted Funds*.

b. Perspective Differences

Perspective differences exist when the structure of financial information for budgetary purposes differs from the fund structure that is defined by GAAP. Although there are some perspective differences between the Budgetary General Fund and the GAAP General Fund, those differences are *not* significant enough to prevent the State from preparing a budgetary comparison schedule for the Budgetary General Fund.

In contrast, however, there are *significant* perspective differences between the Other Budgeted Funds and the State's GAAP funds, including its major special revenue funds. These perspective differences are so significant that the State is unable to present separate budgetary comparison schedules for its major special revenue funds. Accordingly, the State instead has presented a budgetary comparison schedule for its Other Budgeted Funds in accordance with GASB Statement No. 41, *Budgetary Comparison Schedules—Perspective Differences*.

NOTE 2: ORIGINAL AND FINAL BUDGETED AMOUNTS; BASIS OF PRESENTATION

a. Budgetary General Fund

Each year, the General Assembly enacts an Appropriations Act that includes initial estimated revenue and appropriation figures for the Budgetary General Fund. The *original appropriations* presented in the accompanying schedule for the Budgetary General Fund include the amounts displayed in the Appropriations Act as well as any appropriations authorized to carry forward from the preceding fiscal year. *Original estimated revenues* in the accompanying schedule for the Budgetary General Fund include amounts displayed in Section 88 (*Revenue*) of the Appropriations Act and nonrecurring transfers from other funds that were legislatively required by various provisos within the Appropriations Act.

The accompanying schedule for the Budgetary General Fund presents a fund balance section whereas the budget document does not present fund balances; in other respects, however, the format of the accompanying schedule is substantively the same as for the legally enacted budget.

After the beginning of the fiscal year, departments and agencies may request transfers of appropriations among programs. No such transfer request may exceed 20.0% of the program budget. In addition, the Budget and Control Board, composed of five key executive and legislative officials, has the authority to approve transfers of appropriations between personal service and other operating accounts.

The authority to reduce enacted appropriations is provided to the Budget and Control Board if it is deemed necessary to prevent a deficit. Likewise, the State Board of Economic Advisors may approve revisions of estimated revenues for the Budgetary General Fund during the year.

b. Other Budgeted Funds

The *original appropriations* presented in the accompanying schedule for Other Budgeted Funds include the amounts displayed in the Appropriations Act as well as any appropriation reductions specifically authorized by law to prevent duplicate appropriations. The terminology, classifications, and format of the appropriations section of the accompanying schedule for Other Budgeted Funds is substantively the same as for the legally enacted budget.

The State's General Assembly does not approve estimated revenue or fund balance amounts for Other Budgeted Funds (or for Total Funds). However, Section 87 (*Recapitulation*) of the Appropriations Act includes net *source of funds* amounts (i.e., estimated cash brought forward from the previous fiscal year plus estimated revenue for the current fiscal year minus estimated cash to be carried forward to the following fiscal year) for three categories of Other Budgeted Funds: Federal, Earmarked, and Restricted. The *original estimated revenue* amounts in the accompanying schedule for Other Budgeted Funds were obtained from the State Budget Office's breakdown of the source of funds amounts.

As operating conditions change, departments and agencies may request revisions of budgeted amounts in Other Budgeted Funds. Such changes require the Budget and Control Board's approval. Departments and agencies also may request revisions of estimated revenues and appropriations for permanent improvement projects. The Budget and Control Board and the Joint Bond Review Committee must approve and review those changes.

NOTE 3: LEGAL LEVEL OF BUDGETARY CONTROL

The State maintains budgetary control at the level of summary object category of expenditure within each program of each department or agency. The State's Appropriation Acts for the 2011-2012 fiscal year has approximately 2,500 appropriated line items. These line items constitute the level of legal control over expenditures. The level of legal control for all agencies is reported in a publication of the State Comptroller General's Office titled "A Detailed Report of Appropriations and Expenditures," not included herein.

