RICHARD ECKSTROM, CPA
COMPTROLLER GENERAL

NATHAN KAMINSKI, JR., Esq.
CHIEF OF STAFF

November 12, 2008

**To the Citizens, Governor and
Members of the South
Carolina General Assembly**

I am pleased to present to the citizens of South Carolina this Comprehensive Annual Financial Report for the State of South Carolina for the fiscal year ended June 30, 2008. The report provides financial information about the State's operations during the year and describes its financial position at the end of the year. For the convenience of users, we have divided the report into three sections as follows:

- The Introductory Section, containing this letter of transmittal; the Certificate of Achievement for Excellence in Financial Reporting that we recently received for our report as of June 30, 2007; a list of State officials; and an organizational chart of State government.
- The Financial Section, including the report of the independent auditors, management's discussion and analysis, government-wide financial statements, fund financial statements, required supplementary information, other combining financial statements, and schedules.
- The Statistical Section, presenting comparative financial data and other non-financial data.

Management assumes full responsibility for the completeness and reliability of the information contained in this report, based upon a comprehensive framework of internal controls that was established for this purpose. Because the cost of internal controls should not exceed the anticipated benefits, the objective is to provide reasonable, rather than absolute, assurance that the financial statements are free of any material misstatements.

The State Auditor and Clifton Gunderson LLP, an independent certified public accounting firm, jointly performed an independent audit of the State's basic financial statements for the fiscal year ended June 30, 2008. The auditors have issued an unqualified opinion, the most favorable outcome of the audit process.

This letter of transmittal is designed to complement management's discussion and analysis that immediately follows the report of the independent auditors.

PROFILE OF THE GOVERNMENT

South Carolina extends from the Atlantic Ocean westward to the Blue Ridge Mountains, containing over 30,000 square miles. Fortieth in geographic area among the fifty states, South Carolina ranks twenty-fourth in population with approximately 4.4 million citizens.

As shown in the organization chart on page 15, State government is divided into three separate branches: legislative, executive, and judicial. The State's citizens elect the legislative and executive branch officials. The General Assembly elects certain members of the judicial branch, including the Supreme Court. The principal State officials currently in office are listed on page 14.

State government provides a full range of services to South Carolina's citizens including educational, health, social/human, transportation, public safety, regulatory, and conservation/natural resources services. In addition, the State provides grants and loans to assist local governments, including school districts, within its borders.

Certain legally separate entities are included in these financial statements because they function, in essence, as part of State government. The Governor appoints the governing boards for the Public Service Authority, a public utility company, and the State Ports Authority. The Connector 2000 Association, Inc. assists the State's Department of Transportation on a toll road project. The Lottery Commission transfers its net proceeds to the State for educational programs. Other entities benefit and support institutions of higher education, provide medical malpractice insurance, and address medical and educational needs of South Carolina's children. Additional information on these legally separate entities can be found in the notes to the financial statements.

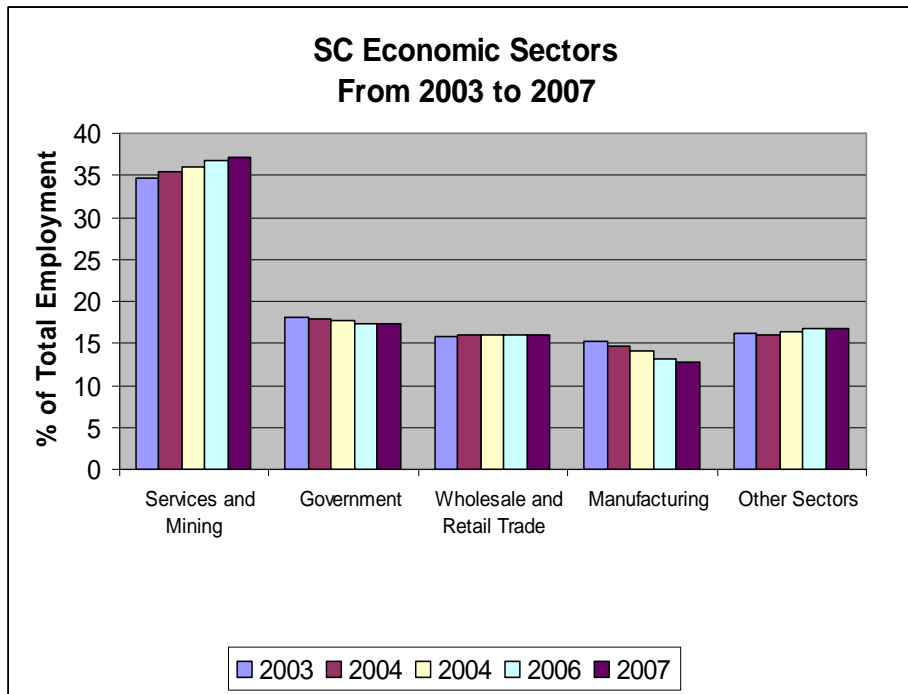

South Carolina's annual Appropriations Act includes legally adopted budgets for the Budgetary General Fund and for Total Funds. The initial budget appears in the annual Appropriations Act. After the budget year begins, the State Budget and Control Board, comprised of five key executive and legislative officials, may order spending cuts if revenue collections fail to reach predicted levels. Departments and agencies may request transfers of appropriations among programs if the transfer request does not exceed 20% of the program budget. The Budget and Control Board has the authority to approve additional transfers of appropriations between personal service and other operating expense accounts. For additional information, see the notes to the required supplementary information - budgetary.

STATE ECONOMY

South Carolina has a diverse economic base, including manufacturing, trade, health care, services, and leisure and hospitality. Businesses have migrated here from all over the world to take advantage of the State's skilled labor force, competitive wages, lower-priced land, excellent port facilities, and accessibility to markets, and in recent years, substantial tax incentives.

Overall, South Carolina has suffered by the national soaring gas prices and stagnant economy but has seen a slight increase in job growth with total employment up 4,500 jobs, a gain of less than 1% over the last twelve months. The State experienced losses of 13,900 in construction and 5,000 in manufacturing from June 2007. The strongest employment gains have been in the State's service sector which has risen from 34% of total employment to 37% during the past five years. This sector, fueled by tourism, educational, and healthcare industries has contributed to a more diversified overall employment base and improved income levels. During fiscal year 2007-2008, average hourly earnings have increased by 3.4% and average weekly earnings have risen by 2.8%.

Although the State's unemployment rate of 5.9% continues to be higher than the national average rate of 4.6%, the State's economy has continued to generate jobs. During calendar year 2007, the jobless rate has fallen a half a percent from calendar year 2006. The State's unemployment rate as of September 2008 has increased to 7.3% based on the recent crisis in the financial markets.

South Carolina’s per capita income for 2007 increased to \$31,013, or 4.5% over 2006. Although the 2007 increase was below the national (5.4%) and southeastern states (4.9%) growth rates, it ranked as the highest per capita personal income growth rate for the State in the last five years.

South Carolina’s population at July 1, 2007, was 4.4 million. The State’s rate of population growth is presently the eleventh fastest in the nation.

The South Carolina Department of Commerce was involved in recruiting 15,666 jobs and \$4.05 billion in new capital investment to the state in 2007. This showed large job creation levels in

non-urban areas, new companies choosing to invest heavily in South Carolina and diversity in investments.

LONG-TERM FINANCIAL PLANNING

State law requires agencies receiving 1% or more of the total annual General Fund appropriations to provide an estimate of their general fund expenditures for the next three fiscal years. The State Budget Office combines these expenditure estimates with long-term revenue estimates made by the State's *Board of Economic Advisors* (BEA) to create a three-year financial plan. The three-year financial plan assists the State in strategically assessing its future financial commitments. The plan is updated annually and provided to the State's Budget and Control Board, the Speaker of the House of Representatives, and the President Pro Tempore of the Senate during the second quarter of each fiscal year.

Principal financial challenges facing state government include anticipated future spending increases for Medicaid, State retirement and health benefits (including post employment benefits), and elementary and secondary education.

The State's long-term financial management practices include a five-year capital improvement plan, which requires funding to be in place before beginning construction on any capital improvement projects.

RELEVANT FINANCIAL POLICIES

The State's legislature is required to adopt a balanced budget annually based on revenue projections provided by the BEA. State law requires the BEA to meet at least quarterly to review how actual revenue collections compare with its earlier projections, and to adjust its projections if necessary. If the BEA reduces revenue projections significantly once the budget year begins, the State's Budget and Control Board is responsible for taking appropriate action to keep the State's budget in balance. If the Board anticipates a year-end operating deficit as a result of the BEA reducing its revenue projections, it must first reduce amounts set-aside in the Annual Appropriations Act for the 2% Capital Reserve. If the anticipated deficit is greater than the 2% Capital Reserve, then the Board must reduce most agency appropriations evenly across-the-board. The State also is required to maintain a 3% General Reserve that can be used only for eliminating a year-end operating deficit. If the State's budgetary General Fund subsequently experiences a year-end operating deficit even after applying all the actions described above, the Board is required to meet within sixty days of August 31 to adopt a plan to liquidate the deficit.

Legislation also exists directing that in closing the books each year the Comptroller General shall suspend, to the extent necessary, any budgetary surplus appropriations in a general or supplemental act or Capital Reserve appropriations, if the State's GAAP-basis General Fund reports a negative unreserved fund balance.

The State's General Fund experienced a budgetary operating deficit and a negative GAAP unreserved fund balance for the fiscal year ended June 30, 2008. The State applied the entire Capital Reserve Fund of \$125 million, \$73 million of the General Reserve Fund, and \$34 million of fiscal year 2007 surpluses that had been carried over for spending in fiscal year 2008 to cover the budgetary operating deficit.

MAJOR INITIATIVES

Finance and Budgeting

The General Assembly approved provisions for guaranteed two percent annual cost of living adjustment (COLA) for beneficiaries within the South Carolina Retirement System and the South Carolina Police Officers Retirement System. The legislation provides that in years when the

Consumer Price Index, which is used to measure inflation, increases by no more than two percent, retirees within these systems are awarded a two percent cost of living adjustment. In years when the Consumer Price Index increase by more than two percent, the legislation establishes conditions that must be met before these retirees may be awarded a cost of living adjustment beyond two percent up to the total percentage increase in the Consumer Price Index or four percent, whichever is less.

The 2008-2009 Appropriations Act includes a 1% pay raise for state employees and funded teacher's salaries at \$300 over the Southeastern average.

Reforms

The General Assembly approved the "South Carolina Illegal Immigration Reform Act." This comprehensive legislation provides criminal penalties for harboring and transporting illegal aliens as well as for the possession for certain fraudulent documents. The legislation employment eligibility verification; prohibits the employment of unauthorized aliens; and authorizes a civil right of action for wrongful termination. Among other things, the legislation places new restrictions on receiving public benefits; establishes a mechanism for the recording and reporting of immigration law violations; requires the enforcement of standards of ethics in the profession of immigration assistance by private individuals who are not lawyers; and prohibits the development of "sanctuary cities" in South Carolina by requiring local officials to adhere to State law.

Responding to the large numbers of alcohol and drug related traffic collisions, the General Assembly revised driving under the influence (DUI) laws this session. The legislation approved by the General Assembly enhances penalties for the offenses of driving under the influence and driving with an unlawful alcohol concentration and structures these penalties so that they are increased according to the offender's level of intoxication. Individuals convicted of drunk driving offenses are required to complete drug and alcohol treatment plans.

Business and Economic Development

The South Carolina Educational Broadband Service Commission was established to evaluate business proposals for leasing the excess spectrum capacity licensed to the South Carolina Educational Television Network that will become available following the federally required conversion to digital broadcasting.

The General Assembly approved the "South Carolina Residential Improvement District Act" to provide a new option for financing infrastructure and other improvements needed to facilitate development. Under the legislation, the owners of real property may request the governing body of a county or municipality to create a district consisting of their property and impose assessments within that district. A local government is authorized to issue bonds secured against the revenue from these assessments in order to fund proposed improvements such as roads, sidewalks, parks, playgrounds, recreational facilities, parking, facade redevelopment, storm water drainage projects, utilities, and school construction or renovation.

Education

The 2008-2009 Appropriations Act provides an additional \$94.5 million to fully fund the Education Finance Act. Other important legislation in support of education includes comprehensive legislation revising the Education Accountability Act of 1998 which replaces the Palmetto Achievement Challenge Test (PACT) with a new accountability test. Also, the South Carolina LightRail Consortium was created to manage access to a high speed, high bandwidth fiber optic communications network for research and clinical work conducted by the State's institutions of higher learning and their research partners.

Energy Conservation

The General Assembly approved a bill establishing incentives for energy efficient manufactured homes. The legislation establishes the Energy Efficient Manufactured Homes Incentive Program to allow an individual who purchases a manufactured home that meets energy saving efficiency standards to receive an income tax credit equal to seven hundred fifty dollars.

Also, legislation was passed for a Fleet Management Program that seeks to improve environmental quality in this state by decreasing the discharge of pollutants. In addition the legislation outlines that a preference in purchasing state motor vehicles must be given to hybrid, plug-in hybrid, bio-diesel, hydrogen, fuel cell, or flex-fuel vehicles when the performance, quality and anticipated life-cycle costs are comparable to other available motor vehicles.

AWARDS AND ACKNOWLEDGMENTS

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the State of South Carolina for its Comprehensive Annual Financial Report (CAFR) for the fiscal year ended June 30, 2007. This was the twentieth consecutive year that the State of South Carolina has achieved this recognition. In order to be awarded a Certificate of Achievement, a government must publish a timely, easily readable, and efficiently organized CAFR. The CAFR must comply with both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current CAFR continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

Production of the CAFR was made possible only by the support of all State agencies and component units that supplied financial data to our office on a timely basis. We extend special appreciation to Mr. Larry Pearce, Director of Publications and Printing at the University of South Carolina, for providing the CAFR's attractive cover.

Sincerely,

Richard Eckstrom, CPA
Comptroller General

**CERTIFICATE
OF ACHIEVEMENT
FOR EXCELLENCE IN
FINANCIAL REPORTING**

Certificate of Achievement for Excellence in Financial Reporting

Presented to

State of South Carolina

For its Comprehensive Annual
Financial Report
for the Fiscal Year Ended
June 30, 2007

A Certificate of Achievement for Excellence in Financial Reporting is presented by the Government Finance Officers Association of the United States and Canada to government units and public employee retirement systems whose comprehensive annual financial reports (CAFRs) achieve the highest standards in government accounting and financial reporting.

Independent Auditors' Report

The Honorable Mark Sanford, Governor
and Members of the General Assembly
State of South Carolina
Columbia, South Carolina

We have jointly audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of South Carolina (the State), as of and for the year ended June 30, 2008, which collectively comprise the State's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the State's management. Our responsibility is to express opinions on these financial statements based on our audit. We did not jointly audit the financial statements of certain agencies and component units of the State of South Carolina, which represent the indicated percent of total assets and total revenues as presented in the table below. Those financial statements were audited by other auditors whose reports have been furnished to us, and our opinion, insofar as it related to the amounts included for those agencies and component units, is based solely on the reports of the other auditors.

	Percentage audited by other auditors	
	Total Assets	Total Revenue
<u>Government-wide</u>		
Governmental activities	61	18
Business-type activities	98	100
Component units	100	100
<u>Fund Statements</u>		
Governmental Funds	23	8
Enterprise Funds	98	100
Internal Service Funds	75	93
Fiduciary Funds	98	100

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to the financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The financial statements of the discretely presented component units identified in Note 1(a) were not audited in accordance with *Government Auditing Standards*, issued by the Comptroller General of the United States. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements.

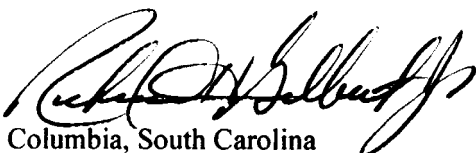

An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit and the reports of other auditors provide a reasonable basis for our opinions.

In our opinion, based on our audit and the reports of other auditors, the financial statements referred to in paragraph one present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of South Carolina as of June 30, 2008, and the respective changes in financial position and cash flows, where applicable, thereof for the year then ended in conformity with accounting principles generally accepted in the United States of America.

In accordance with *Government Auditing Standards*, we have also issued our report dated November 12, 2008 on our consideration of the State's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be read in conjunction with this report in assessing the results of our audit.

The management's discussion and analysis and required supplementary information, listed in the accompanying table of contents, are not a required part of the basic financial statements but are supplementary information required by accounting principles generally accepted in the United States of America. We and the other auditors have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State's basic financial statements. The introductory section, supplementary information to the financial statements and the statistical section as listed in the accompanying table of contents are presented for purposes of additional analysis and are not a required part of the basic financial statements. The supplementary information to the financial statements has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole. The introductory section and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on them.

Columbia, South Carolina

**MANAGEMENT'S DISCUSSION
AND ANALYSIS—
Required Supplementary Information
(Unaudited)**

Management’s Discussion and Analysis

In this section of the State of South Carolina’s annual report, we provide a narrative overview and analysis of the State’s financial performance for its accounting year (*fiscal year*) that ended June 30, 2008. Please read it together with the Comptroller’s *Letter of Transmittal* at the front of this report and also the financial statements, which follow this section.

Overview of the Financial Statements

This discussion and analysis provides an introduction to the State of South Carolina’s basic financial statements, which include the following parts: (1) *government-wide financial statements*, (2) *fund financial statements*, (3) *component unit financial statements*, and (4) *notes to the financial statements*. This annual report also contains certain *required supplementary information* and other *supplementary information*.

Government-wide Financial Statements

The government-wide statements present a long-term view of the State’s finances *as a whole*, using *accrual-basis accounting*—the same accounting methods that most businesses use. The basic government-wide financial statements are presented on pages 34 through 39 of this report.

There are two government-wide financial statements:

Statement of net assets: This statement presents information on *all* of the State’s assets and liabilities, both short-term (*current*) and long-term (*non-current*). In addition, the statement reports the difference between assets and liabilities as *net assets*. Over time, the comparison of net assets to liabilities may indicate whether the State’s financial health is strengthening or weakening. However, the statement of net assets does not tell the whole story. To assess the State’s overall financial health, you would also need to consider factors such as the State’s economy and the condition of its *capital assets* such as its buildings and *infrastructure* (roads and bridges).

Statement of activities: This statement presents information showing how the State’s overall net assets changed during the year. The State reports a change in its net assets as soon as an underlying event occurs that causes a change. The statement of activities accounts for all current-year revenues and expenses, regardless of when the State received or paid cash. Although governments compile the statement of activities using accounting methods similar to businesses, the format of this statement is quite different from the format of a business’s profit and loss statement. The statement of activities helps to show how much it costs the State to provide various services. It also helps to show the extent to which each government function covers its own costs through user fees, charges, or grants. The *net revenues (expenses)* column on the far right of this statement page 38 shows how much a particular function relies on taxes and other general revenues as opposed to program revenues to finance its programs.

The government-wide statements present three different kinds of *activities*:

Governmental activities: Most of the State’s basic services are included here, such as general government, education, health and environment, social services, administration of justice, and transportation. Taxes (primarily income and sales taxes) and federal grants finance most of these services.

Business-type activities: These activities usually recover all, or a significant portion, of the costs of their services or goods by charging fees to customers. Higher education (State-supported colleges and universities), unemployment compensation benefits, and financing of housing facilities are the most significant of South Carolina’s business-type activities.

Component units: Although component units are legally separate from the State, the State’s elected officials are financially accountable for them. The Public Service Authority (Santee-Cooper, an electric utility company), the State Ports Authority, the Connector 2000 Association, Inc. (which operates the Southern Connector, a toll road), and the Lottery Commission are the State’s major component units. Some financial information for these component units is included in this report. You also can obtain complete financial statements for these component units from their respective administrative offices (see Note 1a of the notes to the financial statements).

Fund Financial Statements

The fund financial statements on pages 40 through 63 of this report provide detailed information about the State’s most significant funds—not the State as a whole. Funds are accounting designations that the State uses to track specific funding sources and spending for particular purposes. South Carolina, like other governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. The State reports three types of *funds*:

State of South Carolina

Governmental funds: The State reports most of its basic services in governmental funds. Governmental funds account for activities that the State reports as *governmental activities* in its government-wide statements. These funds focus on *short-term* inflows and outflows of expendable resources. The balances remaining at the end of the year help determine whether a fund has more or less financial resources available to spend in the near future. Because the governmental fund statements lack the additional long-term focus of the government-wide statements, we provide a reconciliation that explains the relationship (or differences) between the two kinds of statements. By comparing the two kinds of statements and examining the reconciliation, you may better understand the long-term impact of the State's near-term financing decisions.

The basic governmental fund statements are on pages 40 through 47 of this report.

Proprietary funds: Proprietary funds charge customers for the services they provide—whether they are provided to outside customers (*enterprise funds*) or other State agencies and other governments (*internal service funds*). Proprietary funds use the *accrual basis of accounting* like businesses use. The State reports all of its enterprise funds (proprietary funds providing services to outside customers) as *business-type activities* in the government-wide statements. However, because our internal service fund operations primarily benefit other State agencies or other governments, these proprietary funds are included as *governmental activities* in the government-wide financial statements.

The basic proprietary fund statements are on pages 48 through 61 of this report.

Fiduciary funds: The State is the trustee, or *fiduciary*, for its employees' retirement and other post-employment benefit plans. The State also is responsible for other assets that, because of a trust agreement, it is to use only for trust beneficiaries such as an investment pool operated on behalf of local governments. We *exclude* these activities from the State's government-wide financial statements because the State is not to use these assets to finance its operations. The State has an obligation to ensure that the net assets it reports in fiduciary funds are used for their intended purposes.

The basic fiduciary fund statements are on pages 62 and 63 of this report.

Component Unit Financial Statements

The *Government-wide Financial Statements* section on the preceding page identifies the State's major component units under the *Component units* subheading. More detailed financial statements which include these component units are on pages 64 through 67 of this report.

Notes to the Financial Statements

Immediately following the financial statements are *notes* that help explain some of the information in the financial statements and provide more detailed data. The notes on pages 68 through 140 are necessary to fully understand the financial statements.

Required Supplementary Information

This section addresses budgetary matters and provides certain *required* reporting information that supplements the basic financial statements. Included in this section is a schedule that compares the State's legally adopted General Fund budget with actual revenues collected and expenditures paid for the year. Note 5 to the required supplementary information is a reconciliation that helps explain differences between the changes in fund balance of certain funds when presented on the budgetary-basis and the changes in fund balance of these funds when presented on the GAAP-basis as reported in the governmental fund statements. This required supplementary information is on pages 141 through 147 of this report.

Government-wide Financial Analysis

Exhibits 1 and 2 summarize the State's overall financial position and results of operations for the past two years based on information included in the government-wide financial statements.

Exhibit 1
Government-wide Net Assets
As of June 30, 2008
(Expressed in Thousands)

	Governmental Activities		Business-type Activities		Totals— Primary Government		Total Percentage Change
	2008	2007	2008	2007	2008	2007	2007-2008

Net Assets

As we noted earlier, the comparison of net assets to liabilities may serve, over time, as a useful indicator of the State's financial strength. At the end of the 2007-2008 accounting year, the State's net assets totaled \$17.801 billion.

The largest portion of the State's net assets reflects its *investment in capital assets* (for example, buildings, roads, and bridges), less any related debt used to acquire those assets that is still outstanding. The State uses these capital assets to provide services to citizens; consequently, they are *not* available for future spending. Further, the State cannot sell the capital assets themselves to repay the related debt because it needs the assets for its operations; so it must find other resources to repay the debt.

Restricted net assets generally are available for future spending but are subject to external restrictions, such as bond covenants, federal government grant restrictions, or restrictions imposed by enabling State legislation or through State constitutional provisions. The State's largest restricted balances include capital improvement bond proceeds (restricted for various capital projects), and loan program funds (restricted primarily for local government water and sewer projects).

Unrestricted net assets—resources available for future spending without restrictions—reported a balance of \$494.621 million at June 30, 2008. This represents a decline of \$702.915 million over the prior year. Much of this decline resulted from a \$765.052 million decrease in the unrestricted net assets reported for the State's *governmental activities*, which reported a \$161.549 million deficit in unrestricted net assets for the current fiscal year versus a \$603.503 million balance in the prior year. The decline was attributable to spending not keeping pace with revenue collections during the year; see section "Budgetary General Fund Highlights" for further detail.

The State's *business-type activities* reported a \$656.170 million unrestricted net asset balance. This resulted from net positive balances of \$853.787 million associated with higher education and certain other business-type activities. However, that positive balance was partially offset by a \$182.880 million accumulated deficit in the State-run medical malpractice insurance program and a \$14.737 million accumulated deficit in the State-run college tuition prepayment program.

^a The higher education institution support activity represents certain associations, foundations, and authorities created for the benefit of the State's higher education institutions.

Changes in Net Assets

The State's total net assets decreased \$141.051 million (0.8%) over the prior year's net assets as a result of its governmental activities and its business-type activities.

Governmental Activities

Net assets of the State's governmental activities decreased by \$364.673 million (2.6%). Revenue did experience growth over last year of \$889.692 million (5.0%), primarily due to modest gains in both general tax revenue and program revenue. General tax revenue increased \$474.458 million (5.3%) and program revenue increased \$384.296 million (4.6%) over prior year activity. Revenues that support governmental activities are derived mostly from taxes; grants and contributions, including federal aid; and charges for goods and services. *Exhibit 3* illustrates the comparative sources of revenues that support governmental activities.

However, expenses associated with governmental activities significantly increased by \$2.092 billion (13.2%) for the fiscal year ended June 30, 2008. These expenses were mostly associated with services provided for health and environment, education, general government, social services, and transportation. *Exhibit 4* compares the cost of these services with their *program revenues*—revenues derived directly from the program itself or from parties outside the State’s taxpayers or citizenry. The difference between the two represents the *net cost* of these services that taxes and other general revenues financed. For the fiscal year ended June 30, 2008, the State used \$9.738 billion in tax and other general revenues to finance the net cost of all services that the State’s governmental activities provided. Governmental activities reported \$1.015 billion in net transfers to the State’s business-type activities, most of which represents support provided to the State’s public colleges and universities.

The following paragraphs highlight the most significant changes in revenues and expenses for governmental activities during the 2007-2008 fiscal year:

- Operating grants and contributions increased by \$465.263 million (8.0%). The increase was primarily due to the improved funding of public health and social services programs.
- General tax revenues increased \$474.458 million (5.3%) over last year. Individual income tax took an insignificant downturn (<1.0%), however, sales and use tax increased 11.4% primarily due to the new property tax exemption program and the accommodations and local option sales taxes. Corporate income and other taxes had moderate growth of 2.8%.
- General government expenses increased \$1.097 billion (32.0%) due in part to the increase of outflows to the new Homestead Exemption Act program, as well as increased distributions of accommodations and local option sales taxes, to participating counties.
- Expenses for education increased \$322.154 million (7.9%) because of spending for early childhood programs for at-risk students, school bus replacement, and increased funding over prior year levels for various other educational programs.

Exhibit 3
Sources of Revenues Supporting Governmental Activities
For the Fiscal Year Ended June 30, 2008

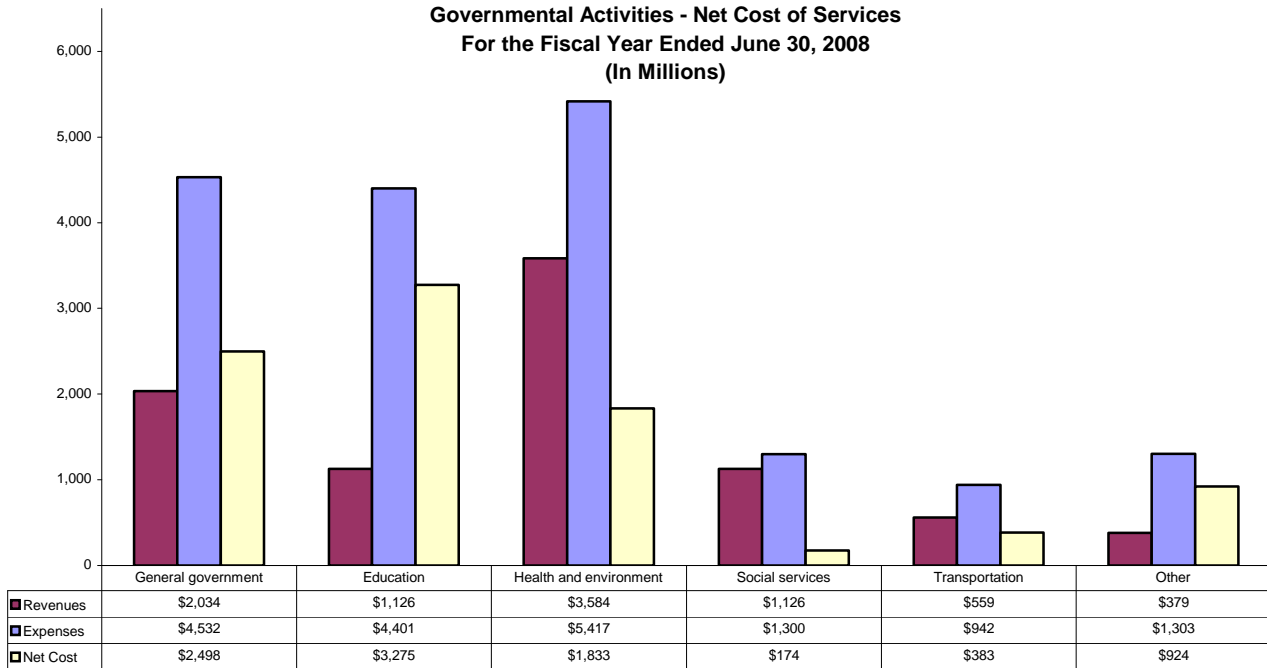

Exhibit 4

**Governmental Activities - Net Cost of Services
For the Fiscal Year Ended June 30, 2008
(In Millions)**

Business-type Activities

Net assets of the State’s business-type activities increased \$223.622 million (5.4%).

Revenues from business-type activities included charges for services (88.4%) and grants and contributions, including federal aid (11.6%). Expenses from business-type activities were mostly to provide higher education services and support (85.9%), unemployment compensation benefits (8.5%), and financing of housing facilities (3.3%).

Most business-type activities are self-supporting. Tuition and student fees, research and other grants (both private and governmental), and other charges primarily pay for the services that the Higher Education Fund provides. However, the Higher Education Fund receives substantial resources (primarily transfers of annual appropriations) from the State’s governmental activities. Essentially, net transfers to the Higher Education Fund, which totaled \$1.015 million for the year ended June 30, 2008, represent the cost of educational services that taxes and other general revenues of governmental activities support.

Higher education and related institution support expense increased \$441.010 million during the 2007-2008 fiscal year. This increase resulted primarily from a rise in general operations and administrative costs.

Financial Analysis of the State's Funds

The State of South Carolina uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. Within the fund financial statements, the focus is on reporting major funds.

Governmental Funds

Exhibit 5 shows the components of fund balance for the State's various governmental funds as of June 30, 2008.

