**RICHARD ECKSTROM, CPA**  
COMPTROLLER GENERAL

**WILLIAM E. GUNN**  
CHIEF OF STAFF

November 13, 2020

**To the Citizens, Governor and  
Members of the South  
Carolina General Assembly**

I am pleased to present to the citizens of South Carolina this Comprehensive Annual Financial Report for the State of South Carolina for the fiscal year ended June 30, 2020. The report provides financial information about the State's operations during the year and describes its financial position at the end of the year.

Management assumes full responsibility for the completeness and reliability of the information contained in this report, based upon a comprehensive framework of internal controls that was established for this purpose. Because the cost of internal controls should not exceed the anticipated benefits, the objective is to provide reasonable, rather than absolute, assurance that the financial statements are free of any material misstatements.

The State Auditor and CliftonLarsonAllen LLP, an independent certified public accounting firm, jointly performed an independent audit of the State's basic financial statements for the fiscal year ended June 30, 2020. The auditors have issued an unmodified opinion, the most favorable outcome of the audit process.

This letter of transmittal is designed to complement management's discussion and analysis that immediately follows the report of the independent auditors.

**PROFILE OF THE GOVERNMENT**

South Carolina extends from the Atlantic Ocean westward to the Blue Ridge Mountains, containing over 30,000 square miles. Fortieth in geographic area among the fifty states, South Carolina ranks twenty-third in population with approximately 5.2 million citizens. According to the U.S. Census Bureau, the State's rate of population growth is presently the sixth fastest in the nation.

As shown in the organizational chart on page 15, State government is divided into three separate branches: legislative, executive, and judicial. The State's citizens elect the legislative and executive branch officials. The General Assembly elects certain members of the judicial branch, including the Supreme Court. The principal State officials currently in office are listed on page 14.

State government provides a full range of services to South Carolina's citizens including educational, health, social/human, transportation, public safety, regulatory, and conservation/natural resources services. In addition, the State provides funds, grants, and loans to assist local governments, including school districts.

The State's reporting entity includes the primary government and its component units. The primary government includes all funds, departments, and agencies. The State's component units are legally separate organizations for which the State is accountable for purposes of financial reporting. The Management's Discussion and Analysis (MD&A) and the Basic Financial Statements focus on the activities of the primary government and the State's major component units.

Additional information on the State's nonmajor component units can be found on pages 257 – 263 and in the separately issued financial statements of those component units.

## **State of South Carolina**

---

South Carolina's annual Appropriations Act includes legally adopted budgets by agency for the Budgetary General Fund and for Total Funds. After the budget year begins, the Executive Budget Office (EBO) may order spending cuts if revenue collections fall short of predicted levels. A department or agency may request transfers of appropriations between programs if its transfer request does not exceed 20% of its program budget. The EBO has the authority to approve additional requested transfers of appropriations between personal services and other operating expenditure accounts. For additional information, see the notes to the required supplementary information - budgetary.

### **STATE ECONOMY**

South Carolina has a diversified economic base, including manufacturing, trade, healthcare, services, and leisure/hospitality. Businesses have relocated here from all over the world taking advantage of the State's skilled labor force, competitive wages, lower-priced land, excellent port facilities and accessibility to markets, and, in recent years, substantial tax and other economic incentives.

Businesses continue to choose South Carolina as a place to locate or expand, and the State of South Carolina is committed to working with employers to meet their workforce needs through state-supported workforce development initiatives.

During the year ended June 30, 2020, total non-farm employment in the state decreased by 120,400 to 2,059,400 as a result of COVID-19. Industry sectors reflecting gains were Construction (+6,300) and Mining, Logging, Information, and Other Services (+1,100). Declines were experienced in Leisure and Hospitality (-62,300); Government (-17,500); Trade, Transportation, and Utilities (-13,400); Education and Health Services (-12,600); Professional and Business Services (-11,700); Manufacturing (-7,800); and Financial Activities (-2,500).