NOTE 4: BASIS OF BUDGETING

Current legislation states that the General Assembly intends to appropriate all monies to operate State government for the current fiscal year. Unexpended appropriations lapse on July 31 unless the department or agency is given specific authorization to carry them forward to the next fiscal year. Cash-basis accounting for payroll expenditures is required.

State law does not precisely define the State's basis of budgeting. In practice, however, it is the cash basis with the following exceptions:

- (i) Departments and agencies charge certain vendor and interfund payments against the preceding fiscal year's appropriations through July 13.
- (ii) Certain revenues collected in advance are recorded as liabilities (deferred revenues) rather than as revenues.
- (iii) The following taxes are recorded on the modified accrual basis in accordance with State law: admissions tax, alcoholic liquors tax, beer and wine tax, business license tax, documentary tax, electric power tax, gasoline and motor fuel taxes, and sales, use, and casual excise taxes.
- (iv) Certain non-cash activity, such as food stamp benefits, is recorded as revenue and expenditure in the fiscal year in which the resources are distributed to the beneficiaries.
- (v) All other revenues are recorded only when the State receives the related cash.

NOTE 5: RECONCILIATION OF BUDGET TO GAAP REPORTING DIFFERENCES

The accompanying budgetary comparison schedules compare the State's legally adopted budget with actual data in accordance with the State's basis of budgeting. Budgetary accounting principles differ significantly from GAAP accounting principles. These different accounting principles result in basis, perspective, and entity differences in the net increase in fund balance—budgetary basis. *Basis differences* arise because the basis of budgeting differs from the GAAP basis used to prepare the statement of revenues, expenditures, and changes in fund balances—governmental funds. *Perspective differences* result because the Appropriations Act's program-oriented structure differs from the fund structure required for GAAP. *Entity differences* arise because certain activity reported within the State's financial reporting entity for GAAP purposes is excluded from the Appropriations Act. These differences (expressed in thousands) for the fiscal year ended June 30, 2012, were as follows:

Budgetary funds	Budgetary General Fund	Other Budgeted Funds				
				Major Special I	Revenue Funds	
					Department of	
	0	N	Departmental	Local	Transportation	State
GAAP funds	General Fund	Not Applicable	Program Services	Government Infrastructure	Special Revenue	Tobacco Settlement

SUPPLEMENTARY INFORMATION

Governmental Funds

Governmental funds include the General Fund, several special revenue funds, a Capital Projects Fund, a Debt Service Fund, and three permanent funds.

This subsection of the Comprehensive Annual Financial Report provides the following supplementary information for the State's governmental funds:

- Combining Balance Sheet—Nonmajor Governmental Funds
- Combining Statement of Revenues, Expenditures, and Changes in Fund Balances—Nonmajor Governmental Funds
- General Reserve Fund Activity—Budgetary General Fund

Generally accepted accounting principles (GAAP) for governments require that a Comprehensive Annual Financial Report (CAFR) include budgetary comparison schedules for "individual nonmajor special revenue funds and other governmental funds of the primary government (including its blended component units)." Such schedules would be included as supplementary information in this subsection of the CAFR if they were applicable. The State of South Carolina, however, does not prepare separate budgets for its individual special revenue funds or for its other governmental funds. Accordingly, this subsection includes no budgetary comparison schedules. (Also see the budgetary comparison schedules within the Required Supplementary Information section of this report.)

Note 1b in the notes to the financial statements describes the State's major governmental funds. The paragraphs below describe all other individual governmental funds that the State uses.

a. Nonmajor Special Revenue Funds

Special revenue funds account for specific revenue sources (other than trusts for individuals, private organizations, or other governments or for major capital projects) that are legally restricted to expenditure for specified purposes. The State uses the nonmajor special revenue funds described below:

Waste Management Fund. This fund accounts for fees collected from consumers, generators of solid and hazardous wastes, and owners and operators of solid waste and hazardous waste storage facilities. These fees must be used for the purposes set forth in the State's Solid Waste Policy and Management Act of 1991 and to cover the State's costs in governmental actions involving uncontrolled hazardous waste sites.