Exhibit 5
Governmental Fund Balances
As of June 30, 2008
(Expressed in Thousands)

	General Fund	Departmental General Operating	Local Government Infrastructure	Department of Transportation Special Revenue	State Tobacco Settlement	Nonmajor Governmental Funds	Total Governmental Funds
Reserved.....	\$ 341,773	\$ 11,063	\$ 1,941,384	\$ 11,375	\$ —	\$ 114,003	\$ 2,419,598

Totals.....	\$ 264,058	\$ 616,403	\$ 1,656,250	\$ (39,052)	\$ 49,091	\$ 1,149,407	\$ 3,696,157
Change from prior year...	\$ (828,879)	\$ 71,840	\$ (62,186)	\$ 2,679	\$ (461,809)	\$ 32,802	\$ (1,245,553)
Percentage change.....	(75.8%)	13.2%	(3.6%)	6.4%	(90.4%)	2.9%	(25.2%)

At June 30, 2008, total ending fund balance for the State's governmental funds was \$3.696 billion, which represents a decrease of \$1.246 billion (25.2%) from the prior year. Approximately one-third of this total (34.5%) consists of *unreserved* fund balance—the amount available for spending in the coming year. The remaining fund balance is *reserved* and is *not* available for future appropriation because it is accessible only for specific purposes. The following paragraphs discuss the activities of the General Fund and other major governmental funds that had significant changes in fund balance:

The *General Fund* is one of two large State operating funds. This fund includes resources that pay for the services that the State traditionally has provided to its citizens. These resources, such as taxes, are accounted for in the General Fund unless State law requires them to be accounted for in another fund. During the 2007-2008 accounting year, the total fund balance of the General Fund decreased \$828.879 million (75.8%) from last year. Overall, revenues were \$152.085 million (2.0%) less than the previous year, the largest portion of the decline being sales and use taxes, which decreased \$174.776 million (6.6%). Total expenditures increased by \$327.866 million (5.0%) over the prior year. The most significant expenditure increase was attributable to health and environment, up \$278.661 million (16.0%). Operating transfers out of the General Fund increased \$309.475 million (25.8%). This increase was attributable in part to transfers of \$329.962 million of tax revenues from the General Fund to the Homestead Exemption Fund for subsequent distribution for property tax relief.

The *Department of Transportation (DOT) Special Revenue Fund* accounts for various gasoline taxes, fees, fines, and federal grant resources. The DOT uses these resources to pay for its general operations, which include maintenance, regulation, and construction of public highways and bridges. While this fund had a negative fund balance at the beginning of the fiscal year, the fund balance increased \$2.679 million during 2007-2008 leaving a negative fund balance of \$39.052 million at the end of the fiscal year. The negative fund balance occurred primarily because of long-term commitments by DOT to provide funding to local governments for highway construction projects administered by the State Infrastructure Bank (included within the Local Government Infrastructure Fund, a major governmental fund). These commitments are recorded as interfund payables by the DOT Special Revenue Fund and as interfund receivables by the Local Government Infrastructure Fund. The commitments are discharged (i.e., reduced) as DOT provides construction services to the Bank.

The *State Tobacco Settlement Fund* accounts for revenues received from the General Fund and from the Tobacco Settlement Revenue Management Authority, a blended component unit and nonmajor governmental fund designated to receive and manage the State's share of the multi-state legal settlement with the tobacco industry. Fund balance declined \$461.809 million (90.4%) during 2007-2008 because the fund transferred \$469.408 million to the Tobacco Settlement Revenue Management Authority for the purpose of bond defeasance.

Proprietary Funds

Exhibit 6 shows the components of net assets for the State’s various proprietary funds at June 30, 2008.

Exhibit 6
Proprietary Fund Net Assets
As of June 30, 2008
(Expressed in Thousands)

Fund Net Assets	Enterprise Funds							Internal Service Funds
	Higher Education	Unemployment Compensation	Housing Authority	Medical University Hospital Authority	Education Assistance Authority	Nonmajor Enterprise	Total Enterprise	
Invested in capital assets (net of related debt).....	\$ 2,182,295	\$ —	\$ 684	\$ 80,806	\$ 223	\$ 51,349	\$ 2,315,357	\$ 98,319

Restricted, nonexpendable.....	95,871	—	—	—	—	32,055	127,926	—
Unrestricted.....	563,460	—	46,969	78,741	1,218	(36,439)	653,949	(22,204)
Totals.....	\$ 3,308,264	\$ 262,499	\$ 299,890	\$ 237,853	\$ 144,829	\$ 102,429	\$ 4,355,764	\$ 412,879
Change from prior year..	\$ 259,880	\$ (92,934)	\$ 15,461	\$ (19,651)	\$ 6,903	\$ 56,367	\$ 226,026	\$ (116,583)
Percentage change.....	8.5%	(26.1%)	5.4%	(7.6%)	5.0%	122.4%	5.5%	(22.0%)

The State has two kinds of proprietary funds: enterprise funds and internal service funds.

Enterprise funds are reported as business-type activities in the government-wide financial statements. Enterprise funds sell goods or services primarily to parties outside of State government.

The *Unemployment Compensation Benefits Fund*, a major enterprise fund, decreased by \$92.934 million (26.1%) primarily due to the increasing unemployment rate and the increased amount of unemployment benefits the Fund paid out, without a corresponding increase in assessment revenue. As discussed in Note 22h, as a result of this situation, there is substantial doubt about the Fund’s ability to continue as a going concern. Management plans to ask the General Assembly to increase the taxable wage base of employers in order to raise employer contributions.

The net assets of the State’s *nonmajor enterprise funds* increased by \$102.429 million (122.4%). This increase was due in part to reduced benefits and claims paid out of the *Patients’ Compensation Fund* and the reduction in the accrual for tuition benefits payable from the *Tuition Prepayment Program Fund*. Additional information concerning the *Tuition Prepayment Program Fund’s* change in accounting estimate can be found in Note 2b of the financial statements.

South Carolina’s *internal service funds* provide certain services (including maintenance, insurance, printing, information technology, and motor pool services) and some goods (such as office supplies) primarily to other State funds but sometimes to local governments as well. The objective of an internal service fund is to charge its customers for the costs of the services or goods that it provides. Because internal service funds primarily benefit State government, South Carolina reports them as governmental activities in the government-wide financial statements.

The net assets of the State’s *internal service funds* decreased by \$116.583 million (22.0%) due in part to *Employee Insurance Programs* contributing Plan reserves to the newly established *South Carolina Retiree Health Insurance Trust Fund* effective May 1, 2008. For more information on other post-employment benefit trust funds, see Note 9 of the financial statements.

Budgetary General Fund Highlights

Original estimated revenues for the 2007–2008 accounting year were \$6.622 billion. The BEA revised downward its original revenue estimate during the course of the year by a total of \$112.713 million. The revisions resulted from the BEA’s review of tax revenue collections and declining economic conditions as the year progressed. Actual revenues at June 30, 2008, were \$116.912 million (1.8%) under the BEA’s final revised revenue estimate and were \$229.625 million less than the BEA’s original estimate. Actual revenues also declined from prior year revenue collections by \$266.109 million (4.0%). Individual income and sales taxes, the fund’s primary revenue sources, were less than forecasted because of unfavorable economic conditions and continued legislative emphasis on tax relief.

Actual expenditures were \$644.906 million greater than actual revenues because State official revenue collection projections were increased over FY07 collections based on the expectation of a steadily improving economy. In addition, transfers out to the agencies during the year totaled \$111.821 million of 2007–2008 Capital Reserve Appropriations.

Based on the above results of operations, 2007-2008 ended with a budgetary deficit. After funding the deficit by drawing down the General Reserve, Capital Reserve, and FY07 spending surplus funds, the State was able to end the year with an accumulated budgetary general fund balance of \$324.254 million, comprised of \$95.123 million remaining in General Reserve Funds (Rainy Day Account) and \$229.131 million in carried-forward appropriations.

See the *Required Supplementary Information* section on pages 141 through 147 of this report for a detailed budgetary comparison schedule.

Capital Assets and Debt Administration

Capital Assets

At the end of the 2007-2008 accounting year, the State had \$17.690 billion invested in capital assets. This represented a net increase (including additions and deductions) of \$757.278 million, or 4.5%, over the previous accounting year (see *Exhibit 7*).

Exhibit 7

Intangible assets.....	1,345	6,568	3,276	2,865	4,621	9,433
Total.....	\$ 13,712,137	\$ 13,393,469	\$ 3,977,559	\$ 3,538,949	\$ 17,689,696	\$ 16,932,418

The State’s investment in buildings and improvements increased significantly, primarily because of the public colleges and universities expanding their campus facilities. The Medical University of South Carolina completed a cancer center expansion while MUSC Hospital Authority completed the first phase of replacement of its current patient care facilities. The College of Charleston added a new campus building, residence hall and an athletic facility.

State vehicles increased significantly due to the Department of Education upgrading the bus fleet and the Budget and Control Board upgrading the state fleet of vehicles.

As in prior years, machinery and equipment increased significantly due, in large part, to acquisitions by public universities. Clemson University, The Medical University of South Carolina, and the University of South Carolina all made significant investments in computing, testing, medical, scientific, and laboratory equipment and equipping newly-established facilities.

Intangible assets decreased from last fiscal year primarily because state-wide depreciation expense exceeded investment in additional intangible assets.

See Note 7 in the notes to the financial statements within this report for additional information on the State’s capital assets.

Long-term Debt

At June 30, 2008, the State had \$8.105 billion in bonds and notes outstanding—a decrease of \$434.114 million, or 5.1%, over last year (see *Exhibit 8*).

Exhibit 8
Outstanding Bonds and Notes

Bond anticipation notes.....	—	—	30,000	4,500	30,000	4,500	566.7%
Total.....	\$ 4,453,795	\$ 5,215,244	\$ 3,651,131	\$ 3,323,796	\$ 8,104,926	\$ 8,539,040	(5.1%)

The reduction in debt reported in governmental activities resulted primarily from the defeasance of \$575.200 million of Tobacco Authority revenue bonds. The Tobacco Settlement Revenue Management Authority defeased the bonds with a portion of the proceeds of \$275.730 million in Tobacco Settlement Revenue Asset-Backed Refunding Bonds, along with funds transferred from the Tobacco Settlement Fund. New debt reported in business-type activities resulted mainly from the issuance of revenue bonds by the *enterprise funds*. The Housing Authority issued \$103.000 million in bonds for housing programs, the Education Assistance Authority issued \$131.700 million in bonds to provide financing for student loans, and the College of Charleston and the University of South Carolina issued \$95.930 million and \$94.185 million, respectively, in facilities revenue bonds. In addition, the Medical University of South Carolina drew down \$48.800 million on a note payable to finance the acquisition of equipment for a new hospital facility and issued \$30.000 million in short-term general obligation bond anticipation notes. The Housing Authority entered into a \$50.000 million mortgage revenue note payable.

Three bond rating services assign ratings to bonds that the State backs with its own taxing authority (*general obligation bonds*). Fitch Ratings rated these bonds as “AAA” and Moody’s Investors Service rated them as “Aaa” during the fiscal year ended June 30, 2008, the highest ratings that these services assign. Standard & Poor’s rated these bonds as “AA+” during the same period.

The State limits the amount of annual payments for principal and interest on general obligation bonds and notes rather than directly limiting the amount of those bonds and notes that the State may have outstanding. At June 30, 2008, the State legally could issue additional bonds as long as the new debt would not increase the State’s annual principal and interest payments by more than the following amounts: \$29.277 million for institution bonds (*Institution bonds* are general obligation bonds that benefit the State’s Higher Education Fund.), \$30.087 million for highway bonds, \$176.033 million for general obligation bonds, excluding institution and highway bonds, \$11.901 million for economic development bonds, and \$19.353 million for research university infrastructure bonds.

See Note 12 in the notes to the financial statements for additional information about the State’s long-term debt.

Economic Factors and Next Year’s Budget

The “Rainy Day Account”

At June 30, 2008, the General Reserve Fund, sometimes called the *rainy day account*, was funded at \$95.123 million, which is \$91.658 million below the full funding requirement. The State’s Constitution requires restoration of the reserve to full funding within three years after a withdrawal. State law defines full funding for the reserve as 3% of the Budgetary General Fund’s revenues for the latest completed accounting year. The 2007-2008 Appropriations Act passed by the General Assembly appropriated \$19.049 million to fully fund the rainy day account; however, \$91.658 million was drawn out to cover the 2007-2008 Budgetary General Fund deficit.

Budgetary General Fund for the 2008-2009 Accounting Year

For fiscal year 2008-2009, estimated revenues in the 2008-2009 Appropriations Act were \$6.736 billion or \$343.690 million more than 2007-2008 revenue collections. Subsequently, legislation has been enacted that reduces appropriations by \$488.000 million. Additional revisions could be subsequently enacted based on continued monitoring of revenue collections and economic conditions.

Economic Conditions

Budgetary General Fund revenues for the first three months of 2008-2009 fiscal year were \$1.556 billion, \$59.501 million (3.7%) lower than during the same period for 2007-2008. South Carolina's three major revenue sources are not as strong as the prior year for the same three months. Individual income taxes are up \$1.720 million (0.2%), compared to a stronger increase of \$33.930 million (3.7%) in 2007-2008. Corporate income taxes have declined by \$9.501 million (16.7%) over the same three month period 2007-2008; however in 2007-2008 the decline was \$17.485 million (23.5%) over the prior year. Sales taxes have also decreased \$57.122 million (12.4%) from 2007-2008 due to unfavorable economic conditions and consumer tax relief legislation. Sales taxes experienced a moderate increase of \$12.495 million (2.8%) for the same period in 2007-2008.

The BEA has adopted a preliminary Budgetary General Fund revenue estimate of \$7.246 billion for the 2008-2009 fiscal year. The BEA has since reduced their revenue estimate by \$554.000 million (7.6%).

Requests For Information

The primary purpose of this financial report is to provide South Carolina's citizens, taxpayers, customers, investors, and creditors with a general overview of the State's finances and to demonstrate the State's accountability for the money it receives. Please address any questions concerning information in this report to:

Reconciliation of the Statement of Revenues, Expenditures, and Changes in Fund Balances of Governmental Funds to the Statement of Activities

For the Fiscal Year Ended June 30, 2008
(Expressed in Thousands)

Net change in fund balances—total governmental funds..... \$ (1,245,553)

Amounts reported for governmental activities in the statement of activities are different because:

Capital outlays are reported as expenditures in governmental funds. However, in the statement of activities, the cost of capital assets is allocated over their useful lives as depreciation expense.

In the current period, these amounts are:

Capital outlay.....	\$ 382,346	
Depreciation expense.....	(234,784)	
Excess of capital outlay over depreciation expense.....		147,562

Donations of capital assets increase net assets in the statement of activities, but do not appear in the governmental funds because they are not financial resources..... 177,499

Losses on disposals of capital assets are reported as an expense in the statement of activities..... (5,282)

Bond and note proceeds provide current financial resources to governmental funds; however, issuing debt increases long-term liabilities in the statement of net assets. In the current period, proceeds were received from:

Refunding bonds issued.....	(275,730)	
Bond premiums and discounts.....	8,249	
Net bond and note proceeds.....		(267,481)

Bond issuance costs are expenditures in governmental funds, but are deferred assets in the statement of net assets..... 3,167

Certain capital additions were financed through capital leases. In governmental funds, a capital lease arrangement is considered a source of financing, but in the statement of net assets, the lease obligation is reported as a liability..... (513)

Repayment of long-term debt is reported as an expenditure in governmental funds, but the repayment reduces long-term liabilities in the statement of net assets. In the current year, these amounts consist of:

Bond principal retirement.....	635,438	
Bonds repurchased.....	152,430	
Note principal retirement.....	1,514	
Capital lease payments.....	257	
Payment to bond refunding agent.....	251,180	
		1,040,819

Internal service funds are used by management to charge the costs of certain activities to individual funds. The net revenue of the internal service funds is included in governmental activities in the statement of activities..... (116,583)

Because certain receivables will not be collected soon enough after the State's fiscal year ends, the related revenues are not considered "available" and are deferred in the governmental funds.

Decrease in deferred revenues..... (69,082)

Interest receivable not due in the current period and therefore not reported in the funds..... (325)

The Notes to the Financial Statements are an integral part of this statement.

Reconciliation of the Statement of Revenues, Expenditures, and Changes in Fund Balances of Governmental Funds to the Statement of Activities (Continued)

For the Fiscal Year Ended June 30, 2008
(Expressed in Thousands)

Eliminations relating to the consolidation of internal service funds resulted in a net decrease in expenses for the business-type activities in the statement of activities.....	\$	2,404	
Certain items reported in the statement of activities do not require the use of current financial resources and therefore are not reported as expenditures in governmental funds. These activities consist of:			
Net decrease in accrued interest.....	\$	1,047	
Interest accreted on capital appreciation debt.....		(993)	
Amortization of bond issuance costs.....		(1,351)	
Net amortization of bond premiums and discounts.....		2,409	
Amortization of deferred losses on refunding of debt.....		(2,738)	
Net increase in compensated absences payable.....		(4,553)	
Decrease in intergovernmental payable.....		100	
Increase in policy claims payable.....		(8,181)	
Net decrease in other payables.....		(17,045)	
Total additional expenses.....		<u>(31,305)</u>	
Change in net assets of governmental activities.....	\$	<u>(364,673)</u>

Notes to the Financial Statements

NOTE 1: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a. Scope of Reporting Entity

The South Carolina General Assembly (an elected legislative body) and several elected executives govern the State of South Carolina. The accompanying financial statements present the activities of the State of South Carolina's primary government and its component units.

Component units are legally separate organizations for which the State is financially accountable. Blended component units, although legally separate from the State, are part of the State's operations in substance. Accordingly, the State presents them as funds in its fund financial statements and as activities in its government-wide financial statements. In contrast, the State excludes its discretely presented component units from the fund financial statements included within its basic financial statements and it reports the discretely presented component units separately in its government-wide financial statements.

As explained more fully below, the State's primary government and its component units include various State funds, agencies, departments, institutions, authorities, and other organizations.

Primary Government

The State's primary government includes all constitutional offices, departments, agencies, commissions, and authorities unless otherwise noted below. Most of these have executives or boards appointed by the Governor, the General Assembly, or a combination thereof. These entities are financially accountable to, and fiscally dependent on, the State.

Although they operate somewhat autonomously, the entities listed below are included in the State's primary government because they lack full corporate powers.

Fiscal year ended June 30, 2008:

- State Housing Finance and Development Authority
- South Carolina Education Assistance Authority
- Jobs-Economic Development Authority
- Patriots Point Development Authority

Fiscal year ended December 31, 2007:

- The Public Railways Division of the Department of Commerce

The State's five retirement systems and two post-employment benefit trust funds are part of the State's primary government. The State Budget and Control Board, which consists of five elected officials, serves as trustee of the systems and the trust funds. The State Treasurer is custodian of the funds.

The State reports ten State-supported universities and sixteen area technical colleges within its Higher Education Fund as part of the primary government. Although the universities and colleges operate somewhat autonomously, they lack full corporate powers. In addition, the Governor and the General Assembly appoint most of their boards and budget a significant portion of their funds.

The accompanying financial statements exclude the related foundations listed in Note 20 because, based on the criteria provided by GASB Statement No. 39, the State does not significantly influence operations of the related foundations nor are the related foundations accountable to the State for fiscal matters.

Blended Component Units

Unless otherwise indicated below, the blended component units have fiscal years ended June 30, and the accompanying financial statements include component unit financial information for the fiscal year ended June 30, 2008.

Tobacco Settlement Revenue Management Authority

The Tobacco Settlement Revenue Management Authority, a blended component unit accounted for as a governmental fund, commenced operations in August 2000. Its creation was in accordance with an act of the General Assembly that resulted from South Carolina's participation in a settlement (the Master Settlement Agreement or MSA) that arose out of litigation that a group of state governments brought against the tobacco industry. The legally separate Authority's primary purposes are (a) to receive all receipts due to South Carolina under the MSA after June 30, 2001, and (b) to issue the Authority's revenue bonds payable solely from, and secured solely by, those receipts. The Authority's governing board is composed of the Governor or his designee, the State Treasurer, the Comptroller General, the Chairman of the Senate Finance Committee, and the Chairman of the House Ways and Means Committee. The State receives the funding from the bond issuances, except in the event that the Authority issues bonds expressly to refund its outstanding bonds.

Blended Component Units Associated with the Higher Education Fund

The State's enterprise funds include the following blended component units, all of which are associated with the Higher Education Fund, a major enterprise fund:

The *Medical University Hospital Authority* (the Authority) was created to manage and operate the Medical University of South Carolina's hospitals and clinics. The legislation establishing the Authority requires that the members of the Medical University's Board of Trustees also constitute the Authority's Board of Trustees. The Authority also is a major enterprise fund.

The *Citadel Trust, Inc.*, was formed to provide scholarship and other financial assistance or support to The Citadel.

The *University of South Carolina Trust (the Trust)* operates exclusively for the benefit of the University's School of Medicine to augment and aid education, research, and service in the field of health sciences. The financial information presented in the accompanying financial statements is for the Trust's fiscal year ended December 31, 2007.

University Medical Associates (UMA) was established to promote and support educational, medical, scientific, and research purposes of the Medical University of South Carolina (MUSC). UMA promotes the recruitment and retention of superior faculty at MUSC. UMA is a blended component unit because it almost exclusively benefits MUSC even though UMA does not provide all of its services directly to MUSC.

The *Medical University Facilities Corporation* was established to obtain financing for the Medical University of South Carolina to purchase land, an office building, and a parking garage.

The *CHS Development Company* was established to provide financing services for the Medical University of South Carolina by developing and leasing property.

The *Enterprise Campus Authority* was established to provide for the management, development, and operation of the Enterprise Campus of Midlands Technical College.

Obtaining More Information about Blended Component Units

One may obtain complete financial statements for the above blended component units from the following administrative offices:

South Carolina Tobacco Settlement
Revenue Management Authority
122 Wade Hampton Office Building
Capitol Complex
Columbia, South Carolina 29201

Medical University Hospital Authority
Fiscal Services Offices
Post Office Box 250603
Charleston, South Carolina 29425

The Citadel Trust
c/o The Citadel
171 Moultrie Street
Charleston, South Carolina 29409

University of South Carolina Trust
Post Office Box 413
Columbia, South Carolina 29202

University Medical Associates
1180 Sam Rittenberg Boulevard
Suite 355
Charleston, South Carolina 29407

Medical University Facilities Corporation
c/o Medical University of South Carolina
Controller's Office
19 Hagood Avenue
Post Office Box 250817
Charleston, South Carolina 29425

CHS Development Company
c/o Medical University of South Carolina

Post Office Box 250817
Charleston, South Carolina 29425

Enterprise Campus Authority
c/o Midlands Technical College
Vice President for Business Affairs
Post Office Box 2408
Columbia, South Carolina 29202

Discretely Presented Component Units

Unless otherwise indicated below, the discretely presented component units have fiscal years ended June 30, and the accompanying financial statements include component unit financial information for the fiscal year ended June 30, 2008.

Public Service Authority

The State General Assembly created the South Carolina Public Service Authority (Santee Cooper), a public utility company, in 1934. The Authority's primary purpose is to provide electric power and wholesale water to the people of South Carolina. The Governor appoints the Authority's Board of Directors. The Governor has the ability to remove the appointed members at will. By law, the Authority must annually transfer to the State's General Fund any net earnings not necessary for prudent business operations. The financial information presented in the accompanying financial statements is for the Authority's fiscal year ended December 31, 2007.

State Ports Authority

The State General Assembly created the South Carolina State Ports Authority in 1942 to develop and improve the State's harbors and seaports. The State Ports Authority owns and operates eight ocean terminals that handle import and export cargo. The Governor appoints the members of the Authority's governing board. The Governor has the ability to remove the appointed members at will. The State's primary government has provided financial support to the Authority in the past, and State law grants the primary government access to the Authority's surplus net revenues.

Connector 2000 Association, Inc.

Connector 2000 Association, Inc., was created in 1996 to assist the Department of Transportation in financing, acquiring, constructing, and operating turnpikes and other transportation projects, primarily the project known as the Southern Connector in Greenville County. The Department of Transportation initially set the toll rates for the Southern Connector and has the right, but not the obligation, to revise the rates. The rates must be in compliance with revenue covenants of the Association's financing agreements. The financial information presented in the accompanying financial statements is for the Association's fiscal year ended December 31, 2007.

Lottery Commission

The South Carolina Lottery Commission commenced operations in July 2001 in accordance with an act of the General Assembly. The Commission, established to serve the State's citizens, is governed by a nine-member board with three members appointed by the Governor, three appointed by the President Pro Tempore of the Senate, and three appointed by the Speaker of the House of Representatives. State law requires, as nearly practical, at least 45% of sales must be returned to the public in the form of prizes to provide continuing entertainment to the State's citizens and the Commission transfer its net proceeds to the State to support improvements and enhancements for educational purposes and programs.

Other Discretely Presented Component Units

The State considers the four discretely presented component units described above as its major component units. The State's government-wide financial statements also include the following non-major discretely presented component units:

The *Clemson Foundation (the Foundation)* is a non-profit, tax-exempt public charity that was established to raise and manage private gifts for the advancement and benefit of Clemson University. The Foundation is governed by an independent, forty-three member volunteer board of directors, with additional honorary and ex-officio directors as approved.

The *University of South Carolina Educational Foundation (the Foundation)* is an eleemosynary corporation operating for the benefit and support of the University of South Carolina. The Foundation establishes and implements long-range fund raising programs to assist in the expansion and improvement of the educational functions of the University. The Foundation is governed by a self-perpetuating board of directors consisting of at least twenty-four members, including four ex-officio directors.

The *South Carolina Medical Malpractice Liability Joint Underwriting Association (the Association)* was established to provide medical malpractice insurance on a self-supporting basis. The Association is governed by a board of thirteen directors, all of whom are appointed by the Governor. The Governor has the ability to remove the appointed members at will. The financial information presented in the accompanying financial statements is for the Association's fiscal year ended December 31, 2007.

The *South Carolina First Steps to School Readiness Board of Trustees* was established in 1999 as a non-profit, tax-exempt corporation under Section 501(c)(3) of the Internal Revenue Code. The corporation was created specifically to carry out the objectives of The South Carolina First Steps to School Readiness Act and to lessen the burdens on government by overseeing the South Carolina First Steps to School Readiness initiative for improving early childhood development. The corporation's governing board is composed of two classes of members, voting and nonvoting. The Board's voting members include the Governor, State Superintendent of Education, ten Governor appointees, four members appointed by the President Pro Tempore of the Senate, four members appointed by the Speaker of the House of Representatives, the Chairman of the Senate Education Committee, and the Chairman of the House Education and Public Works Committee.

State of South Carolina

The *Children's Trust Fund of South Carolina, Inc. (the Fund)*, is a non-profit, tax-exempt organization under Section 501(c)(3) of the Internal Revenue Code. The Fund's purpose is to stimulate innovative prevention and treatment programming to meet critical needs of South Carolina's children by awarding grants to private non-profit organizations. The Governor appoints the Board of Directors' seventeen members. The Governor has the ability to remove the appointed members at will. The financial information presented in the accompanying financial statements is for the Fund's fiscal year ended December 31, 2007.

Obtaining More Information about Discretely Presented Component Units

One may obtain complete financial statements for the discretely presented component units from the following administrative offices:

South Carolina Public Service Authority
(Santee Cooper)
One Riverwood Drive
Post Office Box 2946101
Moncks Corner, South Carolina 29461

South Carolina State Ports Authority
Post Office Box 22287
Charleston, South Carolina 29413

Connector 2000 Association, Inc.
Post Office Box 408
Piedmont, South Carolina 29673

The South Carolina Lottery Commission
Post Office Box 11949
Columbia, South Carolina 29211

Clemson University Foundation
110 Daniel Drive
Clemson, South Carolina 29634

University of South Carolina Educational
Foundation
208 Osborne Building
University of South Carolina
Columbia, South Carolina 29208

The South Carolina Medical Malpractice
Liability Joint Underwriting Association
c/o Patient's Compensation Fund
121 Executive Center Drive
Suite 110
Columbia, South Carolina 29210

The Children's Trust Fund
1205 Pendleton Street, Suite 506
Columbia, South Carolina 29201

Fund financial statements for the South Carolina First Steps to School Readiness Board of Trustees are included in the Supplementary Information section of the State's Comprehensive Annual Financial Report. This entity does not issue separate financial statements.

Related Organizations

A related organization is one for which the primary government is accountable but not *financially accountable*. The South Carolina Reinsurance Facility, the Associated Auto Insurers Plan, regional housing authorities, and the Rural Crossroads Institute are related organizations because the State is not financially accountable for them despite the fact that the Governor appoints a voting majority of their governing boards. County boards of mental retardation and redevelopment authorities are related organizations if the Governor appoints a voting majority of the members.

Jointly Governed Organizations

The Governor, in conjunction with officials of certain local governments, appoints the board members of two military facility redevelopment authorities. The State does not have an ongoing financial interest in these authorities. The Governor appoints one out of seven board members of the Charleston Naval Complex Redevelopment Authority and three out of nine board members of the Myrtle Beach Air Force Base Redevelopment Authority.

During the 2001-2002 fiscal year, the State joined the Atlantic Low-Level Radioactive Waste Compact, a voluntary association of states that, by federal law, is legally separate from each of the party states. South Carolina does not have an ongoing financial interest in the Compact.

b. Basis of Presentation

Government-wide Financial Statements

The statement of net assets and the statement of activities report information about all activities of the primary government and its component units, except for fiduciary activities. These statements distinguish between the State's *governmental* and *business-type activities*. Taxes, federal revenues, and other nonexchange transactions primarily finance the governmental activities whereas fees charged to external parties finance, in whole or in part, the business-type activities. All of the State's governmental and internal service funds are reported in the government-wide financial statements as

governmental activities and all of its enterprise funds are reported as business-type activities. (See the *Fund Financial Statements* subsection for more information about fund types.)

Statement of Activities and Eliminations

The statement of activities presents a comparison between direct expenses and program revenues for the different business-type activities of the State and for each function of the State's governmental activities. Direct expenses are those that are specifically associated with a program or function and, therefore, are clearly identifiable to a particular function. The State does not eliminate direct expenses and does not allocate indirect expenses to functions in the statement of activities. In the statement of activities, reimbursements under indirect cost plans for federal reimbursement purposes are reported as program revenues of the function that includes the reimbursed expenses.

Eliminations have been made to minimize the double-counting of internal activities. For example, the State eliminates payments the Department of Health and Human Services makes to the Department of Mental Health for providing Medicaid services because it reports both departments in its health and environment function. An exception to this general rule is that interfund services provided or used between functions have not been eliminated in the statement of activities because to do so would distort the net cost data for functional activities as reported in the total column of that statement. The State treats these internal payments as program revenues and treats interfund reimbursements in the statement of activities in the same manner as described below for fund financial statements. For example, when the Department of Health and Human Services purchases computer services from one of the State's higher education institutions, the health and environment governmental function reports an expense, and the higher education business-type activity reports program revenue (charges for services).

Program revenues include: (a) fees, fines, and charges paid by the recipients of goods, services, or privileges offered by the programs; (b) grants and contributions that are restricted to meeting the operational or capital requirements of a particular program; and (c) investment earnings that are legally restricted for a specific program. The State classifies as *general revenues* all revenues that are not program revenues, including all taxes.