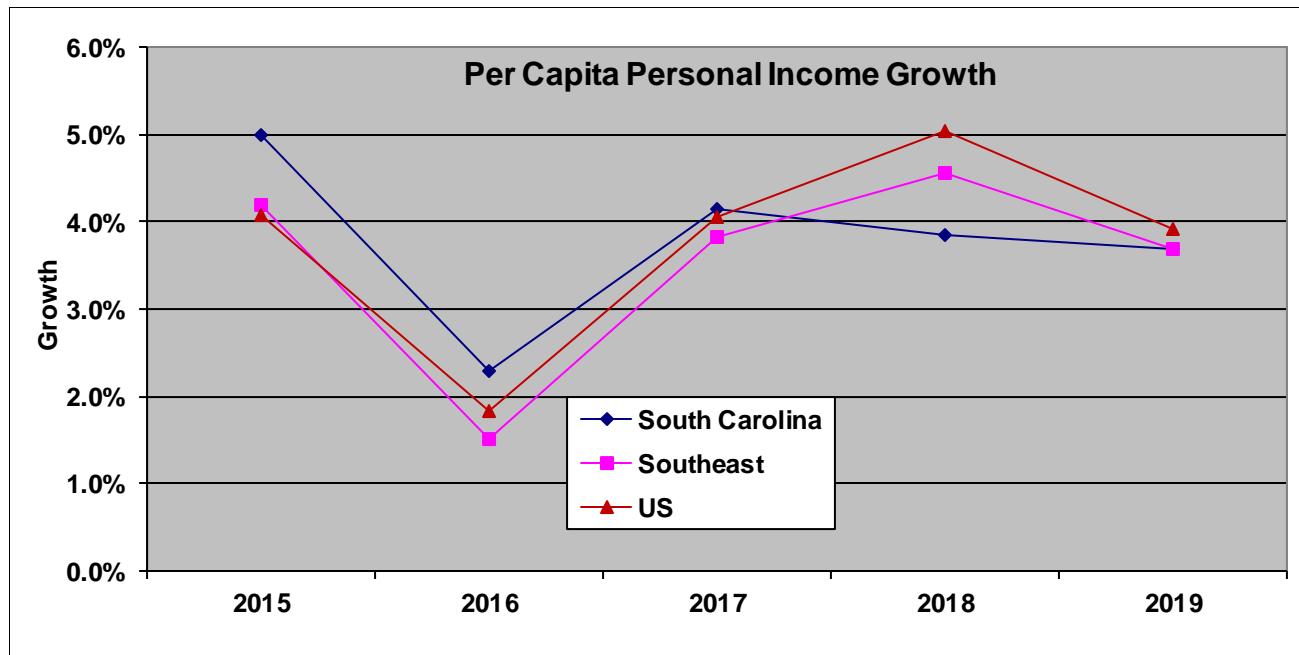

South Carolina's unemployment rate was 8.7% in June 2020, which increased due to the effects of COVID-19 from the June 2019 rate of 2.9%. It further improved to 5.1% in September 2020. In comparison, the U.S. unemployment rate was 10.2% in June 2020 and 7.9% in September 2020.

The South Carolina Leading Index (SCLI) decreased by 0.55 points from June 2019 to June 2020 to 101.89. Above the 100 mark, the SCLI forecasts improving economic conditions for South Carolina over the upcoming three to six months. The SCLI closed the month of September 2020 at 102.43, the most current month available.

The number of real estate closings declined by 10.0% when comparing June 2020 and June 2019 due in large part to the effects of COVID-19. However, with the declining number of foreclosures in the state, down 50.7% in June 2020 compared to June 2019, the supply of available homes on the market remains low. As inventory tightens, real estate values in South Carolina have gained ground. In addition, the number of residential building permits decreased slightly by 1.7% compared to a year ago, but the value of those permits increased by 6.2% when comparing June 2020 and June 2019.

The South Carolina housing market is rebounding with the Myrtle Beach housing market experiencing strong home sales in the first half of calendar year 2020. This growth was also complemented by median prices of homes sold increasing 8.4% when comparing June 2020 to June 2019.

The following compares South Carolina, the southeastern United States, and the entire United States in per capita personal income growth over the last five years.

## LONG-TERM FINANCIAL PLANNING

State law requires agencies that receive 1% or more of the State government's total annual General Fund appropriations to provide an estimate of their projected General Fund expenditures for the next three fiscal years. The EBO combines these expenditure estimates with long-term revenue estimates made by the State's Board of Economic Advisors (BEA) to create a three-year financial plan. The three-year financial plan assists the State in strategically assessing its future financial commitments. The plan is updated annually and provided to the Governor, the Speaker of the House of Representatives, and the President of the Senate during the second quarter of each fiscal year.

Significant financial challenges facing state government include anticipated future spending increases for Medicaid, State retirement and post-retirement health benefits, and elementary and secondary education.

The State's long-term financial management practices include a five-year comprehensive capital improvement plan that requires funding to be in place before beginning construction on any capital improvement projects.

## RELEVANT FINANCIAL POLICIES

The State's legislature is required to adopt a balanced budget annually based on revenue projections provided by the BEA. State law requires the BEA to meet at least quarterly to compare actual revenue collections with its earlier projections and to adjust its projections if necessary. The State legislature and EBO are responsible for taking appropriate action to keep the State's budget in balance. If at the end of the first, second, or third quarter of any fiscal year the BEA reduces revenue by more than 3% below the amount projected for the fiscal year, the President of the Senate and the Speaker of the House of Representatives may call each respective house into session to take action to avoid a year-end deficit. If the houses do not come into session within twenty days of the BEA determination, the Director of the EBO must reduce most agency appropriations evenly across-the-board to avoid a year-end deficit. The State is also required to maintain a General Reserve Fund amounting to 5% of total General Fund revenues for the latest completed fiscal year that can be used only for eliminating a year-end operating deficit. Additionally, the State is required to annually fund a 2% Capital Reserve to be used for capital improvements, debt retirement, or other nonrecurring purposes appropriated by the General Assembly.