Accommodations and Local Option Sales Tax Fund. This fund accounts for: (1) a special additional 2% sales tax on the gross proceeds on the rental of transient accommodations and (2) a special 1% sales tax applicable in some localities within the State. The State allocates these revenues to counties and municipalities in accordance with State law.

Tobacco Settlement Revenue Management Authority Fund. The Tobacco Settlement Revenue Management Authority was created to issue bonds that securitized future payments received under the multi-state legal settlement with the tobacco industry. The State transferred to the Authority, from its General Fund, all of its rights to the future tobacco settlement revenues. In return, the Authority transferred part of the bond proceeds to the State Tobacco Settlement Fund.

Education Lottery Fund. State law requires the Lottery Commission, a major discretely presented component unit, to transfer all proceeds from lottery ticket sales and other revenues net of expenses to the Education Lottery Fund. The Fund distributes these monies for education purposes and programs as stipulated in State law. These programs include tuition assistance, needs-based grants, scholarships for the State's universities and technical colleges and acquisition or improvement of physical resources for education.

Public Telecommunications Fund. The Public Telecommunications Fund of the State's Office of Regulatory Staff accounts for revenues collected from telephone companies within the State and redistributed to certain telephone companies in an effort to align prices and cost recovery with costs. This program also is intended to ensure basic telephone service at affordable rates is available to all citizens. Other revenues of the Fund include telephone customer surcharges for the 911 emergency system mandated by the FCC. These monies are collected from the telephone companies and distributed to local governments for their 911 emergency telephone systems.

Other Special Revenue Funds. These funds, aggregated for reporting purposes, account for various other revenues that must be used for specific purposes. These funds include operations of various employment services, water recreation, agricultural boards, forest renewal programs, certain housing programs, medical and dental scholarships, energy-related programs, and certain programs administered by the Department of Probation, Parole, and Pardon Services.

b. Capital Projects Fund

The Capital Projects Fund accounts for financial resources to be used for the acquisition or construction of major capital facilities (other than those financed by proprietary funds or in trust funds for individuals, private organizations, or other governments). Capital outlays financed from general obligation bond proceeds are accounted for through the Capital Projects Fund.

Governmental Funds

c. Debt Service Fund

The Debt Service Fund accounts for financial resources to be used for the repayment of debt service where the document executed to acquire the debt requires that the funds be segregated from the uses of the proceeds and other operational activities.

d. Permanent Funds

Permanent funds are used to report resources that are legally restricted to the extent that only earnings, and not principal, may be used for purposes that support the State's programs—that is, for the benefit of the State or its citizenry.

Bequests Fund. Sometimes private citizens make bequests of specific assets within their wills to the State. Typically, these gifts provide that the State may expend the earnings, but not the principal, to support certain State agencies or certain programs within a specific State agency. The Bequests Fund accounts for these funds.

Children's Education Endowment Fund. This fund accounts for low-level radioactive waste fees collected from the Barnwell waste facility that are not required to be deposited to the General Fund or remitted to Barnwell County. These funds are to be used for public school facilities assistance and higher education scholarship grants.

Wildlife Endowment Fund. The Wildlife Endowment Fund accounts for funds received from private citizens as gifts and contributions, as well as fees for certain lifetime hunting and fishing licenses. The State may expend the earnings, but not the principal, in furthering the conservation of wildlife resources and the efficient operation of the State's Department of Natural Resources.

General Reserve Fund Activity

BUDGETARY GENERAL FUND Last Ten Fiscal Years

Article III, Section 36, of the South Carolina Constitution establishes requirements relating to the General Reserve Fund (Reserve). The reserve primarily is designed to prevent Budgetary General Fund deficits. On November 4, 1988, a Constitutional amendment was passed, which permanently changed the funding requirement for the Reserve to three percent of the Budgetary General Fund revenue of the previous fiscal year. An additional Constitutional amendment was passed to be effective for the fiscal year 2011-2012, that requires the amount in the Reserve to be gradually increased one-half of one percent annually until the Reserve is five percent of the Budgetary General Fund revenue of the previous fiscal year.