Major Component Units

The State's management designates the Public Service Authority, the State Ports Authority, the Connector 2000 Association, Inc., and the Lottery Commission as major component units. The nonmajor component units include aggregate totals of all remaining discretely presented component units. In determining which discretely presented component units to designate as major, the State considered each component unit's significance relative to the other discretely presented component units and the nature and significance of its relationship to the primary government.

Fund Financial Statements

The fund financial statements provide information about the State's funds, including its fiduciary funds and blended component units. The State presents separate statements for each fund category—governmental, proprietary, and fiduciary. The emphasis of fund financial statements is on major governmental and enterprise funds, with each displayed in a separate column. The State aggregates and reports as nonmajor funds all remaining governmental and enterprise funds.

The State eliminates material intrafund activity. It also treats interfund reimbursements (repayments from the funds responsible for particular expenditures or expenses to the funds that initially paid for them) as reductions of expenditure/expense in the initial fund. For example, during the fiscal year ended June 30, 2008, the Department of Motor Vehicles (reported within the general government function) used office supplies and postage provided by the Department of Public Safety (reported within the administration of justice function). The Department of Public Safety initially recorded expenditures for the office supplies and postage in the General Fund. The Department of Motor Vehicles later reimbursed the Department of Public Safety with special revenue monies. That is, the Department of Motor Vehicles recorded special revenue fund expenditures while the Department of Public Safety reduced its General Fund expenditures by the same amount.

Governmental Funds

Governmental funds focus primarily on the sources, uses, and balances of current financial resources. The governmental fund category includes the General Fund, special revenue funds, the Capital Projects Fund, and permanent funds. The State reports the following major governmental funds:

The *General Fund* is the State's general operating fund. It accounts for resources that fund the services South Carolina's State government traditionally has provided to its citizens, except those required to be accounted for in another fund.

The *Departmental General Operating Fund* accounts for resources, other than General Fund resources, that State agencies may use for operating purposes. These resources include significant amounts of federal grant receipts.

The *Local Governmental Infrastructure Fund* accounts for grants, loans, and other financial assistance to local governments for infrastructure purposes. Certain motor fuel taxes, federal funds, and transfers from other funds are the fund's primary resources. This fund includes operations of the South Carolina Transportation Infrastructure Bank.

The *Department of Transportation Special Revenue Fund* accounts for the various gasoline taxes, fees, fines, and federal grant resources that the Department of Transportation uses in its general operations. Those operations include highway maintenance and repair as well as most of the Department's administrative activities.

The *State Tobacco Settlement Fund* accounts for revenues received from the General Fund and from the Tobacco Settlement Revenue Management Authority, a blended component unit and nonmajor governmental fund designated to receive and manage South Carolina's share of the multi-state legal settlement with the tobacco industry. Various healthcare and local government programs use these funds and the related interest.

The State aggregates other nonmajor governmental funds in a single column in its fund financial statements.

Enterprise Funds

Enterprise funds (which are reported as business-type activities in the government-wide financial statements) report activities that charge fees to external users for goods or services. The State reports the following major enterprise funds:

The *Higher Education Fund* accounts for the general operations of ten four-year higher education institutions and sixteen area technical colleges, all of which are part of the State's primary government.

The *Unemployment Compensation Fund* accounts for the State's unemployment compensation benefits. Revenues consist of assessments on employers to pay benefits to qualified unemployed persons.

The *Housing Authority Fund* facilitates medium-income and low-income housing opportunities by providing reasonable financing to the State's citizens. To provide such financing, the Fund issues bonds and notes and administers federal grants and contracts. Mortgage interest is a primary resource for the Fund.

The *Medical University Hospital Authority* manages and operates the Medical University of South Carolina's hospitals and clinics. Revenues consist of payments from patients and third-party payors including Medicare and Medicaid.

The *Education Assistance Authority Fund* issues bonds to make loans to individuals to enable students to attend higher education institutions. Resources include interest charges, subsidies from the United States Department of Education, loan repayments, and investment earnings.

The State aggregates other nonmajor enterprise funds in a single column in its fund financial statements.

Other Fund Types

The State reports the following fund types in addition to governmental and enterprise funds:

Internal service funds account for various goods and services provided to other State departments or agencies (primarily to governmental funds), or to other governments, on a cost-reimbursement basis. Services provided by these funds include several risk management activities for which the State is the primary participant, including underwriting related to the following risks: public buildings and their contents, torts, medical malpractice, automobile use by public employees in the performance of their official duties, employee health and disability, and workers' compensation benefits. Other services include those relating to telecommunications, computer operations, office rental, janitorial, building maintenance, lease and repair of fleet vehicles, procurement, employee training, and management of public employee retirement systems. The internal service funds also sell goods produced with prison inmate labor. In addition, the internal service funds purchase selected supplies and equipment in bulk and sell these items to other State funds (primarily governmental funds) and to local governmental units. The State's internal service funds are considered to be governmental activities because they primarily serve governmental funds.

Pension and post-employment benefit trust funds account for the pension benefits of the South Carolina Retirement System, the Police Officers' Retirement System, the General Assembly Retirement System, the Judges' and Solicitors' Retirement System, and the National Guard Retirement System, and the post-employment health, dental, and long-term disability insurance benefits paid by the State to its retirees.

The State's *investment trust fund* accounts for a local government investment pool that the State Treasurer operates.

Private-purpose trust funds include a tuition savings plan benefiting college students. Another private-purpose trust fund sets aside assets for site stabilization and closure of a nuclear waste site operated by a private company within the State's borders in the event that the company ceases operations or loses its license to operate. The private-purpose trust funds also include miscellaneous other trust agreements holding assets that benefit non-State parties.

Agency funds account for assets that the State holds as an agent. These assets include deposits of insurance companies in lieu of surety bonds; employee and employer payroll deductions and contributions for the short period of time between the issuance of payroll checks and payment to the recipients; and various other assets held for prisoners, patients of State institutions, and other external parties.

Operating and Nonoperating Revenues and Expenses in Proprietary Fund Financial Statements

Enterprise and internal service funds distinguish *operating* revenues and expenses from *nonoperating* revenues and expenses. Operating revenues and expenses generally are limited to items resulting from the provision of services and goods in connection with the fund's principal ongoing operations. The State generally classifies revenues and expenses as operating only if the related cash flows appear in the operating section on the statement of cash flows. Accordingly, grants and grant-like transactions are reportable as operating revenues only if they are essentially the same as contracts for services (i.e., exchange transactions) and they finance programs that the proprietary fund would not otherwise undertake (i.e., the activity of the grant is inherently part of the operations of the grantor). Conversely, the State classifies nonexchange transactions as nonoperating. This includes all grant revenues except those reportable as operating revenue as described

above and those restricted by the grantor for use exclusively for capital purposes. The State reports as operating most expenses it pays from operating revenues but usually reports interest expense as nonoperating.

In accordance with the general policy stated in the preceding paragraph, the *Higher Education Fund's* principal operating revenues include tuition; student fees; student loans; scholarships and grants (including Pell grants) where the provider has identified the student recipients; sales of miscellaneous goods and services; and certain research grants that, in substance, are contracts for services rather than nonexchange revenues. However, the Higher Education Fund generally does not report as revenue third-party loan amounts that it receives and disburses. (In a third-party loan, a student or a student's parents secure(s) a student loan from a governmental fund or from another lender such as the federal government; the Higher Education Fund then receives funds from the lender and disburses the funds to the student or applies amounts to the student's account.)

For the *Unemployment Compensation Fund*, principal operating revenues include amounts received from covered employers and from federal agencies. The amounts received from federal agencies are classified as operating revenues because they are provided to the State primarily to provide unemployment benefits, although amounts not needed for that purpose may be used for other purposes. This fund's operating expenses consist primarily of unemployment compensation benefits paid. Interest income is classified as nonoperating revenue.

For the *Housing Authority Fund* and the *Education Assistance Authority Fund*, principal operating items include revenues and expenses associated with program loans that provide direct benefits to individuals.

For the *Medical University Hospital Authority*, principal operating items include revenues and expenses associated with managing and operating the Medical University of South Carolina's hospitals and clinics.

Component Unit Financial Statements

The State presents a statement of net assets and a statement of activities for each of its major discretely presented component units and for the aggregate of its nonmajor discretely presented component units.

Use of Private-Sector Accounting and Financial Reporting Principles

The government-wide and proprietary fund financial statements reflect the State's compliance with private-sector standards of accounting and financial reporting issued prior to November 30, 1989, to the extent that those standards do not conflict with or contradict guidance of the Governmental Accounting Standards Board. Governments also may opt to follow private-sector guidance issued after November 30, 1989, for their business-type activities (enterprise funds) and for their discretely presented component units that follow enterprise fund accounting, subject to the same limitation. Only the Public Service Authority and the State Ports Authority, major discretely presented component units, have selected this option.

c. Measurement Focus and Basis of Accounting

A particular measurement focus determines *what* resources are measured. The State reports its government-wide, proprietary, and fiduciary fund (other than agency fund) financial statements using the *economic resources* measurement focus. Agency funds report only assets and liabilities; and therefore cannot be said to have a measurement focus. Business enterprises also use the economic resources measurement focus. The State reports its governmental funds using the *current financial resources* measurement focus.

The basis of accounting determines *when* the State recognizes revenues and expenditures/expenses as well as the related assets and liabilities, regardless of measurement focus. Generally accepted accounting principles for governments require the use of the accrual and the modified accrual bases of accounting as described below.

Accrual Basis

The State uses the accrual basis of accounting in reporting its government-wide financial statements, as well as its proprietary and fiduciary fund financial statements and its major component unit financial statements. Under the accrual basis, the State generally records revenues when earned and reasonably measurable and records expenses when a liability is incurred, regardless of the timing of related cash flows. Revenues collected in advance are deferred until the period in which it is earned.

Significant nonexchange transactions, in which the State gives (or receives) value without directly receiving (or giving) equal value in exchange, include taxes, grants, and donations. On the accrual basis, the State recognizes income, sales, and similar taxes in the period when the underlying income or sales transactions occur, net of estimated overpayments (refunds).

The State recognizes grants, donations, and similar items as revenue as soon as it meets all eligibility requirements. Pledges are recognized as receivables and revenues, net of estimated uncollectible amounts, if all eligibility requirements are met, the promise is verifiable, and the resources are measurable and probable of collection. Note 17b provides additional details regarding pledges that were not measurable at June 30, 2008.

Modified Accrual Basis

Governmental fund financial statements are reported using the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the State considers revenues to be available if they are collected within one month of the end of the current fiscal period with the following exceptions—tax and grant revenues are considered available if collected within one year; interest on investments is recorded as earned because it is deemed available when earned. Receivables not expected to be collected within the established availability periods are offset by deferred revenues.

Recognition of Specific Grant and Shared Revenue Transactions

The State reports the receipt of food commodities as revenue and the distribution of commodities as expenditures/expenses. The fair value of the donated commodities is recognized as revenues when all eligibility requirements are met.

The State recognizes the face value of food stamp benefits distributed as revenue and expenditures/expenses under both the accrual and modified accrual bases of accounting.

The State shares certain of its revenues with municipalities, counties, and districts within its borders, recognizing expenditure or expense when the recipient government has met all eligibility requirements.

d. Cash and Cash Equivalents

The amounts shown in the accompanying financial statements as *cash and cash equivalents* represent petty cash, cash on deposit in banks, restricted cash and cash equivalents on deposit with external parties, and cash invested in various instruments as a part of the State's cash management pool, an internal investment pool. Because the cash management pool operates as a demand deposit account, amounts invested in the pool are classified as cash and cash equivalents. The State Treasurer administers the cash management pool. The pool includes some long-term investments such as obligations of the United States and certain agencies of the United States, obligations of domestic corporations, certificates of deposit, and collateralized repurchase agreements.

Most entities in the primary government and the discretely presented governmental component units participate in the cash management pool. Significant exceptions, however, are: retirement plans, the Local Government Investment Pool (an external investment pool), the Tobacco Settlement Revenue Management Authority (a blended component unit and a nonmajor governmental fund), the Housing Authority (a major enterprise fund), and certain activities of the Higher Education Fund (a major enterprise fund). Of the discretely presented component units, the State Ports Authority, the Lottery Commission, and the South Carolina First Steps to School Readiness Board of Trustees participate in the pool. For activities excluded from the pool, cash equivalents include investments in short-term, highly liquid securities having a maturity at the time of purchase of three months or less.

e. Cash Management Pool—Allocation of Interest

The State's cash management pool consists of a general deposit account and several special deposit accounts. The State records each fund's equity interest in the general deposit account. All earnings on that account are recorded in the General Fund. In contrast, each special deposit account retains its own earnings.

f. Investments

The State Treasurer is authorized by statute to invest all State funds. The State Treasurer's investment objectives are preservation of capital, maintenance of adequate liquidity, and obtaining the best yield possible within prescribed parameters. To meet those objectives, the State Treasurer uses various resources including an investment advisory service, electronic financial quotation and information services, various economic reports, and daily communication with brokers and financial institution investment officers.

To insure safety of principal, the State Treasurer's policy is to limit liquid investments (i.e., those with maturities not exceeding one year) to cash, repurchase agreements (when collateralized by United States Treasury, federal agency or other federally guaranteed obligations with a market value in excess of 100.0% of funds advanced), United States Treasury bills, federal agency discount notes, and commercial paper. The State Treasurer further preserves principal by investing in only the highest investment grade securities (i.e., those rated at least A by two leading national rating services). In order to diversify investment holdings, asset allocation policies are utilized for investments having more than one year to maturity. Overall credit exposure is managed by asset allocation policies and by additional constraints controlling risk exposure to individual corporate issuers.

Certain agencies and component units have specific authority to manage deposits and investments under their control. The investment policies of these entities may differ from those of the State Treasurer.

State law has established a six-member Investment Commission with fiduciary responsibility for all of the State Retirement Systems' investments. The chief investment officer may invest no more than 70.0% of the Systems' investment portfolio in equity securities.

Substantially all of the State's investments are presented at fair value; securities are valued at the last reported sales price as provided by an independent pricing service. In contrast the State has presented at historical cost the investment securities and other instruments that the Chief Insurance Commissioner holds for insurance companies in lieu of surety bonds. These securities are separately classified in the accompanying financial statements as *securities held in lieu of surety bonds*. These instruments are recorded in the State's agency funds and are not held for investment purposes.

Pursuant to State law, the primary government and its discretely presented component units do not maintain deposits or make investments in foreign currencies.

The State sponsors the Local Government Investment Pool (LGIP), an external investment pool reported as an investment trust fund. The LGIP's complete financial statements may be obtained by writing to the following address:

The State Treasurer's Office
 Local Government Investment Pool
 Post Office Box 11778
 Columbia, South Carolina 29211

g. Receivables and Payables

The State records amounts receivable from parties outside the primary government net of allowances for uncollectible amounts and contractual adjustments. It estimates uncollectible amounts based on past collection experience. The State discloses the gross amounts of these receivables and the amounts of related allowances and adjustments, as well as any significant receivable balances not expected to be collected within one year, in Note 5. Further, the State disaggregates its receivable balances in Note 5 if any significant components thereof have been obscured in the financial statements by aggregation or if different components of receivables have significantly different liquidity characteristics.

The State presents balances outstanding at the end of the fiscal year that relate to lending/borrowing arrangements between funds as interfund receivables and payables and reports all other outstanding balances between funds as due to/from other funds. The government-wide statement of net assets displays internal balances that involve fiduciary funds as accounts receivable and accounts payable. The State reports as internal balances any residual balances outstanding between the governmental and business-type activities in the government-wide financial statements.

h. Inventories

The State values its inventories at the lower of cost or market, predominantly using the first-in, first-out methodology for its proprietary funds and its business-type activities and predominantly using the average cost methodology for its other funds and activities and its discretely presented component units. The State records expenditures in governmental funds when it consumes inventory items rather than when it purchases them.

i. Prepaid Items

Certain payments to vendors reflect costs applicable to future accounting periods. The State records these payments as prepaid items in both the government-wide and fund financial statements.

j. Capital Assets

The State reports its capital assets in the following categories in the applicable governmental or business-type activities in the government-wide financial statements: land and land improvements, infrastructure (i.e., highways and bridges), buildings and improvements, construction in progress, vehicles, machinery and equipment, works of art and historical treasures, and intangible assets.

Capital assets are valued at historical cost or at estimated historical cost if actual historical cost data are not available. Donated capital assets are recorded at estimated fair market value on the donation date. Infrastructure assets acquired prior to fiscal years ended after June 30, 1980, are reported at cost beginning in the year 1917. The costs of normal maintenance and repairs that do not significantly add to the value of an asset or materially extend an asset's useful life are not capitalized. Cumulative costs incurred on major capital assets under construction but not yet placed in service are capitalized and reported in the construction in progress account. Net interest incurred by a proprietary fund during the construction phase of a major capital asset is included as part of the capitalized value of such asset.

An individual asset is capitalized and reported if it has an estimated useful life of at least two years and a historical cost as follows: more than \$5 thousand for vehicles, machinery and equipment, and works of art and historical treasures; more than \$100 thousand for buildings and improvements, depreciable land improvements, and intangible assets; and more than \$500 thousand for roads and bridges. All land and non-depreciable land improvements are capitalized and reported, regardless of cost. Certain State agencies also capitalize those assets with a useful life between one and two years that meet

the preceding dollar thresholds, and the Lottery Commission, a major discretely presented component unit, capitalizes all property and equipment purchases of \$1 thousand or more.

Once the State or one of its discretely presented component units places a depreciable capital asset in service, depreciation is recorded using the straight-line method over the following estimated useful lives:

<u>Asset Category</u>	<u>Years</u>
Land improvements.....	3 - 60
Infrastructure—highways.....	75
Infrastructure—bridges.....	50
Buildings and improvements.....	5 - 55
Vehicles.....	3 - 20
Machinery and equipment.....	2 - 25
Works of art; historical treasures.....	10 - 25
Intangible assets.....	3 - 38

The State does not depreciate capitalized individual works of art and historical treasures determined to have inexhaustible useful lives and does not capitalize collections of works of art and historical treasures that are held for public use, are protected and preserved, and are subject to a policy that requires the proceeds from sales of collection items to be used to acquire other items for collections. These non-capitalized collections include portraits of political leaders, historical relics, antiques, fossils, and other South Carolina artifacts.

The State reports losses on disposals of capital assets as expenses of its General Government function and gains on such disposals as general revenues in the government-wide statement of activities.

The State reports the Southern Connector toll road as a capital asset of the Connector 2000 Association, Inc., the major discretely presented component unit that financed, constructed, and is responsible for maintaining and operating the toll road. Under an agreement between the Association and the State Department of Transportation (DOT), the DOT retains fee simple title to the road.

k. Deferred Charges

Deferred costs to be recovered from future revenues of the South Carolina Public Service Authority (a regulated utility reported as a major discretely presented component unit) are recorded as deferred charges. The Authority’s rates are based upon debt service and operating fund requirements. The Authority recognizes differences between debt principal maturities and straight-line depreciation as costs to be recovered from future revenue. The recovery of outstanding amounts recorded as costs to be recovered from future revenue will coincide with the repayment of the outstanding long-term debt of the Authority.

The South Carolina Medical Malpractice Liability Joint Underwriting Association, a non-major discretely presented component unit, defers certain policy acquisition costs for new and renewal business. The Association amortizes these costs based on the related written and unearned premiums.

Unamortized bond issuance costs are reported as deferred charges and are amortized as described in Note 1m.

l. Tax Refunds Payable

Most of the tax refunds payable balance in the General Fund relates to individual income tax. During the calendar year, the State collects employee withholdings and taxpayers’ payments. Taxpayers file returns by April 15 for the preceding calendar year. At June 30, the State estimates the amount it owes taxpayers for overpayments during the preceding six months. The State records this estimated payable as tax refunds payable and a reduction of tax revenues.

m. Long-Term Obligations

The State records general long-term debt and other long-term obligations of the primary government’s governmental funds in the governmental activities reported in its government-wide financial statements. Long-term debt and other obligations financed by proprietary funds are recorded as liabilities in the appropriate funds.

The State defers and amortizes bond premiums and discounts, as well as issuance costs, over the life of the bonds predominantly using the effective interest method. For current refundings and advance refundings resulting in defeasance of debt, the difference between the reacquisition price and the net carrying amount of the old debt is also deferred and amortized over the shorter of the remaining life of the old debt or the life of the new debt. The State reports bonds payable net of the applicable bond premium or discount and deferred amount on refunding. Unamortized issuance costs are reported as deferred charges.

n. Compensated Absences

During their first ten years of service, most full-time permanent State employees annually earn 15 days of vacation leave and 15 days of sick leave. After ten years, most employees earn an additional 1.25 days of vacation leave for each year of service over ten until they reach the maximum of 30 days per year. Employees may carry forward up to 45 days of vacation leave and 180 days of sick leave from one calendar year to the next. Upon termination of employment, the State pays employees for accumulated vacation leave at the pay rate then in effect. Employees do not receive pay for accumulated sick leave when they terminate. However, at retirement, employees participating in the South Carolina Retirement System and the South Carolina Police Officers' Retirement System may receive additional service credit for up to 90 days of accumulated unused sick leave.

The government-wide and proprietary fund statements record an expense and a liability when employees earn compensated absence credits. Governmental fund financial statements record a liability for compensated absences payable at June 30 only if the liability has matured but has not yet been paid at that date (for example, as a result of employee resignations and retirements). The State does not record a liability for unpaid accumulated sick leave.

o. Perkins Loan Liability

The Higher Education Fund, a major enterprise fund, records a liability related to the Perkins student loan program and certain other federal student loan programs to reflect the amount of capital contributions received to date from the federal government plus any other amounts that ultimately are refundable to the federal government under the programs. The State has recorded this liability as part of its other non-current liabilities account.

p. Restricted Net Assets

The State reports a portion of its net assets in its government-wide statements as restricted. Net assets are reported as restricted when constraints placed on net assets use are either (a) externally imposed by creditors (such as debt covenants), grantors, contributors, laws or regulation of other governments, or (b) imposed by law through constitutional provisions or enabling legislation.

Enabling legislation authorizes the State to assess, levy, charge, or otherwise mandate payments of resources (from resource providers) and includes a legally enforceable requirement that those resources be used only for the specific purposes stipulated in the legislation. A legally enforceable requirement is one that an outside party (such as citizens, public interest groups, or the judiciary) can compel the government to honor. At June 30, 2008, \$1.462 billion was reported as restricted net assets because of restrictions imposed by enabling legislation.

q. Flow Assumption, Net Assets

The State's policy is to first apply restricted resources when an expense is incurred for purposes for which both restricted and unrestricted net assets are available.

r. Escheat Property

The State accounts for its escheat property in the General Fund, the fund to which the property ultimately escheats. To the extent it is probable that such property will be reclaimed and paid to claimants, the State records a liability and reduces revenue in the General Fund.

NOTE 2: ACCOUNTING AND REPORTING CHANGES**a. Restatement of Fund Balances in Non-major Governmental Funds**

The State established the Homestead Exemption fund in fiscal year 2007-2008 to account for a special additional 1% sales tax used for property tax relief reimbursements. The additional tax was imposed effective June 1, 2007. At June 30, 2007, the State had accrued \$39.332 million in July collections related to the Homestead Exemption in the Other Special Revenue Fund. The beginning fund balance in the Other Special Revenue Fund has been decreased by \$39.332 million, and the beginning fund balance in the Homestead Exemption Fund has been reported as \$39.332 million.

In addition, the State previously reported the Jobs-Economic Development Authority (JEDA) as a separate non-major fund. For the fiscal year 2007-2008, JEDA has been combined into the Other Special Revenue Fund. The beginning fund balance for JEDA is \$1.365 million.

Total fund balance for non-major governmental funds was not restated from the reported June 30, 2007 amount.

b. Change in Accounting Estimate in Non-major Enterprise Fund

During fiscal year 2007-2008, the Tuition Prepayment Program changed the actuarial assumption for tuition inflation due to the statutory limitation on benefit increases to Program participants who attend South Carolina public colleges or universities imposed by Section 59-4-120 of the South Carolina Code of Laws of 1976, as amended. The revised assumption for those who attend South Carolina public colleges or universities is based on a tuition inflation rate of 7%, compared to the previous assumption of 9%. The limitation imposed by Section 59-4-120 does not apply to those students who attend a private or out-of-state college, but the assumption was revised for that category as well. The projection for those attending private or out-of-state colleges is an 8% average annual tuition increase. This change in assumption caused a negative tuition plan disbursements expense of \$5.844 million for the fiscal year 2007-2008.

NOTE 3: DEFICITS OF INDIVIDUAL FUNDS

The accompanying fund financial statements display deficit fund balances and deficit net asset balances for individual major funds, if applicable. Nonmajor funds had the following deficit net asset balances (expressed in thousands) at June 30, 2008:

Nonmajor Enterprise Funds:	
Patients' Compensation.....	\$ 182,880
Tuition Prepayment Program.....	14,737
CHS Development Company.....	68
Internal Service Funds:	
State Accident Fund.....	99,178
Pension Administration.....	1,132

Actions taken to eliminate deficits include increase of existing fees, assessment of additional fees, purchase of excess loss reinsurance, and implementation of cost containment programs.

NOTE 4: DEPOSITS AND INVESTMENTS

By law, all deposits and investments are under the control of the State Treasurer except for those that, by specific authority, are under the control of other agencies or component units. The deposit and investment policies of those entities may differ from those of the State Treasurer. Typically, these agencies follow the deposit and investment policies of the State Treasurer in an effort to minimize deposit and investment risks.

a. Deposits

The following deposits disclosure excludes the primary government's Pension Trust Funds of the South Carolina Retirement Systems (the Systems) which are described in subsection d and the primary government's Other Post-Employment Benefit Trust Funds which are described in subsection e.

Policy

The State's policy by law, requires all banks or savings and loan associations that receive State funds deposited by the State Treasurer, to secure the deposits by deposit insurance, surety bonds, collateral securities, or letters of credit to protect the State against any loss. Agencies with specific authority manage their deposits outside of the State Treasurer and may have custodial credit risk policies that differ from the State Treasurer. Therefore, some deposits presented below have custodial credit risk. Note 1, subsections d and e explain other policies concerning deposits.

Custodial Credit Risk

Custodial credit risk for deposits is the risk that in the event of a depository financial institution's failure, the State will not be able to recover collateral securities that are in the possession of an outside party. Deposits include cash and cash equivalents on deposit in banks and non-negotiable certificates of deposit. All deposits under the control of the State Treasurer are fully insured or collateralized. The reported amount of the State Treasurer's deposits as of June 30, 2008 was \$145.602 million and the bank balance was \$876.593 million. As of June 30, 2008, the reported amount of the primary government's deposits outside of the State Treasurer was \$216.735 million and the bank balance was \$236.828 million. Of the \$139.852 million bank balance exposed to custodial credit risk, \$38.985 million was uninsured and uncollateralized, and \$100.867 million was uninsured and collateralized with securities held by the counterparty's trust department or agent but not in the State's name.

As of June 30, 2008, the reported amount of the major discretely presented component units' deposits was \$17.934 million and the bank balance was \$18.782 million. Of the \$10.340 million bank balance exposed to custodial credit risk, \$262 thousand was uninsured and uncollateralized; and \$10.078 million was uninsured and collateralized with securities held by the counterparty's trust department or agent, but not in the State's name.

b. Investments

The investment disclosures exclude the primary government's Pension Trust Funds of the South Carolina Retirement Systems which are described in subsection d and the primary government's Other Post-Employment Benefit Trust Funds which are described in subsection e.

Investment Policy

The State's investment policy by law authorizes investments that vary by fund, but generally include obligations of the United States and certain agencies of the United States, obligations of the State of South Carolina and certain of its political subdivisions, certificates of deposit, collateralized repurchase agreements, certain corporate bonds, and commercial paper. Substantially all of the State's investments are presented at fair value. Securities are valued at the last reported sales price as provided by an independent pricing service. Investment income consists of realized and unrealized appreciation (depreciation) in the fair value of investments and interest income earned. Other investment policies for the State and its component units are explained in Note 1, subsection f.

Custodial Credit Risk

Custodial credit risk for investments is the risk that in the event of a failure of the counterparty to a transaction, the State will not be able to recover the value of investments or collateral securities that are in possession of an outside party. All of the State Treasurer's investments are fully insured or collateralized. Certain agencies with specific authority manage their own investments and may have custodial credit risk policies that differ from the State Treasurer. The primary government's investments and the major discretely presented component unit's investments that are exposed to custodial credit risk have been classified into two categories of custodial credit risk. Category A includes investment securities that are uninsured, not registered in the name of the State, and are held by a counterparty. Category B includes investment securities that are uninsured, not registered in the name of the State, and are held by a counterparty's trust department or agent but not in a State entity's name. The portion of the primary government's investments with custodial credit risk is classified by risk category (expressed in thousands) at June 30, 2008, as follows:

Primary Government Investment Type	Category		Reported Amount
	A	B	
U.S. Treasuries.....	\$ 1,648	\$ 6,635	\$ 8,283
U.S. Agencies.....	3,304	10,224	13,528
Corporate bonds.....	—	660	660
Equity securities.....	—	8,109	8,109
Repurchase agreements.....	64,421	45,332	109,753
Asset backed securities.....	4,700	—	4,700
Commercial paper.....	—	32,943	32,943
Totals.....	\$ 74,073	\$ 103,903	\$ 177,976

The State's major discretely presented component units hold investments in U.S. Treasuries that are exposed to custodial credit risk. At June 30 investments with a reported value of \$6.377 million were classified as Category B.