Legislation also directs that in closing the books each year the Comptroller General shall suspend, to the extent necessary, any budgetary surplus appropriations in a general or supplemental act or Capital Reserve Fund appropriations if the State's General Fund has a negative Unassigned fund balance when reported on a generally accepted accounting principles-basis.

The State ended fiscal year 2020 with a positive budgetary General Fund fund balance after reservation of \$1.805 billion, which was made up of legislatively approved agency carryover appropriations of \$623.544

million, the General Reserve of \$406.213 million, Contingency Reserve of \$103.451 million, and an unassigned surplus of \$671.515 million. See the Required Supplementary Information – Other than Management’s Discussion and Analysis (Unaudited) section for further information.

### **MAJOR INITIATIVES**

The State continues to fund programs related to job creation. In calendar year 2019 the State committed \$19.072 million to the South Carolina Coordinating Council on Economic Development’s Set-Aside Fund, which is dedicated to improving the economic well-being of the State by providing funds to local governments to develop the infrastructure necessary for new and expanding business. Programs like this helped to recently attract a Walmart distribution center to Dorchester County and Spartan Motors, Inc. to Charleston County. Walmart is expected to create 1,000 jobs and Spartan Motors, Inc. is expected to create 300 jobs in the coming years. Additionally, Ross Stores, Inc announced in fiscal year 2020 that it will expand its facilities in York County, which will create an additional 700 jobs in the coming years as well.

South Carolina’s job creation and capital investment from manufacturers have experienced steady growth since the end of the 2007 - 2009 Recession. In 2019 alone, the State attracted more than \$2.443 billion in new capital investment from manufacturing companies, which resulted in the creation of more than 9,400 jobs.

*Area Development Magazine* recently ranked South Carolina third in the nation in its 2020 “Top States for Business” analysis. It also ranked South Carolina second in the nation in business incentive programs and second in cooperative and responsive state government.

### **South Carolina’s Growing Economic Environment**

Over the last several years, South Carolina has continued to demonstrate its ability to attract expanded economic opportunities for citizens. Manufacturing has grown substantially. Even in the midst of challenging national economic conditions, our state’s business-friendly climate and committed workforce continue to attract investment that creates well-paying jobs.

We have seen an emerging trend of companies investing and expanding in South Carolina. Many of South Carolina’s major employers have expanded and created high-quality jobs within the State. In 2012, the State established an Aerospace Task Force to position the State for future growth. The task force is focused on growing the aerospace supply chain for companies like Boeing, Lockheed Martin, and GE Turbine and supporting initiatives to assure that South Carolina has a workforce ready for the aerospace industry.

South Carolina’s exports reached a record-high of \$41.5 billion in 2019, which is an increase of 19.7% from 2018. In 2019, South Carolina ranked 11<sup>th</sup> in the United States in exports. These export figures were bolstered by the fact that the State is the nation’s top exporter of completed passenger vehicles and tires, in which the State accounted for approximately 18% of the entire U.S. passenger vehicles market and approximately 35% of the total U.S. tire export market. The State also recently established a Transportation, Distribution and Logistics (TDL) Council that includes strong private sector participation. Part of the mission of this council is to prepare South Carolina for the Panama Canal expansion, providing South Carolina with a world-class port that will have the capacity to support the expected increase in merchant shipping. The Port of Charleston is deepening its shipping channel from forty-five to fifty-two feet. Once the project is completed by 2021, Charleston will be the deepest port on the east coast.

Due in part to the State’s economic outreach initiatives, South Carolina’s total economic output or gross domestic product (GDP) was \$246.309 billion in 2019. Between 2018 and 2019, real GDP grew 5.3%, compared to the southeast states’ average growth of 4.2%.

With our cost of living 10% below the national average, South Carolina offers exceptionally productive employees at one of the lowest labor costs in the nation. South Carolina is a right-to-work state and in 2019 had the lowest unionization rate in the nation, at 2.2% of the workforce. As a result of this, South Carolina was second among the states in improved unemployment rates after experiencing a 0.7% decrease in unemployment.

## AWARDS AND ACKNOWLEDGMENTS

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the State of South Carolina for its Comprehensive Annual Financial Report (CAFR) for the fiscal year that ended June 30, 2019. This was the thirty-second consecutive year that the State of South Carolina achieved this recognition. In order to be awarded a Certificate of Achievement, a government must publish a timely, easily readable, and efficiently organized CAFR. The CAFR must comply with both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current CAFR continues to meet the Certificate of Achievement Program's requirements and we are submitting it to GFOA to determine its eligibility to be awarded a Certificate of Achievement.

Production of the CAFR was made possible only by the support of all State agencies and component units that supplied financial data to our office on a timely basis. I extend special appreciation for the members of my staff who devoted many of their nights and weekends over the past few months working as a team to produce this comprehensive document. I also express special appreciation for the generous sacrifices made by their families who endured the many extra hours they devoted to successfully complete this project.

Sincerely,

Richard Eckstrom, CPA  
Comptroller General