If amounts are withdrawn from the Reserve, the State Constitution requires restoration of the Reserve to full funding within three years.

Key amounts (dollars in thousands) for the General Reserve Fund for the last ten fiscal years are:

Fiscal Year Ended June 30	Start-of- Year Balance	_Deposits_	Withdrawals	End-of-Year Balance	Full-Funding Amount	End-of- Year % Funded
2002	60.523	2.286	(62,800)		150.202

Proprietary Funds

Proprietary funds include enterprise and internal service funds. This subsection of the Comprehensive Annual Financial Report provides the following supplementary information for the State's proprietary funds:

- Combining Statement of Net Assets—Nonmajor Enterprise Funds
- Combining Statement of Revenues, Expenses, and Changes in Fund Net Assets—Nonmajor Enterprise Funds
- Combining Statement of Cash Flows—Nonmajor Enterprise Funds
- Combining Statement of Net Assets—Internal Service Funds
- Combining Statement of Revenues, Expenses, and Changes in Fund Net Assets—Internal Service Funds
- Combining Statement of Cash Flows—Internal Service Funds

Note 1b in the notes to the financial statements describes the State's major enterprise funds. The paragraphs below describe all nonmajor enterprise funds and the internal service funds that the State uses.

a. Nonmajor Enterprise Funds

The State uses enterprise funds to report activities for which it charges fees to external users for goods or services if *any* of the following situations applies:

- The activity is financed with debt that is secured solely by a pledge of the net revenues from fees and charges of the activity.
- Laws or regulations require that the activity's costs of providing services, including capital costs, be recovered
 with fees and charges rather than with taxes or similar revenues.
- The pricing policies of the activity establish fees and charges designed to recover its costs, including capital costs.

The State uses the nonmajor enterprise funds described below.

Patients' Compensation Fund. This fund provides medical malpractice insurance to any public or private health care provider within the State. This fund is reported as an insurance enterprise.

Patriots Point Development Authority Fund. The Patriots Point Development Authority is responsible for developing and operating the Patriots Point area near Charleston, including a naval museum. The Authority is supported by user fees.

Second Injury Fund. This fund serves as a claims processor for insurance carriers, self-insurers, and the State Accident Fund. The fund processes claims of employees with existing permanent physical impairment who are further injured in the course of their subsequent employment.

Tuition Prepayment Program Fund. This fund, previously known as the PACE program, allows contributors to make payments, under the terms of a tuition prepayment contract, to cover future undergraduate tuition expenses of a designated beneficiary at a South Carolina public higher education institution. Alternatively, the benefits of this contract can be applied toward the cost of tuition, up to the weighted average tuition at South Carolina public institutions, at any accredited college or university to which the designated beneficiary has been admitted.

The Citadel Trust, Inc., Fund. The Citadel Trust was formed for the purpose of investing funds in order to provide scholarship and other financial assistance or support to The Citadel, a higher education institution reported in the Higher Education Fund, a major enterprise fund.

University of South Carolina Trust Fund (the Trust). The Trust operates exclusively for the benefit of the University of South Carolina's School of Medicine to augment and aid education, research, and service in the field of health sciences. The University of South Carolina is a higher education institution reported in the Higher Education Fund, a major enterprise fund.

University Medical Associates Fund (UMA). UMA was established to promote and support educational, medical, scientific, and research purposes of the Medical University of South Carolina (MUSC), a higher education institution reported in the Higher Education Fund, a major enterprise fund. UMA promotes the recruitment and retention of superior faculty at MUSC.

Proprietary Funds

Medical University Facilities Corporation Fund (MUFC). MUFC was established to obtain financing for the Medical University of South Carolina to purchase land, an office building, and a parking garage.

CHS Development Company Fund. The Company was established to provide financing for the Medical University of South Carolina by developing and leasing property.