Credit Risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations to the State. The State Treasurer's credit risk policy mitigates potential for loss of principal by purchasing only high investment grade fixed-income securities. In the event that the rating of a security falls below investment grade, that security may continue to be held contingent upon an evaluation of the longer term investment merits of the security. Certain agencies with specific authority to manage their own investments outside of the State Treasurer have credit risk policies that differ from that of the State Treasurer. Debt investments for the primary government were rated as of June 30, 2008 using the Standard and Poor's rating scale. The following table provides information on investment ratings (expressed in thousands):

State of South Carolina

Investment Type and Fair Value	AAA	AA	A	BBB	BB	B	A-1	Not Rated
Corporate bonds.....	\$ 38,662	\$ 141,244	\$ 628,702	\$ 541,793	\$ 1,390	\$ 1,299	\$ 8,407	\$ 48,530
Municipal bonds.....	80,059	38,950	21,300	—	—	—	—	71,225
Repurchase agreements.....	936,350	—	—	—	—	—	1,460,036	244,129
Asset backed securities.....	226,687	16,674	—	—	—	—	128,686	33,099
Commercial paper.....	—	74,772	—	—	—	—	683,147	80,434
Mutual funds.....	53,476	1,681	—	—	—	—	—	1,150,756
Yankee bonds.....	—	—	310	—	—	—	—	—
Corporate private placements.....	49,684	5,322	76,001	127,555	—	—	17,131	6,006
Guaranteed investment contracts.....	108,062	—	—	—	—	—	—	—
Totals.....	\$ 1,492,980	\$ 278,643	\$ 726,313	\$ 669,348	\$ 1,390	\$ 1,299	\$ 2,297,407	\$ 1,634,179

At fiscal year end, the State Ports Authority (June 30, 2008), the Public Service Authority (December 31, 2007), and the Connector 2000 Association, Inc. (December 31, 2007), all major discretely presented component units, held investments in U.S. government securities which do not require disclosure of credit quality. In addition to U.S. government securities, the State Ports Authority, Public Service Authority and the Connector 2000 Association, Inc. held investments as listed below using the Standard and Poor's rating scale (expressed in thousands):

Investment Type and Fair Value	AAA	A-1	Not Rated
Repurchase agreements.....	\$ 193,749	\$ —	\$ 16,176
Mutual funds.....	2,660	12,516	—
Totals.....	\$ 196,409	\$ 12,516	\$ 16,176

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The State Treasurer manages interest rate sensitivity by investing in securities with a range of maturities from one day to thirty years using effective duration. Effective duration is a measure of the price sensitivity of a bond or a portfolio of bonds to interest rate movements given a 50 basis point change in interest rates. It takes into account that expected cash flows will fluctuate as interest rates change and provides a measure of risk that changes proportionately with market rates. At June 30, 2008, the effective duration and fair value of the State Treasurer's investments by investment type, are as follows (expressed in thousands):

Investment Type	Fair Value	Effective Duration
<u>U.S. Government</u>		
U.S. Treasuries.....	\$ 224,443	0.68
U.S. Agencies.....	2,692,176	19.21
<u>State & Local Government</u>		
Municipal bonds.....	159,600	14.81
<u>Corporate</u>		
Corporate bonds.....	1,232,558	3.93
Corporate asset backed.....	208,018	3.41
Private placements.....	227,679	6.19
Yankee bonds.....	310	27.73
<u>Short Term Investments</u>		
Commercial paper.....	297,541	0.00
Mutual funds.....	13,785	0.00
Equity securities.....	60,044	0.00
Repurchase agreements.....	946,350	0.32
Total Invested Assets.....	\$ 6,062,504	

Agencies that manage their own investments have interest rate risk policies that differ from the State Treasurer. Some of these agencies do not have a formal investment policy that limits investment maturities as a means of managing exposure to fair value losses arising from increasing interest rates. At June 30, 2008, agencies within the State's primary government that manage their own investments limited the maturities of their securities according to the following segmented time distribution (expressed in thousands):

Investment Type	Fair Value	Investment Maturities (in years)				No Maturity
		Less than 1	1 - 5	6 - 10	More than 10	
U.S. Treasuries.....	\$ 347,859	\$ 73,013	\$ 273,747	\$ 948	\$ 151	\$ —
U.S. Agencies.....	226,520	214,259	7,891	3,678	692	—
Collateralized mortgage obligations..	114	—	—	—	114	—
Corporate bonds.....	177,469	134,851	21,430	1,059	19,469	660
Municipal bonds.....	51,934	—	26,645	184	25,105	—
Equity securities.....	78,219	—	—	—	—	78,219
Repurchase agreements.....	1,694,165	1,694,165	—	—	—	—
Asset backed securities.....	197,128	—	192,428	—	4,700	—
Commercial paper.....	540,812	540,708	—	—	—	104
Mutual funds.....	1,192,128	54,703	25	83	—	1,137,317
Corporate private placements.....	54,020	54,020	—	—	—	—
Guaranteed investment contracts.....	108,062	98,851	—	—	—	9,211
Totals.....	\$ 4,668,430	\$ 2,864,570	\$ 522,166	\$ 5,952	\$ 50,231	\$ 1,225,511

The State's major discretely presented component units also had interest rate risk policies that varied from the State Treasurer. At June 30, 2008, these major discretely presented component units had the following investments with maturities disclosed by investment category and segmented time distribution stated with fair value (expressed in thousands):

Investment Type	Fair Value	Investment Maturities (in years)			
		Less than 1	1 - 5	6 - 10	More than 10
U.S. Treasuries.....	\$ 278,564	\$ 235,565	\$ 42,999	\$ —	\$ —
U.S. Agencies.....	286,536	—	—	286,536	—
Repurchase agreements.....	209,925	193,749	—	—	16,176
Mutual funds.....	15,176	15,176	—	—	—
Totals.....	\$ 790,201	\$ 444,490	\$ 42,999	\$ 286,536	\$ 16,176

Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investments in a single issuer. The State's policy for reducing the risk is to diversify and limit exposure to any single issuer to no more than 5%, except for United States Treasury and agency obligations. The State sponsors the Local Government Investment Pool (LGIP), an external investment pool reported as an investment trust fund. As of June 30, 2008, the State Treasurer had approximately 57% of the LGIP investment portfolio in an overnight repurchase agreement with a South Carolina bank that was fully collateralized by U.S. Treasuries and U.S. agency obligations.

c. Securities Lending Program

The following securities lending disclosures exclude the primary government's Pension Trust Funds of the South Carolina Retirement Systems which are described in subsection d. The following disclosures, with the exception of the amounts reported in the table below, apply to the primary government's Other Post-Employment Benefit Trust Funds reported in subsection e.

By law, the State Treasurer may lend securities from its investment portfolios on a collateralized basis to third parties, primarily financial institutions, with a simultaneous agreement to return the collateral for the same securities in the future. The State may lend United States government securities, corporate bonds, other securities and equities for collateral in the form of cash or other securities. The contracts with the State's custodians require them to indemnify the State if the borrowers fail to return the securities (and if the collateral is inadequate to replace the securities lent) or fail to pay the State for income distributions by the securities' issuers while the securities are on loan.

State of South Carolina

The weighted average maturity of the State's collateral investments generally matched the maturity of the securities loans during the fiscal year and at June 30, 2008. At June 30, 2008, the State had no credit risk exposure to borrowers because the amounts the State owed the borrowers exceeded the amounts the borrowers owed the State. Either the State or the borrower can terminate all securities loans on demand. There are no restrictions on the amount of the loans that can be made. For the fiscal year ended June 30, 2008, the State experienced no losses on its securities lending transactions because of borrower defaults.

The State receives primarily cash as collateral for its loaned securities. The market value of the required collateral must meet or exceed 102% of the market value of the securities loaned, providing a margin against a decline in the market value of the collateral. During the fiscal year ended June 30, 2008, the State met the 102% requirement. The State cannot pledge or sell collateral securities unless the borrower defaults. The lending agent, on behalf of the State, invests cash collateral received. Accordingly, at June 30, 2008, the State recorded these investments of cash collateral as assets in the accompanying financial statements. Corresponding liability amounts also have been recorded because the State must return the cash collateral to the borrower upon expiration of the loan. The following table presents the fair value (expressed in thousands) of the underlying securities and the total collateral received for securities on loan at June 30, 2008:

	<u>Amount</u>
Securities lent for cash collateral:	
U.S. Treasuries.....	\$ 1,290,735
Corporate bonds.....	11,389
Total for cash collateral.....	<u>\$ 1,302,124</u>
Cash collateral invested:	
Repurchase agreements.....	\$ 47,255
Asset backed securities.....	1,058,037
Floating Rate Notes.....	210,434
Total collateral invested.....	<u>\$ 1,315,726</u>

d. South Carolina Retirement Systems

Custodial Credit Risk

Deposits

Custodial credit risk for deposits is the risk that in the event of a depository financial institution's failure, the Systems' deposits may not be recovered. As prescribed by law, the State Treasurer is the custodian of all deposits and is responsible for securing all deposits held by banks or savings and loan associations. These deposits must be secured by deposit insurance, surety bonds, collateral securities, or letters of credit to protect the State against loss in the event of insolvency or liquidation of the institution, or for any other cause. All deposits are required to be insured by the Federal Deposit Insurance Corporation (FDIC) up to \$100 thousand or collateralized with securities held by the State or its agent in the State Treasurer's name as custodian. As of June 30, 2008, the carrying amount of the Systems' deposits was \$40.715 million and the bank balance was \$63.872 million.

Investments

Custodial credit risk for investments is the risk that, in the event of a failure of the counterparty, the Systems will not be able to recover the value of the investments or collateral securities that are in the possession of an outside party. Investing for the Systems is governed by State law allowing investments to be made in a variety of instruments including obligations of the United States and its agencies, securities fully guaranteed by the United States, certain corporate obligations, collateralized repurchase agreements, and equity securities. The market value must not be less than the amount of either the certificate of deposit so secured, including interest, or the amount of the repurchase agreement so collateralized, including interest.

Funds held in trust for the Retirement Systems may be invested and reinvested in a variety of instruments including, but not limited to, fixed income instruments of the United States, foreign fixed income obligations, futures and options, collateralized mortgage obligations, domestic and international equity securities, private equity, real estate, and fund of funds.

The tables presented for disclosures of credit and interest rate risk in accordance with GASB Statement No. 40 are designed to inform financial statement users about investment risks which could affect the Systems' ability to meet its obligations. These tables classify investments by risk type, while the financial statements disclose investments by asset class. The table amounts were provided by the custodian bank and may vary from the Statement of Plan Net Assets primarily because the amounts reported include accrued income receivable.

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. This risk is managed within the portfolio using effective duration (option adjusted duration). Effective duration is a measure of the price sensitivity of a bond or a portfolio of bonds to interest rate movements given a 50 basis point change in interest rates. It takes into account that expected cash flows will fluctuate as interest rates change and provides a measure of risk that changes proportionately with market rates.

The Systems invest in mortgage-backed securities which are reported at fair value in the Statement of Plan Net Assets and are based on cash flows from principal and interest payments of the underlying mortgages. These securities are sensitive to prepayments, which are likely in an environment of declining interest rates, and thereby reduce the value of the security. The systems invests in these securities to diversify the fixed income portfolio and minimize risk.

The effective duration and the fair value of the Systems' investments by investment type at June 30, 2008 (expressed in thousands), is as follows:

<u>Investment Type</u>	<u>Fair Value</u>	<u>Effective Duration</u>
<u>Short Term Investments</u>

State of South Carolina

Credit Risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations to the Systems. Obligations of the U.S. Government or obligations explicitly guaranteed by the U.S. Government are not considered to have credit risk and disclosure is not required. As of June 30, 2008, the Systems' fixed income assets that are not government guaranteed represented 77 percent of the fixed income portfolio. As a matter of practice, there are no overarching limitations for credit risk exposures within the overall fixed income portfolio. Each individual portfolio within fixed income is managed in accordance with operational guidelines that are specific as to permissible credit quality ranges, exposure levels within individual quality tiers, and average credit quality. The Systems' fixed income investments were rated by Moody's and are presented below:

Investment Type and Fair Value	AAA	AA	A	BAA	BA	B	Not Rated
Short Term Investments							
Commingled Funds U.S. Debt.....	\$ —	\$ —	\$ —	\$ —	\$ —	\$ —	\$ 140,140

Totals.....	\$ 110,120	\$ 419,015	\$ 1,629,975	\$ 1,676,038	\$ 73,172	\$ 34,480	\$ 4,604,915

Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer. The Systems' policy for reducing this risk is to comply with State law requiring that the fixed income portfolio shall contain no more than 6% exposure to any single issuer, except for United States Treasury and agency obligations. As of June 30, 2008, there is no single issuer exposure within the portfolio that comprises 6 percent or more of the overall portfolio. Therefore, there is no concentration of credit risk.

Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates will adversely impact the fair value of an investment. The Systems participates in foreign markets to diversify assets, reduce risk and enhance returns. Exposure to foreign investments has, to date, been achieved synthetically using financial futures, forwards and swaps. Currency forwards are used to manage currency fluctuations and are permitted by investment policy. Policy forbids speculating in forwards and other derivatives.

The table below presents the Systems' exposure to foreign currency risk in U.S. dollars as of June 30, 2008, (amounts expressed in thousands):

Currency	Cash & Cash Equivalents	Forward Contracts	Private Equity
Australian Dollar.....	\$ —	\$ 141,457	\$ —
British Pound Sterling.....	—	558,565	—
Canadian Dollar.....	—	257,263	—
Euro Currency.....	3	1,769,160	34,268
Japanese Yen.....	—	876,241	—
Totals.....	\$ 3	\$ 3,602,686	\$ 34,268

Derivatives

Derivatives are financial instruments whose value is derived from underlying assets or data. They generally take the form of contracts in which two parties agree to make payments at a later date based on the value of the underlying assets or data. The main types of derivatives that are common in today's financial markets are futures, forwards, options, and swaps.

Futures are contractual obligations that require the buyer (seller) to buy (sell) assets at a predetermined date at a predetermined price. These contracts are standardized and traded on an organized exchange with gains and losses settled daily thereby minimizing credit and default risk. To comply with the requirements of multiple exchanges, \$237.63 million in performance bonds (U.S. Treasury Bills) were held in trust by the clearing broker on June 30, 2008. These assets represent the required margin amount to establish the Systems' futures exposure.

As of June 30, 2008, the Systems had the following exposure to futures contracts (dollar amounts expressed in thousands):

<u>Futures Contracts</u>	<u>Expiration</u>	<u>Long/Short</u>	<u>Quantity</u>	<u>Notional Value*</u>
MTF CAC40 10EU	July	Long	2,595	\$ 181,690

*Notional value is the nominal or face amount that is used to calculate payments made on derivative instruments (futures, forwards, swaps, etc.). This amount generally does not change hands and is thus referred to as notional. The notional amount represents the economic equivalent to an investment in the physical securities represented by the derivative contract.

State of South Carolina

Forwards are contractual obligations that require the delivery of assets at a fixed price on a predetermined date. These contracts are “over-the-counter” instruments, meaning they are not traded on an organized exchange. As of June 30, 2008, the Systems had the following forward exposures, listed by counterparty (amounts expressed in thousands):

Broker	Notional Value	Base Gain/(Loss)	Base Exposure
Goldman Sachs.....	\$ 1,602,423	\$ 32,107	45.19%
Lehman Brothers.....	882,097	15,121	24.88%
Deutsche Bank.....	791,643	8,047	22.33%
Royal Bank of Scotland.....	254,794	1,383	7.19%
UBS.....	14,656	(18)	0.41%
Totals.....	\$ 3,545,613	\$ 56,640	100.00%

The Systems have entered into various swap agreements to manage risk exposure. Swaps are “over-the-counter” (OTC) agreements to exchange a series of cash flows according to specified terms. The underlying asset can be an interest rate, an exchange rate, a commodity price or any other index.

Total return swaps are used to efficiently achieve a target asset allocation. Exposures to an asset class are typically gained by paying a reference rate such as LIBOR, plus or minus a spread, in exchange for the risk and returns of a desired index. Similarly, exposures can be reduced by receiving a reference rate in exchange for the economic risks and returns of an index.

Counterparty risk, or default risk, is the risk that either party will not honor its contractual obligations. The Systems seeks to actively manage its counterparty risk by thorough analysis and evaluation of all potential counterparties by investment staff and the independent overlay manager. Risk is further minimized through diversification among counterparties with high credit ratings.

As of June 30, 2008, the Systems was exposed to counterparty risk through currency forwards and swap agreements. The Systems does not anticipate any default in our contractual positions.

Gains and losses on swaps are determined based on market values and are recorded in the Statement of Changes in Plan Net Assets. At June 30, 2008, the System held swaps as shown in the table below (amounts expressed in thousands):

Counterparty	Total Return Swaps	SCRS Pays	SCRS Receives	Maturity Date	Current Notional	Gain (Loss) Since Trade
Morgan Stanley	SP500	LIBOR minus 12.5 bps	SP500	9/19/2008	\$ 178,655	\$ (23,590)

Alternatives

The investment categories on the Statement of Plan Net Assets were modified in 2008 to accommodate the new asset types approved by the Commission to further diversify the assets of the Systems. The Alternatives category includes private equity, global tactical asset allocation, absolute return, and swaps. Private equity investments are legally structured as

limited partnerships. In this structure, the Systems is one of several limited partners, while the investment manager serves as the general partner. Investing in limited partnerships legally obligates the Systems to invest the committed amount until the investment is fully funded.

Commitments

During the year and subsequent to year-end, the Systems entered into commitment agreements with numerous investment managers for future funding of various asset classes including private equity, global tactical asset allocation, absolute return and global fixed income investments. There are varying degrees and understandings regarding the commitments across the individual managers. The total amount of investment commitments outstanding as of June 30, 2008 was \$1.554 billion (US dollars) and €117 million (Euros), with an additional amount of \$1.875 billion (US dollars) being committed subsequent to year-end. The commitment agreements represent the Investment Commission's continued reallocation and transition efforts for investments. In addition, the Systems was committed to purchase Federal National Mortgage Association TBA's (To be Announced) with a market value of \$601 million as of June 30, 2008.

Securities Lending

Through a custodial agent, the Systems participate in a securities lending program whereby securities are loaned for the purpose of generating additional income. The Systems lends securities from its investment portfolios on a collateralized basis to third parties, primarily financial institutions. The market value of the required collateral must initially meet or exceed 102 percent of the market value of the securities loaned, providing a margin against a decline in the market value of the collateral, and requires additional collateral if the collateral value falls below 100 percent.

There are no restrictions on the amount of securities that may be loaned. The types of securities available for loan during the year ended June 30, 2008, included U. S. Government securities, U. S. Government agencies, corporate bonds, convertible bonds, and equities. The contractual agreement with the Systems' custodial bank provides indemnification in the event the borrower fails to return the securities lent or fails to pay the Systems income distribution by the securities' issuers while the securities are on loan. Cash and U.S. Government securities were received as collateral for these loans. The Systems cannot pledge or sell collateral securities without a borrower default. The Systems invests cash collateral received; accordingly, investments made with cash collateral appear as an asset. A corresponding liability is recorded as the Systems must return the cash collateral to the borrower upon the expiration of the loan.

With regard to custodial credit risk, the Systems' cash collateral invested is held by the counterparty and is uninsured. All securities loaned can be terminated on demand by either the Systems or the borrower. At year end the average number of days the loans were outstanding was 1 day. The average weighted maturity of investments made with cash collateral was 30 days. At June 30, 2008, there had been no losses resulting from borrower defaults and the Systems had no credit risk exposure to borrowers because the amounts the Systems owed the borrowers exceeded the amounts the borrowers owed the Systems.

The following table presents the fair value (expressed in thousands) of the underlying securities and the total collateral received for securities on loan at June 30, 2008:

	June 30, 2008					
	SCRS	PORS	GARS	JSRS	NGPS	TOTALS

e. Other Post-Employment Benefit Trust Funds

The State Treasurer is the custodian and investment manager of all deposits and investments of the South Carolina Retiree Health Insurance Trust Fund and the Long-term Disability Insurance Trust Fund (the “Trusts”).

Custodial Credit Risk

Deposits

Custodial credit risk for deposits is the risk that in the event of a depository financial institution’s failure, the Trusts’ deposits may not be recovered. As prescribed by law, the State Treasurer is the custodian of all deposits and is responsible for securing all deposits held by banks or savings and loan associations. These deposits must be secured by deposit insurance, surety bonds, collateral securities, or letters of credit to protect the State against loss in the event of insolvency or liquidation of the institution, or for any other cause. All deposits are required to be insured by the Federal Deposit Insurance Corporation (FDIC) up to \$100 thousand or collateralized with securities held by the State or its agent in the State Treasurer’s name as custodian. As of June 30, 2008, the reported amount of the Trusts’ deposits was negative \$21 thousand.

Investments

In accordance with State Law, the Trusts may invest in a variety of instruments including obligations of the United States and its agencies and securities fully guaranteed by the United States, certain corporate obligations, certain shares of Federal savings and loan associations and State chartered savings and loan associations, and collateralized repurchase agreements. All investments are required to be insured or registered, or held by the State or its agent in the name of the State Treasurer as custodian.

With respect to investments in the State internal cash management pool, all of the State Treasurer’s investments are insured or registered or are investments for which the securities are held by the State or its agents in the State’s name.

Custodial Credit Risk

Custodial credit risk for investments is the risk that in the event of a failure of the counterparty to a transaction, the State will not be able to recover the value of investments or collateral securities that are in possession of an outside party. All of the State Treasurer’s investments are fully insured or collateralized.

Credit Risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations to the State. The State Treasurer’s credit risk policy mitigates potential for loss of principal by purchasing only high investment grade fixed-income securities. In the event that the rating of a security falls below investment grade, that security may continue to be held contingent upon an evaluation of the longer term investment merits of the security. As of June 30, 2008, the Trusts’ applicable debt investments (expressed in thousands) were rated by Standard & Poor’s and are presented below:

Investment Type and Fair Value	AA	A	BBB	BB	Not Rated
Corporate bonds.....	\$ 498	\$ 28,209	\$ 52,324	\$ 463	\$ —
Repurchase agreements.....	—	—	—	—	149,950
Asset backed securities.....	—	—	—	173	—
Corporate private placements.....	556	454	6,576	—	—
Totals.....	\$ 1,054	\$ 28,663	\$ 58,900	\$ 636	\$ 149,950

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The State Treasurer manages interest rate sensitivity by investing in securities with a range of maturities from one day to thirty years using effective duration. Effective duration is a measure of the price sensitivity of a bond or a portfolio of bonds to interest rate movements given a 50 basis point change in interest rates. It takes into account that expected cash flows will fluctuate as interest rates change and provides a measure of risk that changes proportionately with market rates. At June 30, 2008, the effective duration and fair value of the Trusts’ investments by investment type, are as follows (expressed in thousands):

<u>Investment Type</u>	<u>Fair Value</u>	<u>Effective Duration</u>
<u>U.S. Government</u>		
U.S. Agencies.....	\$ 57,927	19.38
<u>Corporate</u>		
Corporate bonds.....	81,494	5.85
Corporate asset backed.....	173	5.51
Private placements.....	7,586	10.39
<u>Short Term Investments</u>		
Repurchase agreements	149,950	0.00
Total Invested Assets.....	\$ 297,130	

Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributed to the magnitude of a government’s investments in a single issuer. The State’s policy for reducing the risk is to diversify and limit exposure to any single issuer to no more than 5%, except for United States Treasury and agency obligations.

Securities Lending

The Trusts participate in the Securities Lending Program as described in subsection c. The following table presents the fair value (expressed in thousands) of the underlying securities and the total collateral received for securities on loan at June 30, 2008:

	<u>Amount</u>
Securities lent for cash collateral:	
U.S. Treasuries.....	\$ 2,605
Corporate bonds.....	22
Total for cash collateral.....	\$ 2,627
Cash collateral invested:	
Repurchase agreements.....	\$ 79
Asset backed securities.....	2,137
Floating Rate Notes.....	427
Total collateral invested.....	\$ 2,643

NOTE 5: RECEIVABLES

Receivable balances are disaggregated by type according to their liquidity characteristics and are presented separately in the financial statements, net of applicable allowances. Allowances for uncollectible receivables (expressed in thousands) at June 30, 2008, for the primary government were as follows:

Allowances for Uncollectibles	Governmental Activities					Total Governmental Activities
	Governmental Funds					
	General	Departmental General Operating	Department of Transportation Special Revenue	Nonmajor Governmental Funds	Internal Service Funds	
Income taxes receivable.....	\$ 170,296	\$ —	\$ —	\$ —	\$ —	\$ 170,296

At June 30, 2008, the primary government had outstanding construction commitments totaling \$681.484 million for capital projects in progress. In addition, outstanding construction commitments at that date totaled \$61.401 million for significant permanent improvement projects that will not increase State assets. Projects that will not be capitalized as State assets upon completion include projects for replacements, repairs, and/or renovations to existing facilities. In addition, the primary government had outstanding commitments totaling \$168 thousand at June 30, 2008, related to information technology projects.

Outstanding construction commitments for major discretely presented component units were as follows: \$354.675 million for the Public Service Authority at December 31, 2007, and \$32.156 million for the State Ports Authority at June 30, 2008.

The total interest expense incurred by the State’s enterprise and internal service funds during the current fiscal year was \$165.013 million and \$2.222 million, respectively. Of the amount incurred by the State’s enterprise funds, \$10.815 million was included as part of the cost of capital assets under construction, net of interest earnings.

The Public Service Authority, a major discretely presented component unit, incurred total interest costs of \$193.687 million during its fiscal year ended December 31, 2007, none of which was included in the cost of capital assets under construction. The State Ports Authority, a major discretely presented component unit, incurred total interest costs of \$16.554 million during its fiscal year ended June 30, 2008, of which \$1.018 million was included as part of the cost of capital assets under construction.

NOTE 8: RETIREMENT PLANS

a. Plan Descriptions

The South Carolina Retirement Systems (the Systems), a division of the State Budget and Control Board, administers five defined benefit retirement plans: the South Carolina Retirement System (SCRS), the South Carolina Police Officers' Retirement System (PORS), the Retirement System for Members of the General Assembly of the State of South Carolina (GARS), the Retirement System for Judges and Solicitors of the State of South Carolina (JSRS), and the National Guard Retirement System (NGPS). The Systems issues a publicly available Comprehensive Annual Financial Report that includes required supplementary information for all five plans. The report may be obtained by writing to:

South Carolina Retirement Systems
PO Box 11960
Columbia, South Carolina 29211-1960

SCRS, established by Section 9-1-20 of the South Carolina Code of Laws, is a cost-sharing multiple-employer defined benefit pension plan that benefits employees of public schools, the State, and its political subdivisions. Membership is required as a condition of employment, unless exempted by State law. Both employers and employees must contribute. Benefits vest after five years of service. Vested members who retire at age sixty-five or with twenty-eight years of service at any age receive an annual benefit, payable monthly, for life. The benefit is based on length of service and average final compensation, an annualized average of the employee's highest twelve consecutive quarters' compensation. The annual benefit amount is 1.82% of average final compensation times years of service. Reduced benefits are payable at age fifty-five with 25 years of service credit. A member is eligible to receive a reduced deferred annuity at age 60 with 5 years of earned service.

PORS, established by Section 9-11-20 of the South Carolina Code of Laws, is a cost-sharing multiple-employer defined benefit pension plan that benefits police officers and fire fighters employed by the State or its political subdivisions. Membership is required as a condition of employment, unless exempted by State law. Both employers and employees must contribute. Benefits vest after five years of service. A monthly pension is payable at age fifty-five for members who retire with five years earned service or with 25 years of service regardless of age. The benefit is based on length of service and average final compensation, an annualized average of the employee's highest twelve consecutive quarters' compensation. The annual benefit amount is 2.14% of average final compensation times years of service.

GARS, established by Section 9-9-20 of the South Carolina Code of Laws, is a single-employer defined benefit pension plan that benefits members of the South Carolina General Assembly. Membership is required as a condition of taking office as a member of the General Assembly, unless exempted by State law. Both the members of the General Assembly and the State must contribute. Benefits vest after eight years of service. Vested members who retire at age sixty or at any age with thirty years of service receive an annual benefit, payable monthly, for life. Effective January 1, 2003, a member at age seventy or with thirty years of service is eligible to retire and draw an annuity while continuing to serve in the General Assembly. The annual benefit amount is 4.82% of earnable compensation times years of service. Earnable compensation is defined as forty days' pay at the rate currently paid to members of the General Assembly plus \$12 thousand.

JSRS, established by Section 9-8-20 of the South Carolina Code of Laws, is a single-employer defined benefit pension plan that benefits the judges, solicitors, and circuit public defenders of the State. Membership is required as a condition of taking office, unless exempted by State law. Both judges and the State must contribute. Benefits vest after ten years of service in a position as a judge and eight years in a position as a solicitor or circuit public defender. Members may retire at age seventy with fifteen years of service, at age sixty-five with twenty years of service, at age sixty-five with four years in a JSRS position and twenty-five years other service with the State, twenty-five years service regardless of age for a judge or twenty-four years of service for a solicitor or circuit public defender regardless of age. Members receive a retirement benefit equal to 71.3% of the current active salary of the position occupied at retirement.

NGPS, established by Section 9-10-30 of the South Carolina Code of Laws, is a single employer defined benefit pension plan that provides benefits to National Guard members who served in South Carolina. The plan had been closed to new entrants since July 1, 1993; however, legislation reopened the plan effective January 1, 2007. National Guard members are considered to be federal government employees. The federal government pays Guard members' drill pay and summer camp pay. In accordance with State law, the State's General Fund pays Guard members' salaries only if the Governor activates the National Guard for service to the State. The pension benefit that the State provides is intended only to supplement the retirement benefit that Guard members receive from the federal government. Members who retire at age sixty with twenty years of military service, including at least fifteen years of South Carolina National Guard duty, ten of which immediately precede retirement, and who have received an honorable discharge, are entitled to monthly pension benefits. The pension amount is equal to \$50 per month for twenty years of creditable service with an additional \$5 per month for each additional year of service, provided that the total pension shall not exceed \$100 per month.

Information regarding the number of participating employers and active members as of June 30, 2008, is as follows (dollars expressed in thousands):

	<u>SCRS</u>	<u>PORS</u>	<u>GARS</u>	<u>JSRS</u>	<u>NGPS</u>
State and school					
Number of employers.....	107	46	1	1	1
Annual covered payroll.....	\$ 5,349,891	\$ 373,839	\$ 3,099	\$ 14,488	N/A ^a
Average number of contributing members....	144,639	10,870	170	144	N/A ^b
Other participating employers					
Number of employers.....	583	293	—	—	—
Annual covered payroll.....	\$ 1,773,063	\$ 620,307	\$ —	\$ —	\$ —
Average number of contributing members....	54,466	16,395	—	—	—

^a Annual covered payroll is not applicable for NGPS because it is a non-contributory plan.

^b Members do not contribute; average number of members is 12,559.

The plans provide retirement, death, and disability benefits to State employees; public school employees; and employees of counties, municipalities, and certain other State political subdivisions. The NGPS provides retirement benefits to members that served in the South Carolina National Guard. Each plan is independent. Assets of each plan may be used only to benefit participants of that plan.

b. Summary of Significant Accounting Policies—Basis of Accounting and Valuation of Investments

The financial statements of the previously-described plans are prepared using the accrual basis of accounting. Employee contributions are recognized in the period in which the contributions are due. Employer contributions to each plan are recognized when due and the employer has made a formal commitment to provide the contributions. Retirement benefits and refund expenses are recognized when due and payable in accordance with the terms of each plan.

Note 1f specifies the method used to value pension trust fund investments.

c. Funding Policies

Article X, Section 16 of the South Carolina Constitution requires that all State-operated retirement plans be funded on a sound actuarial basis. Title 9 of the South Carolina Code of Laws prescribes requirements relating to membership, benefits, and employee/employer contributions for each plan. The following paragraphs summarize those requirements.

By law, employee contribution requirements for the fiscal year ended June 30, 2008, were as follows:

<u>Plan</u>	<u>Rate</u>
SCRS	6.5% of earnable compensation
PORS	6.5% of earnable compensation
GARS	10.0% of earnable compensation
JSRS	10.0% of earnable compensation
NGPS	Non-contributory

Actuarially determined employer contribution rates, expressed as percentages of compensation, for the fiscal year ended June 30, 2008, were as follows:

<u>Plan</u>	<u>Rate</u>
SCRS	9.21%
PORS	10.70%
GARS	78.74%
JSRS	45.09%

The State appropriated \$3.948 million to fund the NGPS actuarially determined employer contribution for the fiscal year ended June 30, 2008.