Enterprise Campus Authority. The Authority was established to provide for the management, development, and operation of the Enterprise Campus of Midlands Technical College. Midlands Technical College is a higher education institution reported in the Higher Education Fund, a major enterprise fund.

Other Enterprise Funds. Other enterprise activities of the State include: the Savannah Valley Development and the Public Railways Divisions of the South Carolina Department of Commerce, the Jobs-Economic Development Authority, the Canteens Fund, operation of the Columbia Farmers' Market, and enterprise operations of the Adjutant General's Office and the State Board for Technical and Comprehensive Education.

b. Internal Service Funds

The State uses the internal service funds described below to report activities that provide goods or services to other State funds, departments, agencies, component units, and/or to other governments, on a cost-reimbursement basis if the State is the predominant participant in the activity. If the State is *not* the predominant participant, it reports the activity as an enterprise fund.

Insurance Reserve Fund. This is a risk management/reinsurance fund. It underwrites insurance risks on public buildings and their contents and tort liability, medical malpractice, and automobile liability for public employees. State law limits the Fund's customers to certain governmental persons/entities within the State and certain associated parties.

Employee Insurance Programs Fund. This is a risk management fund that underwrites the group health, dental, life, accidental death and dismemberment, disability, and long-term care benefits provided to State and public school employees and retirees.

State Accident Fund. This is a risk management fund that provides workers' compensation benefits predominantly to State employees. Premiums are collected from State agencies.

General Services Fund. This fund accounts for various services provided to State and local governmental units for which user fees are charged. These services include telecommunication and computer services, rental of office buildings, janitorial services, building maintenance, and procurement services.

Central Supplies and Equipment Fund. This fund sells office supplies and equipment, food, and paper products to other governmental units. It also stores food and paper products for State agencies.

Motor Pool Fund. This fund provides daily and permanent lease assignments of vehicles to State agencies. It also maintains an inventory of automotive parts to provide maintenance of these vehicles.

Pension Administration Fund. This fund administers the public employee retirement systems. Revenues of the fund primarily consist of assessments charged to the pension trust funds.

Prison Industries Fund. This fund accounts for goods produced by inmate labor. These goods are sold primarily to State agencies.

Other Internal Service Funds. These funds, aggregated for reporting purposes, account for other miscellaneous activities that meet the definition of internal service funds. Such activities include provision of training programs for State employees and work activity centers of the Vocational Rehabilitation Department.

Fiduciary Funds

Fiduciary funds include pension and other post-employment benefit trust funds, investment trust funds, private-purpose trust funds, and agency funds. Note 1b in the notes to the financial statements provides definitions of each of these fund types.

This subsection of the Comprehensive Annual Financial Report provides the following supplementary information for the State's fiduciary funds:

- Combining Statement of Plan Net Assets—Pension and Other Post-Employment Benefit Trust Funds
- Combining Statement of Changes in Plan Net Assets—Pension and Other Post-Employment Benefit Trust Funds
- Combining Statement of Fiduciary Net Assets—Private-Purpose Trust Funds
- Combining Statement of Changes in Fiduciary Net Assets—Private-Purpose Trust Funds
- Combining Statement of Fiduciary Net Assets—Agency Funds
- Combining Statement of Changes in Assets and Liabilities—Agency Funds

The State maintains only one investment trust fund, so no combining statements are necessary for that fund type. The paragraphs below describe all other individual fiduciary funds that the State uses.

a. Pension and Other Post-Employment Benefit Trust Funds

South Carolina Retirement System. This is a multiple-employer pension system that benefits employees of the State, public schools, and political subdivisions of the State.

Police Officers' Retirement System. This is a multiple-employer pension system that benefits police officers and fire fighters employed by the State or its political subdivisions.

General Assembly Retirement System. This is a single-employer pension system that benefits members of the South Carolina General Assembly.

Judges' and Solicitors' Retirement System. This is a single-employer pension system that benefits the judges of the State's Supreme Court, Court of Appeals, circuit courts, family courts, and the State's circuit solicitors.