Under certain conditions, new employers entering the plans are allowed up to ten years to remit matching employer contributions resulting from their employees' purchase of prior service credits. Interest is assessed annually on the unpaid balance. The amounts outstanding at June 30, 2008, were \$577 thousand for SCRS and \$19 thousand for PORS.

State of South Carolina

d. Annual Pension Cost

Annual pension cost (dollars expressed in thousands) and related actuarial data for the State's single-employer defined benefit pension plans were as follows:

	<u>GARS</u>	<u>JSRS</u>	<u>NGPS</u>
Annual pension cost.....	\$2,440	\$7,613	\$3,923
Employer contributions made.....	\$2,440	\$7,613	\$3,948
Actuarial valuation date.....	July 1, 2007	July 1, 2007	July 1, 2007
Actuarial cost method.....	Entry age	Entry age	Entry age
Amortization method.....	Level dollar, closed	Level percent, open	Level dollar, open
Remaining amortization period.....	18 years	28 years	26 years
Asset valuation method.....	5 year smoothed market	5 year smoothed market	5 year smoothed market
Actuarial assumptions:			
Investment rate of return.....	7.25%	7.25%	7.25%
Projected salary increases.....	None	3.25%	None
Assumed inflation rate.....	3.00%	3.00%	3.00%
Assumed cost-of-living adjustments...	None	3.25%	None

The following represents the components of the net pension obligation (NPO) for the NGPS, at June 30, 2008 (expressed in thousands):

	<u>NGPS</u>
Actuarially required contribution (ARC).....	\$ 3,948
Interest on the NPO.....	710
Adjustment to the ARC.....	(961)
Annual pension cost.....	3,697
Contributions made.....	(3,948)
Decrease in NPO.....	(251)
NPO beginning of year.....	6,871
Adjustments to beginning balance.....	2,926
NPO end of year.....	\$ 9,546

e. Trend Information

Trend information indicates the progress made in accumulating sufficient assets to pay benefits when due.

For the cost-sharing multiple-employer defined benefit pension plans in which the State participates, the State's required contributions in dollars (expressed in thousands) and the percentages of those amounts contributed for the three latest available years were as follows. Also see Note 8f for funding status and progress.

	<u>Fiscal Year Ended</u>					
	<u>June 30, 2008</u>		<u>June 30, 2007</u>		<u>June 30, 2006</u>	
	Required	%	Required	%	Required	%
SCRS—State:						
Primary government.....	\$ 246,172	100.0%	\$ 202,865	100.0%	\$ 184,109	100.0%
Component units.....	13,606	100.0%	11,614	100.0%	10,517	100.0%
PORS—State:						
Primary government.....	41,962	100.0%	39,589	100.0%	37,256	100.0%
Component units.....	71	100.0%	72	100.0%	54	100.0%

The following table presents (dollars expressed in thousands) the annual pension cost, percentage of annual pension cost contributed, and the net pension obligation for the three latest available years for the State's single-employer defined benefit plans. Also see Note 8f for funding status and progress:

Plan	Fiscal Year Ended June 30	Annual Pension Cost (APC)	Percentage of APC Contributed	Net Pension Obligation
GARS	2006	\$ 2,171	100.0%	\$ —
	2007	2,358	100.0%	—
	2008	2,440	100.0%	—
JSRS	2006	6,511	100.0%	—
	2007	6,706	100.0%	—
	2008	7,613	100.0%	—
NGPS	2006	2,969	132.8%	9,935
	2007	3,948	130.6%	9,797
	2008	3,923	100.6%	9,546

f. Funding Status and Progress (Unaudited)

The following schedule (dollars expressed in thousands) describes the funding progress for the SCRS and the PORS, cost-sharing multiple-employer defined benefit plans, for the three latest available years:

Plan	Actuarial Valuation Date July 1	Actuarial Value of Assets (a)	Actuarial Accrued Liability (AAL) Entry Age (b)	Unfunded AAL (UAAL) (b-a)	Funded Ratio (a/b)	Covered Payroll (c)	UAAL as a Percentage of Covered Payroll ((b-a)/c)
SCRS	2005	\$ 21,625,510	\$ 30,217,471	\$ 8,591,961	71.6%	\$ 6,356,489	135.2%
	2006	22,293,446	32,018,519	9,725,073	69.6%	6,733,379	144.4%
	2007	23,541,438	33,766,678	10,225,240	69.7%	7,093,181	144.2%
PORS	2005	2,774,606	3,173,930	399,324	87.4%	850,610	46.9%
	2006	2,935,841	3,466,281	530,440	84.7%	931,815	56.9%
	2007	3,160,240	3,730,544	570,304	84.7%	992,849	57.4%

The following schedule (dollars expressed in thousands) describes the funding progress for the State's single-employer defined benefit plans for the three latest available years:

Plan	Actuarial Valuation Date July 1	Actuarial Value of Assets (a)	Actuarial Accrued Liability (AAL) Entry Age (b)	Unfunded AAL (UAAL) (b-a)	Funded Ratio (a/b)	Covered Payroll (c)	UAAL as a Percentage of Covered Payroll ((b-a)/c)
GARS	2005	\$ 46,316	\$ 69,161	\$ 22,845	67.0%	\$ 3,853	592.9%
	2006	46,075	69,734	23,659	66.1%	3,854	613.9%
	2007	46,925	71,014	24,089	66.1%	3,854	625.0%
JSRS	2005	118,888	204,847	85,959	58.0%	15,465	555.8%
	2006	124,837	211,384	86,547	59.1%	15,929	543.3%
	2007	132,990	229,388	96,398	58.0%	16,407	587.5%

Plan	Actuarial Valuation Date	Actuarial Value of Assets (a)	Actuarial Accrued Liability (AAL) Entry Age (b)	Unfunded AAL (UAAL) (b-a)	Funded Ratio (a/b)	Covered Payroll (c)	UAAL as a Percentage of Covered Payroll ((b-a)/c)
NGPS	2005	\$ 12,151	\$ 46,985	\$ 34,834	25.9%	\$ N/A	N/A
	2006	14,046	48,755	34,709	28.8%	N/A	N/A
	2007	15,937	55,917	39,980	28.5%	N/A	N/A

Included among the measurements of long-term funding progress for defined benefit pension plans are whether a plan’s funding ratio is increasing and whether a plan’s unfunded liability (UAAL) as a percentage of covered payroll is decreasing. The tables above present the results of those measurements.

The State records the pension liability for cost of living adjustments (COLAs) in the SCRS and PORS only as COLAs are granted. Accordingly, because COLA benefits are not automatically guaranteed, the plans exclude from their actuarial accrued liability calculations and from their funding formulas the costs of providing future COLA benefits.

While the State Budget and Control Board is annually authorized under certain conditions to defer granting COLAs, the Board historically has granted COLAs, even in years when those conditions permitted a deferral. Plan actuaries have determined that the unfunded liabilities for SCRS and PORS would be significantly higher than amounts presented in the table above if the estimated costs of providing future COLA benefits were included in each plan’s actuarial accrued liability calculation.

g. Receivables and Investments

The principal components of receivables and investments (expressed in thousands) at June 30, 2008, for the plans administered by the South Carolina Retirement Systems were as follows:

	SCRS	PORS	GARS	JSRS	NGPS	Totals
Receivables:						
Contributions.....	\$ 156,756	\$ 17,158	\$ 37	\$ 737	\$ —	\$ 174,688
Employer long-term.....	577	19	—	—	—	596
Accrued interest.....	77,503	10,476	146	423	52	88,600
Unsettled investment sales.....	721,176	96,321	1,358	3,923	486	823,264
Other investment receivables.....	3,923	524	8	21	3	4,479
Total receivables.....	\$ 959,935	\$ 124,498	\$ 1,549	\$ 5,104	\$ 541	\$ 1,091,627
Due from other funds.....	\$ 11,094	\$ 366	\$ 8	\$ —	\$ 175	\$ 11,643
Investments and invested securities lending collateral:						
Short-term securities.....	\$ 89,014	\$ 11,889	\$ 168	\$ 484	\$ 60	\$ 101,615
Debt-domestic.....	5,390,761	727,962	10,140	29,283	3,626	6,161,772
Debt-international.....	3,093,577	413,183	5,827	16,828	2,083	3,531,498
Equity-domestic.....	5,406,024	722,037	10,183	29,406	3,642	6,171,292
Equity-international.....	425,462	56,825	801	2,314	287	485,689
Alternatives.....	7,223,315	964,757	13,605	39,291	4,866	8,245,834
Invested securities lending collateral.....	3,325,439	444,151	6,264	18,089	2,240	3,796,183
Total investments.....	\$ 24,953,592	\$ 3,340,804	\$ 46,988	\$ 135,695	\$ 16,804	\$ 28,493,883

h. Teacher and Employee Retention Incentive Program

The Teacher and Employee Retention Incentive (TERI) program, established by State law, became effective January 1, 2001. The program is a deferred retirement option available to SCRS members eligible for service retirement. Upon entering the TERI program, a member’s status changes from active to retired. A TERI participant agrees to continue employment with an employer participating in the system for a specified period, not to exceed five years.

TERI participants retain the same status and employment rights they held upon entering the program but are not considered active employees for purposes of the group life insurance and disability retirement programs. A TERI retiree’s monthly benefits are accrued and remain in the SCRS trust account during the TERI participation period, but no interest is accrued or paid thereon. Upon termination of employment or at the end of the TERI participation period (whichever is earlier), a retiree may roll over some or all of the accumulated TERI balance into a qualified, tax-sheltered retirement plan and/or receive a lump-sum distribution.

A total of 7,899 members were participating in the TERI program at June 30, 2008. The financial activity of the program (expressed in thousands) during the fiscal year ended June 30, 2008, was as follows:

Beginning balance of TERI trust accounts..	\$	641,750
Additions		219,078
TERI distributions at termination.....		(308,917)
Ending balance of TERI trust accounts	\$	551,911

i. Defined Contribution Plan

As an alternative to membership in SCRS, certain State and public school employees may elect to participate in the State Optional Retirement Program (State ORP). Participants in the State ORP direct the investment of their funds into a plan administered by one of four investment providers. The State assumes no liability for State ORP benefits. Rather, the benefits are the liability of the investment providers and are governed by the terms of the contracts that those providers issue. Accordingly, balances of the State ORP are not reported in the accompanying financial statements.

Under State law, contributions to the State ORP are at the same rates as for the SCRS (see Subsection c, Funding Policies). A direct remittance is required from the employers to the investment providers for the employee contribution (6.5%) and a portion of the employer contribution (5.0%). A direct remittance is also required to the SCRS for a portion of the employer contribution (3.05%) and a group life contribution (0.15%), which is retained by the SCRS. The activity for the State ORP is as follows (expressed in thousands):

Covered payroll.....	\$	854,301
Employee contributions.....		55,530
Employer contributions.....		42,715

NOTE 9: POST-EMPLOYMENT BENEFITS OTHER THAN PENSIONS

a. Plan Description

In accordance with the South Carolina Code of Laws and the annual Appropriations Act, the State provides post-employment health and dental and long-term disability benefits (OPEB plans) to retired State and school district employees and their covered dependents. The OPEB plans have been determined to be cost-sharing multiple-employer defined benefit plans and are administered by the Employee Insurance Program (EIP), a part of the State Budget and Control Board (SBCB). Generally, retirees are eligible for the health and dental benefits if they have established at least ten years of retirement service credit. For new hires May 2, 2008 and after, retirees are eligible for benefits if they have established twenty-five years of service for 100% employer funding and fifteen through twenty-four years of service for 50% employer funding. Benefits become effective when the former employee retires under a State retirement system. Basic long-term disability (BLTD) benefits are provided to active state, public school district and participating local government employees approved for disability.

b. Funding Policies

Sections 1-11-705 and 1-11-710 of the South Carolina Code of Laws of 1976, as amended, requires these post-employment healthcare and long-term disability benefits be funded through annual appropriations by the General Assembly for active employees to the EIP and participating retirees to the SBCB except the portion funded through the pension surcharge and provided from other applicable sources of the EIP for its active employees who are not funded by State General Fund appropriations. Employers participating in the healthcare plan are mandated by State statute to contribute at a rate assessed each year by the Office of the State Budget, 3.42% of annual covered payroll for fiscal year 2007-2008. The EIP sets the employer contribution rate based on a pay-as-you-go basis. The State paid \$36.630 million applicable to the surcharge included with the employer contribution for retirement benefits for the fiscal year ended June 30, 2008. The net estimated OPEB obligation at June 30, 2008 was \$113.604 million. This OPEB obligation is not recorded in the State's financial statements because the State's annual OPEB expense is based on the pay-as-you-go funding level. BLTD benefits are funded through a per person premium charged to State agencies, public school districts, and other participating local governments. The monthly premium per active employee paid to EIP was \$3.23 for the fiscal year ended June 30, 2008.

State of South Carolina

Effective May 1, 2008, the State established two trust funds through Act 195 for the purpose of funding and accounting for the employer costs of retiree health and dental insurance benefits and long-term disability insurance benefits. The South Carolina Retiree Health Insurance Trust Fund (SCRHITF) is primarily funded through the payroll surcharge. Other sources of funding include additional State appropriated dollars (\$63.479 million), accumulated EIP reserves (\$248.726 million), and income generated from investments. The Long Term Disability Insurance Trust Fund (LTDITF) is primarily funded through investment income and employer contributions.

c. Funding Progress

The schedule of funding progress for the OPEB plans based on the most recent actuarial valuation date is as follows (dollar amounts expressed in thousands):

OPEB Plan	Actuarial Valuation Date	Actuarial Value of Assets (a)	Actuarial Accrued Liability (b)	Unfunded Actuarial Accrued Liability (b-a)	Funded Ratio (a/b)	Covered Payroll (c)	UAAL as a Percentage of covered Payroll ((b-a) / c)
SCRHITF	June 30, 2007	\$ —	\$ 8,581,073	\$ 8,581,073	0%	\$ 7,112,053	121%
LTDITF	June 30, 2007	\$ —	\$ 28,048	\$ 28,048	0%	\$ 7,781,719	< 1%

Complete financial statements for the OPEB plans and the trust funds may be obtained by writing to:

Employee Insurance Program
1201 Main Street, Suite 360
Columbia, SC 29201.

d. Receivables and Investments

The principal components of receivables and investments (expressed in thousands) at June 30, 2008, for the OPEB plans administered by the Employee Insurance Program were as follows:

	SCRHI	LTDI	Totals
Accrued interest receivable.....	\$ 586	\$ 99	\$ 685
Due from other funds.....	\$ 36,630	\$ —	\$ 36,630
Investments and invested securities lending collateral:			
Debt-domestic	\$ 122,950	\$ 19,916	\$ 142,866
Financial and Other	2,023	2,286	4,309
Invested securities lending collateral.....	2,041	602	2,643
Total investments.....	\$ 127,014	\$ 22,804	\$ 149,818

NOTE 10: INSURANCE ACTIVITIES

a. Insurance Reserve Fund

The State generally does not purchase commercial insurance for the risks of losses for property damage, including theft of, damage to, and destruction of assets; automobile liability; tort liability; and medical professional liability. Instead, State management believes it is more economical to manage its risks internally and set aside assets for claim settlement in its Insurance Reserve Fund (IRF), within the internal service funds. The IRF services claims for risk of loss to which the State is exposed, including the following: property insurance on government owned buildings, the contents of such buildings, equipment, and automobiles; automobile liability insurance on government owned vehicles and school buses; tort liability insurance for government premises and operations; and medical professional liability for hospitals. Although the State is the predominant participant in the IRF, county and municipal governments, school districts and special purpose political subdivisions also participate. The IRF allocates the cost of providing claims servicing and claims payment by charging each participant an actuarially determined "premium."

The IRF reports liabilities when it is probable that a loss has occurred and the amount of that loss can be reasonably estimated. Amounts for allocated and unallocated claims adjustment expenses have been included in the calculation of the

unpaid claims liability. The liability is reported net of receivables for salvage, subrogation, and reinsurance. The unpaid policy claims liability of \$215.902 million at June 30, 2008, includes a provision for claims in the process of review and for claims incurred but not reported. The liability for claims incurred but not reported is an actuarial estimate based on the most current historical claims experience of previous payments, changes in number of members and participants, inflation, and award trends. This process does not necessarily result in an exact amount. The IRF continually reviews estimates of liabilities for incurred claims and revises those estimates as changes occur. The current year's operating statement reflects the revisions.

Changes in the balances of claims liabilities during the past two years were as follows (expressed in thousands):

Fiscal Year Ended June 30	Beginning-of Fiscal-Year Liability	Current-Year Claims and Changes in Estimates	Claim Payments	Balance at Fiscal Year-End
2007	\$ 214,651	\$ 20,518	\$ (33,986)	\$ 201,183
2008	201,183	45,737	(31,018)	215,902

The IRF purchases aircraft and ocean marine insurance, areas in which the IRF has limited expertise. The IRF also purchases reinsurance to limit losses in the areas of property, boiler and machinery, and automobile liability. The IRF purchases reinsurance for catastrophic losses in the area of property insurance for losses above \$2.000 million per location and \$10.000 million per occurrence. Reinsurance permits partial recovery of losses from reinsurers; but the IRF, as direct insurer of the risks, remains primarily liable.

b. Employee Insurance Programs Fund

State law established the Employee Insurance Programs Fund, part of the State's internal service funds, to provide health and dental insurance coverage for eligible employees and retirees of State agencies and school districts and to provide group life and long-term disability insurance coverage to eligible active State and public school employees. The State, the predominant participant, retains the risk of loss. Under the health insurance program, participants elect coverage through either self-insured health maintenance organizations (HMO) or State self-insured plans. All dental, group life, and long-term disability coverages are provided through the State's self-insured plans. State funds and payroll deductions pay health and dental premiums for eligible State and public school employees. Agencies and school districts pay the employer share of premiums for retirees. Retirees directly pay their own share of premiums. Agencies and school districts pay the premiums for group life and long-term disability for their employees.

Effective May 2008, Basic Long-Term Disability premiums were transferred to the Long-Term Disability Insurance Trust Fund in accordance with Act 195. Basic Long-Term Disability claims are transferred each month out of this trust. The outstanding liability (claims payable) for Basic Long-Term Disability has been eliminated from the Fund's financial reporting. Also effective May 2008, in accordance with Act 195, the Fund began transferring the employer portion of retiree premiums for health and dental insurance from the South Carolina Retiree Health Insurance Trust Fund for claims payment.

The Employee Insurance Programs Fund establishes claims liabilities when information before the issuance of the financial statements indicates that a liability is probable and estimable at the date of the financial statements. The calculation of the unpaid claims liability includes amounts for allocated and unallocated claims adjustment expenses. The unpaid policy claims liability of \$184.593 million at June 30, 2008, includes a provision for claims in the process of review and for claims incurred but not reported. The Fund actuarially estimates the liability for claims incurred but not reported based on the most current historical claims experience of previous payments, changes in number of members and participants, inflation, award trends, and estimates of health care trend changes (cost, utilization, and intensity of services). This process does not necessarily result in an exact amount. The Fund continually reviews estimates of liabilities for incurred claims and revises those estimates as changes occur. The current year's operating statement reflects the revisions.

Of the total claims liability reported for the Employee Insurance Programs Fund at June 30, 2008, \$8.646 million relates to the HMO self-insured managed care plan liability. The State does not discount its claims liabilities for health and dental insurance coverage to present value.

Changes in the balances of claims liabilities during the past two years were as follows (expressed in thousands):

Fiscal Year Ended June 30	Beginning-of Fiscal-Year Liability	Current-Year Claims and Changes in Estimates	Claim Payments	Balance at Fiscal Year-End
2007	\$ 193,760	\$ 1,329,600	\$ (1,324,582)	\$ 198,778
2008	198,778	1,420,653	(1,434,838)	184,593

c. State Accident Fund

State law established the State Accident Fund (the Fund), an internal service fund, to provide workers' compensation insurance coverage to State entities. Although the State is the Fund's predominant participant, counties, municipalities, and other political subdivisions of the State may also elect to participate. The State assumes the full risk for workers' compensation claims.

The Fund investigates, adjusts, and pays workers' compensation claims as awarded by the Workers' Compensation Commission for job-related accidental injury, disease, or death to covered individuals. The Fund annually bills participating entities for estimated premiums based on the entity's estimated payroll. After the policy period ends, policyholders submit the details of the actual salaries paid. The Fund then adjusts the premium using the actual payroll data and a rating modifier based on claims experience.

The Fund establishes claims liabilities based on estimates of the ultimate cost of claims that have been reported but not settled, and of claims that have been incurred but not reported. The claims liabilities include specific incremental claims adjustment expenses but not administrative expenses. The Fund deducts reasonably estimable amounts of salvage and subrogation and reinsurance recoverable, if any, on both settled and unsettled claims from the liability for unpaid claims. The Fund periodically recomputes claims liabilities using a variety of actuarial and statistical techniques to produce current estimates. The Fund charges or credits expense in the period when it adjusts claims liabilities. At June 30, 2008, the Fund's policy claims liability was \$188.810 million. Policy claims in the financial statements include the liabilities for claims reported but not yet paid and for claims incurred but not reported. Because actual claims costs depend on such complex factors as inflation, changes in legal doctrines, and damage awards, computation of the claims liability does not necessarily result in an exact amount.

Changes in the balances of claims liabilities during the past two years were as follows (expressed in thousands):

Fiscal Year Ended June 30	Beginning-of Fiscal-Year Liability	Current-Year Claims and Changes in Estimates	Claim Payments	Balance at Fiscal Year-End
2007	\$ 127,509	\$ 81,970	\$ (50,287)	\$ 159,192
2008	159,192	80,460	(50,842)	188,810

The Fund has entered into a reinsurance agreement to reduce its exposure to catastrophic losses on insured events. Losses in excess of \$1.000 million are covered up to limits of statutory liability; the Fund retains the risk for the first \$1.000 million of loss. Reinsurance reduces the Fund's exposure to losses on insured events related to State-owned aircraft in excess of \$1.000 million per occurrence up to a limit of \$9.000 million. Reinsurance permits partial recovery of losses from reinsurers; but the Fund, as direct insurer of the risks, remains primarily liable.

d. Patients' Compensation Fund and Medical Malpractice Liability Insurance Joint Underwriting Association

The South Carolina Medical Malpractice Patients' Compensation Fund (PCF) and the South Carolina Medical Malpractice Liability Insurance Joint Underwriting Association (JUA) were created by State law. The PCF is accounted for as a nonmajor enterprise fund, and the JUA is a nonmajor discretely presented component unit of the State. The State accounts for the PCF and the JUA as insurance enterprises because they primarily cover non-governmental entities. Accordingly, the PCF and JUA follow the guidance of FASB Statement 60, *Accounting and Reporting by Insurance Enterprises*, and collectively are referred to below as "the insurance enterprises."

The JUA is responsible for payment of that portion of any covered entity's medical malpractice claim, settlement, or judgment up to \$200 thousand per incident or \$600 thousand in the aggregate for one year. The PCF is responsible for payments exceeding these thresholds. In the event that the PCF incurs a liability exceeding \$200 thousand to any person under a single occurrence, the PCF may ultimately pay the claim in full, but it generally may not pay more than \$200 thousand per year on such claim unless agreed to by the PCF's Board of Governors to avoid payment of interest.

Licensed health care providers include physicians and surgeons, directors, officers and trustees of hospitals, nurses, oral surgeons, dentists, pharmacists, chiropractors, hospitals, nursing homes, and any similar category of licensed health care providers. All providers licensed in South Carolina are eligible to participate upon remittance of the annual assessment fees.

The State actuarially establishes claims liabilities for the insurance enterprises based on estimates of the ultimate cost of claims that have been reported but not settled, and of claims that have been incurred but not reported. The policy claims liabilities were \$182.368 million for the PCF at June 30, 2008, and \$196.995 million for the JUA at December 31, 2007, and these amounts include a provision for claims reported but not settled and for claims incurred but not reported. Amounts for claims adjustment expenses, when applicable, have been included in the calculation of the unpaid claims liabilities of the insurance enterprises. The enterprises charge or credit expense, as appropriate, in the period when they adjust claims liabilities. The length of time for which claims costs must be estimated varies depending on the coverage involved. Because actual claims costs depend on such complex factors as medical technology, changes in doctrines of legal liability, and

damage awards, the process for computing claims liabilities does not necessarily result in an exact amount. The insurance enterprises and their actuaries recompute claims liabilities annually, using a variety of actuarial and statistical techniques, to produce current estimates that reflect recent settlements, claims frequency, and other economic and social factors. A provision for inflation in the calculation of estimated future claims costs is implicit because the insurance enterprises and their actuaries rely both on actual historical data that reflect past inflation and on other factors that are considered to be appropriate modifiers of past experience.

e. Second Injury Fund

The State accounts for the South Carolina Second Injury Fund, a nonmajor enterprise fund, as a public benefit program rather than an insurance program primarily because its participants—workers’ compensation insurance carriers and self-insured employers—do not transfer their risk to the Fund. The Fund services claims in cases where an individual with a preexisting permanent physical impairment incurs a subsequent disability from injury or accident arising out of and in the course of employment. Participants of the Fund, rather than the State, are ultimately responsible for these liabilities.

The Fund collects and invests assessments received from its participants and pays claims on behalf of its participants to the extent that Fund resources are available to pay such claims. The Fund reports these activities in its statement of cash flows. In accordance with accounting principles used by claims processors, the Fund reports as revenue only that portion of assessments and interest earnings intended to cover the Fund’s administrative costs, including capital costs. Likewise, the Fund records no claims expense, and it records claims liabilities only to the extent that Fund assets are available to pay such claims.

Per Section 42-7-200(a) of the South Carolina Code of Laws of 1976, as amended, the Second Injury Fund is responsible for administering the Workers’ Compensation Uninsured Employers’ Fund. The State reports the Workers’ Compensation Uninsured Employers’ Fund in its Other Special Revenue Fund. The Fund issues payment of awards of workers’ compensation benefits, which are unpaid because of employers who fail to acquire necessary coverage for employees. Funding for payment of awards is provided from collections of the tax on insurance carriers and self-insured persons in an amount sufficient to maintain the fund. The policy claims liability reported on the government-wide statement of net assets at June 30, 2008, was \$28.148 million.

f. Discretely Presented Component Unit—Public Service Authority (Santee Cooper)

The Public Service Authority (Santee Cooper), a major discretely presented component unit with a fiscal year ended December 31, is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; business interruption; and errors and omissions. The Authority purchases commercial insurance to cover these risks. Settled claims resulting from these risks have not exceeded commercial insurance coverage in any of the past three years. Policies are subject to deductibles ranging from \$250 to \$1.000 million with the exception of named storm losses, which carry deductibles from \$1.000 million up to \$5.000 million. In addition, a \$1.400 million self-insured layer exists between the Authority’s primary and excess liability policies.

The Authority self-insures its risks related to auto, dental, and environmental incidents that do not arise out of an insured event. Automotive exposure is up to \$2.000 million per incident. Risk exposure for the dental plan is limited by plan provisions. There have not been any third-party claims for environmental damages for calendar year 2007.

The State reports all of the Authority’s risk management activities within the Public Service Authority’s accounts. The State reports the Authority’s claims expenses and liabilities when it is probable that a loss has occurred and the amount of the loss is reasonably estimable.

At December 31, 2007, the policy claims liabilities were \$2.140 million. Changes in the reported liability in each of the past two years were as follows (expressed in thousands):

Fiscal Year Ended December 31	Beginning-of Fiscal-Year Liability	Current-Year Claims and Changes in Estimates	Claim Payments	Balance at Fiscal Year-End
2006	\$ 2,597	\$ 1,375	\$ (1,570)	\$ 2,402
2007	2,402	2,360	(2,622)	2,140

NOTE 11: LEASES

a. Lease Commitments

The State leases land, office facilities, equipment, and other assets under both capital and operating leases. The present value of future minimum capital lease payments and total minimum annual lease payments for capital leases recorded in the government-wide statement of net assets at June 30, 2008 for the primary government and the State's discretely presented component units were as follows (expressed in thousands):

<u>Fiscal Year Ending June 30</u>	Governmental Activities	Business- type Activities	Totals
2009	\$ 361	\$ 10,893	\$ 11,254
2010	252	9,131	9,383
2011	174	5,448	5,622
2012	169	4,261	4,430
2013	21	3,604	3,625
2014-2018	—	17,329	17,329
2019-2023	—	7,207	7,207
2024-2028	—	2,197	2,197
Total minimum payments.....	977	60,070	61,047
Less: interest and executory costs.....	(305)	(12,022)	(12,327)
Present value of net minimum payments.....	\$ 672	\$ 48,048	\$ 48,720

<u>Fiscal Year Ending December 31</u>	Public Service Authority
2008	\$ 3,038
2009	2,737
2010	1,934
2011	1,610
2012	1,343
2013-2016	1,276
Total minimum payments.....	11,938
Less: interest and executory costs.....	(1,540)
Present value of net minimum payments.....	\$ 10,398

The present value of future minimum capital lease payments for the State Ports Authority is \$15 thousand at June 30, 2008. The payments are due next fiscal year.

Assets under capital leases recorded in the accompanying government-wide statement of net assets at June 30, 2008, were as follows (expressed in thousands):

Assets Acquired Under Capital Leases	Primary Government			Component Units	
	Governmental Activities	Business-type Activities	Totals	Public Service Authority	State Ports Authority
Land and non-depreciable improvements.....	\$ —	\$ 9,497	\$ 9,497	\$ —	\$ —
Buildings and improvements.....	1,309	80,675	81,984	89,400	—

Works of art and historical treasures.....	—	330	330	—	—
Assets acquired under capital leases before accumulated amortization.....	2,430	124,586	127,016	89,400	185
Less: accumulated amortization.....	(782)	(43,069)	(43,851)	(84,400)	(178)
Assets acquired under capital leases, net.....	\$ 1,648	\$ 81,517	\$ 83,165	\$ 5,000	\$ 7

For the primary government’s fiscal year ended June 30, 2008, minimum rental payments under operating leases were \$48.515 million and contingent rental payments were \$5.208 million. The State’s contingent rental payments are for copiers, with expense being determined on a cost-per-copy basis.

For the Public Service Authority, a major discretely presented component unit, minimum rental payments under operating leases for the fiscal year totaled \$7.600 million. For the State Ports Authority, a major discretely presented component unit, minimum rental payments under operating leases for the fiscal year totaled \$1.106 million. For the Lottery Commission, a major discretely presented component unit, minimum rental payments under operating leases for the fiscal year totaled \$873 thousand.