National Guard Retirement System. The State administers this single-employer pension system that provides a supplemental retirement benefit to members of the South Carolina National Guard. The State is a nonemployer contributor to the system.

South Carolina Retiree Health Insurance Trust Fund. This trust was established to fund the State's cost-sharing multiple employer post-employment health and dental benefit plans.

Long-term Disability Insurance Trust Fund. This trust was established to fund the State's cost-sharing multiple employer long-term disability insurance plans.

b. Private-Purpose Trust Funds

College Savings Plan Fund. The Future Scholar 529 College Savings Plan (the Plan), accounted for in this fund, provides participant families a tax-advantaged method of saving for future college costs. A primary objective of both the financial advisor program and the direct program within the Plan is to provide families with flexibility and professional investment management in meeting their college savings objectives.

Other Private-Purpose Trust Funds. This fund accounts for monies the State has received as trustee under various trust arrangements that specify how the principal and interest earnings must be used. In each case, all of the principal and income benefit individuals, private organizations, or governments outside the State reporting entity; none of the monies may be used for State purposes. The purposes to which the resources of these funds are dedicated include scholarships, the operation of the equestrian center and activities at the Springdale Race Course (for the exclusive benefit of the Carolina Cup Racing Association, Inc., a private nonprofit corporation), and the decommissioning of a low-level radioactive waste disposal facility on behalf of Chem-Nuclear Systems, Inc., a for-profit corporation.

c. Agency Funds

Payroll Clearing Fund. This fund accounts for payroll activity for the short period of time between the issuance of payroll checks and payment to the proper recipient.

Other Agency Funds. Balances in these funds, aggregated for presentation purposes, represent amounts held for prisoners and patients of State institutions, cash bonds, miscellaneous clearing accounts, and other deposits.

Discretely Presented Component Units

Note 1a in the notes to the financial statements explains the relationship of component units to the primary government and the differences between blended component units and discretely presented component units. Note 1b in the notes to the financial statements explains that the State has designated four of its discretely presented component units as major component units. Government-wide financial statements for each of the four major component units are included in the basic financial statements (immediately preceding the notes to the financial statements).

This subsection of the Comprehensive Annual Financial Report provides the following supplementary information for the State's nonmajor discretely presented component units:

- Combining Statement of Net Assets—Nonmajor Discretely Presented Component Units
- Combining Statement of Activities—Nonmajor Discretely Presented Component Units
- Balance Sheet—South Carolina First Steps to School Readiness Board of Trustees
- Statement of Revenues, Expenditures, and Changes in Fund Balances—South Carolina First Steps to School Readiness Board of Trustees

The paragraphs below describe the State's nonmajor discretely presented component units:

The Clemson University Foundation is a non-profit, tax-exempt public charity that was established to raise and manage private gifts for the advancement and benefit of Clemson University.

The University of South Carolina Educational Foundation (the Foundation) is an eleemosynary corporation operating for the benefit and support of the University of South Carolina. The Foundation establishes and implements long-range fund raising programs to assist in the expansion and improvement of the educational functions of the University.

The South Carolina Medical Malpractice Liability Joint Underwriting Association (the Association) was established to provide medical malpractice insurance on a self supporting basis.

The South Carolina First Steps to School Readiness Board of Trustees (First Steps) was established in 1999 as a non-profit, tax-exempt corporation under Section 501(c)(3) of the Internal Revenue Code. The corporation was created specifically to carry out the objectives of The South Carolina First Steps to School Readiness Act and to lessen the burdens on government by overseeing the South Carolina First Steps to School Readiness initiative for improving early childhood development.

The State presents fund financial statements for First Steps, a nonmajor discretely presented component unit, because that organization does not issue separately audited financial statements of its own. First Steps uses accounting principles that apply to special revenue funds. As such, it uses the current financial resources measurement focus and the modified accrual basis of accounting.

The Children's Trust Fund of South Carolina, Inc. (the Fund) is a non-profit, tax-exempt organization under Section 501(c)(3) of the Internal Revenue Code. The Fund's purpose is to stimulate innovative prevention and treatment programming to meet critical needs of South Carolina's children by awarding grants to private non-profit organizations.

Statistical Section (Unaudited)

This section presents certain economic and social data and financial trends over a ten-year period.

Statistical Section

This section of the Comprehensive Annual Financial Report provides additional information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the State of South Carolina's overall financial health.

CONTENTS

	Page
Financial Trends	210
These schedules contain trend information to help the reader understand how the State's financial performance and well-being have changed over time.	
Revenue Capacity	224
These schedules contain information to help the reader assess the State's most significant revenue sources, the personal income tax and the retail sales tax.	
Debt Capacity	230
These schedules present information to help the reader assess the affordability of the State's current levels of outstanding debt and the State's ability to issue additional debt in the future.	
Demographic and Economic Information	249
These schedules offer demographic and economic indicators to help the reader understand the environment within which the State's financial activities take place.	
Operating Information	254
These schedules contain service and capital asset data to help the reader understand how the information in the State's financial report relates to the services the State provides and the activities it performs.	

SOURCES

Unless otherwise noted, the information in these schedules is derived from the State's Comprehensive Annual Financial Report for the relevant fiscal year.

Computation of Legal Debt Margin

June 30, 2012

(Expressed in Thousands)

Section 59-107-90 of the South Carolina Code of Laws states that the maximum amount of annual debt service on institution bonds for each institution shall not exceed ninety percent of the sums received from tuition fees for the preceding fiscal year.

Section 57-11-240 of the South Carolina Code of Laws and Article X, Section 13 of the South Carolina Constitution state that highway bonds may be issued if such bonds are additionally secured by a pledge of revenues designated by the General Assembly for State highway purposes from taxes or licenses imposed for using the public highways of the State. The maximum annual debt service on all highway bonds shall not exceed fifteen percent of the proceeds received from the designated revenues for the fiscal year next preceding.

Section 11-51-50 of the South Carolina Code of Laws states that the issuance of general obligation bonds of the State must be limited so that the maximum annual debt service on all general obligation bonds of the State (excluding highway bonds, State institution bonds, tax anticipation notes, and bond anticipation notes) may not exceed six percent of the general revenues of the State for the fiscal year next preceding (excluding revenues which are authorized to be pledged for state highway bonds and state institution bonds).

Section 11-41-60 states that the maximum annual debt service on economic development bonds may not exceed one-half of one percent of the general revenues of the State for the fiscal year next preceding (excluding revenues which are authorized to be pledged for state highway bonds and state institution bonds).

Section 11-51-50 also states that the maximum annual debt service on research university infrastructure bonds may not exceed one-half of one percent of the general revenues of the State for the fiscal year next preceding (excluding revenues which are authorized to be pledged for state highway bonds and state institution bonds).

South Carolina State University exceeded its legal debt service limit on its State institution bonds by approximately \$30 thousand at June 30, 2012. The University will adjust tuition fees in subsequent years to cover the debt requirement.

b As of June 30, 2012, the maximum annual debt service will occur in the fiscal year ending June 30, 2013.

^c For the fiscal year ended June 30, 2012, there were no net Budgetary General Fund revenues pledged for State institution bonds and anticipation notes.

d As of June 30, 2012, the maximum annual debt service will occur in the fiscal year ending June 30, 2014.

During the fiscal year ended June 30, 2010, the State issued \$50 million of Air Carrier Hub Terminal Facilities bonds under the provisions of Section 55-11-520 of the South Carolina Code of Laws. Section 55-11-520(A) states that no more than \$50 million of Air Carrier Hub Terminal Facilities bonds may be outstanding at any time.

During the fiscal year ended June 30, 2010, the State issued \$170 million of Economic Development bonds which, based on the provisions of Section 11-41-60 of the South Carolina Code of Laws, are not subject to the limitation on maximum annual debt service. This \$170 million bond issue has been excluded from the debt service limit calculations.