At June 30, 2008, future minimum payments under noncancelable operating leases with remaining terms in excess of one year were as follows (expressed in thousands):

Fiscal Year Ending June 30	Primary Government	Component Unit Lottery Commission
	2009	\$ 53,427
2010	47,863	765
2011	38,712	768
2012	27,807	706
2013	19,897	635
2014-2018	32,888	1,842
2019-2023	10,160	—
2024-2028	2,678	—
2029-2033	514	—
2034-2038	500	—
Total minimum payments.....	\$ 234,446	\$ 5,463

Fiscal Year Ending December 31	Public Service Authority
2008	\$ 4,800
2009	297
Total minimum payments.....	\$ 5,097

b. Facilities Leased to Others

At June 30, 2008, the State Ports Authority, a major discretely presented component unit, had leased to non-State parties certain land and facilities having a cost of approximately \$542.289 million and related accumulated depreciation of \$228.056 million. Future minimum rental payments to be received at June 30, 2008, under these operating leases were as follows (expressed in thousands):

<u>Fiscal Year Ending June 30</u>	<u>State Ports Authority</u>
2009	\$ 52,516
2010	41,957
2011	22,581
2012	7,114
2013	683
2014-2018	1,885
2019-2023	744
2024-2028	500
2029-2033	500
2034-2037	117
Total.....	\$ 128,597

NOTE 12: BONDS AND NOTES PAYABLE

a. General Obligation Bonds

General obligation bonds are backed by the full faith, credit, and taxing power of the State. General obligation bonds (expressed in thousands) outstanding at June 30, 2008, were:

Governmental Activities	
Capital improvement bonds, 2.50% to 5.90%, maturing serially through 2019.....	\$ 514,410
State highway bonds, 2.25% to 5.00%, maturing serially through 2023.....	622,145
State school facilities bonds, 3.00% to 5.75%, maturing serially through 2018.....	476,498
Infrastructure Bank bonds, 3.00% to 5.00%, maturing through 2028.....	53,742
State economic development bonds, 1.00% to 6.75%, maturing serially through 2031.....	217,449
Research university infrastructure bonds, 3.00% to 6.25%, maturing serially through 2021.....	132,708
Subtotal—governmental activities.....	2,016,952
Business-type Activities, Higher Education Fund	
State institution bonds, 2.50% to 6.00%, maturing serially through 2028.....	351,481
Total—general obligation bonds payable.....	\$ 2,368,433

At June 30, 2008, \$6.344 million of capital improvement bonds, \$42.185 million of State economic development bonds, and \$69.390 million of State research university infrastructure bonds were authorized but unissued.

At June 30, 2008, future debt service requirements (expressed in thousands) for general obligation bonds were:

Year Ending June 30	Governmental Activities		Business-type Activities (Higher Education Fund)	
	Principal	Interest	Principal	Interest
2009	\$ 204,698	\$ 88,593	\$ 19,860	\$ 14,929
2010	187,501	79,197	19,810	14,162
2011	184,485	70,409	20,410	13,309
2012	175,205	61,765	20,970	12,418
2013	181,120	53,487	21,855	11,525
2014-2018	763,635	152,197	115,845	42,443
2019-2023	267,100	31,339	88,840	18,902
2024-2028	35,575	5,836	44,180	3,711
2029-2031	10,630	538	—	—
Total debt service requirements.....	2,009,949	\$ 543,361	351,770	\$ 131,399
Unamortized premiums.....	14,507		655	
Deferred amount on refunding...	(7,504)		(944)	
Total principal outstanding.....	\$ 2,016,952		\$ 351,481	

The Department of Transportation Special Revenue Fund, a major governmental fund, pays the debt service for the State highway bonds. The Local Government Infrastructure Fund, a major governmental fund, pays the debt service for the Infrastructure Bank bonds. The General Fund pays the debt service for the other general obligation bonds recorded for governmental activities. The Higher Education Fund, a major enterprise fund, pays the debt service for general obligation bonds recorded in that fund.

Rather than directly limiting the amount of outstanding general obligation debt, State law imposes a limitation on annual debt service expenditures. The legal annual debt service margin at June 30, 2008, was \$29.277 million in total for all institution bonds, \$30.087 million for highway bonds, \$176.033 million for general obligation bonds excluding institution and highway bonds, \$11.901 million for economic development bonds, and \$19.353 million for research university infrastructure bonds. South Carolina State University exceeded its legal debt service limit on its State institution bonds by approximately \$530 thousand at June 30, 2008. The University will adjust tuition fees in subsequent years to cover the debt requirement.

b. Limited Obligation Bonds

Limited obligation bonds are not backed by the full faith, credit, and taxing power of the State. Limited obligation bonds outstanding at June 30, 2008, which are reported in the internal service funds, totaled \$9.352 million and mature serially through 2016. Interest rates on these bonds ranged from 4.10% to 6.10%.

At June 30, 2008, there were no limited obligation bonds authorized but unissued.

The State issued limited obligation lease revenue bonds to finance the cost of capital facilities for use by certain State agencies. Pledges of lease rental payments that the agencies will pay from their governmental funds secure the bonds.

At June 30, 2008, future debt service requirements (expressed in thousands) for limited obligation bonds were:

Year Ending June 30	Governmental Activities (Internal Service Funds)	
	Principal	Interest
2009	\$ 1,730	\$ 465
2010	1,200	384
2011	1,280	322
2012	1,345	256
2013	1,420	185
2014-2016	2,415	151
Total debt service requirements.....	9,390	\$ 1,763
Unamortized discounts.....	(38)	
Total principal outstanding.....	\$ 9,352	

The internal service funds pay all debt service for the lease revenue bonds.

c. Revenue, Tobacco Authority, Infrastructure Bank, and Other Bonds and Notes

Revenue debt is not backed by the full faith, credit, and taxing power of the State. Revenue, Tobacco Settlement Revenue Management Authority (Tobacco Authority), Infrastructure Bank, and other bonds and notes (expressed in thousands) outstanding at June 30, 2008, were:

	<u>Bonds</u>	<u>Notes</u>
Primary Government:		
Governmental Activities:		
Infrastructure Bank bonds, 3.00% to 6.00%, maturing serially through 2037.....	\$ 2,125,640	\$ —
Tobacco Authority bonds, 5.00%, maturing serially through 2018.....	242,891	—
Heritage Trust Revenue bonds, 4.00% to 4.25%, maturing in 2022.....	19,317	—
Education Department note, 4.01%, maturing in 2011.....	—	416
Corrections Department note, 3.34%, maturing in 2009.....	—	194
Probation Parole and Pardon Department note, 4.04%, maturing in 2012.....	—	193
Budget and Control Board bond and notes, 3.70% to 5.00%, maturing through 2018.....	19,281	19,559
Totals—governmental activities.....	<u>2,407,129</u>	<u>20,362</u>
Business-type Activities:		
Higher Education Fund bonds and notes, 2.00% to 7.75%, maturing serially through 2035.....	669,777	105,409
Housing Authority Fund bonds and note, 2.60% to 8.30%, maturing serially through 2043.....	762,141	50,000
Medical University Hospital Authority bonds and notes, 3.92% to 5.38%, maturing through 2033.....	470,791	63,414
Education Assistance Authority Fund bonds, 2.60% to 8.30%, maturing serially through 2026.....	1,010,243	—
Nonmajor enterprise funds:		
Nonmajor enterprise fund bonds and notes, 2.45% to 7.50%, maturing through 2025.....	15,689	37,883
Direct note obligations, 5.82% to 6.82%, maturing serially through 2027.....	—	84,303
Totals—business-type activities.....	<u>2,928,641</u>	<u>341,009</u>
Totals—primary government.....	<u>\$ 5,335,770</u>	<u>\$ 361,371</u>
Major Discretely Presented Component Units:		
Public Service Authority bonds, 3.25% to 7.42%, maturing serially through 2039.....	<u>\$ 3,443,485</u>	<u>\$ —</u>
State Ports Authority bonds and notes, 2.47% to 7.42%, maturing serially through 2028.....	<u>\$ 130,823</u>	<u>\$ 1,984</u>
Connector 2000 Association, Inc. bonds, 5.25% to 6.30%, maturing serially through 2038.....	<u>\$ 303,099</u>	<u>\$ —</u>

During a prior fiscal year, the Transportation Infrastructure Bank, reported in the Local Government Infrastructure Fund, a major governmental fund, entered into interest rate exchange agreements with a termination date of October 1, 2031, to enhance savings and offset changes in tax-exempt variable interest rates on certain revenue bonds. On June 18, 2008, the Bank exercised the option to modify the interest rate exchange. Related to this, the Bank received a total of \$7.599 million from two different financial institutions and paid the same amount to another financial institution. The Bank incurred expense of \$650 thousand related to the exercise of this option, which has been capitalized as bond issuance costs. Under these variable-to-fixed interest rate exchanges, for the 2003B-1 and 2003B-3 agreements, the Bank pays a 3.86% fixed rate on a notional amount, having an amortization schedule equal to that of the revenue bonds. For the 2003B-2 agreement, the Bank pays a 3.93% fixed rate on a notional amount, having an amortization schedule equal to that of the revenue bond. In return, the counterparties of the agreement pay the Bank a variable rate equal to 67.0% of the one-month London Interbank Offered Rate on such notional amount. For the fiscal year ended June 30, 2008, the Bank made variable bond interest payments of \$15.091 million and fixed rate payments on the exchange agreement of \$15.991 million. The Bank received variable swap payments on the exchange agreement of \$12.084 million. The June 30, 2008, mark to market value of this swap was negative \$28.997 million.

University Medical Associates of the Medical University of South Carolina (UMA) is a blended component unit and nonmajor enterprise fund. UMA has issued several direct note obligations, select auction variable rate securities. In prior years, UMA entered into interest-rate swap agreements to modify interest rates on a portion of its Series 1994, and all of the 1999A and 1999B direct note obligations in an effort to convert its variable-rate debt to a fixed rate of 6.82% on the 1994 and 1999A obligations, and 5.82% on the 1999B obligations. These agreements were required by MBIA, the municipal bond insurance company, at a time when UMA was experiencing operating losses. The note obligations and related swap agreements mature on May 15, 2024, for the 1994 and 1999A portions and May 15, 2027, for the 1999B portion. The notional amounts as of June 30, 2008, are as follows: Series 1994 obligations—\$8.450 million; Series 1999A obligations—\$32.400 million; and Series 1999B obligations—\$38.300 million. These amounts agree to the principal outstanding under the various issues except Series 1994, which has outstanding principal of \$9.700 million. Under the swap agreements, originally UMA paid the counterparty a fixed interest payment of 6.82% on the 1994 and 1999A obligations, and 5.82% on the 1999B obligations, and received a variable payment based upon the auction rate every thirty-five days. On June 19, 2008, MBIA was downgraded by the various rating agencies which triggered a change in the swap agreements that now use the Securities Industry and Financial Markets Association (SIFMA) rate to determine the payments to UMA. The variable rates in effect at June 30, 2008, were 1.50% for the 1994 and the 1999A obligations, and 1.47% for the 1999B obligations. UMA is considering alternatives to the existing swap arrangements to reduce its future interest costs. On May 1, 2000, these swap agreements were amended to mitigate adverse income tax consequences to the counterparty should certain triggering events occur in the future, resulting in a payment to UMA of \$1.850 million for the remaining life of the agreements. UMA has recorded this amount in deferred revenue and is amortizing it as a reduction of interest expense over the terms of the related obligations on the straight-line method. For the fiscal year ended June 30, 2008, interest expense was reduced by amortization of approximately \$77 thousand. Interest rates have declined since execution of the swap agreements resulting in the swaps having negative fair values of approximately \$2.128 million on the 1994 obligations, \$7.838 million on the 1999A obligations, and \$6.914 million for the 1999B obligations as of June 30, 2008. The fair value was estimated using the zero-coupon method. UMA will be exposed to the risk of fluctuating interest rates of the variable-rate debt agreements if the swap agreements are terminated.

In a prior year, the Medical University Facilities Corporation, a blended component unit and nonmajor enterprise fund, entered into an interest-rate swap agreement to hedge its interest-rate exposure and establish a fixed-rate payment in connection with a \$13.500 million loan. The swap agreement provides that the Corporation will pay the swap provider interest on a notional amount equal to the aggregate principal amount of the loan at a fixed rate of 3.37%, and the swap provider will pay the Corporation a variable rate of interest on such notional amount in an amount sufficient to pay the variable rate of interest on the loan. The notional amount at June 30, 2008, was \$8.210 million, and the variable rate in effect at that date was 1.50%. The swap agreement provides that the notional amount will be reduced in the same amount and at the same time the principal of the note is scheduled to be paid upon redemption or maturity. The loan and the related swap agreement mature on January 1, 2013. As of June 30, 2008, the swap had a negative fair value of approximately \$74 thousand. Termination of the agreement would subject the Corporation to the risk of fluctuating interest rates.

In December 2005, the State Ports Authority, a major discretely presented component unit, entered into two interest swap contracts intended to manage interest expense of fixed-rate debt. The contracts provide that the Authority will pay the swap provider interest on a notional amount at a fixed rate of 3.67%, and the swap provider will pay the Authority at a rate based on 70% of the one-month London Interbank Offered Rate on such notional amount. The notional amounts at June 30, 2008 were \$61.443 million and \$26.333 million. The payments begin August 1, 2008 and continue until the contracts expire on July 1, 2026. In June 2008, the Authority entered into a third interest swap contract intended to manage interest expense and offset the effects of the interest rate swaps entered into in 2005. The contracts provide that the Authority will pay the swap provider interest on a notional amount at a variable rate equal to the SIFMA Municipal Swap Index rate beginning on August 1, 2008 and the first day of each succeeding month up to and including July 1, 2026, when the contract expires. The swap provider will pay the Authority at a fixed rate of 3.51%. The notional amount under the new swap agreement is \$87.775 million at June 30, 2008. As of June 30, 2008, the swaps have fair values of approximately negative \$3.915 million. The unrealized loss related to these agreements recorded at June 30, 2008 is \$6.036 million and is included in interest expense.

As of June 30, 2008, debt service requirements of the UMA and the Corporation variable rate debt and net swap payments (expressed in thousands), assuming current interest rates remain the same for their term, were as follows:

Year Ending June 30	Variable Rate Notes		Interest Rate	Totals
	Principal	Interest	Swaps, Net	
2009	\$ 4,045	\$ 3,768	\$ 3,968	\$ 11,781

2024-2027	16,200	1,586	1,451	19,237
Totals.....	\$ 87,360	\$ 39,621	\$ 41,039	\$ 168,020

Certain revenue bonds require the individual business-type activities to provide sufficient revenue to pay debt service and to fund all necessary expenses of the activities. The funds that receive the proceeds of revenue, Tobacco Authority, Infrastructure Bank, and other bonds and notes have pledged revenues for payment of debt service as follows:

Primary Government:

Governmental Activities:

Infrastructure Bank bonds: Infrastructure Bank revenues recorded in the Local Government Infrastructure Fund, a major governmental fund

Tobacco Authority bonds: tobacco settlement revenues recorded in the nonmajor governmental funds

Heritage Trust bonds: revenues derived from portion of State Deed Recording Fee dedicated to the Heritage Land Trust Fund

Corrections Department note: farm facility revenues

Budget and Control Board bonds: loan repayments

Business-type Activities:

Higher education bonds and notes: various specific higher education revenues

State Housing Authority bonds and note: revenues of the Housing Authority Fund, a major enterprise fund

Education Assistance Authority bonds: loan repayments and United States Commissioner of Education funds in the Education Assistance Authority Fund, a major enterprise fund

Major Discretely Presented Component Units:

Public Service Authority bonds: Public Service Authority revenues

State Ports Authority bonds: State Ports Authority revenues

Connector 2000 Association, Inc. bonds: toll revenues

For its business-type activities, the State separately identifies amounts of pledged revenues available at June 30, 2008, in the statement of revenues, expenses, and changes in fund net assets for proprietary funds.

At June 30, 2008, future debt service requirements (expressed in thousands) for revenue, Tobacco Authority, Infrastructure Bank, and other bonds and notes of the primary government were as follows:

Year Ending June 30	Primary Government			
	Governmental Activities		Business-type Activities	
	Principal	Interest	Principal	Interest
2009	\$ 71,759	\$ 113,922	\$ 134,531	\$ 158,648

The fiscal year for the Public Service Authority ends December 31 while the fiscal year for the State Ports Authority ends June 30. Both entities are major discretely presented component units. At December 31, 2007, the carrying value of the Public Service Authority's debt was \$3.529 billion while the fair value was approximately \$4.000 billion. At June 30, 2008,

the carrying value of the State Ports Authority debt was \$132.174 million while the fair value was approximately \$125.637 million. The fair values were estimated using current rates available to the entities for similar borrowing arrangements and on the market rate of comparable traded debt.

At June 30, 2008, future debt service requirements (expressed in thousands) for bonds and notes of the State's major discretely presented component units were as follows:

Year Ending December 31	Public Service Authority		Connector 2000 Assoc.	
	Principal	Interest	Principal	Interest
2008	\$ 101,695	\$ 170,500	\$ 6,200	\$ 3,508

Borrowing is essential to the continuation of programs associated with certain entities reported within the primary government's governmental activities. The primary government reported interest expense during the fiscal year ended June 30, 2008, in governmental functions for these entities as follows (expressed in thousands):

	Amount
General government.....	\$ 42,646
Transportation.....	155,351
Total allocated interest expense..	\$ 197,997

The amount shown above in the general government function relates to bonds that a blended component unit issued.

d. Bond Anticipation Notes

At June 30, 2008, \$30.000 million in short-term general obligation bond anticipation notes were outstanding in the Higher Education Fund, a major enterprise fund. These notes are due on or before June 30, 2009.

e. Defeased Bonds

On June 26, 2008, the Tobacco Settlement Revenue Management Authority, a non-major governmental fund, defeased a portion of the outstanding principal amount of its Series 2001 bonds by depositing a portion of the proceeds of \$275.730 million Tobacco Settlement Revenue Asset-Backed Refunding Bonds, Series 2008, together with other available funds, with a trustee pursuant to the terms of an irrevocable escrow agreement. Other available funds consisted of a portion of a transfer of \$469.408 million from the Tobacco Settlement Fund, a major governmental fund. As a result of the escrow deposit, \$575.225 million of the Series 2001 bonds are considered to be defeased. The liability for those bonds has been removed from the government-wide statement of net assets. The advance refunding resulted in a difference between the reacquisition price and the net carrying amount of the debt of \$62.500 million. In conjunction with the defeasance described above and the transfer of funds from the Tobacco Settlement Fund, on June 26, 2008, the Authority purchased and retired \$152.430 million principal amount of the Series 2001 bonds maturing on May 15, 2028, at a cost of \$169.500 million. The purpose of the defeasance was to achieve overall economic benefit by reducing the interest cost of the Authority’s debt; shorten the term of the bonds, thereby repatriating the MSA payments for use by the State by an estimated seven years; and restructure the bond covenants to promote flexibility in dealing with tobacco manufacturers over disputed payments. As a result, the Authority expects to reduce its total debt service payments over the next eleven years by approximately \$445.100 million and expects to realize an associated economic loss of approximately \$51.500 million. Principal payments made in 2008 (other than the defeasance noted above) were paid with Turbo Redemptions in prior years. These Turbo Redemptions amounted to \$42.100 million for the fiscal year ended June 30, 2008.

During its fiscal year ended December 31, 2007, the Public Service Authority, a major discretely presented component unit, issued \$98.000 million in refunding revenue bonds with an average interest rate of 4.92% to refund \$105.370 million in revenue bonds with an average interest rate of 5.00%. The refunding resulted in a difference between the reacquisition price and the net carrying amount of the old debt of \$8.832 million. This difference, reported in the accompanying financial statements as a deduction from bonds payable, is being charged to operations through the year 2018 using the effective-interest method. The bonds were refunded to reduce total debt service payments over the next 15 years by approximately \$11.500 million and to obtain an economic gain of approximately \$5.600 million.

For all defeasances involving advance refundings in the current and prior years, the securities purchased were deposited in an irrevocable trust with an escrow agent to provide for all future debt service payments on the old bonds. Accordingly, the State has not recorded the defeased bonds in the accompanying financial statements. At June 30, 2008, the following outstanding bonds of the primary government (expressed in thousands) were considered defeased:

	Governmental Activities	Business- type Activities	Totals— Primary Government
Capital improvement bonds.....	\$ 40,310	\$ —	\$ 40,310
State highway bonds.....	6,500	—	6,500
State school facilities bonds.....	59,515	—	59,515
Infrastructure Bank bonds.....	837,500	—	837,500
Tobacco Authority bonds.....	575,200	—	575,200
Higher Education Fund bonds..	—	220,944	220,944
Totals.....	\$ 1,519,025	\$ 220,944	\$ 1,739,969

In addition, at December 31, 2007, \$220.375 million of bonds associated with the Public Service Authority, a major discretely presented component unit, were considered defeased.

f. Arbitrage Rebate Payable

The Internal Revenue Code and arbitrage regulations issued by the Internal Revenue Service require rebate to the federal government of excess investment earnings on bond proceeds if the yield on those earnings exceeds the effective yield on the related tax-exempt bonds issued. At June 30, 2008, reported as other liabilities for governmental activities is an arbitrage rebate liability of \$5.445 associated with the State’s General Obligation Debt and a \$1.150 million arbitrage rebate liability associated with revenue bonds of the Local Government Infrastructure Fund (a major governmental fund). The Higher Education Fund (a major enterprise fund) and the Education Assistance Authority Fund (a major enterprise fund) have also incurred arbitrage rebate liabilities in connection with student loan and revenue bonds sold in previous years. Arbitrage rebates payable at June 30, 2008, are reported as other liabilities of \$39 thousand in the Higher Education Fund, and as other liabilities payable from restricted assets of \$1.999 million in the Education Assistance Authority Fund.

g. Conduit Debt

State law authorizes issuance of certain bonds for which the State assumes no responsibility for repayment. These bonds, therefore, do not appear as liabilities in the accompanying financial statements.

The Educational Facilities Authority, reported in the General Fund, issues bonds to assist nonprofit educational institutions that do not receive State appropriations in the acquisition, construction, and financing of facilities for educational programs. The bonds are payable solely from, and secured by, a lease agreement on the facilities between the Authority and the institution. When the bonds have been fully paid, the Authority conveys the title for the facility to the institution. At June 30, 2008, the outstanding balance of bonds issued was \$305.699 million.

The Jobs-Economic Development Authority, a nonmajor governmental fund, issues industrial revenue bonds to develop and benefit business enterprises. The bonds are payable solely by revenues of the business enterprise and generally are secured by an irrevocable letter of credit. At June 30, 2008, the outstanding balance of bonds issued after June 30, 1995, was \$3.636 billion. The original amount of bonds issued prior to that date is not available.

The Housing Authority Fund, a major enterprise fund, issues certain mortgage loan notes and housing revenue bonds for developers to construct moderate to low income housing projects. The bonds are payable solely from housing rental payments received by the developer and generally are secured by an irrevocable letter of credit or bond insurance. At June 30, 2008, the outstanding balance of bonds issued was \$287.112 million.

h. Resources Authority Debt

In prior years, the Resources Authority, reported in the General Fund, issued bonds and used the proceeds to purchase obligations of local governmental entities. The local governmental entities used the proceeds received from the Authority to fund water and sewer projects. Periodic principal and interest payments received from the local governmental entities are used by the Authority to retire its own debt. The debt issued by the Authority is not a debt of the State and is not recorded in the accompanying financial statements. The Authority's outstanding debt at June 30, 2008, was \$5 thousand. Effective October 1994, the General Assembly enacted legislation that prohibits the Authority from issuing bonds except to refund bonds previously issued.

Beginning in fiscal year 1993-1994, one local governmental entity has been unable to meet its financial obligation under the terms of a \$5.025 million revenue bond that the Authority purchased. In June 1990, when the local governmental entity issued its debt, it estimated that the related sewer project would be completed and operational by calendar year 1992. Revenue generated by the sewer system is pledged for debt retirement. The State paid a total of approximately \$5.507 million in the 1993-1994 through 2006-2007 fiscal years, and \$2.695 million in the 2007-2008 fiscal year to the Authority to offset the loss of revenues from the delinquent local entity. There is no such provision in the 2008-2009 Appropriations Act. The Town of New Ellenton is required to make court ordered payments to the South Carolina Resources Authority.

i. Commercial Paper Notes and Letters of Credit

Note 13 Changes in Liabilities, displays the activity of commercial paper notes and lines of credit during the fiscal year ended June 30, 2008, including beginning and ending balances (if any) as well as all draws and repayments. The Public Service Authority presents its outstanding amounts as commercial paper notes, but all other amounts outstanding on lines of credit at June 30, 2008 are reported as notes payable. Other relevant information regarding these accounts is provided below.

The State Housing Finance and Development Authority, a major enterprise fund, executed a revolving Mortgage Prepayment Refunding Note with a commercial bank, the purpose of which is to function as a vehicle to preserve the federally limited tax-exempt private activity volume cap pursuant to the federal tax code. The amount outstanding at any given time is not to exceed \$21.000 million. There was no outstanding balance on the note as of June 30, 2008.

The University Medical Associates of the Medical University of South Carolina, a blended component unit and nonmajor enterprise fund, has a \$10.000 million line of credit from a commercial bank. There were no advances under this line of credit during the year ended June 30, 2008.

The Public Service Authority, a discretely presented component unit, has recorded a \$283.252 million liability for commercial paper notes at its fiscal year ended December 31, 2007. The paper is issued for valid corporate purposes with terms not to exceed 270 days. The Authority has a \$450.000 million revolving credit agreement to support the issuance of commercial paper. There were no borrowings under the agreement during 2007.

The Ports Authority, a discretely presented component unit, has a \$10.000 million revolving line of credit from a commercial bank. There are no borrowings under the line of credit as of June 30, 2008.

j. Subsequent Events

On August 28, 2008, the State Housing Finance and Development Authority, a major enterprise fund, issued \$67.215 million in revenue bonds. Additionally, on July 1, 2008, the Housing Authority drew down \$13.055 million from the Mortgage Prepayment Refunding Note entered into on June 28, 2007 and renewed on June 30, 2008.

On September 20, 2008, the Department of Corrections entered into a \$12.400 million note payable.

Since June 30, 2008, the Public Service Authority, a major discretely presented component unit, has issued \$666.985 million in revenue bonds and \$24.432 million in revenue mini-bonds.

NOTE 13: CHANGES IN LIABILITIES

a. Long-Term Liabilities

Changes in major classes of long-term liabilities (expressed in thousands) for the fiscal year ended June 30, 2008, were:

	Balances at July 1, 2007	Increases	Decreases	Balances at June 30, 2008	Amounts Due Within One Year

Arbitrage payable.....	\$ 503	\$ 6,092	\$ —	\$ 6,595	\$ 3,694

The National Guard Retirement System net pension obligation payable, judgments and contingencies payable, and arbitrage payable are included in *other liabilities* in the accompanying financial statements.

The governmental fund that pays an employee's salary is responsible for liquidating the employee's related compensated absence liability. The General Fund is responsible for liquidating the National Guard Retirement System liability. Historically, the State has paid most judgments related to governmental funds from its General Fund unless an identifiable amount was directly attributable to another specific fund.

b. Short-Term Debt

The State’s Higher Education Fund may issue Bond Anticipation Notes (BANS) to provide interim financing for capital projects while in the process of issuing bonds. The Public Service Authority, a major discretely presented component unit, may issue commercial paper as short-term financing for valid corporate purposes as allowed by the Authority’s Board of Directors. Short-term debt for the fiscal year ended June 30, 2008, included: BANS in the Higher Education Fund, a major enterprise fund; commercial paper notes in the Public Service Authority; and letters of credit in the nonmajor enterprise funds. Short-term debt activity during the fiscal year (expressed in thousands) was as follows:

	Balances at July 1, 2007	Increases	Decreases	Balances at June 30, 2008
Primary Government:				
Business-type Activities				
General obligation bond anticipation notes payable.....	\$ —	\$ 30,000	\$ —	\$ 30,000
Revenue bond anticipation notes payable.....	\$ 4,500	\$ —	\$ (4,500)	\$ —
	Balances at January 1, 2007	Increases	Decreases	Balances at December 31, 2007
Major Component Unit:				
Public Service Authority				
Commercial paper notes.....	\$ 195,072	\$ 232,774	\$ (144,594)	\$ 283,252

NOTE 14: RESERVATIONS AND DESIGNATIONS OF FUND BALANCES IN GOVERNMENTAL FUNDS

Reserved components of fund balances represent amounts in governmental funds that are legally segregated or that the State cannot appropriate. Designated portions of unreserved fund balances reflect tentative plans for future use of available financial resources.

The unreserved component of fund balance equals the total fund balance less reserved amounts.

At June 30, 2008, the following amounts of fund balance in governmental funds (expressed in thousands) were reserved:

	General	Departmental General Operating	Local Government Infrastructure	Department of Transportation Special Revenue	Nonmajor Governmental Funds	Total Governmental Funds
Fund balances reserved for:						
General reserve fund.....	\$ 95,123	\$ —	\$ —	\$ —	\$ —	\$ 95,123
Inventories.....	14,909	10,603	—	4,678	9	30,199
Interfund receivables.....	223	—	304,168	—	2,663	307,054
Appropriations to be carried forward	229,131	—	—	—	—	229,131
Endowments	—	—	—	—	2,819	2,819
Long-term loans and notes receivable	12	460	472,629	6,697	25,409	505,207
Debt requirements.....	—	—	1,164,587	—	62,979	1,227,566
School building aid	2,375	—	—	—	20,124	22,499
Total reserved fund balances.....	\$ 341,773	\$ 11,063	\$ 1,941,384	\$ 11,375	\$ 114,003	\$ 2,419,598

The following subsections contain further descriptive information regarding the reserved and designated components of fund balance.

a. Reserved

General Reserve Fund

The South Carolina Constitution requires that the State maintain a reserve to prevent deficits in the Budgetary General Fund. The Reserve is fully funded whenever it equals three percent of the Budgetary General Fund’s revenue (budgetary basis) of the previous fiscal year.

If the State withdraws funds from the Reserve to cover a year-end deficit, it must replace the funds within three years. The Constitution requires that at least one percent of the Budgetary General Fund revenue (budgetary basis) of the latest completed fiscal year, if so much is necessary, be restored each year following the deficit until full funding is achieved.

At June 30, 2008, the Reserve’s balance was \$95.123 million, \$91.658 million below the full funding amount. The State withdrew \$91.658 million to avoid a year-end unreserved budgetary fund balance deficit.

Reserved for Inventories

Governmental funds reserve a portion of fund balance equal to year-end inventory balances to indicate that the funds are not available for appropriation.

Reserved for Interfund Receivables and Reserved for Long-Term Loans and Notes Receivable

Long-term loans and notes receivable and long-term interfund receivables are assets that do not represent expendable available resources. Governmental funds, therefore, reserve a corresponding portion of fund balance.

Reserved for Appropriations to be Carried Forward

The General Fund does not use encumbrance accounting. It uses the reserve for appropriations to be carried forward, however, if the General Assembly has authorized the carry-forward of General Fund appropriations to the next fiscal year.

Reserved for Endowments

This reserve recognizes restrictions on donated resources.

Reserved for Debt Requirements

When financing agreements or bond indentures require a reservation, the State records an amount as reserved for debt requirements.

Reserved for School Building Aid

If the State promises to pay a school district to build school buildings or to retire debt on such buildings, it records an amount as reserved for school building aid. The State has recorded such amounts, which are not available for appropriation, in its General Fund and its nonmajor governmental funds.

b. Designated, Reported in Special Revenue Funds

The total designated amount reported on the governmental funds balance sheet for nonmajor special revenue funds is designated for scholarships. The amount is for the Teacher Loan Program, reported within the nonmajor governmental funds. This program makes loans to students. The State cancels 20.0% to 33.0% of the loan for each year that the borrower teaches in a critical-need area. Borrowers who do not teach in such an area, however, must repay their loans.

c. Designated, Reported in the Capital Projects Fund

The total designated amount reported on the governmental funds balance sheet for the State’s Capital Projects Fund, a nonmajor governmental fund, is designated for capital expenditures.

The preceding interfund receivables and payables generally include loans for building improvements, economic development initiatives, and initial funding for new programs. Additional balances include the following:

- \$334.747 million owed by the Department of Transportation Special Revenue Fund, a major governmental fund, to the Local Government Infrastructure Fund, a major governmental fund. The Department of Transportation has entered into various agreements to provide assistance for highway and transportation facilities projects being constructed by the Local Government Infrastructure Fund.
- \$18.410 million owed by the nonmajor governmental funds to the internal service funds. The nonmajor governmental funds borrowed the money to purchase and renovate new headquarters facilities for the State Department of Public Safety.
- \$9.033 million owed by the nonmajor enterprise funds to the internal service funds. The nonmajor enterprise funds lent the money received to a county for infrastructure within a residential development.
- \$34.920 million owed by the Medical University of South Carolina reported within the Higher Education Fund, a major enterprise fund, to the nonmajor enterprise funds, in relation to internal leasing arrangements.

State of South Carolina

	<u>19,028</u>	<u>22,297</u>
Totals.....	<u>\$ 2,195,104</u>	<u>\$ 2,195,104</u>

The State routinely uses transfers to (1) move revenues from the fund that statute or budget requires to collect them to the fund that statute or budget requires to expend them, (2) move State grant monies from grantor funds to grantee funds, and (3) transfer bond proceeds from the original fund to other funds authorized to receive portions of the proceeds. Significant transfers (i.e., \$5.000 million or more) that occurred during the fiscal year ended June 30, 2008, that had not occurred in prior years included transfers of \$329.962 million of tax revenues from the Tax Relief Trust Fund, reported as part of the State’s General Fund, to the Homestead Exemption Fund for subsequent distribution for property tax relief; a transfer of \$6.106 million from the General Fund to the Other Special Revenue Fund to fund the newly created Renewable Energy Infrastructure Development Fund, which makes loans and grants to individuals or organizations that plan to build a qualified renewable energy production facility; and a transfer of \$468.908 million from the State Tobacco Settlement Fund to the Tobacco Settlement Revenue Management Authority Fund for the purpose of bond defeasance.

NOTE 16: PROPRIETARY FUND REVENUES–ALLOWANCES AND DISCOUNTS

In the financial statements, the State presents its revenues net of allowances for uncollectible accounts receivable and contractual adjustments. Note 5 reports these allowances.

Scholarship allowances in the Higher Education Fund represent the sum of differences between stated charges for goods and services provided to students and amounts billed to students and/or third parties making payments on behalf of students. For the fiscal year ended June 30, 2008, scholarship allowances reduced the revenues of the Higher Education Fund by the following amounts (expressed in thousands):

	Scholarship Allowances
Charges for services.....	\$ 353,370
Operating revenues pledged for revenue bonds.....	21,230
Total	<u>\$ 374,600</u>

For the fiscal year ended June 30, 2008, the State’s enterprise funds presented \$1.037 billion included in net charges for services after provisions for contractual and other adjustments in the amount of \$1.164 billion and uncollectible accounts in the amount of \$132.335 million.

NOTE 17: DONOR-RESTRICTED ENDOWMENTS AND PLEDGES

a. Donor-Restricted Endowments

The State's permanent funds (nonmajor governmental funds) and the Higher Education Fund, a major enterprise fund, maintain donor-restricted endowments. Net appreciation consists of realized and unrealized increases in the fair value of an endowment's assets over the historic dollar value of the assets.

At June 30, 2008, \$12.773 million of the amount reported as *restricted net assets, expendable for education*, represented net appreciation on investments of donor-restricted endowments available for authorization for expenditure by governing boards of the higher education institutions. In addition, \$93 thousand of the amount reported as *restricted net assets, expendable for other*, represented net appreciation on investments of donor-restricted endowments of permanent funds.

The South Carolina Uniform Management of Institutional Funds Act (Title 34, Chapter 6, of the South Carolina Code of Laws, which is referred to below as "the Act") permits an agency's/institution's governing board to authorize for expenditure all of an endowment's net appreciation, unless the applicable gift instrument indicates the donor's intention that net appreciation not be expended. The Act requires, however, that the authorized expenditure be limited to the uses and purposes for which the endowment was established and that the institution's governing board exercise ordinary business care and prudence in authorizing the expenditure of net appreciation.

Specific policies for authorizing and spending endowment investment income vary among the agencies and institutions that hold endowments. Generally, the governing boards establish these policies. Among those agencies/institutions that recorded investment income in donor-restricted endowments during the fiscal year ended June 30, 2008, the predominant policy was to authorize the spending of 4.00% to 5.00% of the fair value of total endowment assets annually.

b. Pledges

The State's Higher Education Fund, a major enterprise fund, and related blended component units reported as nonmajor enterprise funds, recognize receivables and revenues for pledges or promises of cash or other assets from nongovernmental entities when all eligibility requirements are met, provided that the promise is verifiable and the resources are measurable and probable of collection. The financial statements report these amounts as accounts receivable. However, various benefactors have established split interest agreements with The Citadel Trust, Inc., a nonmajor enterprise fund. Among these agreements are a charitable remainder uni-trust and a charitable remainder trust. The Citadel, a higher education institution reported in the Higher Education Fund, will receive a specified portion of the assets remaining under these agreements at the benefactors' deaths. The parties who manage the assets associated with these agreements are not included within the State of South Carolina's financial reporting entity. The State's financial statements do not report these trust assets because the ultimate amounts that the State will receive were not deemed to be measurable at June 30, 2008, and the eligibility requirements for the gifts have not been met.

NOTE 18: SEGMENT INFORMATION

The Housing Authority provides low-cost housing to the State's citizens by issuing bonds/notes and by administering federal contracts and grants. The State issues various separate revenue bonds to finance activities within the Single Family Finance program of its Housing Authority Fund, a major enterprise fund. Covenants of the following revenue bonds within the Single Family Finance program require separate accounting and financial reporting: (a) Single Family, and (b) Mortgage Revenue. Investors in these bonds rely solely on the revenue generated by the individual activities for repayment. Accordingly, condensed financial statements (expressed in thousands) for these segments for the fiscal year ended June 30, 2008, are presented on the following pages:

CONDENSED STATEMENT OF NET ASSETS

Beginning cash and cash equivalents (restated).....	44,855	148,229
Ending cash and cash equivalents.....	\$ 39,506	\$ 175,555

Because the above separately identifiable activities provide essentially similar services to the Authority’s customers, they are not considered to be different activities for financial reporting purposes. Accordingly, all of the Housing Authority’s activities are reported as a single fund and as a single business-type activity in the accompanying financial statements.

NOTE 19: JOINT VENTURE AND JOINT OPERATION

a. Joint Venture

In May 1997, the Public Service Authority (the Authority), a major discretely presented component unit, along with two unrelated publicly owned electric utilities formed a wholesale power marketing joint venture called The Energy Authority (TEA). Subsequently, three additional unrelated entities joined TEA. The Authority engages in gas hedging activities through TEA to reduce the cost of fuel inventories. The Authority now has a 21% ownership interest, which it records as an equity investment. TEA provides services to its member organizations, as well as to certain non-member organizations, and allocates transaction savings and operating expenses to its member organizations pursuant to a settlement agreement.

During its fiscal year ended December 31, 2007, the Authority received distributions of \$35.844 million from TEA and recognized \$35.836 million in reductions to power costs and increases in electric revenues.

The Authority has provided certain guarantees and has pledged certain collateral to support TEA’s transactions. The Authority’s Board of Directors has approved the use of up to \$89.800 million to support TEA’s activities.

At December 31, 2007, the Authority had a payable to TEA of \$5.400 million for power and gas purchases. In addition, the Authority had a receivable due from TEA of approximately \$10.700 million for power sales and sales of excess gas capacity.

Interested parties may obtain a copy of TEA’s financial statements by writing to:

The Energy Authority
301 West Bay Street, Suite 2600
Jacksonville, Florida 32202

b. Joint Operation

The Summer Nuclear Station is a joint operation owned by the Public Service Authority (the Authority), a major discretely presented component unit and regulated electric utility, and the South Carolina Electric and Gas Company (SCE&G), a non-governmental electric utility. The Authority owns an undivided one-third interest in the Station while SCE&G owns an undivided two-thirds interest. SCE&G is solely responsible for the Station’s design, construction, management, budgeting, operation, maintenance, and decommissioning; and the Authority is obligated to pay its ownership share of all costs relating thereto. The Authority receives one-third of the net electricity generated.

In accordance with regulatory accounting practices, the Authority reported capital assets of \$499.000 million, accumulated depreciation of \$286.500 million, and expenses of \$56.700 million, which represent its interest in this joint operation. The Summer Nuclear Station is not a separate legal entity and does not prepare separate financial statements.

The Nuclear Regulatory Commission (NRC) requires a licensee of a nuclear reactor to provide minimum financial assurance of its ability to decommission its nuclear facilities. A site-specific decommissioning study completed in 2006 estimated the Authority’s share of decommissioning costs for the Summer Nuclear Station as \$178.900 million in 2006 dollars. The Authority accrues its share of the estimated decommissioning costs over the remaining life of the facility. These costs are being recovered through the Authority’s rates.

To comply with the NRC regulations, the Authority established an external trust fund and has been making deposits into this fund since September 1990. In addition, the Authority established an internal decommissioning account. The Authority

makes deposits into this fund in the amount necessary to fund the difference between the 2006 site-specific study and the NRC's imposed minimum requirement. Based on current decommissioning cost estimates developed by SCE&G, these funds, which totaled \$141.200 million (adjusted to market) at December 31, 2007, along with future deposits into both the external and internal decommissioning accounts and investment earnings, are expected to provide sufficient funds for the Authority's share of the estimated decommissioning costs.

On May 23, 2008, subsequent to the Authority's December 31 year-end, the Authority and SCE&G entered into an engineering, procurement and construction agreement for the design and construction of two 1,117 megawatt nuclear electric generating units at the existing V.C Summer Nuclear Station site. Leading up to the execution of this agreement, on May 22, 2008, the Authority's Board of Directors had unanimously approved a resolution authorizing the contract signing and spending up to \$1.900 billion on this project through December 31, 2011.

NOTE 20: RELATED PARTY TRANSACTIONS

These financial statements exclude certain related foundations and other organizations, including those discussed below. (See also Note 1a, Scope of Reporting Entity.)

During the fiscal year ended June 30, 2008, the Educational Television Endowment of South Carolina, Inc., disbursed \$4.812 million on behalf of the Departmental General Operating Fund, a major governmental fund, for programs, development, advertising, and other costs.

The following organizations are related to the Higher Education Fund, a major enterprise fund: the University of South Carolina Development Foundation; the University of South Carolina Business Partnership Foundation; the University of South Carolina Research Foundation; the Greater University of South Carolina Alumni Association; the Carolina Piedmont Foundation, Inc.; the Lancaster County Educational Foundation, Inc.; the Clemson University Research Foundation; the Clemson University Continuing Education and Conference Complex Corporation; the Clemson Advancement Foundation for Design and Building; the MUSC Foundation of the Medical University of South Carolina; the Medical University of South Carolina Foundation for Research Development; the Coastal Educational Foundation, Inc.; the Coastal Carolina University Student Housing Foundation; the Horry County Higher Education Commission; the College of Charleston Foundation; the Winthrop University Foundation; the Winthrop University Real Estate Foundation; the Francis Marion University Foundation; the Francis Marion University Student Housing LLC; The Citadel Foundation; The Citadel Alumni Association; The Citadel's Brigadier Foundation; South Carolina State Educational Foundation; the Lander Foundation; Aiken Technical College Foundation, Inc.; Florence-Darlington Technical College Foundation; Horry-Georgetown Technical College Foundation; Greenville Tech Foundation, Inc.; Midlands Technical College Foundation; Orangeburg-Calhoun Technical College Foundation; Piedmont Technical College Foundation; Spartanburg Technical College Foundation; Tri-County Technical College Foundation; Trident Technical College Foundation; and York Technical College Foundation. During the fiscal year ended June 30, 2008, the State entered into various transactions with these organizations. Approximate amounts within the State's Higher Education Fund that represent transactions with these related parties include: receivable from foundations—\$56.547 million; donations of cash and other assets from foundations—\$137.733 million; expenditures paid to foundations—\$4.805 million; and reimbursements to the State for expenses/expenditures the State incurred on behalf of foundations—\$4.411 million.

The Education Assistance Authority Fund, a major enterprise fund, has designated the South Carolina Student Loan Corporation (SLC) as the entity to administer the enterprise fund's student loan program. During the fiscal year ended June 30, 2008, the enterprise fund entered into various transactions with SLC. Approximate amounts within the enterprise fund that represent these transactions include: accounts receivable from SLC—\$1.012 billion; notes receivable from SLC—\$1.579 million; program revenue from SLC—\$18.783 million; reimbursements to SLC for administrative costs—\$7.999 million; and payable to SLC—\$56.841 million.

NOTE 21: MAJOR DISCRETELY PRESENTED COMPONENT UNITS

a. Significant Transactions of Major Component Units with the Primary Government

The Public Service Authority makes payments to the General Fund in lieu of taxes each year based on requirements under bond indentures. These payments totaled \$14.993 million during the Authority's fiscal year ended December 31, 2007.

During the fiscal year ended June 30, 2002, the State Ports Authority resolved to contribute a total of \$45.000 million over twenty-six years to the Local Government Infrastructure Fund, a major governmental fund, for the Cooper River Bridge project in Charleston. The Authority made a payment of \$1.000 million during the fiscal year ended June 30, 2008.

The South Carolina Lottery for Education Act requires the Lottery Commission to transfer all proceeds from lottery ticket sales and other revenues net of expenses to the Education Lottery Fund, a nonmajor governmental fund. The Commission transferred \$268.486 million during the fiscal year ended June 30, 2008; the Commission owed an additional \$18.651 million to the Fund at June 30, 2008.

b. Concentrations of Credit Risk

The Public Service Authority and State Ports Authority have chosen to present their statements in accordance with applicable pronouncements of the Financial Accounting Standards Board (FASB) issued after November 30, 1989. Accordingly, these component units present disclosures regarding concentrations of credit risk.

Public Service Authority

Concentrations of credit risk with respect to the Public Service Authority’s receivables are limited due to its large number of customers and their dispersion across different industries. The Authority maintains an allowance for uncollectible accounts based on the expected collectibility of all accounts receivable. The Authority’s sales to its two major customers for its fiscal year ended December 31, 2007, were as follows (expressed in thousands):

<u>Customer</u>	<u>Revenue</u>	<u>% of Total Sales Revenue</u>
Central Electric Power Cooperative, Inc.....	\$ 737,000	51%
Alumax of South Carolina, Inc.....	142,000	10%

No other customer accounted for more than 10% of the Authority’s sales.

State Ports Authority

During the fiscal year ended June 30, 2008, one customer accounted for approximately 21% of the State Ports Authority’s revenues. The Authority performs ongoing credit evaluations of its customers and generally operates under international laws, which may provide for a maritime lien on vessels in the event of default on credit terms. The Authority maintains reserves for potential credit losses.

c. Inequality of Due from Component Units and Due to Primary Government

Due from Component Units was \$163.694 million and Due to Primary Government was \$160.922 million, a difference of \$2.772 million. This situation occurred because the Public Service Authority and the Connector 2000 Association, Inc. report using a fiscal year ending December 31. At June 30, 2008, the Public Service Authority owed the General Fund its semi-annual payment of \$8.269 in lieu of taxes, which is reported as Due from Component Units. At December 31, 2007, the Connector 2000 Association, Inc. owed the Department of Transportation Special Revenue Fund \$5.497 million for maintenance costs, which is reported as Due to Primary Government.

NOTE 22: CONTINGENCIES AND COMMITMENTS

a. Litigation

Primary Government

Among the unresolved legal actions in which the State was involved at June 30, 2008, are several that challenge the legality of certain taxes. The challenged revenues include the sales tax on diabetic supplies, allegedly exempt materials and equipment and the use of certain income tax credits. In the event of unfavorable outcomes for these cases, the State does not expect the ultimate liability to exceed \$46 million. Although State losses in these cases also could reduce future revenues, the preceding estimates do not include any impact on future revenues.

The South Carolina Retirement Systems has been involved in two lawsuits, which are putative class actions, involving legislation (Act No. 153, 2005 S.C. Acts and Joint Resolutions) requiring that employees who return to work after retirement (including employees participating in the Teacher and Employee Retention Incentive [TERI] Program) to resume making contributions into the retirement system. In the first suit, the plaintiffs alleged that requiring such contributions constituted a breach of contract, an impairment of contractual rights, an unlawful taking of property and was precluded by promissory estoppel. In 2006, the Supreme Court held that the TERI statute created a contract for retirees who entered the TERI program prior to July 1, 2005, and that contract was breached by requiring retirement contributions. The Court ordered the Systems to refund all contributions received from these retirees while they were participating in the TERI program, but remanded the question whether the Systems was liable for the plaintiffs’ attorney fees. The Circuit Court for Richland County issued an order awarding attorneys’ fees against the Systems and the State in the amount of approximately \$9 million. The Systems appealed the award to the Supreme Court. In March 2008, the Supreme Court approved the award of attorneys’ fees, but reduced the amount to approximately \$1 million. The General Assembly appropriated funds and this judgment has been satisfied. As part of its decision in this first case, the Supreme Court also remanded the claims of persons enrolled in the “working retiree program” for determination by the trial court, although the Supreme Court found that the statute creating the

working retiree program did not create a contract between the State and the participants in that program. It is premature to estimate any potential loss associated with this remand; however, as of June 30, 2008, the Systems had collected approximately \$19 million in the form of retirement contributions from members who retired prior to July 1, 2005 and returned to work. If the Plaintiffs were to prevail, these contributions would be refunded to the members and no future contributions could be collected from them. The Systems and the State believe their defense is meritorious and intend to vigorously contest these claims. The second putative class action case filed in August, 2005, alleges that the law requiring working retirees in the Police Officers Retirement System (“PORS”) to make employee contributions is unconstitutional and illegal. Discovery regarding these issues is underway, and it is premature to estimate any potential loss associated with them. If the plaintiffs were to prevail, however, the defendants estimate the potential loss from PORS based on a refund of contributions, as of June 30, 2008, to be approximately \$10 million. There would also be a loss of future contributions. The Systems and the State believe their defense is meritorious and are vigorously defending the case.

The State is involved in other legal proceedings pertaining to matters incidental to the performance of routine governmental operations. Such litigation includes cases involving claims asserted against the State arising from alleged torts, breach of contract, and possible violations of State laws. In the event of unfavorable outcomes in all of the above matters, the State’s estimated liability would be approximately \$21 million.

While the State is uncertain as to the ultimate outcome of any of the above-described lawsuits, it believes its positions are meritorious and it is vigorously defending its position in each case.

The State is involved in a number of cases in which the amounts of potential losses, if any, are not presently determinable. These cases include one contending that the funding of public education in South Carolina is inequitable and inadequate. The State moved to dismiss the case, and the Circuit Court granted that motion. The plaintiffs appealed, and the State Supreme Court affirmed part of the Circuit Court’s order but remanded the case to the Circuit Court for further proceedings as to the issue of alleged inadequate educational opportunity. The Court denied the plaintiffs’ request to add a damage claim. The Court issued an order during December 2005 in which the Court found in favor of the State on most issues, but ruled that the State is failing to fund early childhood intervention programs adequately. Motions to alter or amend the Circuit Judge’s Order were filed in July 2007, but the Court denied the motions. The plaintiffs, the House and the Senate appealed to the Supreme Court and the case was argued in June 2008. The Court has not yet issued an Opinion. In a second unrelated case, the plaintiffs allege that a State board’s actions interfered with their businesses. The State has filed a motion for summary judgment. In the event the State loses this case, the loss amount may not be limited by the State Tort Claims Act and it may exceed the allowable reimbursement from the State’s self-insurance fund. In a third unrelated case, the plaintiffs contend that a lack of funding has resulted in the unconstitutional treatment of prison inmates with mental illnesses. In the fourth unrelated case, the plaintiffs contend that beachfront homes and lots on Sullivan’s Island are threatened by erosion and need large sandbags to protect them temporarily until re-nourishment. The suits also challenge the constitutionality of the Beachfront Management Act and request damages. In a fifth unrelated case, the plaintiffs allege assaults on children placed in a foster home.

Due to the uncertainty involving the ultimate outcome of the several previously discussed unresolved lawsuits, no provision for potential liability has been made for them in the accompanying financial statements.

Generally, liabilities recorded by the State’s Insurance Reserve Fund (see Note 10a), an internal service fund, are sufficient to cover claims arising from alleged torts, up to the liability limits established by the South Carolina Tort Claims Act. Currently, except as described above, no tort claims are pending that are expected to result in any significant liability in excess of the provision for policy claims recorded by the Insurance Reserve Fund.

Major Discretely Presented Component Unit—Public Service Authority

The Public Service Authority, a major discretely presented component unit and electric utility company, is a party to or has an indirect interest in several lawsuits in which the amounts of potential losses, if any, are not presently determinable. The following paragraph discusses the most significant of these cases.

Landowners located along the Santee River contend that the Authority is liable for damage to their real estate because of flooding that has occurred since the U. S. Army Corps of Engineers completed its Cooper River Rediversion Project in 1985. A 1997 trial returned a jury verdict against the Authority on certain causes of action. The Authority appealed the decision and the case was remanded to District Court. The Authority has entered into a settlement agreement with the plaintiffs, which will involve mediation of the claims and a non-jury hearing regarding those claims which cannot be resolved through mediation. No estimate of potential loss to the Authority can be made at this time. The contract between the Corps and the Authority requires that the Corps indemnify the Authority for certain claims arising out of the construction and operation of the project.

b. Tobacco Settlement Revenue Management Authority

The Tobacco Settlement Revenue Management Authority (the Authority), a blended component unit and nonmajor governmental fund established in 2001, is a public body and an instrumentality of the State. State law transferred to the Authority all of the State’s rights and interests under the Master Settlement Agreement (the MSA) and the Consent Decree and Final Judgment between all participating states and the participating tobacco manufacturers. These rights include the

State of South Carolina's share of all tobacco settlement revenues (TSRs) actually received after June 30, 2001, or to be received in the future under the MSA.

The Authority issued asset-backed term bonds in 2001, which were defeased on June 26, 2008, in part by issuing asset-backed refunding bonds. The payment of such refunding bonds is dependent on the receipt of TSRs. The amount of TSRs actually collected is dependent on many factors, including cigarette consumption and the continued financial capability of the original participating manufacturers. Such bonds are secured by, and payable solely from, TSRs and investment earnings pledged under the bond indenture and amounts established and held in accordance with the bond indenture. The term bonds are payable only from the Authority's assets. If the Authority has no assets, it will not pay any principal or interest on the bonds. The TSRs represent the Authority's only source of funds for payments on the bonds; the Authority has no taxing power.

Various parties have instituted litigation alleging, among other things, that the MSA violates certain provisions of federal and State laws. Certain of these actions, if ultimately successful, could result in a determination that the MSA is void or unenforceable. In the event of an adverse court ruling, the Authority may not have adequate financial resources to make payment on the bonds.

c. Federal Grants

The State receives significant federal grant and entitlement revenues. Compliance audits of federal programs may identify disallowed expenditures. Disallowances by federal program officials as a result of these audits may become liabilities of the State. The State records a liability for pending disallowances if settlement is probable and the settlement amount is reasonably estimable. Otherwise, the liability is recorded only when the State and the federal government agree on reimbursement terms. Based on an analysis of historical data, the State believes that any such disallowances relating to the fiscal year ended June 30, 2008, or earlier years will not have a material impact on the State's financial statements.

d. Other Loan Guarantees

The South Carolina Education Assistance Authority, a major enterprise fund, guarantees student loans. At June 30, 2008, these loans totaled \$2.865 billion. The United States Department of Education reinsures 100% of losses under these guarantees for loans made prior to October 1, 1993; 98% of losses for loans made on or after October 1, 1993, but before October 1, 1998; and 95% for loans made on or after October 1, 1998. If the loan default rate exceeds 5% of the loans in repayment status, the United States Department of Education decreases the reinsurance rate. The State's default rate during the fiscal year ended June 30, 2008, was less than 1%.

The nonmajor enterprise funds guarantee a portion of a mortgage debt up to a maximum of \$1.531 million.

e. Purchase Commitments

Major Discretely Presented Component Unit—Public Service Authority

At December 31, 2007, the Public Service Authority, a major discretely presented component unit and electric utility company, had outstanding minimum obligations under existing purchase contracts totaling \$1.340 billion for coal. In addition, minimum obligations under purchased power contracts were approximately \$70.300 million at December 31, 2007, with a remaining term of twenty-seven years. Also, the Authority has commitments for nuclear fuel enrichment and fabrication contracts that are contingent upon the operating life of its nuclear unit. As of December 31, 2007, these commitments totaled approximately \$49.000 million over the next seven years.

The Authority has entered into a service agreement in the approximate amount of \$90.000 million. The agreement provides a service director, initial spare parts, parts and services for specified maintenance outages, remote monitoring and diagnostics of the turbine generators, and combustion tuning for the gas turbines. In exchange for reduced pricing and added features, the contract term was extended through 2023, but can be terminated on one of the units in 2008, and on the other two units in 2009.

Major Discretely Presented Component Unit—Lottery Commission

At June 30, 2008, the Lottery Commission had remaining commitments of \$69.354 million under service contracts expiring in 2018. The contracts provide, among other things, services and equipment to operate the on-line lottery.

f. Commitments to Provide Grants and Other Financial Assistance

The South Carolina Transportation Infrastructure Bank, reported within the Local Government Infrastructure Fund (a major governmental fund), has agreements with various counties to provide financial assistance totaling \$2.379 billion for certain highway and transportation facilities projects. At June 30, 2008, the remaining commitments for these agreements totaled \$1.092 billion.

At June 30, 2008, the Department of Commerce had outstanding commitments of \$120.890 million to provide funds to local governmental entities. These commitments included grants for water and wastewater infrastructure projects, airport

construction projects, and rural infrastructure projects. Of the outstanding commitment, \$67.169 million will be funded by federal grants, and \$35.644 million will be funded by local grants.

At June 30, 2008, the Budget and Control Board had outstanding commitments of \$48.764 million to provide loans and grants for water and wastewater projects and energy efficiency improvement projects. \$19.370 million of this commitment will be funded by federal grants.

At June 30, 2008, the State Board for Technical and Comprehensive Education had outstanding commitments of \$11.781 million to provide training for new and expanding business and industry in the state.

At June 30, 2008, the Department of Public Safety had outstanding commitments of \$4.669 million for pass-through grants to various State agencies, local governments, and not-for-profit entities, of which \$3.955 million will be funded by federal grants.

The State Housing Finance and Development Authority had \$5.339 million in outstanding commitments for special initiatives under the Program Fund at June 30, 2008. The Housing Trust Fund, reported within the nonmajor governmental funds, had financial award commitments outstanding of \$20.402 million at June 30, 2008, for affordable housing projects and developments.

g. Connector 2000 Association, Inc.—Going Concern

During its fiscal year ended December 31, 2001, the Connector 2000 Association, Inc., a major discretely presented component unit, opened the Southern Connector toll road to public traffic and began toll collections. Since commencing operations, the Southern Connector has experienced significantly lower traffic counts than those projected during the planning phase of the project. Because the Association pledged these toll collections for debt service payments on its toll road revenue bonds, the Association's debt service capability also is affected. The Association used a portion of its debt service reserve fund to help fund interest payments during its fiscal year ended December 31, 2007. Debt service on the bonds increased sharply beginning in January 2008 as principal began to mature. Unless revenues increase sharply, management of the Association estimates that within two years the reserve funds will be depleted and the Association will be unable to pay the principal and interest on the bonds in full. As a result, there is substantial doubt about the Association's ability to continue as a going concern.

The Association has been unable to comply with the bond revenue covenant since January 2005. As of January 1, 2008 (after 36 consecutive months), the Association is in technical default under the bond indenture. The Association received a notice of default from the Trustee in January 2008. The bond documents provide the Trustee, upon written request of 25% or more of the bondholders, with certain specific remedies in the event of such default. As of June 2008, the Association had not received any communications from the Trustee initiating any proceedings under the Specific Remedies provision of the bond indenture.

Also subsequent to its fiscal year ended December 31, 2007, the Association withdrew funds from the Senior Bonds Debt Service Reserve Account in order to pay a portion of the interest and principal payment due on January 2, 2008, and withdrew funds from the Subordinate Bonds Debt Service Reserve Account in order to pay the Maturity Value of the Subordinate Capital Appreciation Bonds. Management is investigating the possibility of restructuring its long term debt, but there can be no assurance that these plans will be successful.

h. Unemployment Compensation Benefits Fund—Going Concern

The Unemployment Compensation Benefits Fund, a major enterprise fund, has been generating substantial operating losses and using a substantial amount of cash resources to fund its operations. Due to the increasing unemployment rate and the increased amount of unemployment benefits, without a corresponding increase in assessment revenue, the Fund anticipates that it will be unable to operate without acquiring additional capital. Management plans to ask the General Assembly to adjust the taxable wage base of employers in order to raise additional employer contributions to continue the operations of the Fund. If successful, management does not expect such an adjustment to take effect before cash resources are depleted. In such an event, the Fund plans to raise additional cash resources from the federal government through temporary short-term loans. As a result of this situation, there is substantial doubt about the Fund's ability to continue as a going concern.

NOTE 23: SPECIAL ITEMS

a. Insurance Reserve Fund – Return of Premium

The Insurance Reserve Fund reported a special item of \$20.000 million due to a refund of premiums to its policyholders. The transfer of investment income to the General Fund and the "Rate Holiday" in fiscal year 2002-2003 created a substantial decline in the Fund's assets and equity. The Fund increased rates over several years in order to rebuild both assets and equity. In fiscal year 2006-2007, the Appropriations Act transferred approximately \$52.000 million from the General Fund to the Insurance Reserve Fund. The combination of the cumulative rate increases and the transfer of funds back to the Insurance Reserve Fund generated assets and equity in excess of the Fund's needs. Accordingly, the Fund returned \$20.000

million to its policyholders as a refund of premium. The amount is reported as a special item in the State's internal service funds and governmental activities.

b. Employee Insurance Programs – Elimination of Claims Liability

The Employee Insurance Programs reported a special item of \$25.611 million due to the elimination of the claims liability for the Long-Term Disability Plan. As described in Note 9, Act 195 created the Long-Term Disability Insurance Trust Fund for the purpose of funding and accounting for other post-employment long-term disability benefits. In accordance with GASB 45, the State does not report a liability for these other post-employment benefits. Therefore, Employee Insurance Programs eliminated the previously reported claims liability. The amount is reported as a special item in the State's internal service funds and governmental activities.

NOTE 24: INVESTMENT MARKET UNCERTAINTY

During 2008, financial markets as a whole have incurred significant declines in value. As of June 30, 2008, the State's investment portfolio has not incurred a significant decline in the values reported in the accompanying financial statements. However, as the values of individual investments fluctuate with market conditions, the amount of investment losses that the State may recognize in its future financial statements, if any, cannot be determined. The State believes that any investments that experience declines in value will be temporary unrealized losses as they have the intent and ability to hold such investments until maturity.

Notes to the Required Supplementary Information--Budgetary

NOTE 1: BUDGETARY FUNDS AND PERSPECTIVE DIFFERENCES

a. Budgetary Funds

South Carolina's Annual Appropriation Act, the State's legally adopted budget, does not present budgets by GAAP fund. Instead, it presents program-level budgets for the following two funds:

General Funds. These funds are general operating funds. The resources in these funds are primarily taxes. The State expends General Funds to provide traditional State government services. The General Funds column in the Appropriation Act differs somewhat from the GAAP General Fund and is referred to within these notes and in the accompanying schedule as the *Budgetary General Fund*.

Total Funds. The Total Funds column in the Appropriation Act includes all budgeted resources. Amounts in this column include General Funds as well as most, but not all, federal and department-generated resources. Total funds include portions of certain proprietary and capital project fund activities as well as most special revenue activities but exclude the pension trust funds and some other fiduciary fund activities.

Amounts obtained by subtracting the General Funds column in the Appropriation Act from the Total Funds column in the Appropriation Act are referred to within these notes and in the accompanying schedules as *Other Budgeted Funds*.

b. Perspective Differences

Perspective differences exist when the structure of financial information for budgetary purposes differs from the fund structure that is defined by GAAP. Although there are some perspective differences between the Budgetary General Fund and the GAAP General Fund, those differences are *not* significant enough to prevent the State from preparing a budgetary comparison schedule for the Budgetary General Fund.

In contrast, however, there are *significant* perspective differences between the Other Budgeted Funds and the State's GAAP funds, including its major special revenue funds. These perspective differences are so significant that the State is unable to present separate budgetary comparison schedules for its major special revenue funds. Accordingly, the State instead has presented a budgetary comparison schedule for its Other Budgeted Funds in accordance with GASB Statement No. 41, *Budgetary Comparison Schedules—Perspective Differences*.

NOTE 2: ORIGINAL AND FINAL BUDGETED AMOUNTS; BASIS OF PRESENTATION

a. Budgetary General Fund

Each year, the General Assembly enacts an Appropriation Act that includes initial estimated revenue and appropriation figures for the Budgetary General Fund. The *original appropriations* presented in the accompanying schedule for the Budgetary General Fund include the amounts displayed in the Appropriation Act as well as any appropriations authorized to carry forward from the preceding fiscal year. *Original estimated revenues* in the accompanying schedule for the Budgetary General Fund include amounts displayed in Section 71 (*Revenue*) of the Appropriation Act and nonrecurring transfers from other funds that were legislatively required by various provisos within the Appropriation Act.

The accompanying schedule for the Budgetary General Fund presents a fund balance section whereas the budget document does not present fund balances; in other respects, however, the format of the accompanying schedule is substantively the same as for the legally enacted budget.

After the beginning of the fiscal year, departments and agencies may request transfers of appropriations among programs. No such transfer request, however, may exceed 20.0% of the program budget. In addition, the Budget and Control Board, composed of five key executive and legislative officials, has the authority to approve transfers of appropriations between personal service and other operating accounts.

The Appropriation Act for the 2007-2008 fiscal year directs the Budget and Control Board to reduce the Budgetary General Fund's appropriations during the year if necessary to prevent a deficit. Likewise, the State Board of Economic Advisors may approve revisions of estimated revenues for the Budgetary General Fund during the year.

b. Other Budgeted Funds

The *original appropriations* presented in the accompanying schedule for Other Budgeted Funds include the amounts displayed in the Appropriation Act as well as any appropriation reductions specifically authorized by law to prevent duplicate appropriations. The terminology, classifications, and format of the appropriations section of the accompanying schedule for Other Budgeted Funds is substantively the same as for the legally enacted budget.

The State's General Assembly does not approve estimated revenue or fund balance amounts for Other Budgeted Funds (or for Total Funds). However, Section 70 (*Recapitulation*) of the Appropriation Act includes net *source of funds* amounts (i.e., estimated cash brought forward from the previous fiscal year plus estimated revenue for the current fiscal year minus estimated cash to be carried forward to the following fiscal year) for three categories of Other Budgeted Funds: Federal, Earmarked, and Restricted. The *original estimated revenue* amounts in the accompanying schedule for Other Budgeted Funds were obtained from the State Budget Office's breakdown of the source of funds amounts.

As operating conditions change, departments and agencies may request revisions of budgeted amounts in Other Budgeted Funds. Such changes require the Budget and Control Board's approval. Departments and agencies also may request revisions of estimated revenues and appropriations for permanent improvement projects. The Budget and Control Board and the Joint Bond Review Committee must approve and review those changes.

NOTE 3: LEGAL LEVEL OF BUDGETARY CONTROL

The State maintains budgetary control at the level of summary object category of expenditure within each program of each department or agency. The State's Appropriation Act for the 2007-2008 fiscal year has approximately 2,900 appropriated line items. These line items constitute the level of legal control over expenditures. The level of legal control for all agencies is reported in a publication of the State Comptroller General's Office titled "A Detailed Report of Appropriations and Expenditures," not included herein.

NOTE 4: BASIS OF BUDGETING

Current legislation states that the General Assembly intends to appropriate all monies to operate State government for the current fiscal year. Unexpended appropriations lapse on July 31 unless the department or agency is given specific authorization to carry them forward to the next fiscal year. Cash-basis accounting for payroll expenditures is required.

State law does not precisely define the State's basis of budgeting. In practice, however, it is the cash basis with the following exceptions:

- (i) Departments and agencies charge certain vendor and interfund payments against the preceding fiscal year's appropriations through July 16.
- (ii) Certain revenues collected in advance are recorded as liabilities (deferred revenues) rather than as revenues.
- (iii) The following taxes are recorded on the modified accrual basis in accordance with State law: admissions tax, alcoholic liquors tax, beer and wine tax, business license tax, documentary tax, electric power tax, gasoline and motor fuel taxes, and sales, use, and casual excise taxes.
- (iv) Certain non-cash activity, such as food stamp benefits, is recorded as revenue and expenditure in the fiscal year in which the resources are distributed to the beneficiaries.
- (v) All other revenues are recorded only when the State receives the related cash.

NOTE 5: RECONCILIATION OF BUDGET TO GAAP REPORTING DIFFERENCES

The accompanying budgetary comparison schedules compare the State’s legally adopted budget with actual data in accordance with the State’s basis of budgeting. Budgetary accounting principles, however, differ significantly from GAAP accounting principles. These different accounting principles result in basis, perspective, and entity differences in the net increase in fund balance—budgetary basis. *Basis differences* arise because the basis of budgeting differs from the GAAP basis used to prepare the statement of revenues, expenditures, and changes in fund balances—governmental funds. *Perspective differences* result because the Appropriation Act’s program-oriented structure differs from the fund structure required for GAAP. *Entity differences* arise because certain activity reported within the State’s financial reporting entity for GAAP purposes is excluded from the Appropriation Act. These differences (expressed in thousands) for the fiscal year ended June 30, 2008, were as follows:

<i>Budgetary funds</i>	<i>Budgetary</i>	<i>Other</i>	Major Special Revenue Funds			
	General Fund	Budgeted Funds				
GAAP funds	General Fund	Not Applicable	Departmental General Operating	Local Government Infrastructure	Department of Transportation Special Revenue	State Tobacco Settlement
Net increase in fund balance—budgetary basis	\$ (756,727)	\$ 209,564	\$ —	\$ —	\$ —	\$ —
Perspective differences:						
Other Budgeted Funds attributable to nonmajor governmental and other GAAP funds	—	(331,761)	—	—	—	—
Other Budgeted Funds attributable to major governmental GAAP funds	—	(122,197)	—	—	—	—
Other Budgeted Funds net increase allocated among the State’s major governmental GAAP funds	(14,925)	122,197	7,995	20,788	71,305	2,204
Basis of accounting differences	(25,042)	—	69,971	(130,706)	(68,626)	249
Entity differences	(32,185)	—	(6,126)	47,732	—	(464,262)
Net increase (decrease) in fund balance—GAAP basis	\$ (828,879)	\$ —	\$ 71,840	\$ (62,186)	\$ 2,679	\$ (461,809)

**SUPPLEMENTARY
INFORMATION**

Governmental Funds

Governmental funds include the General Fund, several special revenue funds, a Capital Projects Fund, and two permanent funds. The State does not use debt service funds because it does not accumulate resources to pay future years' general long-term debt principal and interest; instead, the State finances such payments directly from the current year's resources.

This subsection of the Comprehensive Annual Financial Report provides the following supplementary information for the State's governmental funds:

- Combining Balance Sheet—Nonmajor Governmental Funds
- Combining Statement of Revenues, Expenditures, and Changes in Fund Balances—Nonmajor Governmental Funds
- General Reserve Fund Activity—Budgetary General Fund

Generally accepted accounting principles (GAAP) for governments require that a Comprehensive Annual Financial Report (CAFR) include budgetary comparison schedules for "individual nonmajor special revenue funds and other governmental funds of the primary government (including its blended component units)." Such schedules would be included as supplementary information in this subsection of the CAFR if they were applicable. The State of South Carolina, however, does not prepare separate budgets for its individual special revenue funds or for its other governmental funds. Accordingly, this subsection includes no budgetary comparison schedules. (Also see the budgetary comparison schedules within the Required Supplementary Information section of this report.)

Note 1b in the notes to the financial statements describes the State's major governmental funds. The paragraphs below describe all other individual governmental funds that the State uses.

a. Nonmajor Special Revenue Funds

Special revenue funds account for the proceeds of specific revenue sources (other than trusts for individuals, private organizations, or other governments or for major capital projects) that are legally restricted to expenditure for specified purposes. The State uses the nonmajor special revenue funds described below:

Education Improvement Act Fund. This fund accounts for the special additional 1% sales tax levied to be used exclusively for improvements in elementary and secondary education, including academic loans for future teachers.

Children's Education Endowment Fund. This fund accounts for low-level radioactive waste fees collected from the Barnwell waste facility that are not required to be deposited to the General Fund or remitted to Barnwell County. These funds are to be used for public school facilities assistance and higher education scholarship grants.

Waste Management Fund. This fund accounts for fees collected from consumers, generators of solid and hazardous wastes, and owners and operators of solid waste and hazardous waste storage facilities. These fees must be used for the purposes set forth in the State's Solid Waste Policy and Management Act of 1991 and to cover the State's costs in governmental actions involving uncontrolled hazardous waste sites.

Accommodations and Local Option Sales Tax Fund. This fund accounts for: (1) a special additional 2% sales tax on the gross proceeds on the rental of transient accommodations and (2) a special 1% sales tax applicable in some localities within the State. The State allocates these revenues to counties and municipalities in accordance with State law.

Homestead Exemption Fund. This fund accounts for a special additional 1% sales tax to be used for property tax relief reimbursements. The State allocates these revenues to counties and municipalities in accordance with State law.

Medicaid Expansion Fund. Resources of this fund include county assessments for indigent medical care and a tax on licensed hospitals. The fund was established to provide Medicaid coverage to persons formerly ineligible for such coverage and to provide additional State matching funds for Medicaid.

Tobacco Settlement Revenue Management Authority Fund. The Tobacco Settlement Revenue Management Authority was created to issue bonds that securitized future payments received under the multi-state legal settlement with the tobacco industry. The State transferred to the Authority, from its General Fund, all of its rights to the future tobacco settlement revenues. In return, the Authority transferred part of the bond proceeds to the State Tobacco Settlement Fund.

Education Lottery Fund. State law requires the Lottery Commission, a major discretely presented component unit, to transfer all proceeds from lottery ticket sales and other revenues net of expenses to the Education Lottery Fund. The Fund distributes these monies for education purposes and programs as stipulated in State law. These programs include tuition assistance, needs-based grants, and scholarships for the State's universities and technical colleges.

Public Telecommunications Fund. The Public Telecommunications Fund of the State's Office of Regulatory Staff accounts for revenues collected from telephone companies within the State and redistributed to certain telephone companies in an effort to align prices and cost recovery with costs. This program also is intended to ensure basic telephone service at affordable rates is available to all citizens. Other revenues of the Fund include telephone customer surcharges for the 911 emergency system mandated by the FCC. These monies are collected from the telephone companies and distributed to local governments for their 911 emergency telephone systems.

Other Special Revenue Funds. These funds, aggregated for reporting purposes, account for various other revenues that must be used for specific purposes. These funds include operations of various employment services, water recreation, agricultural boards, forest renewal programs, certain housing programs, medical and dental scholarships, energy-related programs, and certain programs administered by the Department of Probation, Parole, and Pardon Services. These funds also include operations of the Jobs-Economic Development Authority, which acts in conjunction with other organizations in the promotion and advancement of industrial, commercial, agricultural, and recreational development in the State. The Authority's emphasis is on those areas of the State with the greatest economic need and those projects providing the greatest economic benefit.

b. Capital Projects Fund

The Capital Projects Fund accounts for financial resources to be used for the acquisition or construction of major capital facilities (other than those financed by proprietary funds or in trust funds for individuals, private organizations, or other governments). Capital outlays financed from general obligation bond proceeds are accounted for through the Capital Projects Fund.

c. Permanent Funds

Permanent funds are used to report resources that are legally restricted to the extent that only earnings, and not principal, may be used for purposes that support the State's programs—that is, for the benefit of the State or its citizenry.

Bequests Fund. Sometimes private citizens make bequests of specific assets within their wills to the State. Typically, these gifts provide that the State may expend the earnings, but not the principal, to support certain State agencies or certain programs within a specific State agency. The Bequests Fund accounts for these funds.

Wildlife Endowment Fund. The Wildlife Endowment Fund accounts for funds received from private citizens as gifts and contributions, as well as fees for certain lifetime hunting and fishing licenses. The State may expend the earnings, but not the principal, in furthering the conservation of wildlife resources and the efficient operation of the State's Department of Natural Resources.

General Reserve Fund Activity

BUDGETARY GENERAL FUND Last Ten Fiscal Years

Article III, Section 36, of the South Carolina Constitution establishes requirements relating to the General Reserve Fund. The reserve primarily is designed to prevent Budgetary General Fund deficits. On November 4, 1988, a Constitutional amendment was passed, which permanently changed the funding requirement for the Reserve to three percent of the Budgetary General Fund revenue of the previous fiscal year.

If amounts are withdrawn from the Reserve, the State Constitution requires restoration of the Reserve to full funding within three years.

Key amounts (dollars in thousands) for the General Reserve Fund for the last ten fiscal years are:

Fiscal Year Ended June 30	Start-of- Year Balance	Deposits	Withdrawals	End-of-Year Balance	Full-Funding Amount^a	Actual End-of- Year % Funded^b
1999	130,380	7,270	—	137,650	137,650	100%
2000	137,650	7,721	—	145,371	145,371	100%
2001	145,371	2,545	(87,393)	60,523	147,916	41%
2002	60,523	2,286	(62,809)	—	150,202	0%
2003	—	38,797	(38,797)	—	152,410	0%
2004	—	74,455	(49,300)	25,155	147,708	17%
2005	25,155	50,000	—	75,155	149,034	50%
2006	75,155	78,333	—	153,488	153,488	100%
2007	153,488	14,244	—	167,732	167,732	100%
2008	167,732	19,049	(91,658)	95,123	186,781	51%

^aEquals 3% of the Budgetary General Fund revenues for the previous fiscal year.

^bEquals (End-of-Year Balance/Full-Funding Amount) x 100.

Proprietary Funds

Proprietary funds include enterprise and internal service funds. This subsection of the Comprehensive Annual Financial Report provides the following supplementary information for the State's proprietary funds:

- Combining Statement of Net Assets—Nonmajor Enterprise Funds
- Combining Statement of Revenues, Expenses, and Changes in Fund Net Assets—Nonmajor Enterprise Funds
- Combining Statement of Cash Flows—Nonmajor Enterprise Funds
- Combining Statement of Net Assets—Internal Service Funds
- Combining Statement of Revenues, Expenses, and Changes in Fund Net Assets—Internal Service Funds
- Combining Statement of Cash Flows—Internal Service Funds

Note 1b in the notes to the financial statements describes the State's major enterprise funds. The paragraphs below describe all nonmajor enterprise funds and the internal service funds that the State uses.

a. Nonmajor Enterprise Funds

The State uses enterprise funds to report activities for which it charges fees to external users for goods or services if *any* of the following situations applies:

- The activity is financed with debt that is secured solely by a pledge of the net revenues from fees and charges of the activity.
- Laws or regulations require that the activity's costs of providing services, including capital costs, be recovered with fees and charges rather than with taxes or similar revenues.
- The pricing policies of the activity establish fees and charges designed to recover its costs, including capital costs.

The State uses the nonmajor enterprise funds described below.

Patients' Compensation Fund. This fund provides medical malpractice insurance to any public or private health care provider within the State. This fund is reported as an insurance enterprise.

Patriots Point Development Authority Fund. The Patriots Point Development Authority is responsible for developing and operating the Patriots Point area near Charleston, including a naval museum. The Authority is supported by user fees.

Second Injury Fund. This fund serves as a claims processor for insurance carriers, self-insurers, and the State Accident Fund. The fund processes claims of employees with existing permanent physical impairment who are further injured in the course of their subsequent employment.

Tuition Prepayment Program Fund. This fund, previously known as the PACE program, allows contributors to make payments, under the terms of a tuition prepayment contract, to cover future undergraduate tuition expenses of a designated beneficiary at a South Carolina public higher education institution. Alternatively, the benefits of this contract can be applied toward the cost of tuition, up to the weighted average tuition at South Carolina public institutions, at any accredited college or university to which the designated beneficiary has been admitted.

The Citadel Trust, Inc., Fund. The Citadel Trust was formed for the purpose of investing funds in order to provide scholarship and other financial assistance or support to The Citadel, a higher education institution reported in the Higher Education Fund, a major enterprise fund.

University of South Carolina Trust Fund (the Trust). The Trust operates exclusively for the benefit of the University of South Carolina's School of Medicine to augment and aid education, research, and service in the field of health sciences. The University of South Carolina is a higher education institution reported in the Higher Education Fund, a major enterprise fund. The Trust's fiscal year ends December 31, and the accompanying supplementary information includes the Trust's financial information for the fiscal year ended December 31, 2007.

University Medical Associates Fund (UMA). UMA was established to promote and support educational, medical, scientific, and research purposes of the Medical University of South Carolina (MUSC), a higher education institution reported in the Higher Education Fund, a major enterprise fund. UMA promotes the recruitment and retention of superior faculty at MUSC.

Medical University Facilities Corporation Fund (MUFC). MUFC was established to obtain financing for the Medical University of South Carolina to purchase land, an office building, and a parking garage.

CHS Development Company Fund. The Company was established to provide financing for the Medical University of South Carolina by developing and leasing property.

Enterprise Campus Authority. The Authority was established to provide for the management, development, and operation of the Enterprise Campus of Midlands Technical College. Midlands Technical College is a higher education institution reported in the Higher Education Fund, a major enterprise fund.

Other Enterprise Funds. Other enterprise activities of the State include: the Savannah Valley Development and the Public Railways Divisions of the South Carolina Department of Commerce, the Canteens Fund, operation of the Columbia Farmers' Market, and enterprise operations of the Adjutant General's Office and the State Board for Technical and Comprehensive Education.

b. Internal Service Funds

The State uses the internal service funds described below to report activities that provide goods or services to other State funds, departments, agencies, component units, and/or to other governments, on a cost-reimbursement basis if the State is the predominant participant in the activity. If the State is *not* the predominant participant, it reports the activity as an enterprise fund.

Insurance Reserve Fund. This is a risk management/reinsurance fund. It underwrites insurance risks on public buildings and their contents and tort liability, medical malpractice, and automobile liability for public employees. State law limits the Fund's customers to certain governmental persons/entities within the State and certain associated parties.

Employee Insurance Programs Fund. This is a risk management fund that underwrites the group health, dental, life, accidental death and dismemberment, disability, and long-term care benefits provided to State and public school employees and retirees.

State Accident Fund. This is a risk management fund that provides workers' compensation benefits predominantly to State employees. Premiums are collected from State agencies.

General Services Fund. This fund accounts for various services provided to State and local governmental units for which user fees are charged. These services include telecommunication and computer services, rental of office buildings, janitorial services, building maintenance, and procurement services.

Central Supplies and Equipment Fund. This fund sells office supplies and equipment, food, and paper products to other governmental units. It also stores food and paper products for State agencies.

Motor Pool Fund. This fund provides daily and permanent lease assignments of vehicles to State agencies. It also maintains an inventory of automotive parts to provide maintenance of these vehicles.

Pension Administration Fund. This fund administers the public employee retirement systems. Revenues of the fund primarily consist of assessments charged to the pension trust funds.

Prison Industries Fund. This fund accounts for goods produced by inmate labor. These goods are sold primarily to State agencies.

Other Internal Service Funds. These funds, aggregated for reporting purposes, account for other miscellaneous activities that meet the definition of internal service funds. Such activities include provision of training programs for State employees and work activity centers of the Vocational Rehabilitation Department.

Fiduciary Funds

Fiduciary funds include pension and other post-employment benefit trust funds, investment trust funds, private-purpose trust funds, and agency funds. Note 1b in the notes to the financial statements provides definitions of each of these fund types.

This subsection of the Comprehensive Annual Financial Report provides the following supplementary information for the State's fiduciary funds:

- Combining Statement of Plan Net Assets—Pension and Other Post-Employment Benefit Trust Funds
- Combining Statement of Changes in Plan Net Assets—Pension and Other Post-Employment Benefit Trust Funds
- Combining Statement of Fiduciary Net Assets—Private-Purpose Trust Funds
- Combining Statement of Changes in Fiduciary Net Assets—Private-Purpose Trust Funds
- Combining Statement of Fiduciary Net Assets—Agency Funds
- Combining Statement of Changes in Assets and Liabilities—Agency Funds

The State maintains only one investment trust fund, so no combining statements are necessary for that fund type. The paragraphs below describe all other individual fiduciary funds that the State uses.

a. Pension and Other Post-Employment Benefit Trust Funds

South Carolina Retirement System. This is a multiple-employer pension system that benefits employees of the State, public schools, and political subdivisions of the State.

Police Officers' Retirement System. This is a multiple-employer pension system that benefits police officers and fire fighters employed by the State or its political subdivisions.

General Assembly Retirement System. This is a single-employer pension system that benefits members of the South Carolina General Assembly.

Judges' and Solicitors' Retirement System. This is a single-employer pension system that benefits the judges of the State's Supreme Court, Court of Appeals, circuit courts, family courts, and the State's circuit solicitors.

National Guard Retirement System. The State administers this single-employer pension system that provides a supplemental retirement benefit to members of the South Carolina National Guard. The State is a nonemployer contributor to the system.

South Carolina Retiree Health Insurance Trust Fund. This trust was established to fund the State's cost-sharing multiple employer post-employment health and dental benefit plans.

Long-term Disability Insurance Trust Fund. This trust was established to fund the State's cost-sharing multiple employer long-term disability insurance plans.

b. Private-Purpose Trust Funds

College Savings Plan Fund. The Future Scholar 529 College Savings Plan (the Plan), accounted for in this fund, provides participant families a tax-advantaged method of saving for future college costs. A primary objective of both the financial advisor program and the direct program within the Plan is to provide families with flexibility and professional investment management in meeting their college savings objectives.

Other Private-Purpose Trust Funds. This fund accounts for monies the State has received as trustee under various trust arrangements that specify how the principal and interest earnings must be used. In each case, all of the principal and income benefit individuals, private organizations, or governments outside the State reporting entity; none of the monies may be used for State purposes. The purposes to which the resources of these funds are dedicated include scholarships, the operation of the equestrian center and activities at the Springdale Race Course (for the exclusive benefit of the Carolina Cup Racing Association, Inc., a private nonprofit corporation), and the decommissioning of a low-level radioactive waste disposal facility on behalf of Chem-Nuclear Systems, Inc., a for-profit corporation.

c. Agency Funds

Insurance Company Deposits Fund. This fund accounts for deposits which are required to be made by insurance companies in lieu of surety bonds.

Payroll Clearing Fund. This fund accounts for employee deductions and contributions for the short period of time between the issuance of payroll checks and payment to the proper recipient.

Other Agency Funds. Balances in these funds, aggregated for presentation purposes, represent amounts held for prisoners and patients of State institutions, cash bonds, miscellaneous clearing accounts, and other deposits.

Discretely Presented Component Units

Note 1a in the notes to the financial statements explains the relationship of component units to the primary government and the differences between blended component units and discretely presented component units. Note 1b in the notes to the financial statements explains that the State has designated four of its discretely presented component units as major component units. Government-wide financial statements for each of the four major component units are included in the basic financial statements (immediately preceding the notes to the financial statements).

This subsection of the Comprehensive Annual Financial Report provides the following supplementary information for the State's nonmajor discretely presented component units:

- Combining Statement of Net Assets—Nonmajor Discretely Presented Component Units
- Combining Statement of Activities—Nonmajor Discretely Presented Component Units
- Balance Sheet—South Carolina First Steps to School Readiness Board of Trustees
- Statement of Revenues, Expenditures, and Changes in Fund Balances—South Carolina First Steps to School Readiness Board of Trustees

The paragraphs below describe the State's nonmajor discretely presented component units:

The Clemson University Foundation is a non-profit, tax-exempt public charity that was established to raise and manage private gifts for the advancement and benefit of Clemson University.

The University of South Carolina Educational Foundation (the Foundation) is an eleemosynary corporation operating for the benefit and support of the University of South Carolina. The Foundation establishes and implements long-range fund raising programs to assist in the expansion and improvement of the educational functions of the University.

The South Carolina Medical Malpractice Liability Joint Underwriting Association (the Association) was established to provide medical malpractice insurance on a self supporting basis. The financial information presented in the accompanying supplemental information is for the Association's fiscal year ended December 31, 2007.

The South Carolina First Steps to School Readiness Board of Trustees (First Steps) was established in 1999 as a non-profit, tax-exempt corporation under Section 501(c)(3) of the Internal Revenue Code. The corporation was created specifically to carry out the objectives of The South Carolina First Steps to School Readiness Act and to lessen the burdens on government by overseeing the South Carolina First Steps to School Readiness initiative for improving early childhood development.

The State presents fund financial statements for First Steps, a nonmajor discretely presented component unit, because that organization does not issue separately audited financial statements of its own. First Steps uses accounting principles that apply to special revenue funds. As such, it uses the current financial resources measurement focus and the modified accrual basis of accounting.

The Children's Trust Fund of South Carolina, Inc. (the Fund) is a non-profit, tax-exempt organization under Section 501(c)(3) of the Internal Revenue Code. The Fund's purpose is to stimulate innovative prevention and treatment programming to meet critical needs of South Carolina's children by awarding grants to private non-profit organizations. The financial information presented in the accompanying supplemental information is for the Fund's fiscal year ended December 31, 2007.

Reconciliation of the Statement of Revenues, Expenditures, and Changes in Fund Balance to the Combining Statement of Activities Nonmajor Discretely Presented Component Units

Net change in fund balance	\$ 1,986
Amounts reported for First Steps in the Combining Statement of Activities are different because:	
Capital outlays are reported as expenditures in the governmental fund. However, in the Combining Statement of Activities the cost of capital assets is allocated over their useful lives as depreciation expense. In the current period this amount is:	
Depreciation expense.....	(2)
Compensated absences expenses reported in the Combining Statement of Activities do not require the use of current financial resources and therefore are not reported as expenditures in the governmental fund.	
Increase in compensated absences payable.....	<u>(25)</u>
Change in net assets.....	<u><u>\$ 1,959</u></u>

Statistical Section *(Unaudited)*

This section presents certain economic and social data and financial trends over a ten-year period.

Statistical Section

This section of the Comprehensive Annual Financial Report provides additional information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the State of South Carolina's overall financial health.

CONTENTS

	<u>Page</u>
Financial Trends	204
<p>These schedules contain trend information to help the reader understand how the State's financial performance and well-being have changed over time.</p>	
Revenue Capacity	218
<p>These schedules contain information to help the reader assess the State's most significant revenue sources, the personal income tax and the retail sales tax.</p>	
Debt Capacity	224
<p>These schedules present information to help the reader assess the affordability of the State's current levels of outstanding debt and the State's ability to issue additional debt in the future.</p>	
Demographic and Economic Information	244
<p>These schedules offer demographic and economic indicators to help the reader understand the environment within which the State's financial activities take place.</p>	
Operating Information	250
<p>These schedules contain service and capital asset data to help the reader understand how the information in the State's financial report relates to the services the State provides and the activities it performs.</p>	

SOURCES

Unless otherwise noted, the information in these schedules is derived from the State's Comprehensive Annual Financial Report for the relevant fiscal year.

Computation of Legal Debt Margin

June 30, 2008

(Expressed in Thousands)

Section 59-107-90 of the South Carolina Code of Laws states that the maximum amount of annual debt service on institution bonds for each institution shall not exceed ninety percent of the sums received from tuition fees for the preceding fiscal year.

Section 57-11-240 of the South Carolina Code of Laws and Article X, Section 13 of the South Carolina Constitution state that highway bonds may be issued if such bonds are additionally secured by a pledge of revenues designated by the General Assembly for State highway purposes from taxes or licenses imposed for using the public highways of the State. The maximum annual debt service on all highway bonds shall not exceed fifteen percent of the proceeds received from the designated revenues for the fiscal year next preceding.

Section 11-51-50 of the South Carolina Code of Laws states that the issuance of general obligation bonds of the State must be limited so that the maximum annual debt service on all general obligation bonds of the State (excluding highway bonds, State institution bonds, tax anticipation notes, and bond anticipation notes) may not exceed six percent of the general revenues of the State for the fiscal year next preceding (excluding revenues which are authorized to be pledged for state highway bonds and state institution bonds).

Section 11-41-60 states that the maximum annual debt service on economic development bonds may not exceed one-half of one percent of the general revenues of the State for the fiscal year next preceding (excluding revenues which are authorized to be pledged for state highway bonds and state institution bonds).

Section 11-51-50 also states that the maximum annual debt service on research university infrastructure bonds may not exceed one-half of one percent of the general revenues of the State for the fiscal year next preceding (excluding revenues which are authorized to be pledged for state highway bonds and state institution bonds).

^a South Carolina State University exceeded its legal debt service limit on its State institution bonds by approximately \$530 thousand at June 20, 2008. The University will adjust tuition fees in subsequent years to cover the debt requirement.

^b As of June 30, 2008, the maximum annual debt service will occur in the fiscal year ending June 30, 2009.

^c For the fiscal year ended June 30, 2008, there were no net Budgetary General Fund revenues pledged for State institution bonds and anticipation notes.

^d As of June 30, 2008, the maximum annual debt service will occur in the fiscal year ending June 30, 2009.
